SOUTHEAST ALASKA SALMON INTERACTIVE MAP

The Alaska Department of Fish and Game (ADF&G) revised commercial salmon districts, sections, and closed waters to provide more accurate descriptions by defining all points with precise latitude and longitudes. The ADF&G developed an interactive map where districts, sections, closed waters as well as other features used in the management of commercial salmon fisheries can be viewed.

This map is available on ADF&G's website at:

<http://www.adfg.alaska.gov/index.cfm?adfg=commercialbyareasoutheast.salmon#maps>.

Geographic information system (GIS) data used to make the map is available for download at:

https://www.adfg.alaska.gov/index.cfm?adfg=maps.commercial_fishing_gis.

The map can be used remotely on mobile devices by downloading the *ArcGIS Field Maps* app by ESRI and loading the *ADF&G SE AK Salmon Mobile – SEAK* map. You can find this map by using the search feature within the “Maps” page of the app and typing in “ADF&G”.

The map will be updated with additional fisheries information when available including hatchery terminal harvest area boundaries, statistical areas, and closed waters to the commercial troll fishery. This map is still considered to be in the developmental stage and any feedback would be appreciated.
