Prince William Sound Salmon Fishery Announcement #12

COPPER RIVER DISTRICT: The Copper River District will open at 7:00 am on Thursday, June 22 for a 24-hour commercial drift gillnet fishing period.

The grass bank marker line is defined in 5 AAC 24.350(1)(A) with the exception of this year's extension of the closure line across Little Softuk (**see bold font below**). This closure line is defined with the following points:

| <i>Point</i> | <i>Latitude</i> | <i>Longitude</i> |
|-----------------------|----------------------|-----------------------|
| Point Whitshed South | 60° 26.49' N. | 145° 52.86' W. |
| Alaganik Slough North | 60° 24.65' N. | 145° 36.70' W. |
| Pete Dahl East | 60° 20.44' N. | 145° 29.14' W. |
| West Kokenhenik | 60° 14.88' N. | 145° 10.01' W. |
| East "East Side" | 60° 14.83' N. | 145° 03.36' W. |
| Coffee Creek East | 60° 14.19' N. | 144° 58.01' W. |
| Charlie Mohr North | 60° 15.15' N. | 144° 56.43' W. |
| Martin River North | 60° 15.29' N. | 144° 52.52' W. |
| Strawberry Reef | 60° 13.93' N. | 144° 50.66' W. |
| Little Softuk | 60° 13.16' N. | 144° 41.38' W. |

Waters north of this line, within sloughs, and in Boswell Bay within the bay (5 AAC 24.350 (1)(A)) are closed to commercial and subsistence salmon fishing during all periods.

During the commercial fishing season, subsistence harvest may occur in the Copper River District concurrent in time and area with commercial fishing periods until the Copper River District is closed at the end of the season. Additionally, waters of the Copper River District, excluding the expanded Chinook salmon inside closure area, will open to subsistence fishing from 6:00 am to 10:00 pm on all Saturdays from May 20 through October 28. Prince William Sound Management Area salmon subsistence permits may be obtained through any ADF&G office or online (<https://www.adfg.alaska.gov/Store/>). In Cordova, permits will be available during normal business hours Monday through Friday from 8:00 a.m. to 12:00 p.m. and 1:00 p.m. to 5:00 p.m. To assist with inseason harvest tracking, permit holders are encouraged to call the Cordova office at 907-424-3212 or report online (<https://www.adfg.alaska.gov/Harvest/>) to provide preliminary harvest reports.

Cumulative sonar count through 6/20 is 300,415 fish whereas 379,866 fish are projected by this date. The 0600 count for 6/21 is 4,215 fish. The cumulative Copper River District harvest to date is 8,630 Chinook and 445,000 sockeye salmon.

BERING RIVER DISTRICT: The Bering River District will open to commercial salmon fishing, west of a longitude line at **144° 33.60' W.**, for a **24-hour** period starting at 7:00 a.m. on Thursday, June 22. **Bering River**

sockeye salmon run timing overlap has increased and open area within the district will remain reduced until escapement indices support additional fishing area.

COGHILL DISTRICT: The Coghill District, excluding the Granite Bay and Esther Subdistricts, and WNH THA and SHA, will open to commercial drift gillnet harvest for a **48-hour** fishing period starting at 8:00 am on Thursday, June 22. Waters of Port Wells and College Fiord, north of 60° 55.81' N., and east of a line from Pakenham Point (61° 00.45' N., 148° 04.85' W.) to 60° 55.81' N., 148° 10.92' W., will open to commercial drift gillnet harvest for a 84-hour period starting at 8:00 am on Thursday, June 22. Preliminary harvest estimates from the 84-hour period that started on Thursday, June 15 were 33,300 chum and 3,930 sockeye salmon with 245 deliveries reported.

PWSAC recommends keeping the Granite Bay and Esther Subdistricts closed for maximum run-entry into the WNH SHA to achieve cost recovery revenue goals. PWSAC is approximately 52% complete on the 2023 chum revenue goal, and cost recovery fishing continues today and as run entry and hatchery escapement warrants. Of the 228,000 broodstock goal, 0% have been collected to date.

ESHAMY DISTRICT: The Eshamy District will remain closed. The next commercial opening of the Eshamy District is anticipated to start on Monday, June 26 with time and area announced on Saturday, June 24. Preliminary harvest estimates from the 24-hour period that started on Monday, June 19 were 11,800 chum and 101,000 sockeye salmon with 348 deliveries reported.

PWSAC recommends keeping the Eshamy District closed. Run entry into MBH has been slow. PWSAC needs to see a substantial increase in fish available for cost recovery to accomplish the revenue goal before other PWS fisheries complicate tender and catcher boat availability. PWSAC is 6% percent complete on the 2023 sockeye revenue goal. Fishing continues as run entry and weekend gear conflict allow. Of the 8,940 broodstock goal, 0% have been collected to date.

MONTAGUE DISTRICT: The Port Chalmers Subdistrict will open to drift gillnet fishing for an 84-hour period starting at 8:00 am on Thursday, June 22 with an additional 60-hour period beginning at 8:00 am on Monday, June 26. A regular schedule of two fishing periods per week is anticipated to remain in effect until further notice. The western boundary of the Port Chalmers Subdistrict is defined by lines from 60°20.00'N., 147°26.59'W. to 60°14.75'N., 147°35.35'W. to 60°02.50'N., 147°44.41'W. **Regulatory closed waters and anadromous stream closures within the Port Chalmers Subdistrict will not be in effect until further notice.** Preliminary harvest estimates from the 84-hour period that started on Thursday, June 15 were 145,000 chum, 1,490 pink, and 1,410 sockeye salmon with 442 deliveries reported.

UNAKWIK DISTRICT: The Unakwik District will open to commercial drift gillnet and purse seine harvest for a 36-hour period starting at 8:00 am on Thursday, June 22. Preliminary harvest estimates from the 36-hour period that started on Monday, June 19 was 1,360 sockeye salmon with 4 deliveries reported.

SOUTHWESTERN DISTRICT: The AFK Hatchery THA and SHA will open to purse seine fishing for a 24-hour period starting at 8:00 am on Thursday, June 22 and for an additional 24-hour period on Saturday, June 24. Preliminary harvest estimates for the period ending today, June 21 are not yet available but based on historical harvest estimates this timing coincides with peak passage of Main Bay sockeye salmon through the Southwestern District. To minimize sockeye salmon interception and be consistent with gillnet management in the Eshamy District, a reduction in fishing time is warranted. **Anadromous stream closures within the AFK Hatchery THA and SHA will not be in effect until further notice.** Preliminary harvest estimates from the period ending on Sunday, June 18 were 12,700 chum and 1,550 sockeye salmon with 24 deliveries reported.

Copies of the updated regulation booklet, *2022-2024 Commercial Salmon Fishing Regulations for Prince William Sound*, are available in the Cordova ADFG office.

ALL buyers purchasing fish in the PWS Management Area are required to complete a Processor Registration Form. Contact the Cordova office for any questions regarding registration.

The next scheduled salmon fisheries announcement is anticipated to be at 2:00 pm Saturday, June 24.

Announcement recordings are available for gillnet fisheries at 907-424-7535 and seine fisheries at 907-424-7345. In addition, announcement recordings are available in Anchorage at 907-267-2843.

Additionally, announcements, inseason harvest data, and escapement data are available at the following web address: <http://www.adfg.alaska.gov/index.cfm?adfg=commercialbyareapws.main> (Prince William Sound and Copper River homepage).

Unless otherwise specified, all openings are clock openings based on Alaska Daylight Time, which is based on Coordinated Universal Time and may be obtained by calling 303-499-7111.

The department encourages commercial permit holders to renew their licenses early and to check their CFEC vessel registration stickers to make sure they are current.

The department also encourages permit holders to report observed violations to Wildlife Safeguard at 800-478-3377. Reports are anonymous and cash rewards may be paid for successful prosecution of violations.

PWS commercial fishers are reminded that area fisheries often necessitate fishing in close proximity to marine mammals. Under the Marine Mammals Protection Act (MMPA), the PWS drift gillnet fishery is classified as a Category II fishery. Participants in Category I and II fisheries must be registered in the Marine Mammal Avoidance Program (MMAP) to be authorized for lawful incidental, but not intentional, marine mammal takes during fishing. However, this authorization explicitly does not exempt holders of commercial fishing permits from the MMPA prohibition on takes of marine mammals listed as endangered or threatened under the Endangered Species Act. As a participant in the PWS drift gillnet fishery, you are automatically registered in the Marine Mammal Authorization Program (MMAP) by the National Marine Fisheries Service (NMFS). As a participant in a Category II fishery, you must:

- Maintain an MMAP Authorization Certificate, or a photocopy, on board the vessel while engaging in any of the fisheries identified on the reverse side of the certificate. For non-vessel or set net fisheries, the enclosed Certificate, or a photocopy, must be in the possession of the permit holder during fishing operations. This Certificate, in combination with a current, valid state or Federal fishing permit, will serve as your authorization to incidentally take non-endangered or non-threatened marine mammals during commercial fishing operations.
- Report all injuries and mortalities of marine mammals within 48 hours of returning from the trip during which these takes occurred using the MMAP Mortality/Injury Reporting Form (<https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-authorization-program>).
- If so requested, take an observer aboard your vessel.

Purse seine and set gillnet gear are classified as a Category III fisheries under the MMPA. Category III fishery participants are automatically exempted from the incidental take prohibition in the MMPA. Therefore, you do not need to maintain the MMAP certificate aboard your vessel but must report any incidental takes of marine

mammals within 48 hours of the incident or your return to port. Such reports must be made on the Marine Mammals Authorization Program Mortality/Injury Reporting Form.

Because some marine mammals are also listed under the Endangered Species Act, incidental takes are also regulated under that act and are not authorized. All MMPA category fisheries are liable for incidentally taking ESA listed species.

Please reference <https://www.fisheries.noaa.gov/alaska/endangered-species-conservation/endangered-threatened-and-candidate-species-alaska> for a list of marine mammals currently listed under the ESA (you should periodically check with the National Marine Fisheries Service for any changes in listed species).

Under the ESA, “take” means to “harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.” (16U.S.C. 1532(19)); and “harass” means an “intentional or negligent act or omission which creates the likelihood of injury to the wildlife by annoying it to such an extent as to significantly disrupt normal behavioral patterns which include, but are not limited to, breeding, feeding, or sheltering.” (50 C.F.R. 17.3).

To reduce the possibility of incidentally taking an ESA listed species and its associated liability ADF&G recommends that:

- Fishermen participating in area fisheries remain vigilant in monitoring gear when marine mammals may be present.
- Fishermen use avoidance measures (e.g., not fishing or relocating fishing activities when marine mammals are present or likely to be present) to minimize interactions with marine mammals.
- Avoid fishing in areas where marine mammals are likely to be present at night or when visibility or weather conditions make it difficult to spot marine mammals.

For further questions concerning marine mammal regulations call NOAA at 907-586-7221.
