To date, only 337 sockeye salmon have been counted at the Hugh Smith Lake weir. The current weir count projects to a total escapement of approximately 533 sockeye salmon, well below the optimal escapement goal range of 8,000–18,000 sockeye salmon. The department will continue to monitor the sockeye salmon escapement as the season progresses and may take management actions in District 1 through statistical week 33.

Chinook Salmon Landing Restrictions: All Chinook salmon harvested in the Deep Inlet THA must be retained and may be sold. For all other fishing areas, Chinook salmon 28 inches or greater in length may NOT be retained and Chinook salmon less than 28 inches may be retained but not sold.

When under nonretention of Chinook salmon 28 inches or larger, purse seine fishermen are encouraged to quickly release Chinook salmon in a manner that minimizes mortality. If Chinook salmon greater than 28 inches (large) are retained, the fisherman is in violation and may be issued a citation. Retained large Chinook salmon will be donated, and the fisherman may be subject to the cost associated with processing the fish for donation. On the fish ticket, the number and weight of the fish must be recorded and the disposition code "86-Donated" must be used.

Fishermen, tenders, and processors are reminded that all salmon, including steelhead, commercially harvested but retained for personal use and not sold, must be reported on fish tickets at the time of delivery.

The next seine announcement will be issued on **Monday, August 14, 2023**.

The Emergency Order corresponding with this announcement is EO 1S6323.
