UPPER COOK INLET COMMERCIAL FISHING ANNOUNCEMENT No. 42
EMERGENCY ORDER NUMBER 2-F-H-41-23

Upper Cook Inlet Commercial Fishing Announcement No. 42 closes set gillnetting in all waters of the Northern District of Upper Cook Inlet on Monday, August 21, 2023, from 7:00 a.m. until 7:00 p.m.

The Deshka River coho salmon sustainable escapement goal (SEG) is 10,200–24,100 fish. Through August 18, approximately 74% of the run has historically passed upstream of the weir. The cumulative weir count through August 18, was 1,466 coho salmon and is currently projecting the escapement goal will not be achieved.

The Little Susitna River coho salmon SEG is 9,200–17,700 fish. Through August 18, approximately 62% of the run has historically passed upstream of the weir. The cumulative weir count through August 18 was 3,528 coho salmon and is currently projecting the escapement goal will not be achieved.

The above restriction is warranted to help increase coho salmon escapements into Northern Cook Inlet streams.
