Regulatory Summary

The use of dive gear 14 days prior to a commercial fishery, 14 days after participating in a commercial opening, and between weekly open periods for miscellaneous shellfish is prohibited. A person who uses dive gear to fish in a commercial red sea urchin fishery, commercial geoduck fishery, or mariculture site may fish in the sea cucumber fishery within the 14-day period (5 AAC 38.147).

Each diver participating in the sea cucumber fishery must have a current Southeast Alaska Sea Cucumber Limited Entry Permit which can be obtained from the Commercial Fisheries Entry Commission (CFEC). All vessels involved in the sea cucumber fishery need to have a current CFEC vessel license and a Miscellaneous Shellfish vessel registration form issued by ADF&G. Vessel registrations can be obtained at any Southeast Alaska ADF&G office. All crew members are required to have a valid Commercial Crewmembers License or a limited entry card from another fishery.

In order to provide a refuge for sea cucumbers in deeper waters, use of mixed gases or saturation diving is prohibited. Nitrox gas can be used for diving provided that the oxygen concentration is less than 40%. Sea cucumbers may only be handpicked and any means other than individually collecting sea cucumbers by hand and placing them in bags is prohibited. Sea cucumbers may only be harvested by diving with the aid of: SCUBA; tethered, umbilical surface supplied systems; or a snorkel.

No more than three divers licensed to fish sea cucumbers (hereafter called “permit holders”) may be on board a vessel registered to fish sea cucumbers from 24 hours before, during, and for 24 hours after a fishing period or at any time commercially harvested sea cucumbers are on board. Only two permit holders can make landings from any registered sea cucumber vessel during any fishing period.

No permit holder may land, or have on board, more than 2,000 pounds of eviscerated sea cucumbers during any fishing period established by the department and only one species of miscellaneous shellfish is permitted on board a vessel at a time. Only vessels registered as tenders may possess more than 4,000 pounds of eviscerated sea cucumbers during an established open fishing period.

Commercial sea cucumber fishermen are also advised that all landings to processors, catcher-processors, or tenders must be recorded on fish tickets with the number of minutes of dive time included. A permit holder who is operating their vessel as a tender for sea cucumbers must complete fish tickets as required by 5 AAC 39.130. A fish ticket must be made out for every landing and all fish tickets must be submitted to ADF&G within seven days of landing.

The corresponding Emergency Order for the area descriptions in this announcement is EO 1M2024, and the Emergency Order for the initial fishery opening is EO 1M2124.
