Record harvest under statistical code 244-57 if you fish in the Expanded Corridor and AP section. Record harvest under statistical code 244-70 if you fish primarily in the Area 1 triangle.

As a reminder, per the *Kenai River Late-run King Salmon Stock of Concern Management plan*, drift gillnet fishing is prohibited within 2-miles of the Kenai Peninsula shoreline.

Through July 13, the cumulative sockeye salmon escapement estimate for the Kasilof River was 623,450 fish and the current mean run timing projection of escapement is approximately 1.4 million sockeye salmon which exceeds the biological escapement goal of 140,000–320,000 sockeye salmon. Through July 13, the cumulative sockeye salmon escapement estimate for the Kenai River was 290,454 fish and the current mean run timing projection of escapement is approximately 2.6 million sockeye salmon which exceeds the inriver run goal of 1.1-1.4 million sockeye salmon. Fishing in the above-described waters is warranted to target sockeye salmon returning to the Kasilof and Kenai rivers.

Fishermen and processors are reminded of the legal requirement to report all commercially harvested salmon on a fish ticket, whether sold or kept for personal use, using the correct statistical fishing area or areas (5 AAC 39.130(c)(7)).

Please check with the appropriate federal agency regarding fishing in the Exclusive Economic Zone (EEZ).
