SOUTHEAST ALASKA COMMERCIAL SHRIMP BEAM TRAWL FISHERY

The guideline harvest levels (GHL) for the third fishing period beginning September 1, 2026, are 400,000 lb in District 6 and 250,000 lb in District 8, in accordance with the preseason advisory announcement that was released on April 28, 2026.

As described in the preseason announcement, this announcement is issued approximately two weeks after the start of a fishing period to announce any GHL rollover from the previous period. This delay is due to the time it takes to accurately reflect harvest from the previous period.

There has been no reported harvest for the second fishing period (July 1–August 31) in District 6. The available rollover poundage will bring the third period GHL to the upper end of the guideline harvest range (GHR) at 400,000 lb. Spot and coonstripe shrimp bycatch harvest to date in District 6 is confidential.

Estimated harvest for the second fishing period (July 1–August 31) in District 8 was confidential. Though not reportable due to fewer than three permits fished, this harvest was below the 250,000 lb GHL. The available rollover poundage will bring the third period GHL to the upper end of the GHR at 250,000 lb. Spot and coonstripe shrimp bycatch harvest to date in District 8 is confidential.
