### Prince William Sound Salmon Fishery News Release #69

**COPPER RIVER DISTRICT:** The Copper River District will open at 7:00 am Thursday, September 11 for a 24-hour period. For the week ending September 13, the actual Copper River delta aerial survey count was 34,475 coho salmon versus an anticipated range of 21,447–44,904 fish. An aerial survey of the Copper River Delta is anticipated to be flown next week. The harvest estimate from the period that closed Tuesday, September 9 was 34,300 coho salmon with 258 deliveries reported.

During the commercial fishing season subsistence harvest may occur in the Copper River District concurrent with commercial periods until the Copper River District is closed at the end of the season. Subsistence users may obtain subsistence permits during regular business hours. The Cordova ADF&G office is open to the public Monday– Friday, 8:00 am–12:00 pm and 1:00 pm– 5:00 pm. **Subsistence permits are not available outside of regular office hours.**

**BERING RIVER DISTRICT:** The Bering River District will open at 7:00 am Thursday, September 11 for a 24-hour period. For the week ending September 13, the actual Bering River District aerial survey count was 19,325 versus an anticipated range of 8,803–22,345 coho salmon. An aerial survey of the Bering River district is anticipated to be flown next week. The harvest estimate from the period that closed Tuesday, September 9 was 21,600 coho salmon with 145 deliveries reported.

**COGHILL DISTRICT:** The Coghill District, **excluding all waters of the WNH SHA**, will open to commercial **drift gillnet** fishing for daily 12-hour fishing periods, from 8:00 am until 8:00 pm, on Thursday, September 11 through Saturday, September 13. Harvest from the September 8 and September 9 fishing periods totaled 9,000 coho and 1,000 pink salmon with 78 deliveries reported.

**SEINE FISHERIES:** PWSAC reports pink salmon escapement estimates at PWSAC facilities on September 10 as follows: 20,000–38,000 pink salmon in the **AFK HEEZ**; 105,000–140,000 in the **CCH SHA**; and, 173,000–210,000 in the **WNH HEEZ**. The WNH pink salmon eggtake goal was reached on Saturday, August 30. The AFK pink salmon eggtake goal was reached on Friday, September 5. Through September 9, PWSAC reports eggtake progress of 88% towards the final goal at CCH.

The 2014 coho salmon return to VFDA appears to be extremely weak. VFDA conducted a survey of Corbin Creek this week to satisfy permitting requirements necessary for conducting remote egg takes to meet the SGH egg take goal of 2 million green eggs. VFDA reports broodstock escapement at SGH of 900 coho salmon on September 10. The minimum broodstock requirement at SGH is 1,000 coho salmon. Port Valdez will remain closed to commercial fishing until further notice.

No purse seine harvest has been reported in PWS since August 28.

**EASTERN DISTRICT:** Waters of the Eastern District south of Rocky Point will open to commercial purse seine fishing for daily 12-hour fishing periods, from 8:00 am until 8:00 pm, on Thursday, September 11 through Saturday, September 13.

**MONTAGUE DISTRICT:** Waters of the Montague District will open to commercial purse seine fishing for daily 12-hour fishing periods, from 8:00 am until 8:00 pm, on Thursday, September 11 through Saturday, September 13.

**NORTHERN DISTRICT:** Waters of the Northern District, **excluding waters of the Cannery Creek Subdistrict north of 60°58.00' N., and excluding all waters of the CCH THA and CCH SHA**, will open to commercial purse seine fishing

for daily 12-hour fishing periods, from 8:00 am until 8:00 pm, on Thursday, September 11 through Saturday, September 13.

**NORTHWESTERN DISTRICT:** Waters of the Northwestern District will open to commercial purse seine fishing for daily 12-hour fishing periods, from 8:00 am until 8:00 pm, on Thursday, September 11 through Saturday, September 13.

**SOUTHEASTERN DISTRICT:** Waters of the Southeastern District will open to commercial purse seine fishing for daily 12-hour fishing periods, from 8:00 am until 8:00 pm, on Thursday, September 11 through Saturday, September 13.

**SOUTHWESTERN DISTRICT:** The Southwestern District will open to commercial purse seine fishing for daily 12-hour fishing periods, from 8:00 am until 8:00 pm, on Thursday, September 11 through Saturday, September 13. **Waters of the AFK SHA west and south of a line from 60° 03.100' N. lat., 148° 04.023' W. long. to 60° 03.042' N. lat., 148° 03.969' W. long. will be closed to commercial fishing during these periods to provide protection for hatchery equipment.**

**The next scheduled salmon fisheries announcement is anticipated to be published by 2:00 pm Saturday, September 13.**

Permit holders are advised that unscheduled announcements based on current escapement data may occur at any time inseason either establishing an additional period or extending an open period.

Announcement recordings are available for **gillnet fisheries at 907-424-7535 and seine fisheries at 907-424-7345. In addition, announcement recordings are available in Anchorage at 267-2843.**

Additionally, announcements, inseason harvest data, and escapement data are available at the following web addresses:

<http://www.adfg.alaska.gov/index.cfm?adfg=commercialbyareacopperriver.main> (Copper River homepage) or  
<http://www.adfg.alaska.gov/index.cfm?adfg=commercialbyareapws.main> (Prince William Sound homepage).

Unless otherwise specified, all openings are clock openings based on Alaska Daylight Time, which is based on Coordinated Universal Time and may be obtained by calling 303-499-7111.

The department encourages commercial permit holders to renew their licenses early and to check their CFEC vessel registration stickers to make sure that they are current. The department also encourages permit holders to report observed violations to Wildlife Safeguard at 800-478-3377. Reports are anonymous and cash rewards may be paid for successful prosecution of violations.

PWS commercial fishers are reminded that area fisheries often necessitate fishing in close proximity to marine mammals. Under the Marine Mammals Protection Act (MMPA), the PWS drift gillnet fishery is classified as a Category II fishery. Participants in Category I and II fisheries must be registered in the Marine Mammal Avoidance Program (MMAP) to be authorized for lawful incidental, but not intentional, marine mammal takes during fishing. However, this authorization explicitly does **not** exempt holders of commercial fishing permits from the MMPA prohibition on takes of marine mammals listed as endangered or threatened under the Endangered Species Act. As a participant in the PWS drift gillnet fishery you are automatically registered in the Marine Mammal Authorization Program (MMAP) by the National Marine Fisheries Service (NMFS). As a participant in a Category II fishery, you must:

- Maintain an MMAP Authorization Certificate, or a photocopy, on board the vessel while engaging in any of the fisheries identified on the reverse side of the certificate. For non-vessel or set net fisheries, the enclosed Certificate, or a photocopy, must be in the possession of the permit holder during fishing operations. This Certificate, in combination with a current, valid state or Federal fishing permit, will serve as your authorization to incidentally take non-endangered or non-threatened marine mammals in the course of commercial fishing operations.
- Report all injuries and mortalities of marine mammals within 48 hours of returning from the trip during which these takes occurred using the MMAP Mortality/Injury Reporting Form (visit [http://www.nmfs.noaa.gov/pr/pdfs/interactions/mmap\\_reporting\\_form.pdf](http://www.nmfs.noaa.gov/pr/pdfs/interactions/mmap_reporting_form.pdf) for a copy).
- If so requested, take an observer aboard your vessel.

Purse seine and set gillnet gear are classified as a category III fisheries under the MMPA. Category III fishery participants are automatically exempted from the incidental take prohibition in the MMPA. Therefore, you do not need to maintain the MMAP certificate aboard your vessel, but must report any incidental takes of marine mammals within 48 hours of the incident or your return to port. Such reports must be made on the Marine Mammals Authorization Program Mortality/Injury Reporting Form.

Because some marine mammals are also listed under the Endangered Species Act, incidental takes are also regulated under that act and are not authorized. **All** MMPA category fisheries are liable for incidentally taking ESA listed species.

Please reference [http://www.nmfs.noaa.gov/pr/pdfs/esa\\_factsheet.pdf](http://www.nmfs.noaa.gov/pr/pdfs/esa_factsheet.pdf) for a list of marine mammals currently listed under the ESA (you should periodically check with the National Marine Fisheries Service for any changes in listed species).

Under the ESA, "take" means to "harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct." "16U.S.C. 1532(19); and "harass" means an "intentional or negligent act or omission which creates the likelihood of injury to the wildlife by annoying it to such an extent as to significantly disrupt normal behavioral patterns which include, but are not limited to, breeding, feeding, or sheltering." (50 C.F.R. 17.3).

To reduce the possibility of incidentally taking an ESA listed species and its associated liability ADF&G recommends that:

- Fishermen participating in area fisheries remain vigilant in monitoring gear when marine mammals may be present.
- Fishermen use avoidance measures (e.g., not fishing or relocating fishing activities when marine mammals are present or likely to be present) to minimize interactions with marine mammals.
- Avoid fishing in areas where marine mammals are likely to be present at night or when visibility or weather conditions make it difficult to spot marine mammals.

For further questions concerning marine mammal regulations call NMFS at 907-271-5006.
