Prince William Sound Salmon Fishery News Release #9

MONTAGUE DISTRICT: Due to increasing harvest of salmon destined for other areas of Prince William Sound within the Port Chalmers Subdistrict, an area adjustment is necessary to focus efforts on enhanced chum salmon returning to Port Chalmers.

Effective 12:01 AM on Tuesday, June 13 Port Chalmers Subdistrict will only be open east of Green Island, north of a line from 60° 9.52'N., 147° 22.38'W. to 60° 13.58'N., 147° 29.29'W. and south of a line from 60° 18.22'N., 147° 20.46'W to 60° 20.00'N., 147° 13.25'W.

As previously announced, the Port Chalmers Subdistrict opened to purse seine fishing for 48 hours at 8:00 am on Monday, June 12, with an additional 48-hour period beginning at 8:00 am on Thursday, June 15. Shorter duration fishing periods and area adjustments are necessary for timely evaluation of stock composition and harvest rates. A regular schedule of two fishing periods per week is anticipated to remain in effect until further notice. **Regulatory closed waters and anadromous stream closures within the Port Chalmers Subdistrict will not be in effect until further notice.** Preliminary harvest estimates from the 84-hour period that started on Thursday, June 8 are 87,000 chum with 63 deliveries reported.

Copies of the updated regulation booklet, 2015-2018 Commercial Salmon Fishing Regulations for Prince William Sound, can be found under the 'Regulations' heading at the following web address:
<http://www.adfg.alaska.gov/index.cfm?adfg=fishregulations.commercial>

The next scheduled salmon fisheries announcement is anticipated to be at 2:00 pm Wednesday, June 14.

Announcement recordings are available for **gillnet fisheries at 907-424-7535 and seine fisheries at 907-424-7345. In addition, announcement recordings are available in Anchorage at 267-2843.** Additionally, announcements, inseason harvest data, and escapement data are available at the following web address:
<http://www.adfg.alaska.gov/index.cfm?adfg=commercialbyareapws.main> (Prince William Sound and Copper River homepage).

Unless otherwise specified, all openings are clock openings based on Alaska Daylight Time, which is based on Coordinated Universal Time and may be obtained by calling 303-499-7111.

The department encourages commercial permit holders to renew their licenses early and to check their CFEC vessel registration stickers to make sure they are current.

The department also encourages permit holders to report observed violations to Wildlife Safeguard at 800-478-3377. Reports are anonymous and cash rewards may be paid for successful prosecution of violations.

PWS commercial fishers are reminded that area fisheries often necessitate fishing in close proximity to marine mammals. Under the Marine Mammals Protection Act (MMPA), the PWS drift gillnet fishery is classified as a Category II fishery. Participants in Category I and II fisheries must be registered in the Marine Mammal Avoidance Program (MMAP) to be authorized for lawful incidental, but not intentional, marine mammal takes during fishing. However, this authorization explicitly does **not** exempt holders of commercial fishing permits from the MMPA prohibition on takes of marine mammals listed as endangered or threatened under the Endangered Species Act. As a participant in the PWS drift gillnet fishery, you are automatically registered in the Marine Mammal Authorization Program (MMAP) by the National Marine Fisheries Service (NMFS). As a participant in a Category II fishery, you must:

- Maintain an MMAP Authorization Certificate, or a photocopy, on board the vessel while engaging in any of the fisheries identified on the reverse side of the certificate. For non-vessel or set net fisheries, the enclosed Certificate, or a photocopy, must be in the possession of the permit holder during fishing operations. This Certificate, in combination with a current, valid state or Federal fishing permit, will serve as your authorization to incidentally take non-endangered or non-threatened marine mammals in the course of commercial fishing operations.
- Report all injuries and mortalities of marine mammals within 48 hours of returning from the trip during which these takes occurred using the MMAP Mortality/Injury Reporting Form (visit http://www.nmfs.noaa.gov/pr/pdfs/interactions/mmap_reporting_form.pdf for a copy).
- If so requested, take an observer aboard your vessel.

Purse seine and set gillnet gear are classified as a Category III fisheries under the MMPA. Category III fishery participants are automatically exempted from the incidental take prohibition in the MMPA. Therefore, you do not need to maintain the MMAP certificate aboard your vessel, but must report any incidental takes of marine mammals within 48 hours of the incident or your return to port. Such reports must be made on the Marine Mammals Authorization Program Mortality/Injury Reporting Form.

Because some marine mammals are also listed under the Endangered Species Act, incidental takes are also regulated under that act and are not authorized. All MMPA category fisheries are liable for incidentally taking ESA listed species.

Please reference http://www.nmfs.noaa.gov/pr/pdfs/esa_factsheet.pdf for a list of marine mammals currently listed under the ESA (you should periodically check with the National Marine Fisheries Service for any changes in listed species).

Under the ESA, "take" means to "harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct." (16U.S.C. 1532(19)); and "harass" means an "intentional or negligent act or omission which creates the likelihood of injury to the wildlife by annoying it to such an extent as to significantly disrupt normal behavioral patterns which include, but are not limited to, breeding, feeding, or sheltering." (50 C.F.R. 17.3).

To reduce the possibility of incidentally taking an ESA listed species and its associated liability ADF&G recommends that:

- Fishermen participating in area fisheries remain vigilant in monitoring gear when marine mammals may be present.
- Fishermen use avoidance measures (e.g., not fishing or relocating fishing activities when marine mammals are present or likely to be present) to minimize interactions with marine mammals.
- Avoid fishing in areas where marine mammals are likely to be present at night or when visibility or weather conditions make it difficult to spot marine mammals.

For further questions concerning marine mammal regulations call NMFS at 907-271-5006.

Port Chalmers Subdistrict June 13, 2017 area adjustment.
