#### **Kuskokwim River Salmon Fishery Announcement #2** **Kuskokwim River Revised Subsistence Fishery Outlook**

This is an announcement from the Alaska Department of Fish and Game (ADF&G) for salmon fishermen in the Kuskokwim River Drainage.

#### **REVISED Chinook Salmon Forecast**

The 2018 Kuskokwim River Chinook salmon forecast is for a range of 116,000–150,000 fish. The drainage-wide Chinook salmon escapement goal is 65,000–120,000. If the run comes back as projected, the drainagewide escapement goal is expected to be achieved and may be able to support a limited subsistence harvest. The 2018 season will be managed in accordance with the *Kuskokwim River Salmon Management Plan* (5 AAC 07.365). It is the department’s intent to take a cautionary approach during the early part of the season, with fishing opportunities being based on inseason run assessment and input from the Kuskokwim River Salmon Management Working Group.
