#### **SOUTHEAST ALASKA PERSONAL USE KING CRAB FISHERY ANNOUNCEMENT**

Petersburg...The Alaska Department of Fish and Game announced the following updated information regarding the 2018/2019 Southeast Alaska personal use red king crab fishery outside of Section 11-A and the golden king crab personal use fishery:

- Pybus Bay, Seymour Canal, and Excursion Inlet will remain open to red and blue king crab personal use fishing.
- Peril Strait and Lynn Sisters will remain closed to red and blue king crab personal use fishing.
- **Gambier Bay will close to red and blue king crab personal use fishing on September 16, 2018, at 11:59 p.m.**
- East Central area will remain closed to golden king crab personal use fishing.
- **Beginning at 12:01 a.m., September 17, 2018, all areas open to personal use king crab fishing will have a reduced daily bag and possession limit of one red or blue king crab as prescribed in regulation when the regionwide harvestable biomass of mature red and blue king crab is below 200,000 pounds [5 AAC 77.664(b)].**

#### 2018 Survey Information and Fishery Recommendations

All red and blue king crab fisheries are closed in all areas of Southeast Alaska by regulation from April 1 through June 30 each year to protect crab during the molting and mating season (personal use fisheries for golden king crab are closed from June 16 to June 30). From July 1 through March 31, open fishing periods for the personal use red and blue king crab fisheries may be adjusted by emergency order. The department conducts annual red king crab surveys in seven areas throughout Southeast Alaska. Those areas include: 1) the Juneau Area in Section 11-A, 2) Lynn Sisters, 3) Excursion Inlet, 4) Pybus Bay, 5) Gambier Bay, 6) Seymour Canal, and 7) Peril Strait. The surveys generally begin in mid-late June and conclude by the end of July or early August. Data from the most recent surveys are used to manage commercial and personal use red king crab fisheries. Because the department has detailed information for each of the surveyed areas, it is possible to manage those areas as distinct fishery units. The remaining waters of Southeast Alaska outside the areas surveyed are referred to as “non-surveyed” areas. In general, management decisions in the non-surveyed areas are made based on trends observed in the surveyed areas.

Because the 2018 red king crab stock assessment survey was not finished on July 1, 2018, decisions regarding the July 1, 2018 opening of the personal use red and blue king crab fisheries were based on

2017 red king crab stock assessment survey results. Currently the non-surveyed areas are open to red and blue king crab personal use fishing for a daily bag and possession limit of three red and blue king crab in combination. Now that the 2018 survey is complete and the department has finalized the analysis of 2018 red king crab stock assessment survey results, new information is available to manage the fisheries. Some highlights of the recent survey include:

- Regionwide the harvestable biomass of mature red and blue king crab is below 200,000 lbs.
- Stock health in Peril Strait remains poor.
- Stock health in Gambier Bay declined from moderate to poor.
- Stocks in Lynn Sisters are moderate, but a low percentage of the mature biomass is legal sized crab.
- All other survey areas and non-survey areas appear to have stocks that can withstand some level of harvest.

Peril Strait, Gambier Bay, and Lynn Sisters cannot withstand the level of personal use harvest prescribed in regulation [5 AAC 77.664(b)] and will be closed until further information becomes available to the department to assess available harvest opportunities.

#### Closed Area Descriptions

- Peril Strait: Section 13-C, Peril Strait (all waters of Peril Strait including Hoonah Sound, Ushk Bay, Rodman Bay, Saook Bay, Hanus Bay, Sitkoh Bay, and contiguous waters west of a line from Point Hayes to Point Thatcher, and north of a line from Pogibshi Point due west to the Chichagof shoreline).
- Lynn Sisters: Waters north of a line from a point at 58°27.00' N. latitude, 135°06.50' W. longitude, due east to a point at 58°27.00' N. latitude, 135°03.00' W. longitude, and west of a line from a point at 58°27.00' N. latitude, 135°03.00' W. longitude to Point Whidbey including St. James Bay.
- Gambier Bay: Gambier Bay waters north and west of a line between Point Gambier and 57°24.90' N. latitude, 133°53.00' W. longitude (effective September 17, 2018).
- 5 AAC 34.107(d) East Central: All waters of Section 11-D, District 10, and District 9 east of a line from Kingsmill Point at 56°50.00' N. latitude, 134°25.17' W. longitude, to Point Gardner at 57°01.00' N. latitude, 134°37.00' W. longitude, all waters of District 8 north of the latitude of Blaquiere Point at 56°35.00' N. latitude, all waters of Section 6-A, and all waters of District 5 north of the latitude of Point Baker at 56°21.53' N. latitude.

Refer to Figure 1 for a map showing open and closed waters for personal use red and blue king crab fishing. Refer to Figure 2 for a map showing open and closed waters for personal use golden king crab fishing.

#### Juneau Area: Section 11-A

Details of the summer red and blue king crab personal use fishery within Section 11-A were previously released in a separate news release dated July 20, 2018. A winter personal use fishery will occur in Section 11-A per the red and blue king crab management and allocation plan outlined in 5 AAC 34.111. Details of the winter personal use king crab fishery in the Juneau Area will be announced in a separate news release that will be issued later in the year. For more information on the red and blue king crab personal use fishery within Section 11-A please contact Dave Harris at (907) 465-4250.

#### Other information

**Starting on July 1, 2018, a personal use fishing permit issued by the department is required to take king crab for each household; households may not be issued multiple permits of the same type per**

year. A permit holder or a household member listed on the permit must have the permit in possession when fishing. Southeast king crab personal use permits can be obtained online at <https://www.adfg.alaska.gov/Store/>. The fishing report section of your permit must be submitted online or returned to your ADF&G Regional Office before June 16, 2019—even if you did not fish. Report online at <http://www.adfg.alaska.gov/sf/PU/>.

Fishermen are reminded that male red **and blue** king crab must be seven inches or greater in width of shell to be retained [5 AAC 77.664(d)]. Male king crab less than the minimum legal size and female king crab must be immediately returned to the water unharmed.

For the areas open to personal use crab fishing outside of Section 11-A, 5 pots are allowed per person with a maximum of 10 pots per vessel, **except that no more than 4 pots per vessel may be used for king and Tanner crab**. A pot used to take king crab must have at least two escape rings on opposing vertical or sloping sides of the pot that are not less than six and one-quarter inches inside diameter. Each fisherman shall plainly and legibly inscribe the fisherman’s first initial, last name, and home address on a keg or buoy attached to a pot. A keg or buoy attached to the pot must also be inscribed with the vessel name or the division of motor vehicles registration number (AK number) of the vessel used to operate the pot [5 ACC 77.010 and 5 AAC 77.664(h)].

Please refer to 5 AAC 77.664 in the 2017-2018 Subsistence and Personal Use Statewide Fisheries Regulations booklet for additional regulations regarding personal use red and blue king crab fishing, or view the regulations online at:
