Commissioner

By delegation to:
Ryan Scott
Region I Management Coordinator
JUSTIFICATION:

Biologists with the Alaska Department of Fish and Game set a harvest objective of 25 bull moose for this area for the 2014 hunting season. As of Sunday evening, October 12, 2014, the harvest had reached 25 bulls; the harvest is expected to exceed the harvest objective. An aerial survey in December 2013 resulted in a 12 bulls per 100 cow moose ratio which is below the 25:100 management objective for the Yakutat area. While the December 2013 bull:cow ratio is considered a minimum ratio due to survey timing it is important, if possible, not to exceed the harvest objective of 25 bull moose west of the Dangerous River to ensure adequate bull to cow ratios for this portion of the Yakutat forelands.

Because the harvest objective of 25 bull moose has been reached during the federal subsistence moose season the State of Alaska moose hunting season will not open in 2014 in the area west of the Dangerous River to Yakutat Bay on the Yakutat Forelands. An Emergency Order (01-11-14) has been issued that closes the state moose hunting season in this area on Tuesday, October 14, 2014 @ 11:59 pm. The United States Forest Service will issue a news release closing the federal moose hunting season in this area, effective October 13, 2014 @ 11:59 pm.
