Commissioner

By delegation to:
Tony Gorn
Unit 22 Area Biologist
JUSTIFICATION:

The Alaska Board of Game established a registration moose hunt in Unit 22(D) Southwest and Unit 22(D) that portion within the Kuzitrin River drainage. A fall moose composition survey completed during November 2013 found a decline in the areas bull: cow ratio. The management objective for the area is 30B: 100C and the 2013 survey found 23B: 100C. Similar surveys completed in 2008 and 2011 found 33B: 100C and 28B: 100C respectively. For regulatory year 2014-2015, the department established a harvest quota of 37 bulls to prevent excessive harvest and to improve the bull:cow ratio.

The fall combined harvest quota of 37 bull moose is expected to be reached by the season closing date announced in this emergency order and no further harvest is warranted.
