JUSTIFICATION:

Based on a harvest rate not to exceed 30% of the estimated fall population, Game Management Unit (GMU) 2 has a harvest limit of 25 wolves for the regulatory year (RY) 2014 season. As of Tuesday, February 17, 2015, 22 wolves are known to have been harvested in GMU 2. Recognizing that several trappers are actively trapping on the island at this time, and in order to avoid exceeding the 25 wolf harvest limit, the trapping and hunting seasons are being closed at 11:59 PM on Sunday, February 22, 2015. This timeframe is expected to allow trappers time to retrieve their traps from the field while also keeping the harvest within the guideline level.
