JUSTIFICATION:

An aerial survey conducted on September 25, 2014 in the area between Blackerby Ridge and the Salmon Creek Reservoir resulted in low goat counts; a total of 22 goats were observed (17 adults, and 5 kids). A combined guideline harvest objective of 1-2 points (male goat = 1 point & female goat = 2 points) was established for the hunt area between the south side of Blackerby Ridge and the north side of Salmon Creek Reservoir, above the 1000 foot contour and east to Observation Peak. As of Monday, August 5, 2019, one female goat has been harvested in this area for a total of 2 points. Due to the vulnerability of goats in this area, and because the guideline harvest level has been met, an emergency order (01-05-19) is being issued to close the goat hunting season in this area at 11:59 pm on Tuesday, August 6, 2019.
