Emergency Order
Under the Authority of AS 16.05.060

Emergency Order No. 02-04-19
Alaska

Effective Date: 11:59 p.m.
October 4th, 2019

Issued at: Anchorage,
October 3rd, 2019

Expiration Date: June 30, 2020
unless superseded by
subsequent emergency order

EXPLANATION:
This Emergency Order closes the state registration permit hunt RM445 for moose in Unit 14(C). All other moose hunting seasons in Unit 14 are unaffected by this Emergency Order.

REGULATION:
Therefore the following regulations in 5AAC 85.045(12), Hunting Seasons and Bag Limits for Moose, are superseded by this Emergency Order, and the following provisions are effective for hunting moose:

</table>
JUSTIFICATION:

In 2011, the Eklutna Lake Management Area moose population was estimated at 80 individuals, including 18 bulls, 50 cows, and 12 calves. In 2013, a survey was flown of neighboring Thunderbird Creek and numbers were found to be consistent with previous years. Weather conditions the last several winters have precluded flying surveys, but harvest and roadkill numbers have remained relatively steady, indicating that the population is unlikely to have decreased substantially. To maintain appropriate bull:cow ratios and the overall population objective, the department has determined the harvest from the Eklutna Lake Management Area should not exceed four bulls. As of October 3rd, four bulls have been taken in this hunt and there are still hunters in the field; therefore, no further harvest is warranted from this population.
