JUSTIFICATION:

Biologists observed 63 goats (54 adults, 9 kids) during an aerial survey conducted on September 28, 2016. Subsequent surveys have resulted in lower numbers of observed goats. On September 17, 2019, under conditions similar to the fall 2016 survey, 54% fewer goats (25 adults, 2 kids) were observed. On September 5, 2020 a total of 29 goats (25 adults, 4 kids) nearly identical to the number of goats observed in 2019. Due to the vulnerability of goats in this area, an emergency order (01-04-21) is being issued effective at 11:59 pm, Saturday, July 31, 2021.
