JUSTIFICATION:
The last aerial survey resulted in a minimum count of 162 goats within mountain goat hunt area RG248. The department set the maximum allowable harvest at 5 goat points. Each billy counts as one goat point, each nanny counts as two goat points, and an unrecoverable goat counts as 1.5 goat points. The current harvest is one billy, and two nannies, totaling 5 goat points with additional hunters remaining in the field. Harvest that exceeds objectives could lead to reduced future hunting opportunity.
