

ADF&G SALMON TROLL EXEMPTION PERMIT

This permit, once signed by a department representative, authorizes the owner of a salmon troll catcher-processor vessel (FAS) to remove heads of adipose fin-clipped salmon before the salmon are offloaded from the vessel, exempting that troller from provisions of 5 AAC 29.140(b). A signed copy should be kept onboard the vessel.

Instructions for spring fishery: Please contact a troll biologist in the Sitka office at (907) 747-6688 to discuss areas you intend to fish. Some spring areas are difficult to obtain an adequate number of samples from, so you may not be issued a permit for those areas. The completed and signed form can be scanned to grant.hagerman@alaska.gov or faxed to the Sitka area office at (907) 747-6693.

This exemption form is to be used for the 2016 spring troll fishery only.
