Alaska Salmon Hatchery and Enhancement Regulations

Last updated October 2022

CHAPTER 40. PRIVATE NONPROFIT SALMON HATCHERIES

Article 1. General

5 AAC 40.005. General
5 AAC 40.007. Gear and fishing periods
5 AAC 40.010. Modifications of applicable regulations
5 AAC 40.015. Prohibitions

Article 2. Special Harvest Areas

5 AAC 40.030. District 13: Sheldon Jackson Special Harvest Areas
5 AAC 40.032. District 11 and District 15: Douglas Island Pink and Chum (DIPAC) Special Harvest Area
5 AAC 40.033. Douglas Island pink and chum Special Harvest Area - Sheep Creek
5 AAC 40.035. Prince William Sound Aquaculture Corporation Special Harvest Area - San Juan
5 AAC 40.037. Nerka Corporation Special Harvest Area - Perry Island
5 AAC 40.038. Solomon Gulch Special Harvest Area - Valdez
5 AAC 40.039. Burnett Inlet
5 AAC 40.041. Herring Bay Special Harvest Area - Ketchikan
5 AAC 40.042. Northern Southeast Regional Aquaculture Association Special Harvest Areas
5 AAC 40.043. Neets Bay Special Harvest Area - Behm Canal
5 AAC 40.044. Burro Creek Farms Special Harvest Area - Taiya Inlet
5 AAC 40.045. Nakat Inlet Special Harvest Area
5 AAC 40.046. Tutka Bay Lagoon Special Harvest Area - Tutka Bay
5 AAC 40.051. District 3: Klawock Inlet and River Special Harvest Area
5 AAC 40.053. District 3: Port Saint Nicholas Special Harvest Area
5 AAC 40.060. District 6: Neck Lake Special Harvest Area
5 AAC 40.061. District 7: Anita Bay Special Harvest Area
5 AAC 40.071. District 9: Gunnuk Creek Special Harvest Area
5 AAC 40.073. District 9: Southeast Cove Special Harvest Area
5 AAC 40.081. District 9: Port Armstrong Special Harvest Area
5 AAC 40.085. Kodiak Regional Aquaculture Association Special Harvest Areas

Article 3. Applicability of regulations

5 AAC 40.100. Applicability of regulations

Article 4. Permit Application Procedures

5 AAC 40.110. Authority
5 AAC 40.120. Pre-application assistance
5 AAC 40.130. Management feasibility analysis
5 AAC 40.140. Permit application
5 AAC 40.150. Application fee
5 AAC 40.160. Acceptance determination
5 AAC 40.170. Regional planning team review
5 AAC 40.180. Additional information
5 AAC 40.190. Review and approval schedules
5 AAC 40.200. Completeness determination
5 AAC 40.210. Public hearing
5 AAC 40.220. Review and determination
5 AAC 40.230. Reconsideration
5 AAC 40.240. Permit revocation

Article 5. Regional Comprehensive Planning

5 AAC 40.300. Regional planning teams in general
CHAPTER 40. PRIVATE NONPROFIT SALMON HATCHERIES

ARTICLE 1. GENERAL

5 AAC 40.005. General

(a) The harvest of salmon inhabiting the water of the state, regardless of whether the salmon are naturally or artificially propagated, may be conducted only pursuant to regulations adopted by the Board of Fisheries.

(b) The harvest of salmon returning to a private nonprofit salmon hatchery will be governed by regulations adopted by the Board of Fisheries. The board will, in its discretion, develop harvesting regulations after review of the harvest plans or other materials, information, and testimony, if any, presented by the regional associations, hatchery operators, the Department of Commerce, Community, and Economic Development, the Department of Fish and Game, fishermen, and other interested parties.

(c) Where hatchery returns enter a segregated location near the release site and can be harvested without significantly affecting wild stocks, a special harvest area may be designated by regulation adopted by the board, within the hatchery permit, or by emergency orders issued by the commissioner.

(d) A private nonprofit hatchery permit holder and his agents, contractees, and employees may harvest salmon for the hatchery only in the applicable special harvest area. This does not prevent a special harvest area from being open to commercial, sport, or subsistence fishing or any combination thereof to the extent provided in regulations adopted and orders issued under this chapter. Harvesting of salmon within the special harvest area, whether by the hatchery operator or the common property fisheries, will be opened and closed by regulation or emergency order.

(e) Special harvest area boundaries set out in 5 AAC 40, or in a private nonprofit hatchery permit issued by the commissioner, may be altered by emergency order if necessary for proper management of natural or hatchery stocks.

(f) Hatchery permit holders, their agents, contractees, and employees shall comply with all terms and conditions of the hatchery permit, applicable regulations and orders, and any additional requirements imposed by the commissioner to implement this chapter.

(g) Agents, contractees, and employees of a hatchery permit holder may harvest salmon for the hatchery in the special harvest area only if they have in their possession a written authorization from the hatchery permit holder and only in accordance with its terms. The activities in the special harvest area of a person who is not a hatchery permit holder or an agent, contractee, or employee of the permit holder acting under the terms of a written authorization, are governed by regulations applicable to commercial, sport, personal use, and subsistence fishing.

(h) Private nonprofit salmon hatchery operators shall take all reasonable steps necessary to ensure that hatchery-produced salmon harvested in their designated special harvest area are surplus fish produced at that facility.

5 AAC 40.007. Gear and fishing periods

(a) The commissioner may authorize legal gear for cost recovery either through the hatchery permit or by regulation.
(b) Fishing periods for each gear type may be modified by emergency order as needed to protect the public interest or wild stocks.

(c) The hatchery operator shall obtain the appropriate special harvest area entry permits from the Commercial Fisheries Entry Commission. The hatchery operator may also contract with licensed commercial fishermen to conduct the harvest.

(d) The commissioner may define a unit of gear to be used and under a special harvest area entry permit for that gear type.

5 AAC 40.010. Modifications of applicable regulations

(a) Hatchery permit holders shall, with respect to salmon harvested by them (or their agents, contractees, or employees), comply with applicable provisions of 5 AAC 39.130(a) and (b) as though they were a purchaser of fish.

(b) Hatchery permit holders harvesting salmon within a special harvest area, to the extent those salmon are used as egg sources for broodstock, will be exempted by the commissioner from the provisions of AS 16.05.831 if the permit holder so requests. The commissioner may condition the exemption on terms he considers necessary to carry out the intent of AS 16.05.831.

(c) Hatchery permit holders conducting a hatchery harvest of salmon within a special harvest area are exempt from the provisions of 5 AAC 39.290.

(d) Fishermen taking salmon in a special harvest area under authorization from the hatchery permit holder and operating under a special harvest area entry permit are exempt from the provisions of 5 AAC 39.120.

5 AAC 40.015. Prohibitions

It is unlawful for any person to violate the provisions of this chapter.

ARTICLE 2. SPECIAL HARVEST AREAS

5 AAC 40.030. District 13: Sheldon Jackson Special Harvest Areas

(a) There are established under the provisions of 5 AAC 40.005 the following Sheldon Jackson Special Harvest Areas:

(1) the Sheldon Jackson Hatchery Special Harvest Area for pink, chum, and king salmon consists of the waters of Crescent Bay and Eastern Anchorage enclosed by a line from the northernmost end of the John O'Connell Bridge to the southernmost end of the bridge to the northeasternmost tips of Aleutski Island, Turning Island, Kutkan Island, and Morne Island, to the Twin Islands Light, to a point on the Baranof Island shore at 57°02.68' N. lat., 135°18.90' W. long., and will be open for harvest by the hatchery permit holder from 12:01 a.m. July 20 until 11:59 p.m. September 15;

(2) the Sheldon Jackson Hatchery Special Harvest Area for coho salmon consists of all waters enclosed by a line from the southeast corner of the Crescent Harbor breakwater at 57°02.95' N. lat., 135°19.50' W. long. to a point on the beach approximately 150 yards southeast of the hatchery stream outlet at 57°02.92' N. lat., 135°19.38' W. long., and will be open for harvest by the hatchery permit holder from 12:01 a.m. August 15 until 11:59 p.m. October 31.
5 AAC 40.032. District 11 and District 15: Douglas Island Pink and Chum (DIPAC) Special Harvest Area

(a) The following special harvest areas are established for Douglas Island Pink and Chum (DIPAC):

(1) Gastineau Channel Special Harvest Area: the waters east of 134° 29.25' W. long. (near Salmon Creek) and west of 134° 17.38' W. long. (approximately one mile north of Dupont Dock);

(2) Amalga Harbor Special Harvest Area: the waters enclosed by a line from the Shrine of St. Terese to the southernmost tip of Bird Island to the northernmost tip of Gull Island to a point on the eastern mainland shore at 58° 30.80' N. lat.;

(3) Boat Harbor Special Harvest Area: the waters within one mile of the western shoreline of Lynn Canal south of 58° 40' N. lat. to a point 2.4 miles north of Point Whidbey at 58° 37.05' N. lat., including the waters inside Boat Harbor;

(4) Speel Arm Special Harvest Area: the waters of Speel Arm north of 58° 03.42' N. lat.

(b) A hatchery permit holder harvesting salmon within the special harvest area under the terms of the hatchery permit is exempt from the provisions of 5 AAC 33.310. The open fishing season within the DIPAC Gastineau Channel, Amalga Harbor, and Speel Arm Special Harvest Areas, for the hatchery permit holder is from June 1 through October 31. Additional fishing periods may be established by emergency order.

(c) Notwithstanding 5 AAC 33.330, legal gear types for the hatchery permit holder in a special harvest area are purse seine, hand purse seine, beach seine, fyke net, drift gillnet, set gillnet, and dip net, and troll gear.

5 AAC 40.033. Douglas Island pink and chum Special Harvest Area - Sheep Creek

Repealed.

5 AAC 40.035. Prince William Sound Aquaculture Corporation Special Harvest Area - San Juan

Repealed.

5 AAC 40.037. Nerka Corporation Special Harvest Area - Perry Island

(a) There is established the Nerka Corporation Special Harvest Area, consisting of all waters of South Bay, Perry Island, enclosed by a line from Meares Point Light on the west side of the bay easterly two nautical miles to an exposed reef and the north one-half mile to the east side of the bay.

(b) A hatchery permit holder harvesting salmon within the special harvest area is exempt from the provisions of 5 AAC 24.310 - 5 AAC 24.320 except as may be specifically provided by
emergency order. The hatchery permit holder may harvest salmon within the special harvest area during periods opened and closed by emergency order. (c) Notwithstanding 5 AAC 24.330, legal gear for the hatchery permit holder in the special harvest area is a set gillnet. However, if the commissioner and the permit holder determine that set gillnet gear is unsatisfactory, the commissioner may open the special harvest area for hatchery harvest with beach seine or purse seine.

5 AAC 40.038. Solomon Gulch Special Harvest Area - Valdez

Repealed.

5 AAC 40.039. Burnett Inlet

(a) There is established the Burnett Inlet Special Harvest Area, for the Southern Southeast Regional Aquaculture Association Burnett Inlet Hatchery, consisting of all waters of Burnett Inlet, Etolin Island, north of 56° 06' N. lat. and south of 56° 10.83' N. lat.

(b) A hatchery permit holder harvesting salmon within the special harvest area is exempt from the provisions of 5 AAC 33.310. Fishing periods for the hatchery permit holder will be opened and closed by emergency order by gear type.

(c) Notwithstanding 5 AAC 33.330, legal gear for the hatchery permit holder in the special harvest area are beach seine, purse seine, hand purse seine, and drift gillnet.

5 AAC 40.041. Herring Bay Special Harvest Area - Ketchikan

(a) There is established a Herring Bay Special Harvest Area for the Southern Southeast Regional Aquaculture Association Whitman Lake Hatchery, consisting of the waters of Herring Creek and Cove bound by the hatchery water outlet and a line from a point of land on George Inlet at the east side of Lot 39, USS 3397, bearing 18° 12' to a point of land on the southern edge of Lot 91, USS 2403.

(b) A hatchery permit holder harvesting salmon within the special harvest area is exempt from the provisions of 5 AAC 33.310. The open fishing season within the Herring Bay Special Harvest Area for the hatchery permit holder is from June 1 through October 31. Additional fishing periods may be established by emergency order.

(c) Notwithstanding 5 AAC 33.330, legal gear for the hatchery permit holder in the special harvest area is beach seine, purse seine, and dip net. Gillnets may be used by the hatchery operator in the special harvest area for taking king and coho salmon broodstock.

(d) That portion of the special harvest area between the hatchery outlet and the terminus of Herring Creek may be closed to sport fishing. The remainder of the special harvest area may not be closed to sport fishing unless hatchery broodstock needs are jeopardized.

5 AAC 40.042. Northern Southeast Regional Aquaculture Association Special Harvest Areas

(a) The following special harvest areas are established for the Northern Southeast Regional Aquaculture Association:

   (1) repealed 4/23/94;
   (2) repealed 5/31/2009;
(3) Patterson Bay, for coho salmon: all waters of Patterson Bay north of 56° 34' N. lat.;
fishing periods for the hatchery permit holder will be opened and closed by emergency order;
(4) Bear Cove, for king and coho salmon: the waters of Bear Cove and Silver Bay east of a
line from 57° 00.63' N. lat., 135° 09.80' W. long., to 57° 00.75' N. lat., 135° 10.58' W. long.,
to 57° 01.07' N. lat., 135° 09.93' W. long. will be open for the hatchery permit holder from
12:01 a.m. May 10 until 11:59 p.m. October 31;
(5) Hidden Falls,
   (A) for chum and king salmon: the waters of District 12 within two nautical miles of the
       Baranof Island shoreline south of the latitude of South Point and north of 57° 06.83' N.
       lat., excluding the waters of Kelp Bay, will be open for harvest by the hatchery permit
       holder from 12:01 a.m. June 1 until 11:59 p.m. August 15;
   (B) for coho salmon: Kasnyku Bay west of a line from 57° 13.33' N. lat., 134° 50.93' W.
       long. to the northernmost tip of an unnamed island of Kasnyku Bay located at 57° 12.93'
       N. lat., 134° 51.40' W. long. and then due south to the southern shore of Kasnyku Bay
       will be open for harvest by the hatchery permit holder from 12:01 a.m. August 1 until
       11:59 p.m. October 31;
(6) Silver Bay, for chum salmon:
   (A) will be open for harvest by the hatchery permit holder from 12:01 a.m. July 1 until
       12:01 a.m. July 22 and from 12:01 a.m. the day before the coho salmon fishery is
       reopened in August, or August 20 if the coho salmon fishery is not closed earlier in
       August, until September 15; the Silver Bay Special Harvest Area for chum salmon is the
       waters of Eastern Channel and Silver Bay enclosed by a line from Entry Point Light, to
       the southernmost tip of Harris Island, to the southernmost tip of Galankin Island, to
       Simpson Rock Light, to the southernmost tip of Makhnati Island, to Sentinel Rock, to the
       westernmost tip of Cape Burunof, to a point west of Pirates Cove at 135° 59.35' N. lat., to
       the westernmost tip of Long Island, to the westernmost tip of Emgeten Island, to the
       westernmost tip of Error Island, to the northernmost tip of Luce Island, and to the
       westernmost tip of Silver Point, and in Silver Bay north of 57° N. lat.;
   (B) from 12:01 a.m. July 22 to 12:01 a.m. the day before the end of the August coho
       salmon fishery closure specified in (A) of this paragraph, or August 20 if there is no
       earlier coho salmon fishery closure in August, the Silver Bay Special Harvest Area for
       chum salmon is the waters of Eastern Channel and Silver Bay south of a line from Entry
       Point Light to the southernmost tip of Harris Island, to the southernmost tip of Galankin
       Island, and east of a line from Galankin Island to the northernmost point of Silver Point,
       and the waters of Sitka Sound enclosed by a line from the southernmost tip of Galankin
       Island, to Simpson Rock Light, to the Makhnati Island buoy, to Black Rock, to the
       southernmost tip of Neva Island to the northernmost tip of Sasendi Island, from the
       southernmost tip of Volga Island, to the northernmost tip of Galankin Island, and in
       Silver Bay north of 57° N. lat.;
(7) Deep Inlet for king, chum, and coho salmon: the waters of Deep Inlet, Aleutkina Bay, and
    contiguous waters south of a line from a point on the westernmost end of Cape Burunoff at
    56° 59.04' N. lat., 135° 23.23' W. long., to a point west of Cape Burunoff at 56° 59.11' N.
    lat., 135° 23.59' W. long., to a point one-half mile west of the westernmost tip of Long Island
    at 57° 00.17' N. lat., 135° 22.69' W. long., to the westernmost tip of Long Island, to the
    easternmost tip of Long Island, to the westernmost tip of Emgeten Island, to the westernmost
    tip of Error Island, to the westernmost tip of Berry Island, to the southernmost tip of Berry
Island, to the westernmost tip of the southernmost island in the Kutchuma Island group, to
the easternmost tip of the southernmost island in the Kutchuma Island group, to the
westernmost tip of an unnamed island at 57° 00.30' N. lat., 135° 17.67' W. long., to a point
on the southern side of the unnamed island at 57° 00.08' N. lat., 135° 16.78' W. long., and
then to a point on the Baranof Island shore at 56° 59.93' N. lat., 135° 16.53' W. long. will be
open for harvest by the hatchery permit holder from 12:01 a.m. June 15 until 11:59 p.m.
October 31, except Sandy Cove is closed south of 56° 59.05' N. lat.;
(8) Mist Cove, for coho salmon: the waters of Mist Cove west of a line from 56° 31.70' N.
latt., 134° 39.87' W. long. to 56° 31.27' N. lat., 134° 39.75' W. long. will be open for harvest
by the hatchery permit holder from 12:01 a.m. August 1 until 11:59 p.m. October 31;
(10) Crawfish Inlet, for king and chum salmon: the waters of Crawfish Inlet east of 135°
11.05' W. long.
(b) A hatchery permit holder harvesting salmon within a special harvest area is exempt from the
provisions of 5 AAC 33.310.
(c) Notwithstanding 5 AAC 33.330, legal gear for the hatchery permit holder in a special harvest
area are as follows:

(1) repealed 6/28/97;
(2) repealed 5/31/2009;
(3) Mist Cove and Patterson Bay: purse seine, beach seine, drift gillnet, set gillnet, hook and
line, and dip net;
(4) Bear Cove: purse seine, hand purse seine, beach seine, and dip net, drift gillnet with six
inch or larger mesh, and troll gear;
(5) Hidden Falls: beach seine, purse seine, hand purse seine, drift gillnet, and troll gear;
(6) Silver Bay and Deep Inlet: purse seine, hand purse seine, beach seine, dip net, and troll
gear;
(7) repealed 5/31/2009;
(8) repealed 5/31/2009;
(9) Shamrock Bay: beach seine, purse seine, hand purse seine, drift gillnet, and troll gear.
(10) Crawfish Inlet: purse seine, hand purse seine, beach seine, drift gillnet, dip net, and troll
gear.

5 AAC 40.043. Neets Bay Special Harvest Area - Behm Canal

(a) There is established a Neets Bay Special Harvest Area for the Southern Southeast Regional
Aquaculture Association harvest of coho and chum returns to the Neets Bay release site,
consisting of all waters of Neets Bay east of the longitude of the easternmost tip of Bug Island.
(b) A hatchery permit holder harvesting salmon within the special harvest area is exempt from
the provisions of 5 AAC 33.310. The open fishing season within the Neets Bay Special Harvest
Area for the hatchery permit holder is from June 1 through October 31. Additional fishing
periods may be established by emergency order.
(c) Notwithstanding 5 AAC 33.330, legal gear for the hatchery permit holder in the special
harvest area is purse seine, beach seine, gillnet, and troll gear. The hatchery permit holder may
use floating weirs in waters of the special harvest area east of 131° 33' W. long.
5 AAC 40.044. Burro Creek Farms Special Harvest Area - Taiya Inlet
Repealed.

5 AAC 40.045. Nakat Inlet Special Harvest Area
(a) There is established a Nakat Inlet Special Harvest Area for the Southern Southeast Regional Aquaculture Association harvest of chum and coho salmon returns to the Nakat Inlet release site, consisting of all waters of Nakat Inlet north of Surprise Point at 54° 49.10' N. lat., and west of 130° 42.75' W. long.

(b) The hatchery permit holder harvesting salmon within the special harvest area is exempt from the provisions of 5 AAC 33.310. Fishing periods for the hatchery permit holder will be established by emergency order by gear type.

(c) Notwithstanding 5 AAC 33.330, legal gear for the hatchery permit holder in the special harvest area are purse seine, gillnet, troll and beach seine.

5 AAC 40.046. Tutka Bay Lagoon Special Harvest Area - Tutka Bay
Expired.

5 AAC 40.051. District 3: Klawock Inlet and River Special Harvest Area
(a) The Klawock Inlet and River Special Harvest Area consists of the waters of Klawock Inlet and Harbor south of the latitude of Cemetery Point and north of 55° 32' N. lat., and any of the hatchery raceways and holding ponds contiguous with the hatchery access ladder from Klawock River for broodstock and cost recovery of sockeye and coho salmon and steelhead.

(b) A hatchery permit holder harvesting salmon within the special harvest area is exempt from the provisions of 5 AAC 33.310. The open fishing season within the Klawock Inlet and River Special Harvest Area for the hatchery permit holder is from July 1 through November 30. Additional fishing periods may be established by emergency order.

(c) Notwithstanding 5 AAC 33.330, legal gear types for the hatchery permit holder in the special harvest area are purse seine, beach seine, dip net, gillnet, and troll gear.

5 AAC 40.053. District 3: Port Saint Nicholas Special Harvest Area
(a) There is established the Port Saint Nicholas Special Harvest Area, consisting of all waters of Port Saint Nicholas east of 133° 02.92' W. long. and west of 132° 59.50' W. long., located at the mouth of the Port Saint Nicholas head stream.

(b) A hatchery permit holder harvesting salmon within the special harvest area is exempt from the provisions of 5 AAC 33.310. Fishing periods for the hatchery permit holder will be open from May 1 through August 15, unless closed earlier by emergency order.

(c) Notwithstanding 5 AAC 33.330, legal gear for the hatchery permit holder in the special harvest area are purse seine, beach seine, and dip net.

5 AAC 40.060. District 6: Neck Lake Special Harvest Area
(a) There is established a Neck Lake Special Harvest Area for the Southern Southeast Regional Aquaculture Association harvest of hatchery salmon returns to the Neck Lake remote release
site, consisting of the waters of Whale Pass north and west of a line from 56° 05.55' N. lat., 133° 07.30' W. long. to 56° 05.82' N. lat., 133° 06.58' W. long.

(b) A hatchery permit holder harvesting salmon within the special harvest area is exempt from the provisions of 5 AAC 33.310. The open fishing season and area for the hatchery permit holder is from June 15 through August 31 in those waters of Neck Creek upstream of the beginning of the fish pass. Additional fishing periods and areas may be established by emergency order.

(c) Notwithstanding 5 AAC 33.330, legal gear for the hatchery permit holder in the special harvest area is weir, dip net, and beach seine. Additional gear may be established by emergency order.

5 AAC 40.061. District 7: Anita Bay Special Harvest Area

(a) There is established the Anita Bay Special Harvest Area, consisting of the waters of Anita Bay south and west of a line from the tip of Anita Point to 56° 14.26' N. lat., 132° 23.92' W. long.

(b) A hatchery permit holder harvesting salmon within the special harvest area is exempt from the provisions of 5 AAC 33.310. The commissioner shall open and close, by emergency order, fishing periods for the hatchery permit holder by gear type.

(c) Notwithstanding 5 AAC 33.330, legal gear types for the hatchery permit holder in the special harvest area are beach seine, purse seine, and hand purse seine, drift gillnet, and troll gear.

5 AAC 40.071. District 9: Gunnuk Creek Special Harvest Area

(a) The Gunnuk Creek Special Harvest Area consists of the waters of Keku Strait enclosed by a line from a point about one-third mile northwest of Kake at 56° 58.95' N. lat., 133° 57.42' W. long. to the southernmost tip of the southern Mosquito Island to the northwest tip of Hamilton Island to Wooten's Dock at 56° 57.55' N. lat., 133° 54.70' W. long.

(b) A hatchery permit holder harvesting salmon within the special harvest area is exempt from the provisions of 5 AAC 33.310. The commissioner shall open and close, by emergency order, fishing periods for the hatchery permit holder to harvest salmon returning to the Gunnuk Creek salmon hatchery.

(c) The commissioner shall open and close, by emergency order, fishing periods for common property fisheries to harvest excess salmon returning to the Gunnuk Creek salmon hatchery.

(d) Notwithstanding 5 AAC 33.330, legal gear types for the hatchery permit holder in the special harvest area are beach seine, purse seine, gillnet, and troll gear.

5 AAC 40.073. District 9: Southeast Cove Special Harvest Area

(a) The Southeast Cove Special Harvest Area consists of the waters of Keku Strait enclosed by a line from a rocky point on the northern end of Kuiu Island located on the east side of Southeast Cove at 56° 52.95' N. lat., 134° 01.33' W. long. to the northwest corner of Hound Island at 56° 53.12' N. lat., 133° 56.77' W. long. then northwest, connecting points along the northern shore of Keku Islands at 56° 53.98' N. lat., 133° 57.58' W. long. to 56° 54.90' N. lat., 133° 59.53' W. long. to 56° 55.93' N. lat., 134° 00.97' W. long. to 56° 55.95' N. lat., 134° 02.15' W. long. to 56° 55.22' N. lat., 134° 02.53' W. long. to 56° 56.37' N. lat., 134° 06.62' W. long. then to the northwest
corner of Payne Island to 56° 57.45' N. lat., 134° 08.75' W. long. then south to a point on Kuiu Island at 56° 55.08' N. lat., 134° 09.25' W. long.

(b) A hatchery permit holder harvesting salmon within the special harvest area is exempt from the provisions of 5 AAC 33.310. The commissioner shall open and close, by emergency order, fishing periods for the hatchery permit holder to harvest salmon returning to the Southeast Cove remote release site.

(c) The commissioner shall open and close, by emergency order, fishing periods for common property fisheries to harvest excess salmon returning to the Southeast Cove remote release site.

(d) Notwithstanding 5 AAC 33.330, legal gear types for the hatchery permit holder in the special harvest area are beach seine, purse seine, gillnet, and troll gear.

5 AAC 40.081. District 9: Port Armstrong Special Harvest Area

(a) The Port Armstrong Special Harvest Area for king salmon consists of the waters of Port Armstrong west of 134° 39.47' W. long., and will be open to harvest by the hatchery permit holder from 12:01 a.m. April 15 until 11:59 p.m. July 31.

(b) The Port Armstrong Special Harvest Area for pink, chum, and coho salmon consists of the waters of Port Armstrong west of a line from Point Eliza at 56° 17.73' N. lat., 134° 38.75' W. long. to a point on the Baranof Island shoreline at 56° 17.98' N. lat., 134° 38.35' W. long., and will be open to harvest by the hatchery permit holder from 12:01 a.m. April 15 until 11:59 p.m. July 31.

(c) A hatchery permit holder harvesting salmon within the special harvest area is exempt from the provisions of 5 AAC 33.310.

(d) The Port Armstrong Special Harvest Area, described in (b) of this section, will be closed to commercial fishing, other than hatchery cost recovery fishing, from 12:01 a.m. July 31 until 11:59 p.m. September 30. The commissioner may open and close, by emergency order, fishing periods for common property fisheries to harvest salmon surplus to broodstock and cost recovery returning to the Port Armstrong salmon hatchery.

(e) Notwithstanding 5 AAC 33.330, legal gear types for the hatchery permit holder in the special harvest area are purse seine, hand purse seine, beach seine, dip net, drift gillnet with six inch or larger mesh, and troll gear.

5 AAC 40.085. Kodiak Regional Aquaculture Association Special Harvest Areas

(a) The following special harvest areas are established for the Kodiak Regional Aquaculture Association (KRAA):

(1) Kitoi Bay Special Harvest Area: all waters of Kitoi Bay west of a line from 58° 10.58' N. lat., 152° 17.36' W. long. to 58° 09.50' N. lat., 152° 18.70' W. long.;
(2) Spiridon Bay Special Harvest Area: all waters of Telrod Cove north of a line extending from Stream Point at 57° 39.00' N. lat., 153° 38.50' W. long., to a point at 57° 38.80' N. lat., 153° 37.70' W. long.;
(3) Foul Bay Special Harvest Area: all waters of Foul Bay east of 152° 47.20' W. long.;
(4) Waterfall Bay Special Harvest Area: all waters of the stream terminus of streams No. 251-821 and 251-822 to a straight line extending northwesterly from 58° 24.15' N. lat., 152°
28.23' W. long. to 58° 25.60' N. lat., 152° 30.80' W. long.; the numbered streams in this paragraph are identified on the ADF&G Kodiak Area Salmon Statistical Chart adopted by reference in 5 AAC 18.350;

(5) Settler Cove Special Harvest Area: all waters of Settler Cove west of 152° 50.80' W. long.

(b) A hatchery permit holder harvesting salmon within a special harvest area under the terms of a hatchery permit is exempt from the provisions of 5 AAC 18.310 and 5 AAC 18.320. The commissioner shall open and close, by emergency order, fishing periods during which the hatchery permit holder may harvest salmon within the designated special harvest area.

(c) Notwithstanding 5 AAC 18.330, legal gear for the hatchery permit holder in a special harvest area is purse seine and beach seine.

ARTICLE 3. APPLICABILITY OF REGULATIONS.

5 AAC 40.100. Applicability of regulations

The provisions of 5 AAC 40.110 - 5 AAC 40.990 govern the permit application process for private nonprofit salmon hatcheries, and establish guidelines and procedures regarding the operation of permitted hatcheries.

ARTICLE 4. PERMIT APPLICATION PROCEDURES

5 AAC 40.110. Authority

The commissioner will review and take action on each application for a private nonprofit salmon hatchery.

5 AAC 40.120. Pre-application assistance

An applicant may request assistance in preparing an application or conducting related activities. The PNP coordinator, or the department area management biologist, will provide assistance to the extent practicable.

5 AAC 40.130. Management feasibility analysis

(a) The department will assist an applicant by preparing a management feasibility analysis for each proposed hatchery site. The analysis will be completed before submittal of an application for a private nonprofit salmon hatchery permit. An analysis is based on information provided by the applicant to the PNP coordinator, including

(1) the location of the facility;
(2) the species desired for hatchery production;
(3) the run timing, by species;
(4) the incubation and rearing levels desired during the first reproductive cycle, by species; and
(5) the incubation and rearing levels desired at full capacity, by species.

(b) Not later than 90 days after the PNP coordinator receives from the applicant the information described in (a) of this section, the department will complete a management feasibility analysis of the proposed hatchery. A management feasibility analysis includes, at a minimum, the following information:
(1) an estimate of potential contributions to the common property fishery;
(2) potential size and location of a special harvest area;
(3) special management considerations or the need for additional studies;
(4) potential broodstock sources;
(5) an assessment of production potentials for each species; and
(6) additional factors considered by the department to be relevant to the proposed hatchery operation.

5 AAC 40.140. Permit application
An application for a hatchery permit must be submitted to the PNP coordinator. The PNP coordinator will provide an application form upon request. The application must include a completed management feasibility analysis. The applicant shall provide, in the permit application, detailed statements of operational goals, objectives, and plans.

5 AAC 40.150. Application fee
An application must be accompanied by the fee required by AS 16.10.400.

5 AAC 40.160. Acceptance determination
(a) The PNP coordinator shall review a submitted application for completeness and determine whether it includes the completed management feasibility analysis described in 5 AAC 40.130(b). If the PNP coordinator determines that the application form is not complete or does not contain a completed management feasibility analysis, the PNP coordinator shall request, in writing, the necessary information from the applicant to complete the application. An application will not be accepted until the PNP coordinator determines that the application is complete and that it contains a completed management feasibility analysis.

(b) The 60-day time period for processing an application under 5 AAC 40.190, Schedule A, will begin when the application is accepted under this section.

5 AAC 40.170. Regional planning team review
(a) The appropriate regional planning team, as established under 5 AAC 40.300, shall review each application to determine if the proposed hatchery is compatible with the appropriate regional comprehensive salmon plan. The regional planning team shall use the following application review criteria:
   (1) the contribution the proposed hatchery would make to the common property fishery;
   (2) the provisions for protection of the naturally occurring stocks from any adverse effects which may originate from the proposed hatchery;
   (3) the compatibility of the proposed hatchery with the goals and objectives of the comprehensive salmon plan for the region; and
   (4) whether the proposed hatchery would make the best use of the site's potential to benefit the common property fishery.

(b) An applicant may review the regional planning team determination and comment on it by letter to the commissioner.
5 AAC 40.180. Additional information

(a) If, after an application has been accepted by the PNP coordinator, the PNP coordinator determines that more information is necessary in order for the department to evaluate the biological, management, and economic feasibility of the proposed hatchery, the PNP coordinator shall request, in writing, the necessary information from the applicant.

(b) If the requested information is not received by the PNP coordinator within 90 days of the date of the written request, the application will be rejected. Nothing in this subsection is intended to preclude an applicant from submitting another application at a later date if that application complies with 5 AAC 40.140 and includes the application fee required under 5 AAC 40.150.

5 AAC 40.190. Review and approval schedules

(a) Except as provided in 5 AAC 40.180, the application review and approval process is set out in Schedules A and B in (b) and (c) of this section.

(b) Hatchery Permit Application Review - Schedule A. The time frame for processing an application under Schedule A is 60 days, which is the fastest period that an application can be processed if no problems are encountered.

   Applicant submits application to PNP coordinator.

   ➢ PNP coordinator reviews the application for completeness. If the application is incomplete, or does not contain a completed management feasibility analysis, PNP coordinator requests the necessary information from applicant.

   ➢ After application is accepted, the commercial fisheries management and development (CFMD) division technical staff reviews application, submits comments to the PNP coordinator, or requests additional information from the PNP coordinator.

   ➢ Department management and regional staff reviews application, submits comments to the PNP coordinator, or requests additional information from the PNP coordinator.

   ➢ The regional planning team reviews the application to determine if proposal is compatible with the regional comprehensive salmon plan; sends recommendation to the commissioner.

   ➢ Basic Management Plan (BMP) is drafted by department area staff, applicant, and the PNP coordinator.

   ➢ The application and BMP are completed. The department schedules a public hearing (AS 16.10.410 Hearing Before Permit Issuance and 5 AAC 40.820 Basic Management Plans).

(c) Issuance of Private Nonprofit Hatchery Permit - Schedule B. The time period for processing an application under Schedule B is 75 days.

   Completed application with Basic Management Plan (BMP): 30 day notice published for public hearing on the completed application and BMP.

   ➢ Public hearing held (AS 16.10410 Hearing Before Permit Issuance, 5 AAC 40.210 Public Hearing and 5 AAC 40.820 Basic Management Plans). Public hearing process concludes 10 days after oral hearing to allow the department to respond to specific objections.

   ➢ BMP finalized by applicant and PNP coordinator after competition of public hearing.

(d) If additional information is requested from the applicant by the PNP coordinator at any time during the review and approval process set out in 5 AAC 40.190, Schedule A, the remainder of
the 60-day time period will be suspended until the requested information is received by the PNP coordinator and determined to be sufficient.

5 AAC 40.200. Completeness determination Repealed.

5 AAC 40.210. Public hearing

(a) The department will conduct a public hearing on each completed permit application. The commissioner will give notice of public hearing at any time after acceptance of an application. The notice will be given at least 25 days before a public hearing, and the notice will, in the commissioner's discretion, be given before the completion of the draft basic management plan. The hearing will be held under the following sequential procedures:
   (1) the commissioner will make an introductory statement;
   (2) the applicant shall make a presentation of the proposed hatchery plans, describing its location, incubation plans, the capacity of the facility, the donor stock source, and other relevant facts that may be of interest to the department or the public;
   (3) the department will present the draft of the basic management plan for the proposed facility, including a presentation on fish culture aspects, production considerations, and a presentation of the management section of the basic management plan by the local commercial fisheries and sport fisheries area management biologist; and
   (4) the commissioner will open the floor for public testimony and questions on all aspects of the proposed facility.

(b) The department will respond in writing within 10 working days to any specific objections offered by a member of the public at the hearing.

(c) The department will accept written comments for 15 days after the hearing, and will respond in writing, within 10 working days after receipt, to any specific objections received within that time. The public hearing process concludes 15 days after the oral hearing is held.

5 AAC 40.220. Review and determination

(a) The commissioner will review the following information, compiled by the PNP coordinator, before rendering a decision on an application:
   (1) recommendations from the regional planning team;
   (2) recommendations resulting from the department's review of the application; and
   (3) the results of the public hearing regarding the proposed facility.

(b) The commissioner will render a decision on the completed application, and notify the applicant in writing, within 75 calendar days after an application is complete. The commissioner's decision will be based on the following considerations:
   (1) The physical and environmental nature of the proposed location must be suitable for enhancing runs or for establishing new runs, and must have the potential to make a reasonable contribution to the common property fishery. The proposed hatchery returns may not unreasonably or adversely affect management of natural stocks. The returns for the proposed hatchery may not require significant alterations in traditional fishery time, area, gear type, or user group allocations.
   (2) The operation of the proposed hatchery must make the best use of the site's potential, to benefit the common property fishery. In order to achieve optimum public benefit from the state's private nonprofit hatchery program and ensure that the proposed hatchery is in the best
interests of the public, enhancement sites must be developed to their fullest potential, with
consideration to appropriate species and technological use of the site.
(3) The proximity of the proposed hatchery to an area that will allow for a segregated harvest
of hatchery stocks without adversely affecting natural stocks is an important factor. The
harvest area of the proposed hatchery must be of sufficient size to allow harvest of hatchery
returns, and may not otherwise limit harvests to a location where fish would not be expected
to be of sufficient quality to satisfy the requirements of AS 16.10.450 regarding fish for
human consumption.
(4) The proposed hatchery must have available donor sources that are approvable under 5
AAC 41. Proposed donor sources for hatchery broodstock must be able to meet necessary
first-cycle egg take levels under department removal schedules.
(5) The proposed hatchery must have a secured water source and delivery system that is
adequate for the proposed levels of incubation and rearing. The security of the water source
must be demonstrated through the appropriate water use permits, annual hydrographs,
chemical analysis of the water source, and any provisions necessary for recycling and
derepuration.
(6) The proposed hatchery facility and water intake structures may not be located in streams
or reaches of streams that have dynamic flooding characteristics or that have significant and
rapid bedload transport that may endanger water intake galleries, weirs, the facility, or the
reliability of the water source for the proposed hatchery.
(7) The proposed hatchery must allow for the maintenance of adequate instream flows below
the hatchery or any hatchery-related facilities, such as water intake structures, to support
natural stocks.
(8) The proposed hatchery plans and staffing plans must demonstrate a reasonable level of
operational feasibility and an acceptable degree of potential success.
(c) If the application is approved, the commissioner will, as a condition of the permit, require the
permit holder to provide for suitable fish-passage facilities in order to accommodate acceptable
upstream and downstream passage of fish, if passage facilities are determined by the department
to be necessary.

5 AAC 40.230. Reconsideration
An application for a private nonprofit salmon hatchery permit which has been denied by the
commissioner will, in the commissioner's discretion, be reconsidered if the applicant provides
new or additional information that may have altered the original decision.

5 AAC 40.240. Permit revocation
(a) The commissioner will revoke a hatchery permit if the commissioner determines that at the
end of five years from the date the permit was issued, the permit holder has not undertaken
substantial ongoing work to construct and operate a hatchery facility in compliance with the
terms and conditions specified in the permit and the facility development schedule specified in
the basic management plan required by 5 AAC 40.820.
(b) To initiate revocation of a permit under this section, the PNP coordinator shall notify the
permit holder, in writing, of the proposed revocation. The permit holder may have 30 days from
the date of the notice of the proposed revocation to submit information to the commissioner to
show that the permit holder has undertaken substantial ongoing work to construct and operate a
hatchery facility in compliance with the terms and conditions specified in the permit and the facility development schedule specified in the basic management plan required by 5 AAC 40.820.

(c) The PNP coordinator shall provide written notice of the proposed revocation of the hatchery permit to the regional planning team for the area in which the proposed hatchery is permitted. The regional planning team may have 90 days from the date of the notice to review the proposed revocation and submit comments on it to the commissioner.

ARTICLE 5. REGIONAL COMPREHENSIVE PLANNING

5 AAC 40.300. Regional planning teams in general

The commissioner will establish regions and regional planning teams for the primary purpose of developing comprehensive salmon plans for various regions of the state. The provisions of 5 AAC 40.300 - 5 AAC 40.370 govern the structure and functions of each regional planning team and the development of a comprehensive salmon plan for each region.

5 AAC 40.310. Regional planning team composition

(a) Each regional planning team consists of six members. Three are department personnel appointed by the commissioner, and three are appointed by the board of directors of the appropriate regional aquaculture association, qualified under AS 16.10.380.

(b) The commissioner will, in his or her discretion, request the involvement of representatives of federal and state agencies to assist a regional planning team if their contribution will aid in the development of the regional comprehensive plan.

5 AAC 40.320. Chairman of regional planning team

(a) Each regional planning team shall elect a chairman to serve at the pleasure of the team.

(b) The chairman or his delegate shall

   (1) conduct regional planning team meetings, including recording of proceedings, and employing agreed-upon rules of order;
   (2) set the agenda and meeting time and place for regional planning team meetings; and
   (3) coordinate regional planning team staff in the accomplishment of tasks assigned to the chairman by the team, including
      (A) providing the commissioner with team communications requiring commissioner review or approval;
      (B) contacting members to determine who will be attending the next scheduled meeting; and
      (C) preparing minutes of the previous meeting.

5 AAC 40.330. Quorum and voting

A regional planning team may not transact business without a simple majority of four members. Voting procedures may be established at the discretion of the membership.

5 AAC 40.340. Regional planning team responsibility
Each regional planning team shall prepare a regional comprehensive salmon plan, for the appropriate region, to rehabilitate natural stocks and supplement natural production, with provisions for both public and private nonprofit hatcheries. Each region planning team shall consider the needs of all user groups and ensure that the public has opportunity to participate in the development of the comprehensive salmon plan. Each regional comprehensive plan must define regional production goals by species, area, and time.

5 AAC 40.345. Southeast Alaska

In accordance with the Southeastern Alaska Area Enhanced Salmon Allocation Management Plan in 5 AAC 33.364, the joint Northern and Southern Southeast Regional Planning Team shall make annual recommendations to the commissioner on production changes to salmon enhancement projects to comply with allocation plans.

5 AAC 40.350. Public notice

The chair of the regional planning team, or the chair's designee, shall give two weeks' notice, on the Alaska Online Public Notice System (AS 44.62.175), of a planning team meeting. Additionally the chair may use alternative methods to provide notice to the public that are specific to regional circumstances. The alternative methods may include department advisory announcements, publications in a newspaper of general circulation, website postings, electronic mail distribution lists, and radio or television advertisements.

5 AAC 40.360. Public involvement

Each regional planning team shall encourage public participation during all stages of the development and review of regional comprehensive salmon plans.

5 AAC 40.370. Plan approval

(a) A draft regional comprehensive salmon plan must be submitted to the PNP coordinator for department review and comment.

(b) The draft regional comprehensive salmon plan must be distributed for public review.

(c) The regional planning team shall respond to comments received as a result of these reviews, and may incorporate them in the final draft of the regional comprehensive salmon plan.

(d) The regional planning team shall submit a final draft of the regional comprehensive salmon plan to the commissioner for review and approval.

ARTICLE 8. GENERAL PROVISIONS

5 AAC 40.800. Nontransferability of permits

A hatchery permit is not transferable. Another person wishing to obtain a permit to operate a hatchery at a location which is already a currently permitted site, shall submit an application, which is subject to the same application review schedule as outlined in 5 AAC 40.110 - 5 AAC 40.230. If the assets, or control, of a private nonprofit corporation that holds a hatchery are transferred to a degree considered substantial by the department, the corporation shall submit a new application for a hatchery permit.
5 AAC 40.810. Preference right

(a) A preference right under AS 16.10.400 applies to a potential hatchery site, and does not constitute an approval of a permit.

(b) As part of the pre-application assistance described in 5 AAC 40.120, the PNP coordinator will inform the applicant whether a qualified regional association or an approved local nonprofit hatchery corporation has an established preference right to the identified site.

(c) The PNP coordinator will notify the appropriate qualified regional association, by certified letter, of an applicant's intent to apply for a hatchery site if that site has been identified as a potential hatchery site in the comprehensive plan for the region.

(d) Within three weeks after receiving the notification, the qualified regional association may respond, by certified letter, to the PNP coordinator to establish a preference right at that location.

(e) If the qualified regional association exercises a preference right for that site, the association may, within one year, submit an application for acceptance. If an application is not submitted and accepted within one year, the qualified regional association relinquishes its preference right to that location.

(f) A local nonprofit hatchery corporation is eligible to establish a preference right to a proposed site if the corporation receives approval from the qualified regional association. That preference right is identical to the one which can be established by a qualified regional association.

(g) A local nonprofit hatchery corporation seeking regional association approval shall send a notice, by certified letter, to the PNP coordinator at the same time that a certified letter requesting approval is sent to the qualified regional association.

(h) All applicants for a permit, including local nonprofit corporations, local nonprofit hatchery corporations approved by the qualified regional associations, shall follow the application procedures outlined in 5 AAC 40.110 - 5 AAC 40.230.

5 AAC 40.820. Basic management plans

(a) A hatchery operator shall manage the hatchery and its salmon returns in accordance with a basic management plan approved by the commissioner. Before the public hearing held under 5 AAC 40.210 on the proposed hatchery, department staff, in conjunction with the applicant, shall develop a draft basic management plan that includes a facility development schedule of no more than five years. Department staff and the applicant shall present the draft basic management plan and facility development schedule at the public hearing and shall make copies available for public review and comment at the hearing.

(b) If, following the public hearing, the commissioner decides to issue a permit for the proposed hatchery, department staff shall finalize the basic management plan and facility development schedule after all comments have been considered. The final basic management plan, which includes a facility development schedule, describes the conditions under which the permit will be implemented, and is an addendum to the permit.
5 AAC 40.830. Hatchery inspection

The permit holder shall notify the PNP coordinator when construction of the hatchery has been completed and the facility is ready for operation. The facility must be inspected and approved by the department before the permit holder may start operations.

5 AAC 40.840. Annual management plans

(a) Beginning with the first year of operation of the hatchery, and on an annual basis after that, the department will prepare, in conjunction with the permit holder, an annual management plan to guide and condition hatchery operations.

(b) An annual management plan must organize and guide the hatchery's operations regarding production goals, broodstock management, and harvest management of hatchery returns. The plan must be developed with consideration of the hatchery's production cycle. The production cycle begins with adult returns, that lead to egg takes and end with fish releases. Action may be taken outside of the management plan if allowed under the hatchery permit or modified by emergency order.

(c) The PNP coordinator shall organize the appropriate department staff and the permit holder in preparing a draft annual management plan. The appropriate regional planning team and the Department of Commerce, Community, and Economic Development may also review the plan. The operator shall submit a draft plan to the department not later than April 1 of each year.

5 AAC 40.850. Notice of permit alteration

(a) A hatchery permit holder may propose alteration of the permit, based on accumulated experience and changing conditions. The permit holder shall request, on a form provided by the PNP coordinator, a permit alteration for a proposed modification to the permit or change in the basic management plan for the hatchery.

(b) Requests for permit alterations must be received by the PNP coordinator, on the prescribed form, no later than February 15 of the calendar year that the proposed alteration is to occur. The commissioner will, in his or her discretion, extend the deadline for submittal of a permit alteration request, on a case-by-case basis, if the request is justified by extraordinary circumstances or emergency.

(c) The regional planning team may, if the commissioner so requests, review and make a recommendation to the commissioner on the permit alteration request.

(d) In reviewing the request, the commissioner will, in his or her discretion, consider past management practices and fish culture procedures associated with the request, the past performance of the hatchery, the recommendation of the regional planning team, and any additional information deemed necessary.

(e) Issuance of a notice of permit alteration by the department modifies the hatchery permit.

5 AAC 40.860. Performance review

(a) Based upon a department internal review, the PNP coordinator will notify the commissioner if a hatchery operator's performance is inadequate, according to the conditions under which the permit was granted.
(b) The commissioner will, in his or her discretion, consider a permit alteration, suspension, or revocation in accordance with AS 16.10.430. If the commissioner decides to consider a permit alteration, suspension, or revocation, the coordinator will notify the appropriate regional planning team. The regional planning team may make a written recommendation to the commissioner on the proposed alteration, suspension, or revocation. The regional planning team shall use the following performance standards in their review, evaluation, and recommendation to the commissioner, including whether:

1. survivals in the hatchery are more than the minimum standards described in (c) of this section for a period of greater than four years;
2. the transport of broodstock from wild sources does not continue for longer than one cycle of the particular species without reevaluation of hatchery operations;
3. the hatchery contributes to the common property fishery;
4. the hatchery does not significantly impact wild stocks in a negative manner;
5. the hatchery fulfills the production objectives described in the terms of the hatchery permit; and
6. there are any mitigating circumstances which were beyond the control of the hatchery operator.

(c) Minimum hatchery survival standards are as follows:

<table>
<thead>
<tr>
<th>Survival for this stage</th>
<th>Cumulative Survival</th>
</tr>
</thead>
<tbody>
<tr>
<td>Captured broodstock to egg take</td>
<td>70%</td>
</tr>
<tr>
<td>Green egg to eyed egg</td>
<td>80%</td>
</tr>
<tr>
<td>Eyed egg to emergent fry</td>
<td>85%</td>
</tr>
<tr>
<td>Emergent to fed fry¹</td>
<td>90%</td>
</tr>
<tr>
<td>Fed fry to fingerling²</td>
<td>90%</td>
</tr>
<tr>
<td>Fingerling to smolt</td>
<td>75%</td>
</tr>
</tbody>
</table>

¹ Fry achieving up to 25% weight gain from swim-up.
² Fry achieving substantially more than 25% weight gain from swim-up.

(Eff. 3/31/85, Register 93)

5 AAC 40.870. Reporting of mortality

(a) If, in any of the hatchery operations during the year, an event occurs which results in fish or egg mortalities above the minimum hatchery survival standards defined in 5 AAC 40.860, the operator shall inform the PNP coordinator immediately and shall submit an incident report, which must include

1. a description of the nature of the incident;
2. the cause of the incident;
3. the time of the incident;
4. the effect on the stocks;
5. corrective action taken and proposed measures to eradicate future problems; and
6. an assessment of the general impact on the program.

(b) The operator shall complete and submit the mortality incident report to the PNP coordinator within 15 days after the incident occurs.
5 AAC 40.880. Surplus salmon eggs
(a) Salmon eggs are surplus if the following conditions are met:
(1) the hatchery operator no longer needs to return to the indigenous stocks in order to develop the broodstock for the hatchery; and
(2) broodstock needs for the hatchery, as identified in the annual management plan, must have been achieved through salmon returning to the facility.
(b) A proposed sale of surplus salmon eggs by a permit holder must be identified in the annual management plan for the facility.
(c) A permit holder shall obtain a permit alteration from the commissioner if the eggs taken for sale purposes are to be incubated at the facility before transferral to the recipient facility.
(d) The appropriate fish-transport permit must be approved by the commissioner before any surplus salmon eggs are transferred from the facility to the recipient facility.

5 AAC 40.890. Information
The department will exchange information with the Department of Commerce, Community, and Economic Development, including copies of annual reports required to be submitted under AS 16.10.470, in order to ensure consistency between reports submitted by the permit holder to both agencies.

5 AAC 40.990. Definitions In this chapter,
(1) "commissioner" means the commissioner of the Department of Fish and Game or his designee;
(2) "common property fishery" means any fishery in which the general public is allowed to harvest fish subject to state and federal law;
(3) "completed application" means a final application that has been accepted by the commissioner and that contains a draft basic management plan for the operation of the facility and a completed management feasibility analysis;
(4) "department" means the Alaska Department of Fish and Game;
(5) "enhancement" means a strategy designed to supplement allowable harvest of natural freshwater and anadromous species; enhancement activities are primarily designed to implement artificial or semi-artificial production systems or to increase the amount of productive natural habitat;
(6) "escapement" means all fish that escape the common property fishery and includes two categories of escapement:
   (A) the number of broodstock or spawners required to perpetuate and achieve natural, semi-artificial, and artificial production objectives; and
   (B) the number of hatchery-produced fish taken for the hatchery harvest requirement, to be used to pay for the hatchery's reasonable operating and capital costs, at current market prices for the species involved;
(7) "permit" means a private nonprofit salmon hatchery permit, issued by the commissioner, which has not been suspended or revoked;
(8) "PNP coordinator" means the manager of the private nonprofit hatchery program within the department;

(9) "regional comprehensive salmon plan" is a document that integrates and assembles all relevant information regarding the development and protection of the salmon resource, for a specific long-range period of time, into a strategic plan for an established region of the state;

(10) "rehabilitation" means a strategy directed toward restoring debilitated natural stocks to optimum production levels; rehabilitation strategies consist of regulatory and nonregulatory activities; nonregulatory activities are directed at increasing the survival of debilitated broodstock and include removal of migration inhibitors, stream restoration, incubation and subsequent planting of eyed eggs, fry and fingerlings, lake fertilization and predator-competitor control;

(11) "salmon stock" means a population of salmon of a single species identified with a specific water system or portion of a water system, which share a common spawning period;

(12) "special harvest area" means an area designated by the commissioner or the Board of Fisheries where hatchery returns are to be harvested by the hatchery operators, and, in some situations by the common property fishery;

(13) "terminal harvest area" means an area designated by the commissioner, Board of Fisheries regulation, or department emergency order where hatchery returns have achieved a reasonable degree of segregation from naturally occurring stocks and may be harvested by the common property fishery without adverse effects;

(14) "broodstock" means sexually mature fish from which eggs or milt have been or will be extracted for use of the gametes in artificial propagation.

CHAPTER 41. COLLECTION, TRANSPORTATION, POSSESSION, PROPAGATION, OR RELEASE OF AQUATIC ORGANISMS; AQUATIC FARMING

ARTICLE 1. SCOPE OF REGULATIONS.

5 AAC 41.001. Application of this chapter

The provisions of this chapter govern the collection, transportation, possession, propagation, or release of aquatic organisms transplanted for or cultivated for human consumption or sport fishing purposes, or as part of a program for scientific, educational, or propagative purposes; the collection, transportation, possession, propagation, or release of aquatic organisms for conservation purposes; and the transportation and possession of aquatic organisms for commercial purposes including aquatic farming, aquarium stocking, and guided sport ecotourism fishing. Unless specifically provided, the provisions of this chapter do not apply to the cultivation of ornamental fish.

ARTICLE 2. PERMIT SYSTEM ESTABLISHED.

5 AAC 41.005. Permit required

(a) Except as otherwise provided, a person may not collect, transport, possess, propagate, export from the state, or release into the waters or the lands of the state, any aquatic organism, unless
the person holds a fish transport or aquatic resource permit issued by the commissioner, and the person is in compliance with all conditions of the permit and the provisions of this chapter. A fish transport or aquatic resource permit will be issued for a fixed term subject to the provisions of this section. Notwithstanding the provisions of this subsection, and except as restricted under AS 16.10.240, a licensed processor may export live shellfish out of the waters of the state for human consumption without a fish transport permit only after complying with all applicable reporting requirements.

(b) A permit issued under this chapter authorizes only that operation specified in the permit and is not transferrable. Additional personnel may engage in activities authorized by the permit only after written approval by the department. Any change of species, stock, or location of permitted activities requires a new permit. Any other change requires an amendment to the permit. Possession of a permit does not relieve the permit holder of the responsibility for securing any other local, state, or federal permits that may be required.

(c) If the commissioner determines that an applicant made a false statement on an application, affidavit, permit, or report required by this chapter, or omitted material information, the commissioner may suspend or revoke the permit, and deny future permit applications submitted by the applicant.

(d) Notwithstanding the expiration, termination, or suspension of a permit issued under this chapter, each permit holder is responsible for the obligations arising under the terms and conditions of the permit, and under the provisions of this chapter.

(e) Unless otherwise provided in regulation or by emergency order, a permit is not required for transportation of aquatic organisms harvested or caught under sport, personal use, subsistence, or commercial regulations from the place of harvest or capture to a place within the state for processing, or commercially caught or harvested aquatic organisms to a place within the state for sale.

5 AAC 41.010. Uniform application procedures for fish transport and aquatic resource permits

(a) Each applicant for a fish transport or aquatic resource permit shall submit, on a form provided by the department, the following information:

(1) identification of each species and location of the stock to be collected, transported, possessed, propagated, or released;
(2) the destination of the transported aquatic organisms and the release site;
(3) the number of aquatic organisms and their life history stage or age;
(4) a descriptive history of previous transport of the stock and related activities;
(5) a statement on the health or condition of the aquatic organisms, including a disease history of the stock, a disease history of the hatchery or rearing facilities through which they may have passed, and any previous disease treatments or vaccinations. If the disease history is incomplete or unavailable, a broodstock inspection and certification under 5 AAC 41.020 may be required;
(6) isolation measures planned to control disease during transport and holding, including a description of containers, depuration measures, and plans for disinfection;
(7) repealed 1/10/2018;
(8) the source of water for holding and rearing, and proposed effluent discharge location;
(9) identification and status of stocks in the area of collection, holding, and release, including a statement of expected interactions with other stocks in these areas; 
(10) a description of the methods and the expected dates of collection, transport, holding, or release; 
(11) the purpose and expected benefits of the activity; and 
(12) evaluation plans.

(b) A completed application must be submitted to the department as specified on the application form.

(c) If the commissioner determines that an application is incomplete and that further information is necessary, the department will return the application to the applicant with a description of the deficient information.

(d) Repealed 1/10/2018.

5 AAC 41.020. Inspection for disease of broodstock

If the disease history of the broodstock is unavailable or incomplete and the department requires under 5 AAC 41.010(a)(5), an inspection of the broodstock to detect disease must be scheduled by the applicant and conducted by the appropriate fish pathology section of the department's division of commercial fisheries, or by a person designated by the fish pathology section. The applicant must submit samples of the broodstock as directed by the fish pathology section for the purpose of inspection. The applicant will receive a certification from the fish pathology section upon successful completion of the inspection.

5 AAC 41.030. Permit issuance, suspension, denial, or revocation

For fish transport or aquatic resource permits issued under this chapter,

(1) the commissioner will issue a permit if the commissioner determines that the proposed activity will not adversely affect the continued health and perpetuation of native, wild, or enhanced stocks of aquatic organisms, fisheries, and research, management, monitoring, or enforcement activities; 

(2) the commissioner will issue a permit with terms and conditions attached if the commissioner determines that the terms and conditions are necessary to protect the continued health and perpetuation of native, wild, or enhanced stocks of aquatic organisms, fisheries, and research, management, monitoring, or enforcement activities; 

(3) the commissioner will deny a permit, or an amendment to a permit, if the applicant's proposed plans, methods, or specifications are not adequate to protect the continued health and perpetuation of native, wild, or enhanced stocks of aquatic organisms, fisheries, and research, management, monitoring, or enforcement activities. Written notice of denial shall be given to the applicant, including the reasons for denial.

(4) the commissioner will approve, condition, or deny a permit not later than 45 days after a completed application as specified in 5 AAC 41.010 has been received in the appropriate office. The commissioner may extend the review period for complex or large projects.

(5) the commissioner shall revoke or suspend the permit, or particular provisions of the permit including amendments, if the commissioner finds
(A) on the basis of new information or changed circumstances, that the permitted activity will adversely affect the continued health and perpetuation of native, wild, or enhanced stocks of aquatic organisms, fisheries, and research, management, monitoring, or enforcement activities; or
(B) the permit holder has failed to comply with permit terms or the provisions of this chapter;

(6) the commissioner may reconsider a denial, suspension, or revocation of a permit if the applicant submits in writing new or additional information that may have altered the original decision.

5 AAC 41.040. Amendments to the permit

(a) A permit holder may request amendment of a fish transport or aquatic resource permit by submitting, in writing to the department office where the permit was issued, an amended plan and a statement explaining why the amendment is necessary.

(b) The commissioner will issue an amendment to the permit upon a determination made under 5 AAC 41.030(1) or (2). The commissioner will approve, condition, or deny a request for amendment no later than 30 days after receipt of the request.

(c) The commissioner may alter or amend permit conditions at any time if additional information, unforeseen changes, or changed circumstances affect the adequacy of permit terms and conditions.

(d) Amendments approved by the commissioner become effective when received by the permit holder, or at a later date specified in the amendment. Unless otherwise specified, amendments remain valid for the duration of the permit and must be attached to the original permit.

5 AAC 41.050. Permit conditions

The commissioner may prescribe conditions on a fish transport or aquatic resource permit to control the occurrence of disease, genetic change, or other disturbances of biological origin affecting native, wild, or enhanced stocks, or to minimize effects on fisheries or other uses of aquatic resources, including research, management, monitoring, or enforcement activities. These conditions may include: designation of broodstock and release locations; methods of collection, transport, holding, or release; quarantine and depuration requirements and procedures; disease inspections; disposal of wastes and effluents; timing of transportation and release; reporting requirements; and other measures necessary to achieve the purposes of this chapter.

5 AAC 41.060. Retention of permit for inspection

(a) After issuance, a copy of the fish transport or aquatic resource permit including any amendments must be retained by the permit holder and be made available upon request for inspection by a representative of the department or a law enforcement officer of the Department of Public Safety. A copy of the permit must also be available at all field collection and project sites, and accompany the authorized transport of aquatic organisms.

(b) For the purposes of inspecting and monitoring compliance with the terms of the permit or the requirements of this chapter, each permit holder shall give authorized representatives of the department, and law enforcement officers of the Department of Public Safety, free and unobstructed access at all times to permit sites. Each permit holder shall give such assistance and
furnish information the representative or law enforcement officer may reasonably require for monitoring and inspection.

ARTICLE 3. GENERAL PROVISIONS

5 AAC 41.070. Prohibitions on importation and release of live fish

(a) Except as provided in (b) - (d) of this section, no person may import any live fish into the state for purposes of stocking or rearing in the waters or the lands of the state.

(b) Live oysters native to and originating from the Pacific Coast of North America may be imported for aquaculture purposes, under a stock transport permit required by this chapter, and may be released into the waters of the state only if the
   (1) broodstock is derived from oysters commercially cultured on the Pacific Coast of North America through three or more generations; and
   (2) disease history or an inspection indicates no incidence of disease that is not indigenous to the state or is not considered to be a risk to indigenous stocks, and oyster health or marketability.

(c) Ornamental fish not raised for human consumption or sport fishing purposes may be imported into the state, but may not be reared in or released into the waters or the lands of the state. Fish wastes and waste water from ornamental fish may not be released directly into the waters of the state.

(d) Weathervane scallops originating from wild stocks or cultured stocks in the Southeastern Alaska and Yakutat Areas may be imported for aquaculture purposes and may be released only into the waters of the Southeastern Alaska and Yakutat Areas under a stock transport permit required by this chapter only if the
   (1) broodstock was taken under the provisions of a stock acquisition permit issued by the department;
   (2) broodstock was certified by the department's fish pathology section before transport out of the state;
   (3) broodstock was held continuously in a department-approved isolation facility;
   (4) weathervane scallops proposed for import have been held continuously in a department-approved isolation facility before import into the state;
   (5) disease history, or an inspection, of the weathervane scallops proposed for import indicates no incidence of a disease of transport significance.

(e) A person may not import, own, possess, propagate, transport, distribute, release, purchase, or sell within this state
   (1) any species listed under 50 C.F.R. 16.13, as revised as of October 31, 2016, as an injurious live, or dead fish, mollusk, crustacean, or their eggs; and
   (2) any species listed under 50 C.F.R. 16.14, as revised as of January 28, 2016, as injurious live or dead amphibians or their eggs.

(f) Except as otherwise provided in this chapter, a person may not possess, import, propagate, transport, release, purchase, or sell within this state a banned invasive species classified under 5 AAC 41.075.
5 AAC 41.075. Classification of banned invasive species

(a) In consultation with the department, the board will classify certain nonnative species as banned invasive species under this section.

(b) When considering proposals to classify a certain nonnative species as a banned invasive species, or removing a species from the list of banned invasive species specified in (c) of this section, the board will consider and determine the potential of the species to
   (1) survive, grow, reproduce, and establish reproductive populations in this state;
   (2) cause a genetic alteration of a species indigenous to this state;
   (3) compete for food, habitat, and resources with a species indigenous to this state;
   (4) degrade or make uninhabitable habitats used by species indigenous to this state;
   (5) transmit a disease to a species indigenous to this state or to humans;
   (6) threaten the health or population of a species indigenous to this state or to humans;
   (7) cause economic or environmental harm.

(c) The following species are classified as banned invasive species:

<table>
<thead>
<tr>
<th>Common Name</th>
<th>Scientific Name</th>

</table>

(d) In this section, "banned invasive species" includes any part of an organism, including reproductive or genetic material, at any stage of its life cycle. Authority: AS 16.05.050 AS 16.05.251

5 AAC 41.080. Reporting and control of fish diseases at egg-take sites, hatcheries, and rearing facilities

(a) The requirements of this section apply to all public and private egg-take programs, fish hatcheries, and fish rearing facilities in the state.

(b) Within 24 hours of taking and fertilizing live fish eggs or transporting live fish eggs between watersheds, all eggs must be treated, for at least 10 minutes, with an iodine solution of at least 100 parts per million of active iodine ingredient, with pH at least 6.0 or greater, or in a manner...
approved by the fish pathology section of the department. This requirement does not apply to shellfish eggs, and the commissioner may also exempt eggs taken at large-scale pink and chum salmon facilities where the operational history for the preceding five years shows that disease has not been a problem in returning stocks of fish.

(c) As determined by the commissioner, each fish hatchery or fish rearing facility may be inspected by the department's fish pathology section once every other year or less depending on the suitability of the fish stock disease histories. The commissioner may require and conduct additional inspections if the disease history of the stock or facility is incomplete, or if the disease history or current condition of the stock evidences incidence of disease.

(d) The occurrence of any of the following pathogens or diseases of fish must immediately be reported to the department's fish pathology section:

(1) Finfish Pathogen Categories:
   (A) Class I - Pathogens of Critical Concern.
      (i) Piscirickettsia;
      (ii) VHSV - Viral hemorrhagic septicemia virus (genotypes I - III and IVb);
      (iii) IPNV - infectious pancreatic necrosis virus;
      (iv) OMV - Oncorhynchus masou virus;
      (v) Herpesvirus salmonis;
      (vi) Whirling disease (Myxobolus cerebralis);
      (vii) ISAV - Infectious salmon anemia virus;
   (B) Class II - Endemic Pathogens of Concern:
      (i) IHNV - Infectious hematopoietic necrosis virus;
      (ii) VHSV - Viral hemorrhagic septicemia virus (type IVa);
      (iii) BKD - Bacterial kidney disease (Renibacterium salmoninarum);
      (iv) Furunculosis (Aeromonas salmonicida);
      (v) ERM - Enteric redmouth (Yersinia ruckeri);
      (vi) ICH - Ichthyophthiriasis (Ichthyophthirius multifiliis);
   (C) Class III - Nuisance Pathogens:
      (i) Vibriosis (marine Vibrio (Listonella) anguillarum, V. ordalii, V. alginolyticus);
      (ii) Cold water disease (Flavobacterium psychrophilum);
      (iii) Columnaris (Flavobacterium columnare);
      (iv) Trichodiniiasis (Trichodina, etc.);
      (v) Ichthyobodiasis (Ichthyobodo = Costia);
      (vi) Hexamitiasis (Hexamita);
      (vii) Lymphocystis Virus;
      (viii) Helminth diseases;
      (ix) Fungal diseases (Saprolegnia sp.; Phoma herbarum);
      (x) Motile bacterial septicemias (Aeromonas hydrophila, Pseudomonas sp.);
   (D) Class IV - Uncategorized Pathogens:
      (i) VENV - Viral erythrocytic necrosis virus;
      (ii) PKD - Proliferative kidney disease (Tetracapsula bryosalmonae);
      (iii) Vibrio salmonicida (cold water marine Hitra);
      (iv) Loma sp. (Microsporidian); (v) Reovirus;
      (vi) Paramyxovirus;
      (vii) Aquabirnavirus;
(viii) Erythrocytic Inclusion Body Syndrome (EIBS) virus;
(ix) Ceratomyxa shasta (Myxosporian);
(2) Emerging Finfish Pathogens not defined in Classes I, II, III, or IV, including non-salmonid agents;
(3) Shellfish Pathogen Categories:
(A) Class I - Oyster Pathogens - Critical Concern:
(i) European Hemocyte and Gill Iridoviruses (HIVD, GNVD);
(ii) Oyster Herpesvirus;
(iii) Ostracoblabe implexa (shell disease fungus);
(iv) Haplosporidium sp. (nelsoni; costalis);
(v) Perkinsus marinus, P. atlanticus and other similar protozoa;
(vi) Marteilioides chungmuensis;
(vii) Marteilia sp. (refringens, sydnei, branchialis, Aber disease, QX);
(viii) Bonamia ostreae, Bonamia sp. (microcells);
(ix) Velar disease virus (OVVD Iridovirus);
(x) Mytilicola sp. (intestinalis, orientalis, parasitic copepods);
(xi) Malpeque Bay disease (unknown etiology); (xii) Denman Island and Australian winter diseases (Mikrocytos mackini, M. roughleyi);
(B) Class II - Nuisance Oyster Pathogens or Pests:
(i) Pacific oyster nocardiosis (Nocardia crassostreae);
(ii) Prokaryote inclusions (chlamydia; mycoplasma, rickettsia);
(iii) Bacillary necrosis (Vibrio, Pseudomonas, Aeromonas, others);
(iv) Siroplidium zoophthorum (fungus);
(v) Mycelial disease (Actinomycete-like);
(vi) Hexamita sp. (flagellate protozoan);
(vii) Ciliates (Sphenophrya, thigmotrichs, trichodinids, Ancistrocoma);
(viii) Nematopsis sp. (sporozoan);
(ix) Microsporidea (HEP and others);
(x) Helminth parasites;
(xi) Pseudomyicola sp. (parasitic copepod);
(xii) Gregarines (protozoa);
(xiii) Neoplasia (germinomas);
(xiv) Ovacystis virus (gametogenic papilloma/polyoma-like virus);
(xv) Symbionts: Polydora sp. (polychaete mudworm); Diplothyra sp. (boring clam);
Cliona sp. (boring sponge); Bryozoa;
(xvi) Predators: Stylochus sp. (polyclad worm); Drills: Urosalpinx cinerea; Ocenebra japonica; Rapana sp.;
(C) Class III - Endemic Pathogens of Concern in Bivalves Other than Oysters:
(i) Herpesviruses - littleneck clams, rock scallops;
(ii) Histozyoic coxidian - littleneck clams;
(iii) Disseminated neoplasia - littleneck clams, blue mussels;
(iv) Pseudoklossia coccidia - littleneck clams, basket cockles, blue mussels.
(e) Diseases reported under (d) of this section, or found by inspection under (c) of this section, must be treated by taking steps acknowledged by the fish pathology section to be effective in eliminating the disease. Containers or facilities must be disinfected by the permit holder in a manner directed or approved by the commissioner.
(f) If the commissioner determines that a Class I disease pathogen in finfish stocks or Class I disease pathogen exotic to North America in shellfish stocks is detected within a hatchery or rearing facility, the commissioner will require immediate action, including quarantine, stoppage of water flows to eliminate effluent release, complete destruction and proper disposal, such as caustic lime burial or incineration, of affected stocks within the facility, and a thorough disinfection of holding areas and equipment. An affected facility may be required to remain dry or out of production for one year and be certified free of the disease pathogen before continued production of fish or shellfish. If Class I disease pathogens exotic to this state, but not to North America are detected in oysters in this state, destruction of those oysters by the permit holder may be required if the commissioner determines that the disease pathogen poses a threat to the health and perpetuation of native, wild, or hatchery stocks of shellfish in the immediate area or the intended release location. In limited circumstances, the commissioner may allow retention or transportation of these diseased fish or shellfish under controlled conditions that pose no threat to native, wild, or hatchery stocks of fish and shellfish, such as movement to a disease laboratory having effluent depuration.

(g) Stocks of finfish in hatcheries or rearing facilities in which a Class II disease pathogen has been detected may require destruction and complete disinfection of the facility by the permit holder depending on the pathogen involved as determined by the commissioner, and if the disease poses a threat to the health and perpetuation of native, wild, or hatchery stocks of finfish in the hatchery effluent watershed or the intended release location. (h) The presence of pests recognized in Class II nuisance pathogens which may be exotic to this state will result in refusal of shellfish import certification by the commissioner until resubmitted representative samples of the shipment are free of nontarget invertebrate species. The commissioner will also refuse certification or restrict movement of oysters if there is oyster mortality or disease associated with the prevalence of any infectious pathogens.

5 AAC 41.090. Delegation of authority
The commissioner may delegate to designated employees of the department the authority to administer the provisions of this chapter.

5 AAC 41.100. Definitions Repealed.

CHAPTER 93. DEPARTMENT PROGRAMS

ARTICLE 3. SALMON USE

5 AAC 93.310. Waste of salmon
(a) Unless authorized under 5 AAC 93.310 - 5 AAC 93.390, a person may not waste salmon intentionally, knowingly, or with reckless disregard for the consequences.

(b) Salmon is intended for a use listed in AS 16.05.831(a)(1) - (a)(3) if the salmon was taken by or is possessed by a person who has an authorization under state or federal law to take, process for sale, or sell the salmon.

(c) In AS 16.05.831 and this section, the commissioner considers waste to not include
(1) normal inadvertent loss of flesh associated with uses of salmon described in AS 16.05.831(a)(1) - (a)(3) or authorized under 5 AAC 93.310 - 5 AAC 93.390 where the loss cannot be prevented by practical means; or
(2) failure to use or sell spoiled, diseased, or contaminated salmon flesh if the spoilage or contamination is not the result of intentional, knowing, or reckless actions; and, if the salmon could legally have been sold, the person disposing of the salmon complies with the requirements of (d) of this section.

(d) Before disposing of spoiled, diseased, or contaminated salmon that could legally have been sold, a person shall record the number of salmon in a logbook, available from the department, by date, species, and reason for disposal. By December 31 of the year of disposal, the person shall submit a completed logbook to the department.

(e) A logbook maintained, but not yet submitted under (d) of this section, shall be provided, upon request, to the department, the department’s agent, or the Department of Public Safety for inspection.

(f) Logbooks submitted under this section are public documents.

(g) In this section,
   (1) "flesh" means all muscular body tissue surrounding the skeleton;
   (2) "person" has the meaning given in AS 01.10.060, including joint ventures and other business entities; for purposes of this section "person" does not include the state or the federal government.

5 AAC 93.319. Hatchery salmon use authorization Expired.

5 AAC 93.320. Hatchery salmon use authorization Repealed.

5 AAC 93.324. Hatchery salmon use authorization Expired.

5 AAC 93.325. Hatchery salmon use authorization Expired.

5 AAC 93.326. Prince William Sound Hatchery salmon use authorization Expired.

5 AAC 93.327. Solomon Gulch Hatchery salmon use authorization Expired.

5 AAC 93.328. Hatchery salmon use authorization Expired.

**5 AAC 93.330. Hatchery salmon use authorization**

(a) Notwithstanding AS 16.05.831(a) and 5 AAC 93.310, the commissioner may, by emergency order, open a fishing season in any area during which a hatchery operator, or a processor or catcher processor working under contract for the hatchery operator, may remove and sell pink and chum salmon roe without further utilization of the carcasses of the salmon under this section.

(b) The provisions of this section apply only to pink and chum salmon that
   (1) originated from a hatchery;
   (2) are harvested in a hatchery terminal harvest area or hatchery special harvest area;
   (3) if left unharvested may create a public nuisance or stray and intermix with or interfere with natural salmon stocks;
(4) have matured to the point that the hatchery operator reasonably determines that the flesh of the salmon cannot be marketed or put to other lawful use without an unreasonable risk of incurring a financial loss;

(5) are required to be harvested under the terms of a hatchery permit;
(6) are retained until after completion of a fish ticket; and
(7) are disposed of at the same time as other salmon reported on the same fish ticket.

(c) Before operating under this section in any calendar year, a hatchery operator must submit a written notice of intent to operate to the department and receive a written acknowledgment from the department that the department has received a completed notice of intent to operate.

(d) After receiving the written acknowledgment described in (c) of this section, during a season opened by emergency order under this section, a hatchery operator, or an individual or company working for the hatchery operator, may remove the roe from pink and chum salmon without further use of the carcasses if the requirements of (b) of this section are met.

(g) Reports and other information provided to the department under this section are public records.

(k) If the commissioner determines that operations under this section are not consistent with the maximum and wise use of the resource, the commissioner may, by emergency order, close the season and reopen a new season during which the terms of an authorization are modified or revoked for salmon processed or caught in any fishing district, subdistrict, or section.

5 AAC 93.349. General authorizations for use of salmon Expired.

5 AAC 93.350. General authorizations for use of salmon

(a) Notwithstanding AS 16.05.831(a) and 5 AAC 93.310, and unless otherwise prohibited by law, under the authorization of this subsection a person may use salmon taken in a hatchery cost recovery fishery, or in a commercial, sport, personal use, or subsistence fishery for bait.

(b) Notwithstanding AS 16.05.831(a) and 5 AAC 93.310, and unless otherwise prohibited by law, under the authorization of this subsection a person may use salmon taken in a commercial fishery or hatchery cost recovery fishery for the production of fertilizer or fish meal.

(c) Notwithstanding AS 16.05.831(a) and 5 AAC 93.310, and unless otherwise prohibited by law, under the authorization of this subsection a person may use salmon taken in a hatchery cost recovery fishery, conducted in a special harvest area, for the production of fish oil.
(d) Notwithstanding AS 16.05.831(a) and 5 AAC 93.310, a person may dispose of the carcass of a salmon from which milt or eggs are extracted under a permit issued under AS 16.10.400 - 16.10.480 for lawful use as broodstock if the permit holder

   (1) removes eggs that are not used for fertilization from no more than 10 percent of the permit holder's female broodstock during milt and egg extraction; or
   (2) immediately notifies the department, in writing, of any extraction of eggs that will not be used for fertilization that exceed the limits established in (1) of this subsection.

(e) For the purposes of this section, "broodstock" has the meaning given in 5 AAC 40.990.

5 AAC 93.390. Procedures for authorization for other uses of salmon

A request for an authorization under AS 16.05.831(b), for uses of salmon that would otherwise be prohibited by AS 16.05.831 and regulations adopted under it, must be made by a petition under AS 44.62.220.
