I. PROGRESS ON PROJECT OBJECTIVES DURING LAST SEGMENT

OBJECTIVE 1: Capture additional animals to augment estimation of Nelchina brown bear productivity, cub survival, and annual rate of population change (λ).

All brown bears radiocollared for this purpose have had their radio collars removed and no further data has been collected.

OBJECTIVE 2: Identify degree of calf/adult moose killing by collared bears, both within and outside the study's moose calving area.

Nine Brown bears were captured on May 14 and 15 and monitored until June 26 when the bears were recaptured and the collars removed.
