Mr. Boyd Evison
Regional Director
National Park Service
2525 Gambell
Anchorage, Alaska 99503

Dear Mr. Evison:

Enclosed please find two copies of Alaska Department of Fish and Game, Division of Wildlife Conservation's 1988-89 Harvest Summary book. One copy is bound and is for your use. The other copy is unbound and may be sent to your print shop for printing and distribution as you please.

The Harvest Summary book is a compilation harvest information concerning the major game species managed throughout Alaska by our agency. It contains summary tables of statewide harvest totals, and extensive harvest information organized by game management unit/subunit and by species. Maps to orient the reader to specific Game Management Units are included, as well as a summary of hunting and trapping seasons for regulatory year 1988-89.

This is the first book of its type we have produced. We intend to publish one each year, with subsequent books each containing past years' data in condensed form plus the current year's data in more detailed format. We expect that the book will evolve and improve as we learn more about readers' needs and expectations. To that end, please do not hesitate to use the questionnaire and postage-paid envelope at the back of the book to let us know how we may improve the quality of this product.

We hope you find the information in this book useful.

Sincerely,

Enid A. Goodwin
Wildlife Information Data Base Project Leader
(907) 267-2253

ERRATA

A portion of the moose harvest data for GMU 22 has been found to be in error. The correct data is included on the attached errata sheet. This sheet is formatted to replace the data on page 119 in the Species section. However, since the same data appears in a different format on pp. 67-68, in the Unit/Subunit section, appropriate changes should be noted there as well. The corrected Statewide Total for moose harvest (p. 8) should read: 7,696. The statewide sex breakdown totals on p. 119 should read:
Total...7696; Male...7160; Female...420; Unknown...116.

We apologize for this error and the inconvenience it causes the reader. These types of data, coming together as they do from a wide variety of sources, may be expected to contain some error even though great effort is made to prevent their occurrence. In the future, an errata sheet will be distributed to book recipients should a significant error come to our attention. Minor changes will be noted in the database and the corrected information published in next year's edition.

If you discover an error in the data, please contact:

Enid Goodwin, WIDB Project Leader
333 Raspberry Rd.
Anchorage, AK 99518

INTRODUCTION

This book presents a summary of wildlife harvest statistics that the Alaska Department of Fish and Game, Division of Wildlife Conservation, collected for the July 1, 1988-June 30, 1989 regulatory year.

Human uses of Alaska's wildlife resources and habitats are continuing to increase. Rapid access to accurate resource information is needed for the public and resource managers to address resource development, management, and allocation issues. This need has prompted the Division of Wildlife Conservation to embark on a program to strengthen its information management capabilities and to make resource information more readily available. This book represents one product of that program. Since this is the first time that the division has produced such a report, the division is anxious to receive feedback on the book's usefulness. The last page in this book is a questionnaire. Readers are encouraged to use this questionnaire to identify how subsequent editions of this book can be improved.

It is important for the reader to understand how the statistics presented in this book were obtained. The division routinely collects big game harvest information through the use of harvest ticket reports, registration and drawing permit reports, hunter surveys, sealing certificates, and hunter interviews. While reminder letters are sent to many harvest ticket holders to increase the response rate for harvest reports, these reporting systems never result in a 100% response rate. Unreported harvest and illegal take can equal or exceed the reported harvest in some areas. The specific information source for each species is identified before the appropriate tables.

In using big game harvest statistics, the reader should be aware that many factors affect harvest levels: game regulations on seasons, methods and means, and bag limits; environmental conditions such as weather and terrain; the availability of alternative hunting opportunities and other food sources; and economic factors such as travel costs. This book summarizes the hunting seasons for each species and area, but no attempt is made to quantify the other factors affecting harvest.

We hope you find this information useful.

W. Lewis Pamplin, Jr.
Director,
Division of Wildlife Conservation

ACKNOWLEDGEMENTS

Special thanks is extended to the Information Management Section staff for their diligence and dedication in producing this book. They are: Teri Arnold, Lynn Dang, Thela Divens, Nancy Graves, Randy Kardong, Ruth Moulton, Becky Strauch, and Tammy Wettin. Thanks goes to other Divisional staff making significant contributions to this book : to each area management biologist for his contribution to the contents of this book; to Patrick Valkenburg, Larry Van Daele, and Larry Aumiller for their special contributions; to the Management Coordinators Greg Bos, Dave Johnson, Christian Smith, and John Trent; to the Regional Supervisors Dave Anderson, John Coady, Christian Smith, and Daniel Timm for their support and encouragement; and especially to SuzAnne Miller for her guiding vision from the book's inception to its completion..

*INCLUDES APPLICANTS FOR HUNTS NOT REQUIRING RESIDENCY INFORMATION

SOURCES OF HARVEST INFORMATION

Wildlife harvest information in Alaska is compiled from a diverse array of sources. This section outlines the major data sources for the species whose harvests are summarized in this book. Major sources of harvest information for each species are indicated before each listing in the Species section.

HARVEST TICKETS

Harvest tickets are the primary means of collecting information on caribou, deer, moose, and sheep harvests in areas not administered by registration or drawing permit hunts. Harvest tickets are issued by license vendors and Department staff to individual hunters. Overlays, containing hunter's name, residency information and license number, are sent to the Division of Wildlife Conservation in Anchorage. Hunters are required to validate appropriate tickets immediately upon killing an animal and to send in a completed hunt report form within a specified time frame. Reports are postage-paid and pre-addressed to be sent to Anchorage.

Moose and sheep overlays are keypunched and hunters not returning reports are sent reminder letters. Deer overlays are keypunched and the information is used for annual (southeastern Alaska) or periodic (Kodiak and Prince William Sound) questionnaires to randomly selected hunters. No hunter reports are required of deer hunters or Western Arctic caribou hunters. Caribou overlays are not keypunched.

Hunter reports provide information on hunter effort, success, location, method of take, transport means, sex of animal(s) killed, number of animals killed if multiple bag limits apply, and horn length or antler width where applicable.

DRAWING PERMITS AND REGISTRATION PERMITS

A drawing permit is obtained through a lottery drawing in which qualified applicants are chosen on the basis of a computerized random selection of winning numbers. Drawing permit winners are issued a permit, part of which is a hunt report which must be filled out and returned to the Division of Wildlife Conservation in Anchorage as part of the conditions of the permit hunt.

Registration permits are obtained by application in person at designated area offices. Registration permit hunts, unlike drawing permit hunts, have no limiting quota of permits that may be issued. Harvest levels are regulated through emergency closures of each hunt when desired harvest levels have been reached.

Similar to drawing permits, registration permits contain a hunt report which must be returned either in person (if a specimen must also be turned in) or by mail to a designated ADF&G office at some specified time following each hunt.

Permit harvest reports provide residency, success, effort, method of take, transport means, and location data in addition to harvest data (sex, horn length or antler width where applicable).

SEALING DOCUMENTS

Sealing certificates are used in gathering information on black bear, brown bear harvests not regulated under permit hunts, and furbearer harvests.

Brown bear and black bear sealing certificates are filled out by an authorized departmental

employee at the time a hunter brings his/her bear skull and hide to have a numbered locking tag (seal) affixed to the hide and the skull. Residency, location, transport means, and successful hunter effort data are obtained from bear sealing certificates, along with sex, specimen data, and color-phase information. Some game management units do not require sealing of black bears. For those units, harvest levels must be estimated.

Furbearers are sealed by affixing a numbered locking seal to each pelt. Trapper residency data are not routinely collected, nor is effort information. Information on number of animals taken, location, method of take, transport means, pelt size and sex data (where applicable) are obtained from furbearer sealing certificates.

HUNTER QUESTIONNAIRES

Hunter questionnaires are used to obtain harvest and hunter information for deer (yearly in southeastern Alaska and periodically in Kodiak and Prince William Sound), some furbearers, and some caribou.

Hunter questionnaires are direct mail surveys sent to a random sample of appropriate hunters and trappers based on harvest tickets, sealing certificates, or tag sales. Follow-up questionnaires are frequently used to encourage hunters to respond.

The total harvest of a population in question is estimated based on a statistical analysis of hunter questionnaire results.

Questionnaires can be used as a vehicle for obtaining comprehensive information from hunters. In addition to the same information provided by hunt reports, hunter questionnaires may also provide information on hunter motivations, hunter expenses, use of public facilities, and encounters with other wildlife (e.g. bears).

HUNTER INTERVIEWS

Many area management biologists augment their more formal sources of harvest data by conducting informal interviews of hunters in the field, at local airports, and in rural towns and villages. Interviews can provide word-of-mouth information on otherwise unreported harvests, information on illegal kills, and a check on hunter reporting rates. While hunter interview information is basically subjective data, it can be of great help to the biologist in assessing harvest levels and harvest-related activities in his area.

FUR EXPORT REPORTS AND FUR ACQUISITION REPORTS

Of the 18 furbearer species trapped in Alaska, only 5 have mandatory sealing requirements statewide. Those 5, beaver, otter, lynx, wolf, and wolverine, are reported on in this book. To estimate harvest of the remaining species, biologists frequently use information from raw fur export reports and fur acquisition reports.

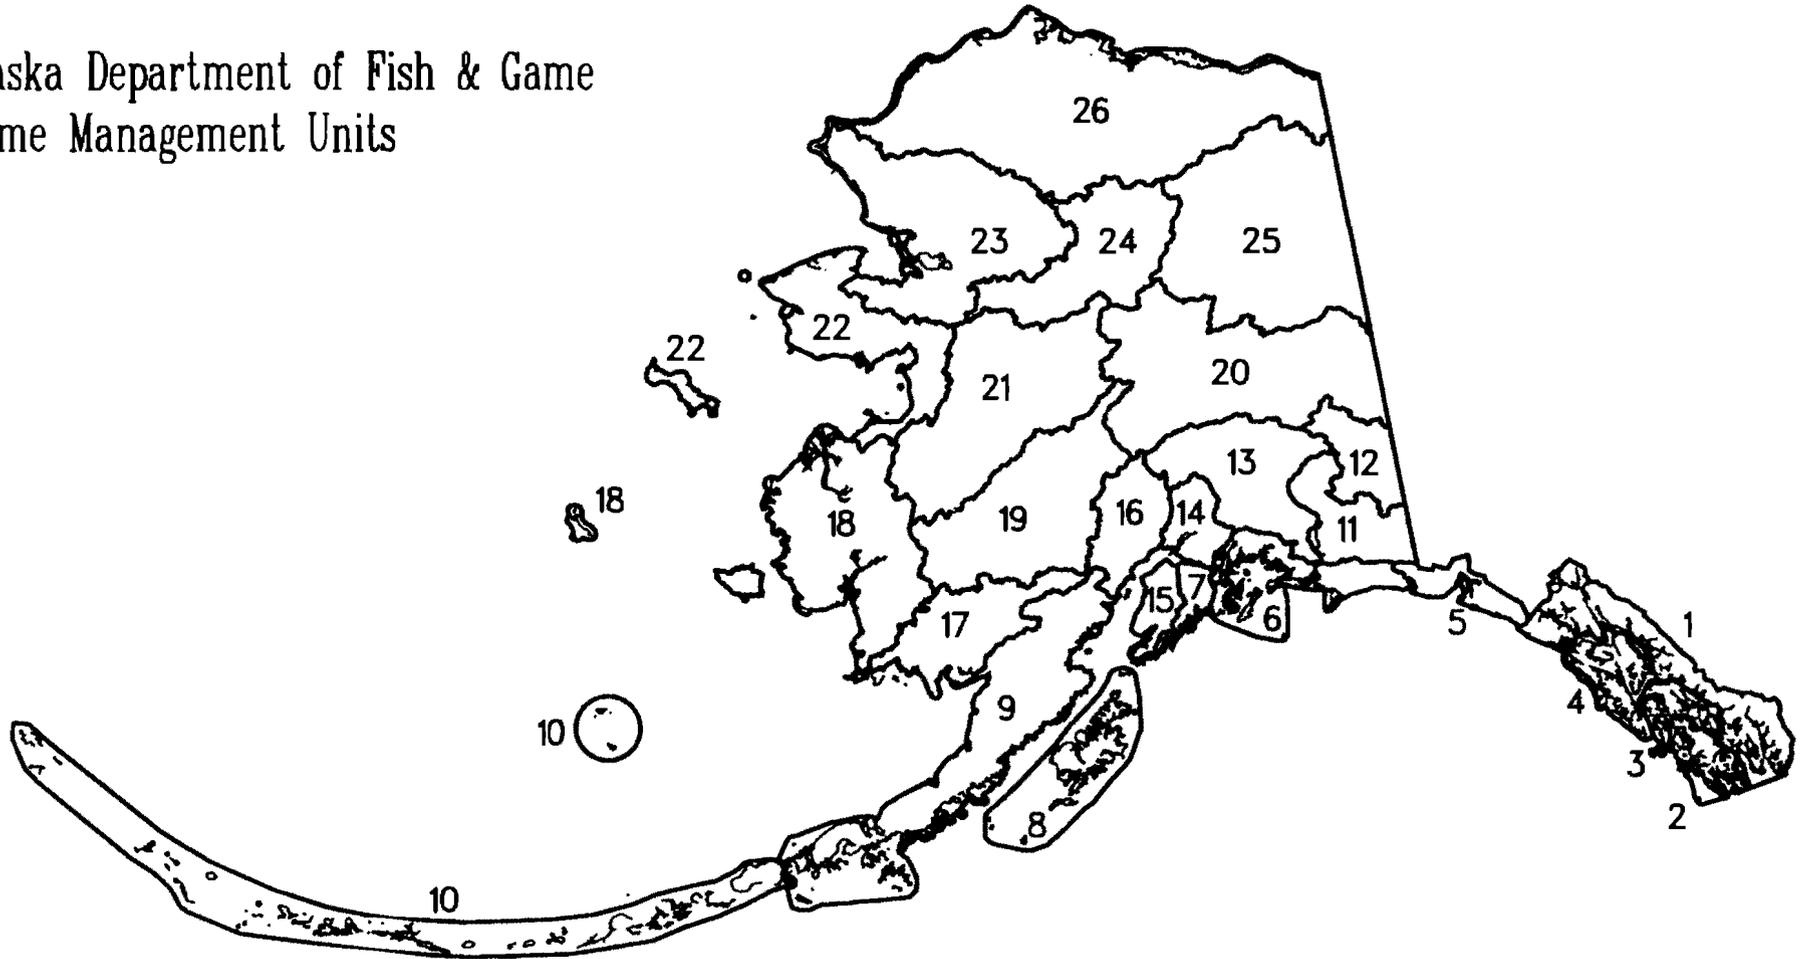

Fur acquisition reports are filled out by a fur buyer when he/she purchases raw furs from a trapper or fur dealer. A report of the transaction, showing species, number, and location in which the furs were trapped (game management unit) is sent to ADF&G.

Fur export reports are filled out when an individual sends raw furs out of state. The same information is collected from export reports as from acquisition reports, and the reports are sent to ADF&G in Anchorage.

Fur reports provide harvest estimate information only. Raw fur purchase plus trapper export numbers are summed for minimum harvest estimates.

1988-89 ALASKA HARVEST SUMMARY: UNIT/SUBUNIT

A KEY TO READING THE TABLES

A summary of the State of Alaska's hunting harvest data for regulatory year 1988-89 is presented in two ways:

- 1) by Game Management Unit/Subunit
- 2) by Species

This section contains the **Unit/Subunit** summary.

To ensure accurate interpretation of the summarized data, the following points should be noted:

1. Harvest data are from two categories:
 - a. **Centrally processed data** obtained from keypunched harvest reports (e.g., moose harvest tickets, bear and furbearer sealing certificates, etc.) and from keypunched permit reports (includes all drawing permit data and some registration hunt data).
 - b. **biologist-compiled records** (e.g., deer hunter survey; many registration hunts; and general seasons where harvest reports are not required)
2. Material in the tables is divided up into several categories. These are:
 - a. Hunter data
 1. Numbers of successful and unsuccessful hunters
 2. Number of game management unit residents who reported
 3. Total number of Alaska residents who reported
 4. Total number of non-residents who reported
 5. Total number of hunters of unknown residency who reported
 6. Effort (= total number of hunter days/total number of reporting hunters)
 7. % of total hunters who were successful
 - b. Harvest data
 1. Total number of animals harvested (reported harvest only)
 2. Sex of harvested animals
 3. Defense of Life and Property (DLP) kills (bears only)
 4. Average horn length: for mountain goat and dall sheep; for moose, this column carries antler spread information. No information on caribou rack size is reported.
 - c. Totals
 1. Subunit totals are indicated when more than one hunt type occurs; when only one hunt type occurs (i.e., general season only, no permit or registration hunts), the figures given are the same as the subunit totals.
 2. Unit totals: in units which contain subunits, residency information is not totalled at the unit level. See (6) below.
 3. State harvest totals are given in a table at the end of the section.
3. Harvest figures are for **reported harvest only** unless otherwise noted. Unreported harvest estimates are indicated under "comments".
 - a. For bear harvest data, Defense of Life and Property (DLP) kills are not included in the total harvest figures. DLP figures are totalled separately.

4. For bear harvests, residency data are calculated from special hunts only (i.e. drawing permit and registration hunts). Residency information is not available for general seasons.
5. Residency data for furbearer harvests are for successful hunters and trappers only.
6. Residency information is not totalled at the unit level. An individual may hunt in several different subunits of a game management area; to sum hunter information across subunits may lead to an inflated and inaccurate total for numbers of hunters.
7. Caribou harvest figures by unit/subunit are incomplete since not all caribou data are compiled on a unit/subunit basis. These limited data are presented here, however, as they may be of interest to some readers. All caribou data are compiled according to herd, and are presented in the Species section of this book. The reader is referred to the herd summary for a more accurate representation of harvest size.
8. The harvest data presented here should be considered accurate as of January 15, 1990. Updates will be reflected in subsequent harvest summary books.
9. For several species (black bear, furbearers, deer, caribou), a multiple-animal bag limit may apply. In these cases, the numbers of successful hunters may be smaller than the total numbers of animals harvested.
10. "**Brown bear**" is the term applied in this book to brown bears and grizzly bears. No distinction is made between the two in terms of harvest.

For easier interpretation of table contents, the reader should note that:

1. "**Permit**" refers to **drawing permit** hunts, and "**registration**" refers to **registration permit** hunts throughout the tables in this book. Some drawing permit and registration permit hunts may also be **subsistence** hunts. For details on specific subsistence hunts, the reader is referred to the 1988-89 Alaska drawing permit hunt and registration permit hunt newspaper supplements.
2. "**General Season**" refers to a season which is not regulated by permit (drawing or registration) and is open to hunters in one or more of the following categories: **resident, non-resident, or subsistence**. Subsistence harvest is not differentiated from other general season harvest in this book. For more detailed information on subsistence seasons, the reader is referred to the Season Dates section of this book and to *Alaska Game Regulations*, No. 29, July 1, 1988 - June 30, 1989.
3. "**n/a**" means **no data was available**. Data may not have been collected at all, or it was in a form inappropriate for inclusion and would have led to erroneous interpretations.
4. A "**Z**" designation following a game management unit number refers to data for which the **subunit** was **unknown**; data could only be coded to a unit level during central processing.
5. "**Unit 27Z**" refers to data for which the game management **unit** was **unknown**.

1988-89 ALASKA HARVEST SUMMARY: SPECIES

A KEY TO READING THE TABLES

A summary of the State of Alaska's hunting harvest data for regulatory year 1988-89 is presented in two ways:

- 1) by Game Management Unit/Subunit
- 2) by Species

This section contains harvest summaries by **Species**.

To ensure accurate interpretation of the summarized data, the following points should be noted:

1. Harvest data are from two categories:
 - a. **Centrally processed data** obtained from keypunched harvest reports (e.g., moose harvest tickets, bear and furbearer sealing certificates, etc.) and from keypunched permit reports (includes all drawing permit data and some registration hunt data).
 - b. **biologist-compiled records** (e.g., deer hunter survey; many registration hunts; and general seasons where harvest reports are not required).
2. Primary data sources for each species are identified before each appropriate summary table.
3. Material in the tables is divided up into several categories. These are:
 - a. Hunter data
 1. Numbers of successful and unsuccessful hunters
 2. Number of game management unit residents who reported
 3. Total number of Alaska residents who reported
 4. Total number of non-residents who reported
 5. Total number of hunters of unknown residency who reported
 6. Effort (= total number of hunter days/total number of reporting hunters)
 7. % of total hunters who were successful
 - b. Harvest data
 1. Total number of animals harvested (reported harvest only)
 2. Sex of harvested animals
 3. Defense of Life and Property (DLP) kills (bears only)
 4. Average Horn Length: for mountain goat and dall sheep; for moose, this column carries antler spread information. No information on caribou rack size is reported.
 - c. Totals
 1. Subunit totals are indicated when more than one hunt type occurs; when only one hunt type occurs (i.e., general season only, no permit or registration hunts), the figures given are the same as the sub-unit totals.
 2. Unit totals: in units which contain subunits, residency information is not totaled at the unit level. See (7) below.
 3. State Harvest Totals are given in a table at the end of the section.
4. Harvest figures are for **reported harvest only** unless otherwise noted. Unreported harvest estimates are indicated under "comments".

- a. For bear harvest data, Defense of Life and Property (DLP) kills are not included in the total harvest figures. DLP figures are totaled separately.
5. For bear harvests, residency data are calculated from special hunts only (i.e., drawing permit and registration hunts). Residency information is not available for general seasons.
6. Residency data for furbearer harvests are for successful hunters and trappers only.
7. Residency information is not totaled at the unit level. An individual may hunt in several different subunits of a game management area; to sum hunter information across subunits may lead to inflated and inaccurate totals for numbers of hunters.
8. The caribou herd data presented in this section are more accurate and more reflective of true harvest size than that presented on a unit/subunit basis. However, since the limited unit/subunit data may be of interest to some readers, they are summarized in another section of this book.
9. The harvest data presented here should be considered accurate as of January 15, 1990. Updates will be reflected in subsequent harvest summary books.
10. For several species (black bear, furbearers, deer, caribou) a multiple-animal bag limit may apply. In these cases, the numbers of successful hunters may be smaller than the total numbers of animals harvested.
11. "**Brown bear**" is the term used in this book to include both brown bears and grizzly bears. No distinction between the two is made for purposes of harvest reporting.

For easier interpretation of table contents, the reader should note that:

1. "**Permit**" refers to **drawing permit** hunts, and "**registration**" refers to **registration permit** hunts throughout the tables in this book. Some drawing permit and registration permit hunts may also be **subsistence** hunts. For more specific information on permit subsistence hunts refer to the 1988-89 Alaska drawing permit and registration permit hunt newspaper supplements.
2. "**General Season**" refers to a season which is not regulated by permit and is open to hunters in one or more of the following categories: **resident, non- resident, or subsistence**. Subsistence harvest is not differentiated from other general season harvest in this book. For more detailed information on subsistence seasons, the reader is referred to the Season Dates section of this book and to *Alaska Game Regulations*, No. 29, July 1, 1988-June 30, 1989.
3. "**n/a**" means **no data** was **available**. Data may not have been collected at all, or it was in a form inappropriate for inclusion and would have led to erroneous interpretations.
4. A "**Z**" designation following a game management unit number refers to data for which the **subunit** was **unknown**; data could only be coded to a unit level during central processing.
5. "**Unit 27Z**" refers to data for which the game management **unit** was **unknown**.

BEAVER HARVEST SUMMARY

Beaver harvest information is collected from beaver sealing certificates. No residency data are collected. No data are available on unsuccessful beaver trappers, thus making trapper effort and % success information also unavailable. Since there is a multiple-animal bag limit on beaver, harvest totals are generally larger than numbers of successful trappers.

Beaver sealing certificate data may be augmented by information from trapper questionnaires, hunter interviews, and fur acquisition and export reports.

BISON HARVEST SUMMARY

Bison harvest in Alaska is regulated by drawing permit and registration permit only. Bison harvest information is collected from permit hunt reports submitted by permit holders at some specified time after each hunt. For a more detailed description of the permit system, please refer to the Sources of Harvest Information section at the front of this book.

BLACK BEAR HARVEST SUMMARY

Black bear harvest information is collected from black bear sealing certificates. Since information collected is for successful hunters only, overall hunter effort and % success figures are not available. Successful hunter effort data are collected, but for the sake of consistency, are not presented in this book. In some units, a multiple-animal bag limit applies to black bear. In these cases, numbers of successful hunters may be smaller than total numbers of animals harvested.

For a more detailed description of the sealing document system, the reader is referred to the Sources of Harvest Information section at the front of this book.

BROWN BEAR HARVEST SUMMARY

Brown bear harvest information is collected from brown bear sealing certificates, and from permit hunt reports. Special hunts are held on Kodiak, and in several game management units north of the Brooks Range. General season information on brown bear harvest is for successful hunters only; permit reports include unsuccessful hunter data as well. For the sake of consistency, hunter effort and % success information are not reported here.

For a more detailed description of the sealing document system and the permit system, the reader is referred to the Sources of Harvest Information section at the front of this book.

CARIBOU HARVEST SUMMARY

Caribou harvest information is collected from general season harvest ticket hunt reports and permit hunt reports. The reader is referred to the Sources of Harvest Information section at the front of this book for a more detailed description of the harvest ticket system and the permit hunt reporting system.

Because only some area biologists examine their caribou harvest information by game management unit/subunit, the unit/subunit information, presented here for those readers interested in that type of breakdown, is incomplete. All biologists, however, examine their caribou harvest data on a herd basis. For the most accurate representation of the statewide caribou harvest, the reader should examine the table presenting harvest by herd. All herds and all harvest figures, regardless of unit, are presented here.

Because of problems with non-reporting in many general season areas, data on caribou harvest are especially limited. In the table which presents caribou harvest by herd, low estimates (representing minimum reported harvest) and high estimates (including estimates of unreported kill) are given. The reader should keep in mind that both of these figures are estimates because of under-reporting or non-reporting by many caribou hunters.

Reporting on caribou harvest regulated by the permit system is somewhat more reliable. In the 1988-89 caribou permit hunt seasons, 3,632 permits were issued. A total of 3,535, (97%) permit overlays were returned. No figures are available for numbers of permit hunt reports returned.

In many units, a multiple-animal bag limit applies to caribou. In these cases, the numbers of successful hunters shown may be smaller than the total numbers of animals harvested.

CARIBOU HERDS BY UNIT / SUBUNIT

DALL SHEEP

Dall sheep harvest information is obtained from drawing and registration permit reports and from general season hunt reports. During the 1988-89 sheep hunting seasons, 7,158 harvest tickets were issued and 5,659 (79%) hunt reports were returned. During that same period, 627 dall sheep permits were issued, and 596 (95%) permit hunt reports were returned for central processing.

The reader is referred to the Sources of Harvest Information section at the front of this book for a more detailed description of the harvest ticket and permit systems.

ELK

Alaska's elk harvest is regulated by drawing permit and registration permit hunts. All legal elk harvest occurs on Raspberry and Afognak Islands, near Kodiak Island, in game management unit 8. Elk harvest information is obtained from permit hunt reports. For a more detailed description of the permit system, the reader is referred to the Sources of Harvest Information section at the front of this book.

LYNX HARVEST SUMMARY

Lynx harvest information is collected from furbearer sealing certificates. No residency data are collected. No data are available on unsuccessful lynx trappers, thus making trapper effort and % success information also unavailable. Since there is a multiple-animal bag limit on lynx, harvest totals are generally larger than numbers of successful trappers.

Lynx sealing certificate data may be augmented by information from trapper questionnaires, hunter interviews, and fur acquisition and export reports.

MOOSE

Moose harvest information is collected from permit hunt reports, registration hunt reports, and harvest ticket hunt reports. For the 1988-89 regulatory year, there were 45,862 harvest tickets issued and 33,310 hunt reports returned (73%). A total of 3,403 permits were issued, and 3318 (97.5%) permit hunt reports returned for central processing.

The reader is referred to the Sources of Harvest Information section at the front of this book for a more detailed description of the permit and harvest ticket systems.

MUSKOX

Muskox harvest information is collected from drawing and registration permit hunt reports. There are no general seasons on muskoxen in Alaska.

For a more detailed description of the permit system, the reader is referred to the Sources of Harvest Information section at the front of this book.

RIVER OTTER HARVEST SUMMARY

River otter harvest information is collected from furbearer sealing certificates. No residency data are collected. No data are available on unsuccessful otter trappers, thus making trapper effort and % success information also unavailable. Since there is a multiple-animal bag limit on otter, harvest totals are generally larger than numbers of successful trappers.

River otter sealing certificate data may be augmented by information from trapper questionnaires, hunter interviews, and fur acquisition and export reports.

SITKA BLACK- TAIL DEER

While harvest tickets are issued to deer hunters, no hunt reports are required upon completion of a hunt. Deer harvest information is collected through the use of yearly (in southeastern Alaska) and periodic (in Prince William Sound and Kodiak) deer questionnaires. Follow-up questionnaires are sent to encourage hunters to report. Estimates of harvest size are calculated from questionnaire responses.

In Kodiak and Prince William sound, where deer surveys are not used on a yearly basis, harvest estimates may be derived from prior years' data for which questionnaire information is available.

The reader is referred to the Sources of Harvest Information section for a more detailed explanation of the harvest ticket system.

WOLVERINE HARVEST SUMMARY

Wolverine harvest information is collected from furbearer sealing certificates. No residency data are collected. No data are available on unsuccessful wolverine trappers or hunters, thus making trapper and hunter effort and % success information also unavailable. Since there is a multiple-animal bag limit on wolverine, harvest totals are generally larger than numbers of successful trappers.

Wolverine sealing certificate data may be augmented by information from trapper questionnaires, hunter interviews, and fur acquisition and export reports.

HUNTING SEASON DATES

This section contains summaries of the hunting seasons for the regulatory year 1988-89 in Alaska. The general hunting season dates are in one listing (organized by species and game management unit). The drawing permit and registration permit hunt season dates are listed together and are also organized by species.

Subsistence hunts occur within general seasons as well as within drawing and registration permit hunts. Those general seasons which are open to subsistence hunters are labeled as "subsistence". Some hunts show multiple listings of seasons. These may be subsistence hunts, late-winter hunts, or hunts with special conditions associated with them. For details on the multiple season hunts, the reader is referred to *Alaska Game Regulations*, No. 29, July 1, 1988 - June 30, 1989, and to the Alaska 1988-89 drawing permit hunt and registration permit hunt newspaper supplements.

The summaries of Alaska's hunting seasons presented here are not intended to serve in lieu of the Alaska Game Regulations which were in effect during the 1988-89 regulatory year. For a details of the hunting regulations, legal descriptions of hunt areas, information on legal bag limits, methods of take, etc. that may have applied to a particular season listed here, the reader is again referred to *Alaska Game Regulations*, No. 29, July 1, 1988 - June 30, 1989.

1988-89 HARVEST SUMMARY BOOK

READER QUESTIONNAIRE

This harvest summary book is our first effort. The next book will contain 1988-89 data plus 1989-90 data. We want to do all we can to make next year's book comprehensive, understandable, and easy to use. Please take a few moments and provide us with your thoughts on how to improve the harvest summary book. The last page of this questionnaire folds into a pre-addressed, postage paid envelope for your use in returning your comments to us.

ORGANIZATION:

1. Was the book well-organized? _____

2. Did the order in which things were presented make sense to you? _____

3. What would you like to see changed in the way the book was organized? _____

FORMAT

1. Were the tables readable, easy to understand? _____

2. What did you find difficult about reading the tables? _____

3. How can we make the tables more readable, easier to understand? _____

CONTENTS

1. Were the tables complete? _____

2. What other information would you like to see included? _____

3. What information do you think could be left out next year? _____

4. Were the explanations of the tables helpful in your interpretation of the data? _____

5. How can we make the harvest data more easily understood? _____

6. Were the State and Unit/Subunit maps helpful in your interpretation of the data? _____

7. Did you find inclusion of hunting season dates helpful? _____
