HARVEST SUMMARY

1991-1992

Prepared by:
Division of Wildlife Conservation
Information Management Section
Wildlife Information Data Base
Enid Goodwin, Project Leader

March 1, 1993

This book was partially financed by Federal Aid in Wildlife Restoration funds under Project W-23-5, Job. No. 22.0, Alaska Wildlife Statistics Information Data Base, Segment Period July 1, 1992 - June 30, 1993.

This publication was released by the Alaska Department of Fish and Game, Division of Wildlife Conservation, produced at a cost of $21.40 per copy to present summary data of wildlife harvests for regulatory year 1991-92, and printed in Anchorage, Alaska.

The Alaska Department of Fish and Game conducts all programs and activities free from discrimination on the basis of sex, color, race, religion, national origin, age, marital status, pregnancy, parenthood, or disability. For information on alternative formats available for this and other department publication, please contact the department ADA Coordinator at (voice) 907-465-4120, (TDD) 1-800-478-3648, or (FAX) 907-586-6595. Any person who believes she/he has been discriminated against should write to: ADF&G, P.O. Box 25526, Juneau, AK 99802-5526; or O.E.O., U.S. Department of the Interior, Washington, D.C. 20240.

This book is printed on recycled paper.

INTRODUCTION

As a part of the Division of Wildlife Conservation's continuing commitment to provide reliable data for those concerned with Alaska wildlife issues, the Wildlife Information Data Base Project presents the 1991-92 Wildlife Harvest Summary Book.

This book is the fourth in an ongoing series of yearly publications. As you look at the data and compare information from year to year, you should keep in mind some aspects of the 1991-92 regulatory year which may have affected harvest levels and produced differences between this and previous years:

Under-reporting of harvests for all species continued to be a chronic problem for wildlife managers in many remote rural areas.

During regulatory year 1991-92, the Tier II system went into effect for the Nelchina herd caribou. While large numbers of hunters qualified for this hunt, unusual herd movements to inaccessible areas led to lower than anticipated harvests.

The Alaska Peninsula (GMU 9) was open for Fall and Spring brown bear hunting in 1991-92 (the season was closed in '90-91).

The winter of 1990-91 was severe for wildlife over much of Alaska. Interior Alaska subsequently shortened moose and caribou season lengths during '91-92, and enacted 50-inch moose antler restrictions for some nonresident hunts to compensate for reductions in affected populations. In Southcentral, existing spike/fork regulations lessened harvests where necessary. On portions of Kodiak Island (GMU 8), deer seasons were shortened and the bag limit reduced. In Southeastern Alaska, some deer seasons were closed early. High winter mortalities combined with increased predation on sheep and moose in GMU 23 as a result of failure of the Western Arctic caribou herd to winter there resulted in closure of sheep seasons and shortened nonresident moose seasons.

This year's Harvest Summary Book contains format improvements, more types of totals than previously, and a separate section for maps. Maps contain square mile figures. In the Unit/Subunit and Species sections, harvest and hunter data have been organized into discrete subsections. We hope these changes make the Book more convenient for you to use. Please feel free to provide your comments and suggestions on the design, content, and/or utility of the book.

We hope you find the information in this book useful.

David Kelleyhouse
Director
Division of Wildlife Conservation

ACKNOWLEDGEMENTS

Thanks is extended to the Information Management Section staff for their diligence and dedication in producing this book. Special thanks goes to Becky Strauch for her exceptional computer capabilities and dedication to a job well done, to Suzan Bowen without whose ideas, attention to detail, and good humor this book would have been impossible; to Thela Divens, Bob Walker, Tammy Wettin, and Ruth Moulton for their efforts, and high standards of accuracy. Thanks goes to other Divisional staff making significant contributions to this book: to each area and assistant area management biologist for his/her outstanding cooperation and willing effort; to the Management Coordinators; to the Regional Supervisors; to Deputy Director Wayne Regelin for his encouragement and support; and especially to SuzAnne Miller for her dedication of staff time and budgetary resources for the annual completion of this program.

1991-1992 ALASKA WILDLIFE HARVEST SUMMARY

A KEY TO USING THE TABLES

FOR EASIER INTERPRETATION OF TABLE CONTENTS, PLEASE NOTE THE FOLLOWING:

1. **"n/a"** means **NO DATA WAS AVAILABLE.**

2. A **"Z"** designation following a Game Management Unit (GMU) number refers to data for which the **SUBUNIT WAS UNKNOWN**; during central processing, data could only be assigned to the GMU level due to omissions or illegibility of information.

3. **"Unit 27Z"** refers to data for which the **GAME MANAGEMENT UNIT** was unknown.

4. Hunt numbers followed by an **"F"** refer to **FALL HUNTS**; numbers followed by an **"S"** refer to **SPRING HUNTS**. Not all Fall or Spring hunts have an F or S designation. For a more complete listing of Fall or Spring hunt numbers, please refer to the 1991-92 Permit Hunt Supplement Hunt newspapers.

5. Hunt numbers followed by a **"T"** refer to **TIER II SUBSISTENCE HUNTS**. Not all subsistence hunts have a "T" designation, but all "T" hunts are tier II subsistence hunts.

6. **"General Season"** refers to a season not regulated by the drawing or registration permit systems and is open to one or more of the following categories of hunters: Alaska Resident, Non-Resident, or Subsistence. In general season hunts, the numbers of hunters are not regulated; the numbers of animals taken are regulated by bag limits, season lengths, methods and means, and access restrictions.

7. Throughout this book, **"SHEEP"** refers to **DALL SHEEP**; **"DEER"** refers to **SITKA BLACKTAIL DEER**; and **"OTTER"** refers to **RIVER OTTER** (also known as **LAND OTTER**).

8. If a species is not listed for a particular GMU/subunit, it does not occur in that area.

You are urged to be aware of the scope and limitations of the data presented here before interpreting it for other applications. In using these wildlife harvest statistics, you should check available information (the Comments column in the main tables and the Seasons section) to note actual season lengths, applicable regulations , or other conditions which may have affected harvest levels. Other factors affecting harvest (such as weather conditions, availability of other food sources, alternative hunting opportunities, or travel costs) are not quantified here.

HOW THIS BOOK IS ORGANIZED

WHAT IS IN THE DATA TABLES

The harvest data presented in this book have been compiled from two main sources:

1. **CENTRALLY PROCESSED DATA** obtained from keypunched harvest reports (e.g., moose harvest tickets, bear and furbearer sealing certificates, etc.), from keypunched permit reports (includes most drawing permit data and some registration hunt data), and from a deer hunter survey for South East and South Central Alaska.

2. **BIOLOGIST-COMPILED RECORDS** (e.g., some drawing permit hunt data; data from most registration hunts; general seasons where harvest reports are not required; Defense of Life and Property [DLP] kills ; and illegal and unreported kills).

Please refer to the **SOURCES OF DATA** section of this book for a more detailed explanation of the systems used for collecting the wildlife harvest data presented here.

The State of Alaska's summary harvest data for regulatory year 1991-1992 (July 1, 1991-June 30, 1992) is presented in two ways, each in its own section:

1. By **GAME MANAGEMENT UNIT/SUBUNIT**

2. By **SPECIES**

Within each section of these two sections, the data are presented in two parts:

1. **HARVEST INFORMATION**

2. **HUNTER INFORMATION**

The two parts are presented separately to avoid confusion when the tables are read. In other words, in the GMU/Subunit section, all harvest information for all units is presented, followed by tables for all hunter information for all units. In the Species section, all harvest for a species is presented, followed by all hunter information for that species.

All data are identified as to species, GMU/Subunit, type of hunting season (i.e., general season, drawing permit, registration permit, trapping, etc.) and hunt number, where applicable. Information regarding permit or harvest ticket holders who did not hunt is not reported in this book.

HARVEST INFORMATION contains the following:

1. **Total Harvest**: Total number of animals harvested. Reported harvest only. Does NOT include DLP's for bears or unreported/illegal harvest.

2. **Sex** breakdown of reported harvest: (male + female + unknown = Total Harvest).

3. **DLP, Bear**: Defense of Life and Property kills. Applies to brown and black bears only.

4. **Unreported/Illegal**: Estimates of unreported and/or illegally taken harvest. In

some areas, for some species, unreported and illegal harvest may equal or exceed the reported harvest.

5. **Average Horn Length/Antler Width**: Horn length applies to Dall Sheep and Mountain Goat.
   Antler width applies to moose.
   Caribou rack size data are not collected.

6. **Comments**: Explanatory information pertinent to interpretation of the data.

HUNTER INFORMATION contains the following:

1. **Successful Hunters**

   a. **Total**: Total number of successful hunters. Total Successful = Successful Unit Residents + Other Successful State Residents + Total Successful Non-Residents + Total Successful Unknown Residents.

      For hunts and species which have a single animal bag limit, Total Successful = Total Harvest.

   b. **Unit Residents**: Number of successful hunters whose primary place of residence is the GMU in which the hunt or season is held. Unit residents are also State Residents.

   c. **Other State Residents:** Total number of successful hunters who are Alaska State residents but who are not residents of the GMU for which data is reported.

   d. **Non-Residents**: Total number of successful hunters who are non-residents. Non-residents includes aliens who reside outside of the U.S.

   e. **Unknown Residents**: Total number of successful hunters whose residency is unknown, generally because of illegibly written address information or failure to include it on the harvest or permit report.

2. **Unsuccessful Hunters**
   The residency categories for Unsuccessful hunters are the same as for Successful categories, except that Unsuccessful data apply. Total = Unsuccessful Unit Residents + Unsuccessful Other State Residents + Unsuccessful Non-Residents + Unsuccessful Unknown Residency hunters.

   For many hunts, Unsuccessful residency information is not available and is denoted by "n/a" in the appropriate columns. No Unsuccessful residency is collected for brown and black bear harvests (except for permitted hunts), caribou General Season hunts, or all furbearers.

3. **Per Cent Successful**:
   For those hunts where both Successful and Unsuccessful hunter residency data is available, % Success is calculated.

   a. **Total % Success** = (Total number of successful hunters / [Total number of successful hunters + Total number of unsuccessful hunters]) x 100.

b. **Unit Resident % Success** = (Total number of successful GMU resident hunters/[Total number of successful GMU resident hunters + Total number of unsuccessful GMU resident hunters]) x 100.

c. **Other State Resident % Success** = (Total number of successful other Alaska resident hunters/[Total number of successful Alaska resident hunters + Total number of unsuccessful Alaska resident hunters] x 100.

d. **Non-Resident % Success** = (Total number of successful non-resident hunters/[Total number of successful non-resident hunters + Total number of unsuccessful non-resident hunters]) x 100.

e. **Unknown Resident % Success** = (Total number of successful unknown residency hunters/[Total number of successful unknown residency hunters + Total number of unsuccessful unknown residency hunters]) x 100.

4. **Total Days** = Total number of days or parts of days spent in the field by all hunters having the intent to harvest a given species.

5. **Average Effort** = Total number of days spent by all hunters in the field / Total number of hunters, where Total number of hunters = Total Successful + Total Unsuccessfuls.

CALCULATION OF TOTALS

AT THE SUBUNIT LEVEL:

HUNTER AND HARVEST INFORMATION:

1. **TOTAL HUNT**: When more than one hunt with the same hunt number appears within a subunit (e.g., Fall and Spring hunts with the same number; or a registration hunt open to anyone and a subsistence hunt, with the same number, open to local residents), the data for those hunts will be totalled.

2. **TOTAL SUBUNIT**: When more than one hunt for a given species occurs within a subunit, the data for all hunts for that species is totalled. Single hunts within a subunit for a given species are their own totals.

AT THE GAME MANAGEMENT UNIT LEVEL:

HARVEST INFORMATION:

1. **TOTAL UNIT**: All reported harvest for a given species, regardless of hunt number or hunt type, is totalled at the Unit level and is presented at the end of the Subunit tables.

   a. **When a GMU has no Subunits**, data from individual hunts are shown as in Subunit tables, then totalled in a GMU summary table, consistent with the format for GMU's with Subunits.

   b. **For unsealed furbearers (coyote, fox, mink, and marten** [except marten taken in GMU's 1-5, and 7, 18, and 19]**), harvest data is generally**

unavailable and (denoted by "n/a" in the tables). Documents dealing with these species relate more to transactions between trappers and fur dealers who export furs outside Alaska, rather than to the actual harvest of those animals in a given year. While useful for trend information, these documents are not generally reliable sources of harvest information. For marten, sealing is required in GMU's 1-5 and 7; in GMU's 18 and 19 the area biologists have taken extra care (through personal contact with trappers and fur dealers and/or intensive trapper questionnaire use) to document furbearer harvest. For those units, data is considered a reliable reflection of harvest levels.

c. **For sealed furbearers** (beaver, marten taken from GMU's 1-5 and 7, lynx, otter, wolf, and wolverine), data are totalled at the GMU level.

HUNTER INFORMATION:

Even though problems exist because of duplicate reporting when a single individual hunts in more than one subunit (one individual would be counted as more than one), **hunter data is totalled at the Unit level as well as at the subunit level. These data are intended for use as indices only and may overestimate the true number of hunters utilizing the resource.**

AT THE STATEWIDE LEVEL

TOTAL STATEWIDE

1. The sum total of all harvest data Statewide is shown in a separate table at the end of the GMU/SUBUNIT section.

2. Statewide totals by species are shown at the end of the GMU summaries in the SPECIES section.

3. No statewide totals for unsealed furbearers are given (lack of available data).

COMPARATIVE TABLES

The **HISTORICAL TABLES** section of this book contains tables which compare harvest and/or hunter information on a multi-year basis. These tables present statewide, regional or GMU totals from the previous Harvest Summary Books (1988-89, 1989-90) along with the 1990-91 information in a comparative format.

The HISTORICAL TABLES section is also the place to obtain information updated from previous years. Frequently, harvest documents are sent in for processing after the appointed deadlines; the data provided from these documents may not be received in time to be included for publication in the Harvest Summary Book. However, as the late information is received, the files are updated and corrected as necessary. This new information is then used to produce the updated totals seen in the tables containing comparative data. **You are cautioned to check the most current issue of the Harvest Summary Book for updates before using summary data presented in previous issues.**

MULTI-YEAR COMPARISONS OF HARVEST DATA

When comparing harvest levels by hunt number from one year to the next, you are cautioned to remember that hunt numbers, areas, bag limits, and/or methods and means may have been changed from one year to the next. In these cases, comparisons between years should only be made with those changes firmly in mind. In some cases, direct comparisons should not be made at all, depending upon what types of changes have been made.

As an example of changes which may make year-by year hunt comparisons invalid, consider GMU 14C moose drawing permit hunt number 923:

In 1986-87, hunt 923 had the following conditions:

1. Season dates: 12/1/86 - 2/28/87
2. Methods and Means: Any legal hunting weaponry
3. Hunt area: Specified portions of Ft. Richardson Military Base.
4. Bag Limit: 1 moose, either sex.

In 1987-88, hunt 923 had the following conditions:

1. Season dates: 9/8/87 - 10/31/87
2. Methods and Means: Archery only
3. Hunt Area: Specified portions of Ft. Richardson, south of Eagle River
4. Bag Limit: 1 moose, either sex, 10 bull quota

In 1988-89, hunt 923 had the following conditions:

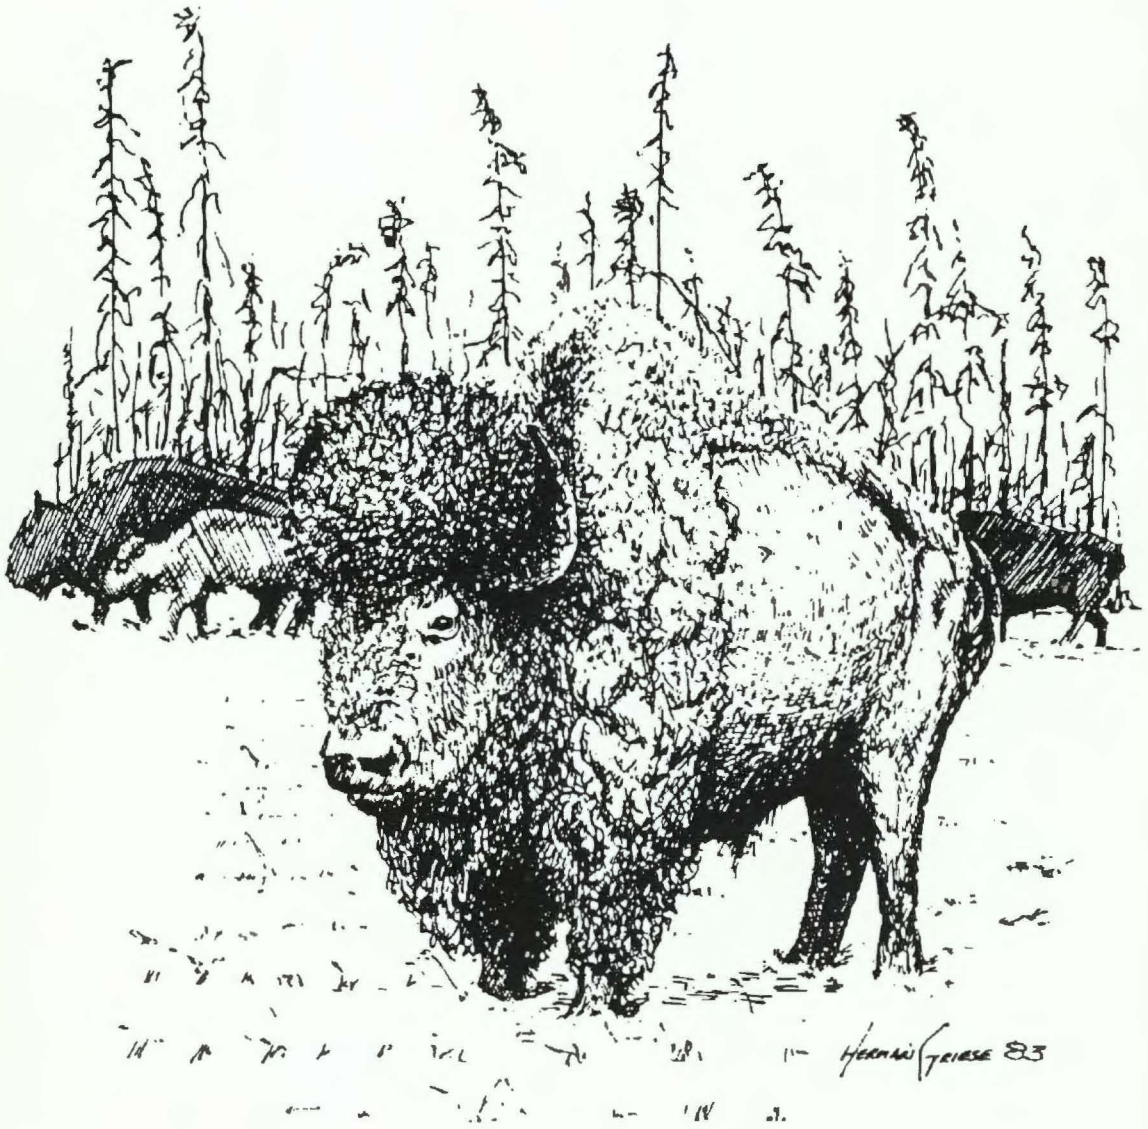

1. Season dates: 9/6/89 - 10/31/89
2. Methods and Means: Archery only
3. Hunt Area: Specified portions of Ft. Richardson, north of Eagle River
4. Bag Limit: 1 moose, antlerless only

In 1989-90, hunt 923 had the following conditions:

1. Season dates: 9/5/89 - 10/31/89
2. Methods and Means: Black powder muzzle-loaders only
3. Hunt Area: Specified portions of Ft. Richardson, north of Eagle River
4. Bag Limit: 1 moose, antlerless only

Any direct multi-year comparison of harvest levels for hunt 923 would be invalid. Similar situations apply to many other drawing and registration hunts across the state.

This book contains no multi-year comparisons of harvest data at the hunt number level. Because a comprehensive history of hunt numbers and conditions is not yet available, you are urged to exercise extreme caution before you attempt to make such comparisons. Until such time as documentation of hunt histories is available, please refer to the Seasons section of this book, to past and current issues of *Alaska Game Regulations*, the annual drawing and registration permit hunt supplemental newspapers, and Division of Wildlife Conservation staff who have knowledge of hunt histories (specific area biologists, Regional Regulation Specialists, Regional Management Coordinators, etc.).

Herman Griese 83

SOURCES OF HARVEST INFORMATION

The Division of Wildlife Conservation compiles Alaska wildlife harvest information from a diverse array of sources. This section outlines the various data sources for the species whose harvests are summarized in this book. Specific sources of harvest information for each separate species are delineated in the second part of this section.

HARVEST TICKETS

Harvest tickets are the primary means of collecting information on caribou, moose, and sheep harvests in areas not administered by registration or drawing permit hunts. License vendors and Department staff issue harvest tickets to individual hunters. Each "harvest ticket" has three parts: an overlay, containing hunter's name, residency information and license number; a hunt report containing harvest data; and a harvest ticket carried into the field by the hunter and validated when an animal is harvested., License vendors return overlays to the Division of Wildlife Conservation in Anchorage. Alalska law requires hunters to send in a completed hunt report within a specified time frame after the hunt. Reports are postage-paid and pre-addressed to be sent to Anchorage for central processing by the Information Management Section.

Moose and sheep overlays are keypunched, and hunters not returning reports are sent up to three reminder letters. Deer overlays are keypunched and the information is used for annual (southeastern Alaska) or periodic (Kodiak and Prince William Sound) survey questionnaires to randomly selected hunters. No hunter reports are required of deer hunters or Western Arctic caribou hunters. Caribou overlays are not presently keypunched.

Hunter reports provide information on hunter residency, effort, success, location of kill, method of take, transport means, commercial services used, sex of animal(s) killed, number of animals killed if multiple bag limits apply, horn or antler measurements where applicable, and chronology of kill.

DRAWING PERMITS AND REGISTRATION PERMITS

A drawing permit is obtained through a lottery drawing in which qualified applicants are chosen on the basis of a computerized random assignment of winning numbers. Harvest levels are regulated through the numbers of permits allotted within each hunt. Drawing winners are issued a permit, part of which is a hunt report which must be filled out and returned to the Division of Wildlife Conservation as part of the conditions of the permit hunt. Failure to return a hunt report for a drawing permit may lead to the exclusion of the hunter from eligibility for drawing permits in the following year.

Registration permits are obtained by application in person at designated area offices. In general, registration permit hunts, unlike drawing permit hunts, have no limiting quota of permits that may be issued. For a few hunts, the total number of permits is limited and permits are issued on a first-come-first-serve basis at designated offices. Harvest levels are regulated through emergency closures of each hunt when desired harvest levels have been reached. In certain registration hunts, only qualified local residents may participate. In some other hunts, only Alaskans holding a resident hunting license may participate; in others, any licensed hunter, regardless of residency, may hunt.

Registration permits contain a hunt report which must be returned either in person or by mail to a designated ADF&G office at a specified time following each hunt. Some drawing and registration hunts may also require hunters to telephone in hunt information.

Permit harvest reports provide hunter residency, effort, location of kill, success, method of take, transport means, and commercial services used in addition to harvest data (sex and horn/antler measurements where applicable).

TIER II PERMITS

1991-92 Tier II subsistence hunts were created by the Alaska Board of Game. Tier II subsistence hunts occur when there is not enough wild game in an area for all subsistence hunters to have a reasonable opportunity to take. Hunting permits are given to people who get the highest number of points on a scored application. Points are awarded by the following criteria (defined by law):

1. Customary and direct dependence upon the game population as the mainstay of one's livelihood
2. Local residency
3. Availability of alternative resources

In the 1991-92 regulatory year, 12 Tier II subsistence hunts were held for moose, caribou, mountain goat, and muskox.

FEDERAL PERMITS

During the 1991-92 regulatory year, 13 Federal subsistence hunts were held for caribou, moose, sheep and mountain goat. Federal regulations were set by a governing board analogous to Alaska's Board of Game. All Federal hunts were registration hunts and all permits issued were valid only for hunt areas on Federal lands. Harvest information was provided by a hunt report similar to the State's, to be returned by each permit holder by a specified deadline. Processing of all Federal harvest data was done by the Division of Wildlife Conservation, Information Management Section.

SEALING DOCUMENTS

Sealing certificates are used in gathering information on black and brown bear harvests not regulated under permit hunts, and some furbearer harvests.

Brown bear and black bear sealing certificates are filled out by an authorized Department employee at the time a hunter brings in a bear skull and hide to have a numbered locking tag (seal) affixed. Hunter residency, location of kill, transport means, commercial services used, and successful hunter effort data are obtained from bear sealing certificates, along with sex, age, and color-phase information. No information concerning unsuccessful bear hunters is collected. Sealing of black bears is required only for GMU's 1 - 7, 11 - 16, and 20. For those units where sealing is not required, harvest levels must be estimated and where available, are shown as "unreported harvest".

Of the furbearers harvested in Alaska, five species require sealing: beaver, lynx, otter, wolf, and wolverine. In addition, marten are required to be sealed in GMU's 1-5 (Southeastern Alaska) and GMU's 7 and 15. Furbearers are sealed by affixing a numbered locking seal to each pelt. Trapper residency data are not routinely collected, nor is effort or success information. Information on number of animals taken, location of harvest, method of take, transport means, pelt size and sex data (where applicable) are obtained from furbearer sealing certificates.

HUNTER QUESTIONNAIRES/SURVEYS

Hunter questionnaires are used to obtain harvest and hunter information for some species in lieu of other sources of reliable harvest information. Deer harvest is generally monitored through the use of hunter surveys: yearly in southeastern Alaska and periodically in Kodiak and Prince William Sound. The deer harvest information presented in this year's book was obtained through a deer survey covering both of these areas. Some biologists employ trapper questionnaires to monitor furbearer harvests, and some caribou harvest information is obtained through the use of hunter surveys.

Hunter questionnaires are direct mail surveys sent to a random sample of appropriate hunters and trappers based on names obtained from harvest tickets, sealing certificates, or tag sales. Follow-up questionnaires are frequently used to encourage hunters to respond. The total harvest of a population in question is estimated based on a statistical analysis of hunter questionnaire results. Questionnaires can be used as a vehicle for obtaining comprehensive information from hunters. In addition to the same information provided by hunt reports, hunter questionnaires may also provide information on hunter motivations, hunter expenses, use of public facilities, and observations of other wildlife .

HUNTER INTERVIEWS

Many area management biologists augment their more formal sources of harvest data by conducting informal interviews of hunters in the field, at local airports, and in rural towns and villages. Interviews can provide word-of-mouth information on otherwise unreported harvests, information on illegal kills, and a check on hunter reporting rates. While hunter interview information is subjective data, it can be of great help to the biologist in assessing harvest levels and harvest-related activities in his area.

FUR EXPORT AND FUR ACQUISITION REPORTS

Of the 18 furbearer species trapped in Alaska, only five have mandatory sealing requirements statewide. To estimate harvest of the remaining species, biologists may use information from raw fur export and fur acquisition reports. More frequently, when information is collected at all, it is obtained from trapper questionnaires and personal trapper interviews.

Fur acquisition reports are filled out by a fur buyer when raw furs are purchased from a trapper or fur dealer. A report of the transaction, showing species, number, and location in which the furs were trapped (GMU) is sent to ADF&G. Information on trapper residency, transport means, etc. are not available on fur export or acquisition reports. Fur acquisition reports may include reporting of animals taken in previous years.

Fur export reports are filled out when an individual sends raw furs out of state. The same information is collected from export reports as from acquisition reports, and the reports are sent to the Information Management Section in Anchorage for compilation.

Since fur reports provide a record of commercial transactions involving furs (animals kept for home tanning are not documented in fur reports), and are not an actual record of numbers of furbearers harvested in a given regulatory year, harvest estimate information extrapolated from fur reports should be considered marginal in quality. Raw fur purchase plus trapper export numbers may be summed for an index of harvest trends but do not necessarily reflect actual harvest. In view of this, reliable harvest data for unsealed furbearers are generally unavailable throughout the state. Where marten are sealed, data are shown; where specific area biologists make a concerted effort

to collect reliable furbearer information using all methods available, data are shown. However, no data are compiled on a Statewide basis for these species (coyote, fox, marten, mink).

HARVEST INFORMATION SOURCES: BY SPECIES

BEAVER

Beaver harvest information is collected from beaver sealing certificates. No residency data are collected. No data are available on unsuccessful beaver trappers, thus making trapper effort and per cent success information also unavailable. Since there is a multiple-animal bag limit on beaver, harvest totals are generally larger than numbers of successful trappers.

Beaver sealing certificate data may be augmented by information from trapper questionnaires, hunter interviews, and fur acquisition and export reports.

BISON

Bison harvest in Alaska is regulated by drawing permit and registration permit only. Bison harvest information is collected from permit hunt reports submitted by permit holders at some specified time after each hunt or by personal interviews with hunters before they leave the area of the hunt. In the 1991-92 regulatory year, 180 drawing permits were issued. A total of 90 (50%) permit reports were returned.

BLACK BEAR

Black bear harvest information is collected from black bear sealing certificates. Since information collected is for successful hunters only, unsuccessful hunter residency, hunter effort and per cent success figures are not available. In some units, a multiple-animal bag limit applies to black bear. In these cases, numbers of successful hunters may be smaller than total numbers of animals harvested. In some GMU's, black bears are not required to be sealed (see Sealing Certificates, above).

BROWN BEAR

Brown bear harvest information is collected from brown bear sealing certificates and from drawing and registration permit hunt reports. Special hunts are held on Kodiak, Southeastern Alaska, and in several game management units north of the Brooks Range. General season information on brown bear harvest is for successful hunters only; permit reports include unsuccessful hunter data as well. In 1991-92, 1547 brown bear registration permits were issued, and 1535 (99%) reports were returned. A total of 431 brown bear drawing permits were issued and 293 (68%) reports were returned.

CARIBOU

Caribou are a migratory species, and at any given time a caribou herd may range over more than one GMU or Subunit. When a caribou hunt is held, it generally applies to a specific herd rather than to a specific GMU/Subunit. Within Alaska, caribou are managed by herd, for which 33 have been identified. However, some biologists do examine their data on a GMU/Subunit basis as well. To accommodate both types of data collection, caribou harvest data is presented both ways, on a herd summary basis, and on an individual GMU/subunit basis. Because not all area biologists report their caribou harvest information by GMU/Subunit, the GMU information may be incomplete. ***For the most accurate statewide caribou harvest data, see the tables presenting harvest by herd.*** These tables may be found in the *SPECIES* section of this book. Because

of problems with non-reporting in many general season areas, data on caribou harvest are especially limited. In the table which presents caribou harvest by herd, low estimates (representing reported harvest + the low estimate of unreported kills) and high estimates (representing reported harvest + high estimates of unreported kills) are given. Reported harvest figures are obtained from returned harvest ticket reports. You should keep in mind that both High Total Harvest, and Low Total Harvest figures are estimates because of under-reporting or non-reporting by many caribou hunters. In some cases, unreported harvest equals or exceeds the reported harvest from a given herd.

Reporting on caribou harvest regulated by the permit system is somewhat more reliable. In the 1991-92 caribou permit hunt seasons, 3,898 State drawing and registration non-subsistence permits were issued; 2802 State Tier II subsistence permits were issued; 2601 Federal registration permits were issued. A total of 3,781 State hunt non-subsistence reports (97%) were returned; 2760 Tier II subsistence reports (99%) were returned; 2410 Federal hunt reports (93%) were returned.

In many units, a multiple-animal bag limit applies to caribou. In these cases, the numbers of successful hunters shown may be smaller than the total numbers of animals harvested.

COYOTE, FOX, MARTEN, AND MINK

Coyote, fox, marten and mink harvests are not easily documented since these furs are not generally required to be sealed (marten require sealing in GMU's 1 - 5 , 7 and 15). Documentation regarding unsealed furbearers generally amounts to records of transactions between trappers and fur dealers, and records of shipments of furs outside the state, either for sale or for tanning. Because such transactions may include furs taken in previous years, and because many trappers, especially in Northern and Western Alaska, may keep their trapped furs for tanning and use at home, these documents are not especially useful for reflecting true harvest levels. In addition, non-reporting of transactions may be substantial. As a result, figures derived from these documents may be useful only as trend indicators or as an index of harvest. Consequently, we have chosen not to include data from these sources as representative of harvest numbers. In some GMU's, particularly in GMU 18 and 19, where local economies may depend heavily on furbearer harvests, area biologists have made a concerted effort to accurately monitor the harvest through the use of trapper questionnaires, and personal interviews with trappers and fur dealers. We have reported their figures at the GMU level, but have not incorporated them into any Statewide estimates of unsealed furbearer harvests. Where marten are sealed (GMU 1-5, and 7), harvest figures are presented but are not incorporated into a Statewide estimate.

DEER

While harvest tickets are issued to deer hunters, no hunt reports are required upon completion of a hunt. Deer harvest information is routinely calculated through the use of deer surveys. For the 1991-92 Sitka Blacktail Deer harvest, 8005 deer surveys were issued for Southeastern and South Central Alaska, and 2732 were returned (34%). The survey covered harvests in Southeastern Alaska, Prince William Sound and Kodiak. Up to three follow-up questionnaires are sent to encourage hunters to report. Estimates of harvest size are calculated from questionnaire responses. In 1991-92, 700 deer registration permits were issued for newly-instituted hunts in Southeastern Alaska; 674 hunt reports (96%) were returned.

ELK

Alaska's elk harvest is regulated by drawing permit and registration permit hunts. All legal elk harvest occurs on Raspberry and Afognak Islands, in the Kodiak Island archipelago, in GMU 8. Elk harvest information is obtained from permit hunt reports. In the 1991-92 regulatory year, 2,867 drawing and registration permits were issued, with a 97% permit hunt report return rate (2774 returned).

LYNX

Lynx harvest information is collected from furbearer sealing certificates. No residency data are collected. No data are available on unsuccessful lynx trappers, thus making trapper effort and % success information also unavailable. Since there is a multiple-animal bag limit on lynx, harvest totals are generally larger than numbers of successful trappers.

Lynx sealing certificate data may be augmented by information from trapper questionnaires, hunter interviews, and fur acquisition and export reports.

MOOSE

Moose harvest information is collected from permit hunt reports, registration hunt reports, and harvest ticket hunt reports. For the 1991-92 regulatory year, there were 45,577 harvest tickets issued and 33,290 hunt reports returned (73%). A total of 2,731 State drawing and registration permits (non-Tier II) were issued, with 2,626 (96%) permit hunt reports returned. A total of 398 Tier II permits were issued, and 335 hunt reports (84%) were returned. Federal agencies issued 769 registration permits, and 728 reports were returned (94%).

MOUNTAIN GOAT

Mountain goat harvest information is collected from registration permit hunt reports and drawing permit hunt reports. There are no general seasons on mountain goats in Alaska. GMU's 6 and 15 have several subsistence registration permit hunts for mountain goat and there were 4 Tier II and 2 Federal mountain goat hunts held. In the 1991-92 regulatory year, 1,977 registration permits were issued; 1858 hunt reports (94%) were returned. In that same period, 480 drawing permits were issued, and 477 hunt reports (99%) were returned. Tier II permits issued numbered 94, with 92 (98%) being returned. Federal agencies issued 16 subsistence permits for mountain goats, and 14 reports were returned (88%).

MUSKOX

Muskox harvest information is collected from drawing and registration permit hunt reports. There are no general seasons on muskoxen in Alaska. This year, there were 2 Tier II muskox hunts held. In the 1991-92 regulatory year, 114 non-Tier II drawing and registration permits were issued; 114 permit reports (100%) were returned.

OTTER

River otter harvest information is collected from furbearer sealing certificates. No residency data are collected. No data are available on unsuccessful otter trappers, thus making trapper effort and per cent success information also unavailable. Since there is a multiple-animal bag limit on otter, harvest totals are generally larger than numbers of successful trappers.

River otter sealing certificate data is frequently augmented by information from trapper questionnaires, hunter interviews, and fur acquisition and export reports.

SHEEP

Dall sheep harvest information is obtained from drawing and registration permit reports and from general season hunt reports. During the 1991-92 sheep hunting seasons, 7,901 harvest tickets were issued and 5,442 (82%) hunt reports were returned. During that same period, 627 dall sheep drawing permits were issued, and 621 (99%) permit hunt reports were returned. Six Federal sheep permits were issued; 2 (33%) hunt reports were returned.

WATERFOWL

Statewide waterfowl harvest information is collected annually through the use of hunter surveys. The distribution of hunter questionnaires has been incorporated into the sales of the state duck stamp. Self-addressed, pre-paid questionnaires are issued to the purchasers of the first 2 stamps out of each booklet of 5 stamps (40% sample). Harvest and hunter activity is compiled from survey cards returned by a specified date. No reminder surveys are sent to non-respondents. No hunter questionnaires were issued in 1991-92; therefore, no estimate of statewide waterfowl harvest is available.

WOLF

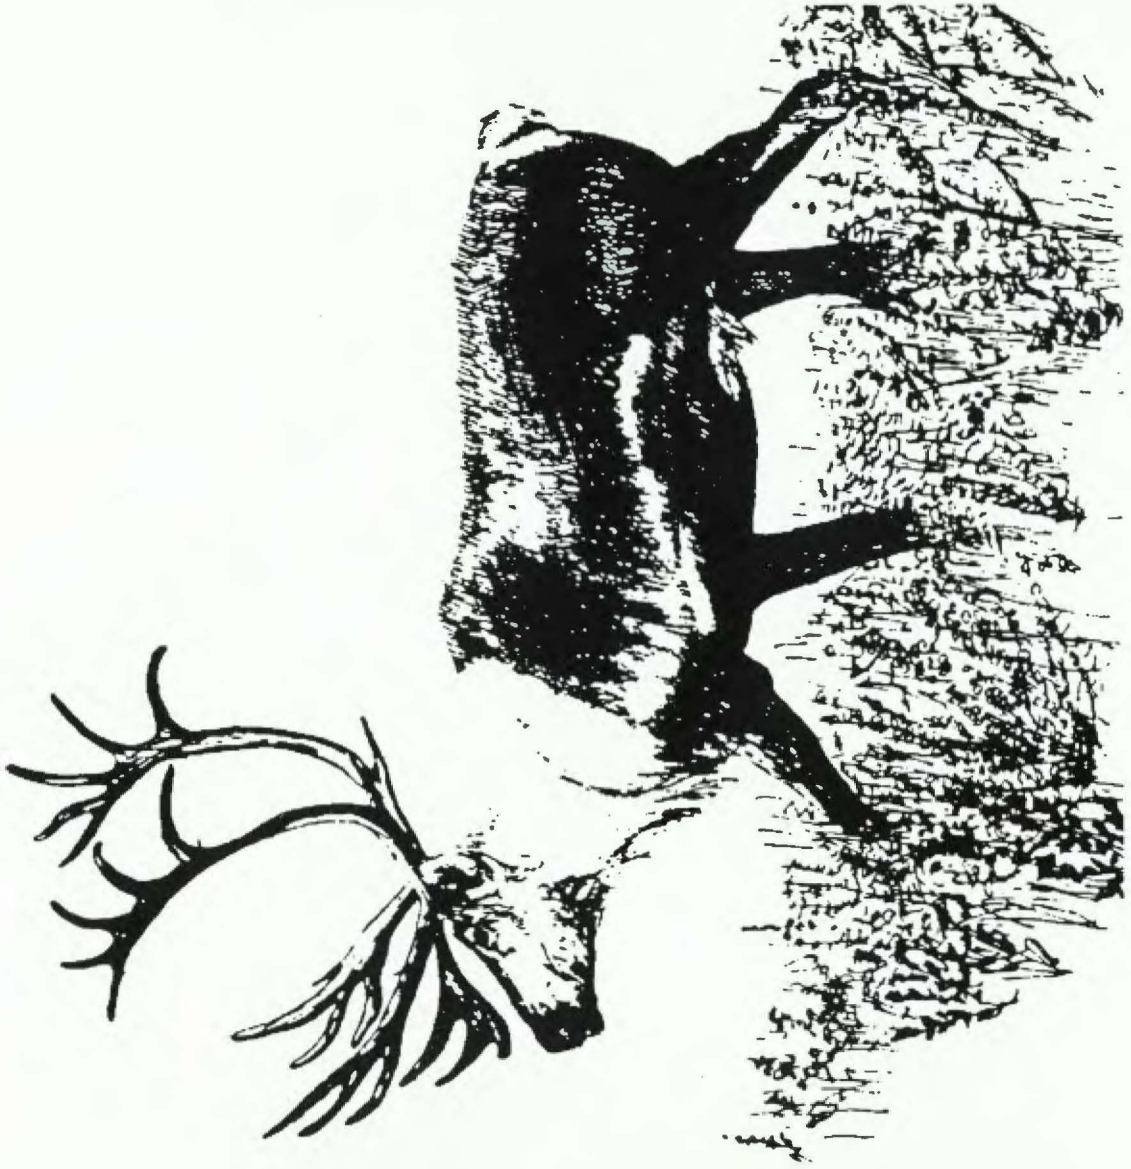

Wolf harvest information is collected from furbearer sealing certificates. No residency data are collected. No data are available on unsuccessful wolf trappers and hunters, thus making trapper and hunter effort and % success information also unavailable. Since there is a multiple-animal bag limit on wolves, harvest totals are generally larger than numbers of successful trappers.

Wolf sealing certificate data may be augmented by information from trapper questionnaires, hunter interviews, and fur acquisition and export reports.

WOLVERINE

Wolverine harvest information is collected from furbearer sealing certificates. No residency data are collected. No data are available on unsuccessful wolverine trappers or hunters, thus making trapper and hunter effort and % success information also unavailable. Since there is a multiple-animal bag limit on wolverine, harvest totals are generally larger than numbers of successful trappers.

Wolverine sealing certificate data may be augmented by information from trapper questionnaires, hunter interviews, and fur acquisition and export reports.

[1] Low = Minimum reported harvest
[2] High = Low + estimate of unreported kill
[3] Based on minimum reported harvest
[4] Low = Reported harvest + low estimate of unreported kill
High = Reported harvest + high estimate of unreported kill
Estimates of unreported kill available for Western Arctic and Porcupine herds for 1988-89 only.
1991-92 take by residency estimated based on herd harvests. Previous year's estimates may be low since they were based on GMU harvests.
[5] Estimates only, based on deer hunter surveys.

Yanert[5]	20A

[1]Galena Mountain,Ray Mountains, and Wolf Mountains herds comprise the Kokrines Herd.
[2]Tustumena Bench Herd has split into Killey River and Fox River Herds.
[3]Andreafsky Herd may not exist anymore
[4]Teshekpuk Herd included in W. Arctic Herd
[5]Yankert Herd included in Delta Herd
[6]Kuskokwim Mountains Herd same as Beaver Mountains Herd

HERD COMMENTS

ADAK	MULTIPLE BAG LIMIT
ANDREAFSKY	HERD MAY BE NONEXISTENT
BEAVER	INCLUDES KUSKOKWIM MTS HARVEST
CENTRAL ARCTIC	MULTIPLE BAG LIMIT
DELTA	REGISTRATION HUNTS CLOSED BY EMERGENCY ORDER.INCLUDES YANERT HERD
DENALI	NO OPEN SEASON—NO KNOWN HARVEST
FORTYMILE	GENERAL SEASON AND REGISTRATION HUNTS CLOSED EARLY.
FOX RIVER	NO OPEN SEASON.
GALENA MOUNTAIN	INCLUDED IN KOKRINES HERD
KILBUCK MOUNTAINS	MULTIPLE BAG LIMIT. STATE TIER II HUNT CANCELLED.
KILLEY RIVER	NO OPEN SEASON.
KOKRINES	INCLUDES RAY MTS., WOLF MTS., AND GALENA MTS. HERDS.
KUSKOKWIM MOUNTAINS	HARVEST INCLUDED IN BEAVER MTNS. HERD
MACOMB	REGISTRATION HUNT CLOSED EARLY.
MULCHATNA	MULTIPLE BAG LIMIT. HIGH UNREPORTED HARVEST
NELCHINA	DRAWING PERMIT FIGURES REPRESENT STATE TIER II PERMIT HUNT.
N. ALASKA PENINSULA	MULTIPLE BAG LIMIT
NUSHAGAK PENINSULA	NO OPEN SEASON. 2 ILLEGAL KILLS.

CARIBOU HERDS BY UNIT/SUBUNIT

HERD	UNIT
Adak	10
Alaska Peninsula (N)	9C,E
Alaska Peninsula (S)	9D
Andreafsky[3]	18, 21E, 22A
Beaver Mountains[6]	19A,D, 21A
Big River	19C
Central Arctic	26A,B,C
Chisana	12
Delta[5]	20A
Denali	13E, 20C
Fortymile	12, 20B,D,E, 25C
Fox River[2]	15C
Galena Mountain[1]	21B,C,D
Kenai Lowlands	15A
Kenai Mountains	7
Kilbuck Mountains	18, 19B
Killey River[2]	15B
Kokrines[1]	20F,21B,C,D,24
Kuskokwim Mountains[6]	19A,D, 21A
Macomb	12, 20D
Mentasta	11, 12
Mulchatna	9B,C, 17B,C, 19A,B
Nelchina	13A,B,C,D,E, 14B
Nushagak Peninsula	17A,C
Porcupine	25, 26B,C
Rainy Pass	16B, 19B,C
Ray Mountains[1]	20F, 21C, 24
Sunshine Mountains	19D, 21A
Teshekpuk[4]	26A
Tonzona	19C, 20C
Tustumena Bench[2]	15B,C
Western Arctic[4]	21C,D,E, 22A,B, 23, 24, 26A,B
White Mountains	20D,F, 25C,D
Wolf Mountain[1]	21B,C,D, 24
Yanert[5]	20A

[1]Galena Mountain,Ray Mountains, and Wolf Mountains herds comprise the Kokrines Herd.
[2]Tustumena Bench Herd has split into Killey River and Fox River Herds.
[3]Andreafsky Herd may not exist anymore
[4]Teshekpuk Herd included in W. Arctic Herd
[5]Yankert Herd included in Delta Herd
[6]Kuskokwim Mountains Herd same as Beaver Mountains Herd

1991-92 ALASKA HUNTING AND TRAPPING REGULATIONS AND SEASONS

The Regulations and Seasons section of this book lists all hunting and trapping seasons open in Alaska during regulatory year 1991-92. The descriptions of the seasons, bag limits, hunt areas, and methods and means are the same as those listed in *Alaska Game Regulations, no. 31, effective July 1, 1991 - June 30, 1992* -- with one exception:

The *season dates*, defined hunt areas and/or bag limits *have been adjusted to reflect actual opening and closing dates*, boundary changes or hunt conditions as mandated by Emergency Orders issued by state biologists.

You should be aware that adjustment of season lengths is only one method by which harvest levels may be manipulated from year to year. When comparing differences in harvest levels between years, possible differences in season lengths, size and location of hunt areas, bag limits and methods and means should be kept in mind. For a more detailed discussion of the limitations of multi-year comparisons, please refer to the *Introduction/How To Use This Book* section.

BEAVER -- TRAPPING

Game Management Unit and Bag Limits	Subsistence/ Resident Open Seasons	Nonresident Open Seasons
Units 1 (except **1(D)**), **2, 3** (except Mitkof Island), **and 4** (that portion east of Chatham Strait) No limit	Dec. 1--May 15	Dec. 1--May 15
Unit 1(D)	No open season	No open season
Unit 3, Mitkof Island No limit	Dec. 1--April 15	Dec. 1--April 15
Unit 4 (that portion west of Chatham Strait)	No open season	No open season
Unit 5 No limit	Nov. 10--May 15	Nov. 10--May 15
Unit 6, 7, and 15 Twenty per season	Feb. 1--Mar. 31	Feb. 1--Mar. 31
Units 8, 11, 13, 14(A), 14(B), and 16 Thirty per season	Nov. 10--Apr. 30	Nov. 10--Apr. 30
Unit 9 Forty per season	Jan. 1--Mar. 31	Jan. 1--Mar. 31
Units 10 and 26	No open season	No open season
Unit 12 Fifteen per season	Nov. 1--Apr. 15	Nov. 1--Apr. 15
Unit 14(C), that portion within the drainages of Glacier Creek, Kern Creek, Peterson Creek, and Twentymile River Twenty per season	Feb. 1--Mar. 31	Feb. 1--Mar. 31
Remainder of Unit 14(C)	No open season	No open season
Unit 17(A) Twenty per season	Jan. 1--Jan. 31	Jan. 1--Jan. 31
Units 17(B) and 17(C) Twenty per season	Jan. 1--Feb. 28	Jan. 1--Feb. 28
Unit 18 No limit	Nov. 1--June 10	Nov. 1--June 10
Units 19, 21, and 24 Fifty per season	Nov. 1--Apr. 15	Nov. 1--Apr. 15
Unit 20(A) Twenty five per season	Feb. 1--Apr. 15	Feb. 1--Apr. 15
Unit 20(B), that portion of the Chena River downstream from its confluence with the Little Chena River, and Badger (Piledriver) Slough downstream from Plack Road	No open season	No open season
Remainder of Unit 20(B), and Units 20(C), 20(E), and that portion of Unit 20(D) draining into the north bank of the Tanana River, including the islands in the Tanana River Twenty five per season	Nov. 1--Apr. 15	Nov. 1--Apr. 15
Remainder of Unit 20(D) Fifteen per season	Feb. 1--Apr. 15	Feb. 1--Apr. 15

BEAVER -- TRAPPING

Units 20(F) and 25 (except Unit 25(C)) Fifty per season	Nov. 1--Apr. 15	Nov. 1--Apr. 15
Units 22(A) and 22(B) Fifty per season	Nov. 1--June 10	Nov. 1--June 10
Remainder of Unit 22 Fifty per season	Nov. 1--Apr. 15	Nov. 1--Apr. 15
Unit 23, the Kobuk and Selawik River drainages Fifty per season	Nov. 1--June 10	Nov. 1--June 10
Remainder of Unit 23 Thirty per season	Nov. 1--June 10	Nov. 1--June 10
Unit 25(C) Twenty five per season	Nov. 1--Apr. 15	Nov. 1--Apr. 15

BISON

Game Management Unit and Bag Limits	**Subsistence/ Resident Open Seasons**	**Nonresident Open Seasons**
