

RC 033

**Dear Mr. Chairman and board members**

**As permit holders from Trap point fisheries we would like to register our support for proposal 99**

**Most set net sites on the south end are dual or multiple permit sites. I believe this proposal is one of the few ways to keep these sites viable. During the three years that it was legal to stack permits we were able to utilize this twice. Once at the birth of our son and one time when our father had heart surgery.**

**Sincerely**

  
**Jason and Corina Watt**
