Coho Fact Sheet Regarding Commercial Harvest

*This chart does not include Kenai and Turnagain Arm stocks.

- **Habitat degradation and predation by invasive pike are the determining factors for the number of smolt out-migration.**

Reference Bob Clark's ADF&G report presented to the Board 1/31/14:

- **The Little Susitna produces large returns from small escapements of coho.**
- **The number of smolts that go to the ocean are the determining factor of returns.**
