# **Petersburg Advisory Committee Minutes**

1/7/2015

Location: Assembly Chambers Call to Order: by chairman Bob Martin at 6:30 pm. Roll Call: 11 of 14 members present

AC members present:

AC Absent:

| Bob Martin      | Max Worhatch   |
|-----------------|----------------|
| Joel Randrup    | David Benitz   |
| Arnold Enge     | Ryan Littleton |
| Kirt Marsh      |                |
| Ben Case        |                |
| Wes Malcom      |                |
| Jerry Dahl      |                |
| Andy Knight     |                |
| Stan Malcom     |                |
| Frank Neidiffer |                |
| Ted Sandhofer   |                |
|                 |                |

ADF&G Present:

Joe Stratman, regional shellfish biologist Troy Thynes, area management biologist for commercial finfish Kevin Clark, assistant area management ... commercial fish Patrick Fowler, area management biologist for sportfish

Visitors:

Megan O'Neil, Petersburg Vessel Owner's Association John Jensen, Board of Fish Mark Roberts, Alaska Troller's Association, local troller Ed Wood, local troller and longliner

# Main Agenda Item was to consider Southeast Finfish Proposals

New Business:

Elections: Bob Martin, Arnold Enge, and Stan Malcom were nominated to be re-elected for two year terms (expiring 12/2016) in their existing seats with the exception of Bob Martin's seat being relaxed from "crab" to an "undesignated" spot as there are usually several AC members holding crab permits in addition to their primary seat designation. There were no objections to the "undesignation" and no competing nominees. All three members were re-elected. We discussed re-visiting some shrimp proposals we had punted to the Shrimp Task Force at our last meeting and decided to leave them alone. We agreed to re-visit #239 regarding a

statewide proposal affecting Dungeness pot storage at the next meeting (Jan. 8). Joe Stratman was concerned that there may have been a misunderstanding about how proposal #239 would affect Dungeness pot storage.

Visitor Mark Roberts requested that we take up the commercial trolling proposal first since he would be unavailable at the next meeting so we agreed begin with proposal #220.

Proposals #220 - 233, then 114-134 were considered and recorded in proposal comments which are attached.

The meeting was adjourned at 10:00 pm to be resumed the following evening Jan. 8 at 6:30pm.

# Jan 8. continuation of Meeting...

Location: Assembly Chambers Call to Order: by chairman Bob Martin at 6:30 pm. Roll Call: 10 of 14 members present

AC members present: AC Absent:

| Bob Martin      | Max Worhatch   |

# ADF&G Present:

Joe Stratman, regional shellfish biologist Troy Thynes, area management biologist for commercial finfish Kevin Clark, assistant area management ... commercial fish Patrick Fowler, area management biologist for sportfish

Visitors: Megan O'Neil, Petersburg Vessel Owner's Association

New Business: Proposal #239 reconsidered and voted down. Proposals #135-210 were considered. Member Kirt Marsh left the meeting after #139.

Meeting adjourned at 10:45 pm.

Minutes taken by Jerry Dahl and Bob Martin.

Proposal votes and comments are attached.

|               |     |    |    |    | worms  |
|---------------|-----|----|----|----|--|
|               |     |    |    |    |  |
| Sitka Herring | 123 |    |    | na |  |
| Sitka Herring | 124 |    |    | na |  |
| Sitka Herring | 125 | 0  | 11 |    | Micromanaging department for no reason   |
| Sitka Herring | 126 | 0  | 11 |    | Would cause devastating price drop to<br>existing roe on kelp markets. Even 2014<br>showed drastic     |
|               |     |    |    |    | price drop.  |
| Spawn on Kelp | 127 | 0  | 11 |    | Roe on kelp participants generally favor<br>double-ponding to conserve herring. This<br>proposal might |
|               |     |    |    |    | discourage conservation in favor of product quality in low biomass years.                              |
| Spawn on Kelp | 128 | 3  | 8  |    | Might cause more fish to be used in fisheries during low biomass years                                 |
|               |     |    |    |    | Some members thought it could add value to product and that  |
|               |     |    |    |    | joining pens together could make adding<br>herring less stressful on the fish being added<br>to pens   |
| Spawn on Kelp | 129 | 9  | 2  |    | Midnight is a bad time. Predators enter pens and destroy product.                                      |
|               |     |    |    |    | Minority said just stagger times and harvest earlier in day.   |
| Dogfish       | 130 |    |    | na |  |
| Sablefish     | 131 | 0  | 11 |    | Too vague but not bad idea, liked #134<br>better   |
| Sablefish     | 132 |    |    | na |  |
| Sablefish     | 133 |    |    | na |  |
| Sablefish     | 134 | 11 | 0  |    | Good for testing out the pot fishery to<br>address flea and slime eel issues                           |
| Sablefish     | 135 | 10 | 0  |    | Housekeeping to get ready for a pot fishery?<br>- Fine   |
| Sablefish     | 136 | 2  | 8  |    | Not clear how many people could be on<br>boat, whether permits required for non-<br>participants       |
|               |     |    |    |    | Not sure there is a problem that needs to be addressed   |

|                |     |    |    |    | Minority in favor thought 50 was plenty and<br>fishery is rapidly expanding and now is the<br>time to get it under control  |
|----------------|-----|----|----|----|---|
| Sablefish      | 137 | 5  | 5  |    | Supporters liked gear limit, but want to make sure 350 hooks per permit can be stacked  |
|                |     |    |    |    | Opposers don't think there is a problem with too many black cod being harvested   |
| Gear/Logs      | 138 | 10 | 0  |    | In favor if confidentiality could be protected, perhaps by sealed logbooks  |
| Gear/Logs      | 139 | 10 | 0  |    | Seems reasonable  |
| Lingcod        | 140 | 0  | 10 |    | Not convinced there is a conservation or other stock issue  |
| Lingcod        | 141 |    |    | na |   |
| Lingcod        | 142 | 9  | 0  |    |   |
| Sport Rockfish | 143 | 4  | 5  |    | There is real stock issue and mortality<br>concern but it is mainly near Sitka.<br>The average local sport fisherman does not<br>have this technology when jigging for food<br>and does not release many. |
|                |     |    |    |    | Those supporting it thought it addressed a serious concern and this proposal was not an undue hardship  |
| Sport Rockfish | 144 | 0  | 9  |    | Charter member said this was a bad idea<br>unless #143 was in effect  |
|                |     |    |    |    | because mortality would increase otherwise  |
| Sport Rockfish | 145 | 9  | 0  |    | Sure  |
| Subsistence    | 146 | 9  | 0  |    | Housekeeping  |
| Subsistence    | 147 | 0  | 8  |    | RAC should stay out of state regs and #146<br>addresses the issue   |
| Subsistence    | 148 | 0  | 9  |    | Already allowed by readily attainable special permit  |
| Klawock        | 149 |    |    | na |   |
| Klawock        | 150 |    |    | na |   |
| Klawock        | 151 |    |    | na |   |
| Klawock        | 152 |    |    | na |   |

| Com. Salmon<br>mgt   | 173        | 0 | 9 |    | Extreme measure to go back to 1946 data.<br>Seems like a resource grab by one<br>community.                       |

| Gillnet in 6-D                                 | 207 | 9 | 0 |    | In years of hight abundance it would give a little extra opportunity to district 6-D gillneters. Seiners did not object.   |
| District 8 gillnet<br>mesh size<br>restriction | 208 | 3 | 6 |    | 208 is opposed by commercial fishing<br>members on the AC. Gillnetters express that<br>they historically catch a baseline number of<br>Stikine Chinook during the District 8 sockeyer<br>fishery and this has been understood and<br>accounted by the Department and the treaty<br>with Canada for decades. Recently more<br>boats have focused on Anita Bay hatchery<br>kings returning through a different corridor in<br>District 8 and there is a misperception that<br>these boats are targeting and catching<br>Stikine Chinook. The proposer, Stan<br>Malcom, and two other AC members<br>supported this proposal because they feel<br>that it is reasonable to make gillnets less<br>effective on all Chinook while District 8 is<br>managed as a Sockeye fishery. |

| Small mesh<br>gillnets get more<br>meshes deep | 209 | 2  | 5  |    | Gillnet performance data would be different due to unknown efficiency and could shorten openings    |
|--|-----|----|----|----|---|
|  |     |    |    |    | Supporters note that smaller mesh nets are unnecessarily shallow and ineffective                    |
| Monofilament<br>Gillnet                        | 210 | 5  | 3  |    | Supporters like option of cheaper nets. Not sure how it would affect fishing.                       |
|  |     |    |    |    | Catch rate might increase. Department might have to reduce time until data collected                |

| Statewide<br>Dungeness pot<br>storage             | 239 | 0  | 10 |    | We re-considered this statewide shellfish<br>proposal after it was brought to our attention<br>that we may have been given the wrong<br>impression by the department that it would<br>just bring the 72-hour pot storage in line with<br>the 7-days allowed after the summer and fall<br>seasons we were familiar with locally. This<br>does not seem to be the case although it<br>may be the intent of the proposer to do that.<br>We were not comfortable amending this<br>without consulting the proposer so voted it<br>down unanimously. |

## Sitka Advisory Committee December 18, 2014 Sitka Sound Science Center, 834 Lincoln Street

#### I. Call to Order: 6:30 PM by John Murray

II. Roll Call: Jessica Gill

Members Present: Jerry Barber, Dick Curran, Kim Elliot, Jeff Feldpausch, Tad Fujioka, Jessica Gill, Randy Gluth, Moe Johnson, Karen Johnson, John Murray, Bradley Shaffer, Wayne Unger Members Absent: Cody Loomis, Brian Massey, Peter Roddy, Floyd Tomkins Number Needed For Quorum on AC: 8

List of User Groups Present: Hand Troll, Longline, Subsistence, Alternate 1, Trapping, Alternate 2, Hunting, Seine, At-Large 1, Power Troll, At-Large 2, Processor

#### III. Approval of Agenda:

No formal agenda was published, but John overview the proposals we would try to cover during the meeting. John would like to discuss a few subsistence/personal use fishery proposals this evening, if there's time.

- IV. Approval of Previous Meeting Minutes: Kim made a motion to approve all the minutes. Jerry seconded. 9 in favor; 2 abstain. Meeting minutes from November 18<sup>th</sup>, December 2<sup>nd</sup>, and December 10<sup>th</sup> were approved. Jessica will forward the minutes onto Boards Support.
- V. Fish and Game Staff Present: Dave Gordon, Troy Tydingco, Mike Vaughn, Kyle Ferguson (Alaska Wildlife Troopers)
- VI. Guests Present:

Steve Reifenstuhl, Mike Baines, Randy Langtiegne, Al Wilson, Tori O'Connell, Roger Ingman, Linda Behnken, Frank Bolivich, Jeff Farvour, Troy Denkinger

#### VII. Old Business:

Charter seat elections will not be held tonight. John and Jessica did not notify Boards Support in time before elections were going to be held.

VIII. New Business:

Kim discussed a high school scholarship for students going to college/trade school in the maritime industry.

Jerry asked about the charter seat/at-large seat. Steve Reifenstuhl asked about adding an aquaculture seat, and John mentioned the possibility of a gillnet seat. Bradley mentioned it would throw off the number of seats, with split even votes if we moved outside the 15 current members. Kim suggested we approached it a little differently. Bradley asked if it was public notice or administrative hold up that barred us from holding the elections tonight. John mentioned that the issue was not letting Boards Support know about the election in a timely manner.

John asked about BOF proposal 113 and possibly bringing this up at the next meeting. Kim mentioned that she looked up the proposer group, look to be a worldwide conservation group.

| Alaska Board of Fisheries<br>Mandatory- Please Summarize Your Proposal Comments in this Form |                    |                      |  |  |  |  |  |  |
|  |                    |                      |  |  |  |  |  |  |
| BOG or BOF   | Proposal<br>Number | Proposal Description |  |  |  |  |  |  |
| Supports or<br>Opposes?  | Number<br>Support  | Number<br>Oppose     | Comments/Discussion (list Pros and Cons)/Amendments to Proposal  |  |  |  |  |  |
| BOF  | 123                | Assign eq            | ual quota shares in the Sitka Sound commercial sac roe herring fishery.  |  |  |  |  |  |
| ⊠ Oppose   | 3                  | 7, 2<br>abstain.     | Wayne moved to adopt, Dick seconded.<br>Wayne—processor side of things and local economy it's something that we<br>should be in support of. Less equipment out on the grounds to harvest the<br>same amount of fish. Give more towards the local fishermen, and the<br>money would stay in Sitka. Not as many tenders into town. More<br>processing time, this could extend the processing out to 10-11days.<br>Kim—thinks there's a problem with this, and getting all the permit holders to<br>agree, and it could be more damaging to the herring biomass. Local<br>economy counts on seiners to spend their money every year. Doesn't think<br>she'll support it.<br>Moe—would like to hear the permit holders input. Every year this comes<br>up.<br>Troy Denkinger (Public)—strongly believes this equal split will leave the<br>money in town. There are losers though- the out of town tenders and pilots.<br>Money would stay year round and not leave.<br>Dick—Should we leave this up to the permit holders?<br>Tad—this would set BOF and ADF&G to manage this way regardless of if all<br>permit holders agree.<br>Kim—do they have to have 100% agreement to have quota shares?<br>Troy D.—yes. The last time this came up, 80% signed off, 10% neutral, 10%<br>strongly opposed.<br>Roger Ingman (Public)—been in favor with equal splits, agrees with Troy.<br>Mature biomass too large during test sets, and with equal quotas, they can<br>give the fish to certain permits.<br>John—if you don't have proposal 126 pass, this won't work?<br>Dave (ADF&G)—not necessarily. Those doing SOK would give up seine. No<br>having to give up permits, SOK harvest biomass would be taken away from<br>sac roe biomass.<br>Kim—maybe I'm confused, but if they only want to send out a few boats,<br>they would send out all the boats? And you could wipe out a whole<br>population by fishing?<br>Dave (ADF&G)—ot necessary.<br>Kim—you misunderstand. One big mass of herring, you'd fit 10 boats vs. 50<br>boats, and you could take a bunch of them? Could you damage the biomass<br>future with equal shares?<br>Dave (ADF&G)—if we execute a fishery in a smaller area it's stil |  |  |  |  |  |

|          |     |   | perspective is that ADF&G still have control, and everyone would have been<br>allocated a certain percentage or tonnage.<br>Roger (Public)—FYI, when we've had equal splits, processors have so many<br>boats, and it's split up on the # of boats the company has. Don't have to<br>send out 10 boats for 10 shares, can send out 1 boat to fish the 10 shares.<br>Tad—2 points: 1) conservations concern, you're assured to not go over the<br>quota with less boats fishing. 2) from economics, the value of the permit<br>goes up, and it's already an expensive permit, and that might be a concern<br>for people trying to get in the fishery.<br>Dick—market might make a difference in the price of the permit.<br>Jerry—this one's similar to proposal, but likes that the 70/30 split for the<br>management.<br>John—didn't it have to be 100% majority? Who would set the new shares?<br>Tad—BOF would set new shares regardless of permit holder agreements.<br>Troy (Public)—it has to be 100% between permit holders and then go to<br>equal shares.<br>Dave (ADF&G)—it would be like Chatham black cod. We don't manage the<br>shares, only the openings and closures.<br>Steve Reifenstuhl (Public)—past BOF meetings have looked for 100%<br>agreement from permit holders.<br>Lerry called the question   |  |  |
|----------|-----|---|---|--|--|
|          |     |   | Jerry called the question.  |  |  |
| BOF      | 124 | Allow purse seine permit holders to vote on equal quota shares in the Sitka Sound |   |  |  |
|          |     | commerc   | ial sac roe herring fishery.  |  |  |
| 🔀 Oppose | 3   | 6, 3<br>abstain   | Jerry moved to adopt, Kim seconded.<br>Jerry—likes the idea of 70% vote, and a lot of things are already based on<br>50% majority. Doesn't like that 1 or 2 permit holders can stop the other 48<br>from doing what they want to do, like the way it is now.<br>Wayne—this is a fisherman issues, in terms of how they want to vote.<br>Jerry called question.  |  |  |
|          |     | Reduce t  | ne harvest rate and establish a maximum guideline harvest level for the Sitka   |  |  |
| BOF      | 125 |   | mmercial sac roe herring fishery.   |  |  |
| ⊠ Oppose | 4   | 7   | Tad left, voting down to 11. Jeff moved to adopt, Kim seconded.<br>Jeff— this proposal would cap the harvest at 10%, and GHL cap at 10,000<br>tons. Sac-roe fisheries are very wasteful, 12% is harvested, 88% waste. Dr.<br>Hamada from Research Institute for Humanity and Nature gave an overview<br>to Sitka Tribe of Alaska's council about what's going on with herring in Japan.<br>In his work, he contacted Japanese processors, the herring from Canada and<br>southeast AK is processed in China, then the roe is extracted, and the rest<br>turned into fish meal. Lack of fish meal is hurting fish farmers. Fish meal<br>prices have gone up tripled in the last 15 years because of Peruvian anchovy<br>decline. This year's price was the lowest ever, \$0.09 a pound exvessel value.<br>Make herring least valuable fish in AK, part of this decline is due to the end<br>user—losing some of the kazunoko users. Japanese could gift kazunoko to<br>government officials, but government in Japan banned that. At which point<br>are herring left more in the water? Lenfest Report found that forage fish are<br>worth two times as much left in the water as a prey species for other<br>fisheries. This proposal would make the market better (simple supply and<br>demand) and increase the value of the resource. This proposal also follows<br>the AK hatchery program- leaving more fish in the water will leave more fish |  |  |

| r |   |
|---|---|
|   | farmed salmon. Everyone wins—more fish, markets better, keeping more              |
|   | fish in the water for other users.  |
|   | Dave (ADF&G)—would not like to have ADF&G involved in the markets, but            |
|   | it's simplistic to think that the decreased harvest would increase our value,     |
|   | because there are other sac roe fisheries. As far as leaving more fish in the     |
|   | water, having a hard time to see if more fish left in the water will lead to      |
|   | more salmon and halibut, seen a study to suggest more herring are                 |
|   | competing with king salmon in Puget sound.  |
|   | Steve Reifenstuhl (Public)—this proposal is predicated on markets of this         |
|   | year, if you look at gas prices now it'll suggest that it's going to be like that |
|   | forever. Likely demand will increase and decrease. This is applying a             |
|   |   |
|   | biological context to economic argument. That the fishery exceeds market          |
|   | demand is untrue- all the herring harvested were sold. If GHL is capped, it       |
|   | won't necessarily increase the value. Some years in the past have had fish        |
|   | left in the water it would have left thousands of dollars in the water. Read      |
|   | somewhere that in the future there's likely to be a depression in AK's            |
|   | economy (because of oil production) and coastal communities are the only          |
|   | ones that are going to be ok. Subsistence harvest has been down, and in           |
|   | 2003 the biomass was 30,000 tons, but had the 2 <sup>nd</sup> highest subsistence |
|   | harvest. In 2004, 50,000 tons biomass had the highest subsistence harvest.        |
|   | Dissolves the third argument.   |
|   | Kim—questioned Steve if the fish meal Steve is using for the local fish is from   |
|   | Japan? Are we utilizing the product best we can in Sitka.                         |
|   | Steve (Public)—fish meal he uses at his hatcheries is from a large                |
|   | manufacturing firm probably utilizes not much herring. The soy meal and oil       |
|   | used in fish feed is used in fish farms. The fish feed we used is fish oils from  |
|   | hake and anchovies. We've experimented with soy oils, but not preferred           |
|   | diets for our fish. You asked about the oils here? The infrastructure is about    |
|   | \$5 million for capital, not feasible with the amount harvested here in Sitka.    |
|   | Most of the by product from salmon goes into pet feed.                            |
|   | John—for this year's quota, what percent are you aiming to harvest at?            |
|   | Dave (ADF&G)—19.7 % is target harvest rate. Based on sliding scale                |
|   | discussed at the last meeting, set in regulation.                                 |
|   | Wayne—agrees with Steve, and thinks its speculation. Good info, but not all       |
|   | valid. Big impact in the economy. Look at Silver Bay Seafoods' entry into the     |
|   | market. Business models use this fishery at a 10% harvest rate, thinks it'        |
|   | won't be viable at that rate. Big impact, everything ever processed get sold.     |
|   | Value of fishery isn't always based on supply and demand.                         |
|   | Bradley—what's the exchange value of subsistence product. Part of                 |
|   |   |
|   | subsistence economy is trade.   |
|   | Jeff—not sure if there's been a study on the subsistence economic impacts.        |
|   | Lenfest report suggested herring worth two times more in supportive value         |
|   | to other fisheries. Asked by industry representative in spring in the Togiak      |
|   | fishery when the price dropped to \$50/ton.                                       |
|   | Bradley—off topic. Two different users will always have a conflict. One           |
|   | party says you have the opportunity you're not getting it, and everyone           |
|   | trying to assign a value to harvest. What's the fairest allocation?               |
|   | Tad—last meeting when we talked about herring proposals, we kept coming           |
|   | back to sanctuary from 3 years ago, [the core subsistence zone]. What was         |
|   | said last week is still valid today, in that we don't know if the area is working |

|           |     | <ul> <li>because it hasn't been in place long enough. What is the value of leaving the herring in the water-we don't know, but the Lenfest report is just an average, and it might not be particular to this situation. But if someone could come up with those numbers for our situation [Sitka Sound]. Troy Denkinger (Public)—this proposal comes down to economics and I don't think we know its impacts. It comes down to economics. What we sell a herring to consumers is \$127 million in Southeast. 62% of fish processed by Sitka processors. If we went back to the 10% harvest rate like this proposal is suggesting, \$45 million lost in revenue. That's why we're so emotional. If this proposal went through 7 years ago, it would have been a loss of \$28million. Large impact, it sparks the community in the spring. Opposed because of the economics. Also, there's no science in this proposal/ economic. Increase effort you'll increase production. 2011 mentioned for subsistence harvest.</li> <li>Steve R. (Public)—read the Lenfest report. Great report. 3 ways to manage the fishery from the report. Good assessment, the better the harvest level. Some scientists think that harvest of 30% would be good too on forage fish. Wanted to speak to Lenfest report, because it supports the state in managing their fishery.</li> <li>Kim—has multiple feelings too. Not sure if she's the best representative for subs, because she's also a conservationist. If it came down to it, and she had to sacrifice subsistence harvesting for conservation, she would. Can only hope that ADF&amp;G be conservation expossible for things. Concerned about the lack of 3 year olds. We have a years to know if the biomass is going back or forwards. We have to balance everything the best we can. My concern is for the fisheries and the environment. Not sure where to put herself in the midst of this. Not a scientist, but afriad for what's happening in Sitka. Cares about this, and all of the people involved.</li> <li>Moe—opposed to this because it's too heavily weighted to economic to ev</li></ul> |
|-----------|-----|---|
|           |     | there's agreement with supply and demand does drive herring markets.<br>Supply has stayed steady. Not all the herring were harvested in Alaska; in<br>Kodiak the processors left tons in the water.   |
|           |     | Jerry called question.  |

|           |     |   | Jerry called the question.   |
|-----------|-----|---|--|
| BOF       | 132 | Add pot g   | ear as a legal gear type for permits currently limited to longline gear for  |
| BOF       | 152 | commerc   | ial sablefish harvest in Southern Southeast Inside Subdistrict fishery.  |
|           |     |   | Dick moved to adopt, Randy seconded.   |
|           |     |   | John—this is the Clarence fishery?   |
|           |     |   | Mike (ADF&G)—yes.  |
| 🛛 Oppose  |     | 8, 3  | Dick—are these proposals (132/133) the same? Are they already doing pots?  |
|           | 0   | abstain   | Would rather let the fishermen in Clarence handle it. Never had problem  |
|           |     | abstan  | catching fish or longlining when fishing down there. Should be decided by  |
|           |     |   | participants, doesn't think that there's many fishermen in Sitka for pots in   |
|           |     |   | SSEI.  |
|           |     |   | Kim called question.   |
| BOF       | 133 | -   | gear as a legal gear type for permits currently limited to longline gear for   |
|           |     | commerc   | ial sablefish harvest in Southern Southeast Inside Subdistrict fishery.  |
| No Action |     |   | No Comment (see above).  |
| BOF       | 134 |   | year as a legal gear type for commercial sablefish permits currently limited to gear in the Southern Southeast Inside Subdistrict fishery. |
|           |     |   | Dick—kind of the same as 132/133?  |
| No Action |     |   | Mike (ADF&G)—we grouped them all together. Would give option for   |
|           |     |   | seiners to jump onto pot boat.   |
|           |     |   | No one motioned.   |
| BOF       | 135 | Update a  | nd clarify the areas where sablefish may be taken with longline gear in the  |
| вот       | 155 | Eastern G   | ulf of Alaska Area.  |
|           |     |   | Dick moved to adopt, Kim seconded.   |
|           |     |   | Mike (ADF&G)—we consider this housekeeping. We only manage in NSEI   |
| Support   |     |   | and SSEI so having regulation written the way it is would have possibly for  |
|           | 11  | 0   | outside fishing and there's not. People are only allowed to retain black cod   |
|           |     |   | with tags in outside (not SSEI or NSEI). East Yakutat is not defined in  |
|           |     |   | regulations. Clean up in reg.  |
|           |     |   | Jerry called question.   |
| BOF       | 136 | Establish 50 fish harvest limit for personal use sablefish fishery. |  |
|           |     |   | Dick moved to adopt, Kim seconded.   |
|           |     |   | Dick—there's two proposals. This was put in because there was a permit   |
|           |     |   | requirement for personal use fishery. Come up with limit that would be a   |
|           |     |   | generous limit per person: 250lbs/permit/person. That's probably a good  |
|           |     |   | estimate for use. 370 hooks is typically two longline skates. Set two skates   |
|           |     |   | and you could come up with 50 fish. If you set 10 skates, you could catch  |
|           |     |   | too much fish. There's no limit right now. Similar to salmon proposals.  |
|           |     |   | Kim—concerned but trying to understand. Has received a few fish from a   |
| Support   | 11  | 0   | commercial guy, because she can't get them herself. Worried about people   |
|           |     |   | going to harvest for people that can't them themselves (elders, disabled, etc). Wondered how it affects do-gooders.                        |
|           |     |   | Dick—it's per person, so they can bring more people with them. They could  |
|           |     |   | do a proxy. Maybe a breakout session in BOF. He just wants to set some   |
|           |     |   | limit so people don't get 50,000 lbs.  |
|           |     |   | John—in personal use can you do proxy?   |
|           |     |   | Mike (ADF&G)—statewide allow proxies, but mostly for blind, above a  |
|           |     |   | certain age, or disabled. Proxy may not process more than two times the  |
|           |     |   | daily bag limit. That's how it is now.   |
|           |     | l   |  |

|         | 1   |           | ,  |
|---------|-----|-----------|--|
|         |     |           | Roger Ingman (Public)—but you can give personal use fish way. How many   |
|         |     |           | hooks are we talking about?  |
|         |     |           | Dick—350 hooks (2 commercial skates) per permit.   |
|         |     |           | Roger I. (Public)—What about personal use halibut? Can you proxy?  |
|         |     |           | Kyle Ferguson (AWT)—new to this.   |
|         |     |           | Mike (ADF&G)—any halibut caught here would have to be released. Based  |
|         |     |           | on gear limits for personal use halibut.   |
|         |     |           | Linda Behnken (Public)–that's why. Under personal use halibut you can only   |
|         |     |           | fish 36 hooks, but under personal use black cod there's no regulation.   |
|         |     |           | Kyle (AWT)—logic to follow other regulations.  |
|         |     |           | Linda B. (Public)—just wanted to put an upper bound on it.   |
|         |     |           | Kyle (AWT)—confusion with state and federal. With federal halibut, most  |
|         |     |           | people follow those regulations. Keep it consistent.   |
|         |     |           | Mike (ADF&G)—distributed handout, permits for personal use fishery from  |
|         |     |           | 2012-2014, but 2013 was the only full year of data. Proposal affects   |
|         |     |           | personal use fishery, so it'll only affect the areas around Ketchikan and  |
|         |     |           | Juneau. No personal use fish in the subsistence area.  |
|         |     |           | John—as far as Sitka, we'd fall under the limit?   |
|         |     |           | Mike (ADF&G)—in state waters, yes. Can subsistence fish in hatched areas;  |
|         |     |           | in areas not hatched, you can only fish personal use (referring to handout).   |
|         |     |           | John—was this an oversight?  |
|         |     |           | Linda B. (Public)—wading into subsistence it's worse than personal use. Just   |
|         |     |           | wanted to get a control on personal use fishing in southeast.  |
|         |     |           | Bradley—seafood serving size is rarely over 6oz if you weigh it. 250lbs is a lot of fish.  |
|         |     |           | Dick—that's a lot of fish.   |
|         |     |           | Bradley—too much of an opportunity to sell black market fish.  |
|         |     |           | Kim—regarding number of hooks. 350 hooks is how many commercial  |
|         |     |           | skates?  |
|         |     |           | Dick—commercial on his boats is about two skates. Can catch about 25 fish.   |
|         |     |           | Tori O'Connell (Public)—easy to set to skates because they're tied together  |
|         |     |           | Don't need to adjust gear.   |
|         |     |           | Jeff called the question.  |
| BOF     | 137 | Establish | an annual limit and gear restriction in the personal use sablefish fishery.  |
|         |     |           | Dick—we talked about both of these proposals (136/137) at the same time.   |
|         |     |           | John—question for ALFA. Are you going to try to put it in subsistence  |
|         |     |           | regulations?   |
| Support | 11  | 0         | Linda Behnken (Public)—little bit of a stretch to say they have Customary  |
|         | 11  |           | and Traditional use because of the ability to catch sablefish. If we can make  |
|         |     |           | headway on personal use, but it's a heavier lift for subsistence. Jerry moved  |
|         |     |           | to adopt, Kim seconded. No discussion.   |
|         |     |           | Jerry called the question.   |
|         |     |           | groundfish fishermen using dinglebar, mechanical jig, or hand troll gear to  |

|         |     | informati | on requested in the logbook.   |
|         |     |           | Bradley left. Kim moved to adopt, Dick seconded.   |
| Support | 10  | 0         | Mike (ADF&G)—long established reporting requirements for logbooks in the   |
|         |     |           | longline fishery. Jig fisheries are prosecuted differently, no start/end position of gear. Jig logbook is to nearest bay or headland. The info |
|         |     |           |  |

| ■       Provided is slim by nearest head or bay. From lingcoff fishery in Fairweather grounds it's reported at Utyue Bay So miles away. Trying to report to nearest statistical area. Nothing like narrowed down for lingcod. The proposal will help to address where effort is and the amount of fish where they are. In regulations, it's required to report number of hooks and number of hooks per line. Difficult to distinguish for staff what the data is coming in as. Logbook asks for total amount of hooks fished. The proposal will allow us to get data that's more straight-forward.         John—is the data very confidential? People not keen to give away favorite spots.       Mike (ADF&G)—we take confidentiality seriously, sealed stamped envelopes for logbook mail in.         Roger ingman (Public)—if you give lat/lon, would you micromanage versus opening a huge area?       Mike (ADF&G)—we open entire mgmt. area.         Roger I. (Public)—would you think about opening only one smaller area in the district?       Mike (ADF&G)—we open entire mgmt. area.         Roger I. (Public)—would you think about opening only one smaller area in the district?       Mike (ADF&G)—we open entire mgmt. area.         Roger I. (Public)—would it change the way you're managing? Is it good for the fishermen to give a lot of data?       Mike (ADF&G)—there's no stock assessment for lingcod. How we used the data is probably limittes.         Level of detail now is minimal. Trying to gain more info on the resource. There's no stock assessment for lingcod. How we used the data is probably limittes.         No Action       No one motioned.         BOF       140       Define mechanical ligging garesparate from dinglebar troil gear and est   |           |     |  |  |
|---|-----------|-----|--|--|
| BOF         139         Define mechanical jigging gear separate from dinglebar troll gear and establish limits on hooks to be used.           No Action         No one motioned.           BOF         140         Increase minimum commercial lingcod size limit to 30 inches from tip of snout, or 22.75 inches from front of dorsal fin, to tip of tail.           Dick moved to adopt, Jeff seconded.         Mike (ADF&G)—we didn't introduce this. History for 27 inch size limit was in 1989 protecting sexually immature females and nest guarding males, which was info from BC. Population declined, so minimum 27 inch size limit was put into place. No fecundity study to show what this effect would have to the spawning biomass. Surveys between 1995 and 2005 indicate 1% of fish sampled were in this length range. Longliners tend to catch larger fish. Bulk of harvest would be out of the range suggested. Data from directed fishery show that sampled 20% lingcod of directed fishery were under 30 inches. This change wouldn't affect longliners so much but would impact the directed fishery and by-catch. Jeff—does it address any conservation concerns by ADF&G? Mike (ADF&G)—no, we think populations are doing well, and there's little  |           |     | <ul> <li>grounds it's reported at Lityua Bay 50 miles away nearest statistical area. |         |     |          | Dick—would the proposal increase handling mortalities?  |
|---------|-----|----------|---|
|         |     |          | Mike (ADF&G)—depends on where they're fishing. Would have some  |
|         |     |          | mortality, and some handling mortality.   |
|         |     |          | John—quotas in EYAK filled, but in SSEI?  |
|         |     |          | Mike (ADF&G)—no, most of the quota remains. Last year about 10-15,000   |
|         |     |          | pounds left in the central gulf fishery. That harvest depends on lingcod  |
|         |     |          | prices, and on salmon.  |
|         |     |          | Roger Ingman (Public)—maybe if it's not used we should close it.  |
|         |     |          | Linda Behnken (Public)—the existing size limit was shown to protect the   |
|         |     |          | stock and to throw in a proposal to change it just because seems silly.   |
|         |     |          | Jeff called question.<br>mmercial salmon fishermen using troll gear in Sitka Sound to retain up to two              |
| BOF     | 141 |          | er trip for personal use.   |
|         |     |          | Tad was present during this proposal (taken up before he left), allowing us to                                      |
|         |     |          | have 12 voting members. Tad moved to adopt, Randy seconded.   |
|         |     |          | Tad—two separate but related issues. Trollers able to retain by catch   |
|         |     |          | lingcod in the LAMP. Issues with trollers near the LAMP, but choosing to not  |
|         |     |          | keep lingcod so they can fish in the LAMP later in that trip. Difficult for   |
|         |     |          | enforcement to allow retention without possession. Attempt to get at both   |
|         |     |          | issues. Something as restrictive as two fish per trip might address   |
|         |     |          | conservations concerns, and maybe even restrict to home pack. ADF&G can   |
|         |     |          | make that a requirement. Came out from a proposal three years ago.  |
|         |     |          | John—question for trooper, and Mike (ADF&G). What if this went through  |
|         |     |          | and you would cut off the dorsal fish/other fin? Made it so it's not a saleable                                     |
|         |     |          | fish.   |
|         |     |          | Kyle Ferguson (AWT)—like the way you'd ID a sport caught king? Not sure,  |
|         |     |          | new the AWT, but thinks that would work.<br>John—did the original regulation come up because of a concern for local |
|         |     |          | lingcod abundance. Still an issue?  |
|         |     |          | Mike (ADF&G)—only commercial user able to retain was halibut fishermen  |
| Support |     |          | during the 1997 survey. Status of lingcod in LAMP?  |
|         | 12  | 0        | John—I know some of the concern about the LAMP fishery.   |
|         |     |          | Mike (ADF&G)—lingcod population decline in the early 90s and area wide  |
|         |     |          | lingcod stocks are doing well.  |
|         |     |          | Tad—area wide lingcod stocks are doing well, but central Southeast troll  |
|         |     |          | outside quota has rarely been taken. Is that because fish and retention was   |
|         |     |          | assumed?  |
|         |     |          | Mike (ADF&G)—no, because it was assumed prior to 2000.  |
|         |     |          | Bradley—is there a reason why you don't want to sell your by-catch?   |
|         |     |          | Tad—I'd rather be able to keep one to eat at home than not to be able to  |
|         |     |          | keep it all, or not even be allowed to troll in the LAMP because I had a  |
|         |     |          | lingcod onboard. Market is there.   |
|         |     |          | Kim—are people coming home every day from the LAMP and you could be   |
|         |     |          | catching two fish per day? For subsistence/personal use, I've been fishing  |
|         |     |          | out there. Every day is a trip. Doesn't have a problem with taking fish home  |
|         |     |          | to eat it, and most of these are smaller boats that would be coming in daily.                                       |
|         |     |          | Tad—the person actually catches by-catch in the LAMP or by the boats that   |
|         |     |          | are fishing outside the LAMP and occasionally coming in to finish a trip. By-                                       |
|         |     | <u> </u> | catch rates are not high, but can cause an end to a trip (2-5 lingcod per year).                                    |

|          |     |   | Increase in landings would be fish caught outside the LAMP who thought<br>they might fish later in the LAMP. The Central Southeast Outside troll by-<br>catch allocation was based on data from years with unlimited by-catch.<br>Since by-catch has been prohibited in the LAMP, have haven't reached the<br>by-catch allowance.<br>Mike (ADF&G)—addressing this proposal, it seems to asked as personal use<br>not commercial. That wouldn't change the issue of commercial/personal<br>use fish onboard the boat. 10 by-catch lingcod caught outside the sound, |  |
|----------|-----|---|--|--|
|          |     |   | can't tell the difference between the commercial/personal use fishing.<br>Jeff—wanted to makes sure there's not a problem with enforcement. Can't<br>have other fish on board.   |  |
|          |     |   | Moe—do you think we can do commercial by-catch in the LAMP? Doesn't think there's high enough by-catch.  |  |
|          |     |   | Mike (ADF&G)—the last round this proposal went through the BOF process<br>ADF&G was against, because there's no stock assessment and we don't<br>know what the impact would be. Ran data on 2013 troll season, 1,350 troll<br>salmon landings attributed to LAMP during open by-catch. When by-catch<br>closed, 1,900 may or may not be from the LAMP. JUST salmon landings.   |  |
|          |     |   | Kim—can you catch and release lingcod? With that device for rockfish?  |  |
|          |     |   | Mike (ADF&G)—lingcod don't have that problem like rockfish do, some mortalities with release, but do much better than rockfish.  |  |
|          |     |   | Steve Reifenstuhl (Public)—how do you do the biological assessment inside/outside LMAP.  |  |
|          |     |   | Mike (ADF&G)—no stock assessment for Southeast lingcod, rely on fish tickets and logbooks.   |  |
|          |     |   | Steve R. (Public)—you sense the biomass is increasing?<br>Mike (ADF&G)—over the years we've had anecdotal reports. We don't feel<br>there's a problem, but we don't have the stock assessment program. John—<br>any numbers on D-class boats harvest?  |  |
|          |     |   | Mike (ADF&G)—has some numbers for 2001-2014. Lingcod catch in the halibut fisheries (commercial, subsistence/sport), average round pounds in LAMP was 1,645 longline catch pounds for commercial. Sport caught-  |  |
|          |     |   | 8,500lbs/year. Subsistence fishery 15,400 lbs. Total for all groups is roughly 25,500 pounds.  |  |
|          |     |   | Jerry called question.   |  |
| BOF      | 142 | Repeal Si   | tka Sound Special Use area lingcod regulations.  |  |
| Support  | 9   | 0   | Kim moved to adopt, Jerry seconded.<br>Troy (ADF&G)—housekeeping proposal. Regulations on book for sport<br>lingcod. Sitka sound special use area were more conservative, but now they<br>are less conservative.<br>Jerry called the question.   |  |
| BOF      | 143 | Require all anglers releasing nonpelagic rockfish to release them at depth, and require |  |  |
|          |     | at least 0  | ne deep water release mechanism on board vessels used by sport anglers.<br>Jerry moved to adopt, Kim seconded.   |  |
| 🔀 Oppose | 1   | 8   | Troy (ADF&G) overviewed the deep water release mechanisms used by<br>charter fleet. Charter has to take fish down to 100 ft or depth of capture,<br>whichever is shallower.<br>Roger Ingman (Public)—how much weight does it take to send a yelloweye  |  |
|          |     |   | down?<br>Troy (ADF&G)—About 5 lbs for medium size fish. Some mechanisms are  |  |

|          |     |           | designed for adding multiple weights. Sportfish website has a link for a        |
|----------|-----|-----------|---|
|          |     |           | video for all of the mechanisms.  |
|          |     |           | John—what do you do to go out to catch a rockfish (charter goes out each        |
|          |     |           | day).   |
|          |     |           | Jerry—go out whenever possible, not always targeting bottomfish. Likes the      |
|          |     |           | idea of releasing at depth, but not like the idea of adding more gear to the    |
|          |     |           | boat. Likes it for conservation.  |
|          |     |           | Kim—bought one because thought it was going to come in regulations soon.        |
|          |     |           | Troy—no current definition for a release mechanism. Up to AWT for               |
|          |     |           | enforcement. Proposal would require all anglers to have some release            |
|          |     |           | device.   |
|          |     |           | Kyle (AWT)—proposal would be for saltwater. It would be handy to have a         |
|          |     |           | bucket with some line to throw over.  |
|          |     |           | Kim called the question.  |
| BOF      | 144 | Repeal m  | andatory retention requirements for nonpelagic rockfish.                        |
|          |     |           | Jerry moved to adopt, Jeff seconded.  |
|          |     | 8         | Jerry—fact that you have to keep each one as you catch it is negative. What     |
|          |     |           | if I don't want to keep rockfish, just salmon? While I'm trolling, I don't want |
|          |     |           | to have to stop and release them at depth.                                      |
| 🔀 Oppose | 1   |           | Tori O'Connell (Public)—no high grading in mandatory retention.                 |
|          |     |           | Jerry—in that sense I like it. There's one thought, the 80%                     |
|          |     |           | survivability/100% mortality [a statistic mentioned in the proposal] is true.   |
|          |     |           | John—Rockfish so hard to fillet, but doesn't see the waste issue.               |
|          |     |           | Jerry called the question.  |
|          |     | Repeal Si | tka Sound Special Use Area and Ketchikan Area nonpelagic rockfish               |
| BOF      | 145 | regulatio |   |
|          |     |           | Jeff moved to adopt, Karen seconded.  |
|          |     |           | Troy (ADF&G)—similar to lingcod proposal. Sitka sound special use area has      |
| Support  | 9   |           | less conservative regulations than regional regulations. This regulation isn't  |
|          |     | 0         | necessary.  |
|          |     |           | John—call this housekeeping?  |
|          |     |           | Troy (ADF&G)—yes.   |
|          |     |           | Jerry called the question.  |
|          | 1   | 1         |   |

- IX. Meeting: 6th of January for next meeting? Elections on the charter will occur, and the discussion about the seat will occur at the next meeting.
- X. Adjournment: 9:36 PM

Minutes Recorded By: Jessica Gill, Secretary Minutes Approved By: Date:

### Sitka Advisory Committee January 14<sup>th</sup>, 2015 Sitka Sound Science Center, 834 Lincoln Street

- I. Call to Order: 6:32PM by John Murray, Chairman
- Roll Call: Jessica Gill, Secretary
   Members Present: Jon Martin, Jerry Barber, Dick Curran, Kim Elliot, Jeff Feldpausch, Tad Fujioka, Jessica Gill, Randy Gluth, Moe Johnson, Karen Johnson, John Murray, Bradley Shaffer, Floyd Tomkins, Wayne Unger
   Members Absent: Cody Loomis, Brian Massey, Peter Roddy
   Number Needed For Quorum on AC: 8
   List of User Groups Present: Charter, Hand Troll, Longline, Subsistence, Alternates 1 and 2, Trapping, Hunting, At-Large 1 and 2, Power Troll, Conservation, Processor
- III. Approval of Agenda: No formal agenda, but we'll be discussing sport fishing proposals, troll proposals, and subsistence proposals.
- IV. Approval of Previous Meeting Minutes: From meeting date: John found minutes to be in order. Kim and Tad had comments. Kim motioned to approve minutes, Tad moved. Minutes approved.
- V. Fish and Game Staff Present: Grant Hagerman, Dave Gordon, Troy Tydingco
- VI. Guests Present: Eric Jordan, Harvey Kitka, Carl Petersen, Joel Markis
- VII. Old Business: None
- VIII. New Business: None
- IX. Next Meeting: Monday Feb 2<sup>nd</sup>. Everyone seems to be in agreement. Seine proposals will be covered.

| Southeast and Yakutat Finfish, Feb. 23–March 3, 2015 |                           |                  |  |  |  |

| BOG or BOF   | Proposal<br>Number        |                  | Proposal Description   |  |  |
| Supports or<br>Opposes?                              | Number<br>Support         | Number<br>Oppose | Comments/Discussion (list Pros and Cons)/Amendments to Proposal  |  |  |
| BOF  | 146                       | Revise the 14.   | e amounts reasonable necessary for subsistence for salmon in Districts 12 and  |  |  |
| No Action  | TABLED                    |                  | Jeff moved to adopt, Randy seconded. 13 voting members.<br>Dave (ADF&G)—in part it's housekeeping, but Customary & Traditional use<br>designation doesn't exist for Districts 11 (Cape Fairweather to Yakutat) and<br>16 (Juneau). Division of Subsistence is doing surveys in Angoon, and they<br>will likely come to BOF to reduce the ANS.<br>Tad—doesn't feel comfortable without knowing the revised numbers.<br>Jeff and Randy withdraw their motion for adoption based on lack of<br>information on revised ANS numbers.<br>Majority vote to table.   |  |  |
| BOF  | 148                       | Allow for        | designation of community subsistence harvesters for Hoonah residents.  |  |  |
| ⊠ Oppose   | 1                         | 5, 7<br>abstain  | Kim moved to adopt, Randy seconded. Only 13 voting members.<br>John—there's got to be some limits on community harvest permits.<br>Dave (ADF&G)—common practice throughout SE. There is state proxy<br>permit (for blind, disabled, elderly), which is restricted to harvesting 2<br>permits. ADF&G issues community harvest permits (CHPs) to various<br>agencies based on abundances. Hesitation on stocks that are low, but if<br>there's surplus fish a CHP is allowed. Way its worded is for Hoonah residents<br>only, which could cause problem, but perhaps for only an area instead of an<br>individual group or organization.<br>John—there's not prolific runs up there.<br>Dave (ADF&G)—not a lot of information on the systems they're asking for.<br>Jeff—any escapement data?<br>Dave (ADF&G)—in 2002, meetings with different parties yielded requests for<br>more fish, and ADF&G raised limits.<br>Jerry called question. |  |  |
| BOF  | 153                       |                  | osistence harvest of salmon with purse seine and gillnet gear in portions of   |  |  |
| bor  | 133                       | Districts 1      | 2 and 13 near Angoon.  |  |  |
| 🔀 Oppose   | 3                         | 8, 1<br>abstain  | Jeff moved to adopt, Tad seconded. 13 voting members.<br>Jeff—Extraterritorial Jurisdiction petition might be influencing this and we<br>might want to weigh in on this before it gets tossed around in the federal<br>courts.<br>Dave (ADF&G)—restrictions on general permit gear near sockeye streams.<br>Proposal wants to join gillnets together, ideally for more fish in Angoon. He<br>suggested that if someone gets a subsistence permit, and wants to use gear<br>outside of the permit stipulations, they can ask ADF&G, and it'll be allowed.<br>Tad—compared to other proposals intended to help Angoon which would<br>eliminate commercial harvest opportunities, he likes this proposal the best.<br>Dave (ADF&G)—ADF&G would specify locations for regulation   |  |  |

|          |     |                  | Jerry called the question.   |
|----------|-----|------------------|--|
| BOF      | 155 | Allow par        | ty fishing in Southeast Alaska saltwater fisheries.  |
| ⊠ Oppose | 2   | 11, 1<br>abstain | Jerry moved to adopt, Tad seconded.<br>Troy (ADF&G)—similar proposals before, can't give ADF&G's stance. Boat<br>limit, not person limit, specific to SE.<br>Jon—issues with enforcement? In charter world, may be positive and<br>alleviate some issues within the charter fleet.<br>Tad—possible on boat conflicts (whose fish is whose)? Who does<br>enforcement write the ticket for if they have extra fish?<br>Jon—Captain is responsible for adhering to limits.<br>Troy (ADF&G)—typically ticket goes to guides, but if enforcement can pin it<br>on a particular person too, they will.<br>Jon—definitely some enforcement issues, and might need some clarification<br>before BOF.<br>Floyd—do boats already bringing parties out have boat limits?<br>Troy (ADF&G)—from a legal standpoint whoever caught the fish is<br>responsible/owner.<br>Bradley—thinks that if the proposer knew that this would pertain to a<br>commercial guide operation, he might change the proposal.<br>Jerry—common in fleet to party fish, but was illegal years ago.<br>Consensus was that the fish you catch is your fish. And possible<br>enforcement issues.<br>Jon—thinks there is room for a little bit of clarification in this proposal for<br>party fishing.<br>Eric Jordan (Public)—possible increase in catch and release mortality with<br>this proposal, both for groundfish and salmon.<br>Troy (ADF&G)—once you've caught your bag limit, you can continue to fish.<br>Tad called the question. |
| BOF      | 156 |                  | e use of bow and arrow to take salmon in the Southeast Alaska Area by<br>now anglers.  |
| ⊠ Oppose | 2   | 10, 2<br>abstain | Jerry moved to adopt, Bradley seconded.<br>Jessica—is this a common practice?<br>Randy—it's illegal in the state.<br>Troy (ADF&G)—there are a few places in AK that you can fish with bow and<br>arrow. But not in SE.<br>Bradley—his understanding with other states is that it's for invasive species.<br>Floyd—it's been mentioned before for redoubt salmon, but thinks it's a bad<br>idea.<br>Jerry—thinks it's nice to have more bow hunting opportunities, but the bow<br>hunters' education class would be difficult to include fishing. Doesn't like<br>the proposal.<br>Randy—different than traditional bow hunting, and you'd need deeper<br>waters with line on the arrows. Arrow doesn't travel far because it's heavy.<br>Probably wouldn't be used a lot, and not by a lot of people.<br>Jerry called the question.  |
| BOF      | 157 |                  | e king salmon size limit from 28 inches or greater in length to 26 inches or<br>length in the Southeast Alaska Area.   |
| 🛛 Oppose | 0   | 14               | Bradley moved to adopt, Jerry seconded.<br>Kim—used to have a lot bigger fish, and with the increase in hatcheries a   |

|          |     |    | <ul> <li>27.5 inch fish will weigh as much as a 30 inch fish.</li> <li>Troy (ADF&amp;G)—28 inch has been around for a while and it's because it used to be a marketable size. In SE seeing a decrease in weight at age in salmon, but not sure how changing the size would affect things, because no info on size of released fish.</li> <li>Tad—his understanding was the 28 inch size limit was with regards to spawning/non-spawning fish. Proposer is a guide from Juneau, and is looking to increase number of fish his clients are taking home.</li> <li>Moe—majority of shakers he releases are 26-28 inches, and if they didn't get shaken off, the season would be over by now.</li> <li>Troy (ADF&amp;G)—it's a sport proposal the way it's written.</li> <li>Floyd—would this increase the downward trend in size at age of released fish?</li> <li>Grant (ADF&amp;G)—fish are maturing earlier, and there has been an increase in abundance of smaller fish (younger fish), and a decrease in weight at length.</li> <li>Eric Jordan (Public)—historically, raised size limit from 26 to 28 to meet treaty regulations. Smaller size will have the fishermen targeting the smaller fish.</li> <li>Kim—are the smaller fish tagged?</li> <li>Grant (ADF&amp;G)—from commercial troll fishery, the small tagged fish are mostly non-Alaskan hatchery fish.</li> <li>Bradley called the question.</li> </ul>  |
|----------|-----|----|--|
| BOF      | 158 | -  | ne Southeast Alaska King Salmon Management Plan by eliminating inseason<br>ns to the annual limit.   |
| ⊠ Oppose | 0   | 14 | Jon moved to adopt, Jerry seconded.<br>Troy (ADF&G)—for King salmon sport fisheries management plan ADF&G has<br>to have sport harvest 20% of harvest, minimize restrictions for sport fishers,<br>and minimize in-season changes. In high abundance years, all fishers,<br>resident and non-residents, have high harvest limits, but non-residents have<br>annual limit. In low abundance, the harvest changes based on abundances,<br>and non-resident bag limits decrease throughout season.<br>There was significant discussion that the reduction in non-resident annual<br>limits as the season progresses was a feature that the charter<br>representatives who helped set up the management plan specifically<br>wanted. There is more opportunity to take coho and other species later in<br>the season.<br>Jon—management plan is for all in SE. Proposers are charter operators on<br>the inside. Thinks the plan is working well here in Sitka, but on the inside<br>they might have a harder time catching fish. Will not support as written.<br>Troy (ADF&G)—no allocation specifically to sport guides, and percentage of<br>fish harvested has not changed.<br>Eric Jordan (Public)—in other areas, proposal is possibly allocating fish to<br>certain areas (on the inside).<br>Tad—the limit for non-residents would stay at an average throughout the<br>season, not high or low, if the proposal was adopted.<br>Troy (ADF&G)—we know the quota changes in advance, so we could set that<br>average throughout the season.<br>Jerry called the question. |

| BOF       | 159    |   | nonresident annual limits for coho, sockeye, chum, and pink salmon in salt the Southeast Alaska Area.   |
|-----------|--------|---|---|
| 🛛 Oppose  | 0      | 11, 3<br>abstain  | Jerry moved to adopt, Kim seconded.<br>Troy (ADF&G)—no conservation concern for these species.<br>Jon—doesn't support this unless conservation concern, it would be bad for<br>small scale operators.<br>John—can see local conservation concerns, but not justified if no concern.<br>Troy (ADF&G)—conservation concerns are regionally. Local stock concerns<br>are addressed through emergency orders.<br>Jon—this proposal is for saltwater.<br>Jeff—possibly proposal has come out of Kake with charter fleet wiping their<br>runs in pillar bay.<br>Jerry called the question.  |
| BOF       | 160    |   | nonresident annual limits for coho, sockeye, chum, and pink salmon in fresh<br>the Southeast Alaska Area.   |
| 🛛 Oppose  | 1      | 7, 6<br>abstain   | Jerry moved to adopt, Randy seconded.<br>John—similar as proposal 159, but for freshwater.<br>Troy (ADF&G)—no conservation concern for a particular species, and when<br>ADF&G does have a conservation concern, ADF&G issues emergency orders.<br>Jon—possible conservation concerns for coho in freshwater with a possible<br>increase in guide operations.<br>Jerry called the question.   |
| BOF       | 162    | Prohibit multiple hooks and barbed hooks in all fresh waters of the Yakutat         |   |
|           |        | Managem   | nent Area.  |
| Support   | 14     | 0   | Jerry moved to adopt, Kim seconded.<br>Jerry—proposal from Yakutat AC. In favor because it could reduce mortality<br>of catch and release fish.<br>Troy (ADF&G)—no conservation concern in these fish/area.<br>Eric Jordan (Public)—thinks barbless hooks makes a huge difference in catch<br>and release, and that the Yakutat AC has a good idea here.<br>Kim—in support based on conservation and fish health.<br>Jon—do barbless hooks reduce mortality?<br>Troy (ADF&G)—yes and higher reduced mortality when fishing without bait.<br>Jon—important to note that sport fishermen weren't opposed to this<br>proposal.<br>Jerry called the question. |
| BOF       | 187    | Allow commercial salmon drift gillnet gear in Southeast Cove Terminal Harvest Area. |   |
| 🛛 Oppose  | 2      | 6, 6<br>abstain   | Tad moved to adopt, Jerry seconded.<br>Tad—proposal doesn't make sense. Gillnetters are already far ahead in their<br>allocation. Doesn't think it needs to be put into place at this time.<br>Eric Jordan (Public)—gillnetters want to be included in additional or new<br>opening areas.<br>John—doesn't think this is a BOF proposal [issue]; UGA should be able to<br>meet with the Regional Planning Teams for this proposal and not move it to<br>BOF.<br>Kim called the question.  |
| BOF       | 188    | Modify commercial seine and troll fishing schedules in Southeast Cove Terminal      |   |
| No Action | TABLED | Harvest A   | rea.<br>Tad moved to adopt, Jerry seconded.   |
|           |        | I   |   |

|          |     | T               |  |
|----------|-----|-----------------|--|
|          |     |                 | Tad—Chum Trollers Association (CTA) proposal. Trollers need block of days<br>to be effective. SE Cove is new fish, and this was an attempt to maximize the<br>benefit to the troll fleet. Run peaks about mid-July.<br>Jeff—peak was consistently about 20 <sup>th</sup> of July. Area would be good for<br>trollers, with bright fish.<br>Eric Jordan (Public)—thinks fleet would want a seine opening at least once a<br>week.<br>Tad—10 day block would be better, once a week openers wouldn't have fish<br>enough buildup.<br>Eric J. (Public)—would really like some consistency and collaboration from all<br>gear groups when coming to BOF.<br>Dave (ADF&G)—this proposal is just a chum opener.<br>Moe—not in favor of block closures. In the past, it's not clear if the effort<br>will be there. Fishing could be messy with block closures and fish building<br>up. |
|          |     |                 | Carl Petersen (Public)—no opening this board cycle, because fish will be there for cost recovery for the first two years. Would like to have 5 day   |
|          |     |                 | contiguous troll openings.<br>Jeff—seiners might be getting a chance at the fish in Hidden Falls before<br>they go to SE Cove.   |
|          |     |                 | Moe—there could be a possibility for giving the trollers the first 72 hours.<br>A lot of sentiments were repeated from Proposal 176.   |
|          |     |                 | Eric J. (Public)—suggests the AC make a motion to change the schedule from 5 consecutive days troll, 2 days seine. Up until June 8, seine openings at SE Cove same time as openings at Hidden Falls, then after June 8, 5 days toll, 2 days seine.   |
|          |     |                 | Dave (ADF&G)—would not be open for chum outside THA.   |
|          |     |                 | Kim—Table discussion on hidden falls/deep inlet/se cove so gear groups can discuss.  |
|          |     |                 | Moe moved to table, Wayne seconded. Majority vote to table.  |
| BOF      | 220 | Modify th       | e winter boundary line for the commercial salmon troll fishery.  |
| 🖾 Oppose | 0   | 8, 6<br>abstain | Tad moved to adopt, Dick seconded.<br>Grant (ADF&G)—proposal continuation from 2003 Yakutat proposal. Safety<br>concerns at that time fishing so close to the reef. Winter harvest for kings<br>has gone up from 4% to 10% of winter catch with the 2003 lines. After<br>discussing with proposer, the actual area is about ½ mile further. 2003 line<br>is 26 miles, addition is an extra 30 square miles.<br>John—might support if fishing is after January. Can't support with size of<br>area.<br>Eric Jordan (Public)—if the AC adopts this, you can have very large winter<br>king catches, which can have huge repercussions.<br>Kim called the question.   |
| DOF      | 222 | Correct re      | egulatory language to clarify a contribution rate of Alaska hatchery-produced  |
| BOF      | 222 |                 | or the spring salmon troll fisheries.  |
| ⊠Support | 14  | 0               | Kim moved to adopt, Jerry seconded.<br>Grant (ADF&G)—spring troll fishery management plan. Managed based on<br>Alaska hatchery production.<br>Jessica—clarification on if proposal would increase hatchery production.<br>Grant (ADF&G)—no, it would just do some housekeeping on the regulation.<br>Jerry called the question.  |
|          |     | 1               | ן זכו זי למופט נוופ קעפטנוטוו.   |

| BOF       | 225 | Change th<br>Managem  | ne sunset date in the District 12 and 14 Enhanced Chum Salmon Troll Fishery nent Plan.   |  |
|-----------|-----|---|--|--|
| No Action |     |   | Bradley left, voting members down to 13. Tad—225, 226, 227 all pretty similar and in the interest of time, he'd like to move to adopt 227 and comments for 227 echo thoughts for 225 and 226.  |  |
| DOL       | 220 | Remove sunset clause from District 12 and 14 Enhanced Chum Salmon Troll Fishery |  |  |
| BOF       | 226 | Managem   | nent Plan.   |  |
| Support   | 13  | 0   | Tad moved to adopt, Jerry seconded.<br>Eric Jordan (Public)—recommends discussing 226 in addition to discussion<br>on 227.<br>Tad—comments from 227 apply here.<br>Tad called question.<br>unset clause from District 12 and 14 enhanced commercial chum salmon  |  |
| BOF       | 227 |   | ry and allow fishing 7 days per week.  |  |
| ⊠Support  | 13  | 0   | Tad moved to adopt, Jerry seconded.<br>Tad—proposals to make Chatham fishery a more viable fishery, and remove<br>sunset clause. Proposal 227 changes the openings to 7 days. At 4 days, it<br>doesn't work because of lack of tenders in the area. Originally at 4 days to<br>removed conflicts with Juneau sport fleet, but didn't see any there when he<br>fished. Would allow fleet to follow fish through Icy Strait east.<br>Grant (ADF&G)—227 would give more time to trollers, allocative. ADF&G is<br>in favor of continuing management plan.<br>Kim called question.   |  |
| BOF       | 228 | Close the   | commercial troll fishery for coho salmon from August 1–10.   |  |
| ⊠ Oppose  | 0   | 11, 2<br>abstain  | Tad moved to adopt, Jerry seconded.<br>Grant (ADF&G)—10 day mandatory regional troll closure to allow fish to pass<br>to Angoon for additional harvest opportunities for resident.<br>Tad—seems excessive to close Yakutat to Ketchikan for just Angoon.<br>Grant (ADF&G)—for coho, those systems aren't monitored. Indicators with<br>coded wire tags in northern streams, which have been within or above<br>escapement goals within the last decade. Berner's River and Auke Creek are<br>the indicators for NSEI, and similar to the Angoon streams. Escapement in<br>Auke Creek is very high. Proposal eliminates existing closures based on stock<br>assessments, and the whole region would shut down for 10 days.<br>Jeff—any subsistence data from Angoon with ANS/subsistence needs not<br>being met?<br>Grant (ADF&G)—limited subsistence harvest data, 2012 study: 314 coho by<br>rod and reel, 530 sport caught coho. Majority of fish caught in saltwater.<br>John—seen ADF&G have closures when needed, and if there was a need,<br>we'd have one. Seems like overkill.<br>Kim called question. |  |
| BOF       | 230 | Restrict c  | ommercial salmon fishing with troll gear in Section 15-C beginning July 1.   |  |
| 🛛 Oppose  | 0   | 12, 1<br>abstain  | Tad moved to adopt, Randy seconded.<br>Tad—vindictive proposal, contrary to 1994 agreement for hatchery fish. In<br>July, that district [15C] is managed for sockeye not chum or coho. His<br>encounter rate for kings in 15C is about 10% of king encounter rate during<br>the same time of year while fishing for coho.<br>Grant (ADF&G)—little to no effort by troll in this area.<br>Kim—the regulation doesn't specify species.   |  |

|          |     |            | Eric Jordan (Public)—proposal speaks to sub-legal king mortality, but he      |
|----------|-----|------------|---|
|          |     |            | believes the gillnetters should not mention by-catch mortality.               |
|          |     |            | Tad—reducing the number of days open in this proposal for troll will          |
|          |     |            | essentially kill trolling in this area.                                       |
|          |     |            | , .   |
|          |     |            | Kim called the question.  |
| BOF      | 231 |            | he area open to commercial salmon fishing with troll gear in Naha Bay during  |
|          |     | the sumn   | -   |
|          |     |            | Tad moved to adopt, Kim seconded.   |
|          |     |            | Eric Jordan (Public)—millions of hatchery chum returning to Neets Bay, but    |
|          |     |            | fish come into Naha Bay, and acts as a fish trap, and fishery goes on for     |
| 🖂 Oppose | 0   | 12, 1      | about 10 days. Doesn't think the fish there are at that time are Naha fish,   |
|          | Ū   | abstain    | they are Neets fish. This proposal wouldn't conserve Naha Bay fish at all.    |
|          |     |            | It's a hatchery chum fishery.   |
|          |     |            | Grant (ADF&G)—no conservation concern in Naha Bay.                            |
|          |     |            | Jerry called question.  |
| BOF      | 232 | Clarify po | wer troll gear specifications regarding hand troll gurdies and fishing rods.  |
|          |     |            | Kim moved to adopt, Jerry seconded.   |
|          |     | 1          | Grant (ADF&G)—Housekeeping. Level of detail is much more detailed in          |
|          |     |            | hand troll versus power troll regulations. Proposal would help alleviate      |
|          |     |            | questions about power troll legal gear. Would not change regulation at all.   |
|          |     |            | You cannot fish hand troll from power troller.                                |
| Support  | 12  |            | Some questions regarding the regulation itself were asked.                    |
|          |     |            | Tad—ATA hand troll rep generous, and suggested that if the power troller      |
|          |     |            | wants to fish with hand troll gear, they should go for it (more expensive     |
|          |     |            | permit).  |
|          |     |            | Grant (ADF&G)—this does not change the regulation at all.                     |
|          |     |            | Kim called the question.  |
| BOF      | 233 | Allow do   | wnriggers as legal commercial salmon hand troll gear for the entire year.     |
|          |     |            | Kim moved to adopt, Tad seconded.   |
|          | 13  | 0          | Kim—has a hand troll permit, and it's getting hard for her to hoist lines and |
|          |     |            | downriggers by hand. Doesn't believe too much impact on fishery if was        |
| Support  |     |            | allowed.  |
| Sapport  |     |            | Tad—ATA opposed to proposal in past, but this cycle it was unanimously        |
|          |     |            | supported.  |
|          |     |            | Jerry called the question.  |
|          |     |            | jen y caneu the question.   |

X. Adjournment: 9:53 PM by John Murray.

Minutes Recorded By: Jessica Gill, Secretary Minutes Approved By: Date:

#### Sitka Advisory Committee January 6, 2015 Sitka Sound Science Center, 834 Lincoln Street

- I. Call to Order: 6:29PM by Chairman John Murray.
- II. Roll Call: Jessica Gill

Members Present: Jerry Barber, Dick Curran, Kim Elliot, Jeff Feldpausch, Tad Fujioka, Jessica Gill, Randy Gluth, Moe Johnson, Karen Johnson, John Murray, Bradley Shaffer, Floyd Tomkins, new member Jon Martin Members Absent: Cody Loomis, Brian Massey, Peter Roddy, Wayne Unger Number Needed For Quorum on AC: 8 List of User Groups Present: Hand Troll, Longline, Subsistence, Alternate 1, Trapping, Alternate 2, Hunting, Seine, At-Large 1, Power Troll, At-Large 2, Conservation, Charter

- III. Approval of Agenda: No formal agenda. Troll proposals will be covered tonight.
- IV. Approval of Previous Meeting Minutes: From meeting date: Dec. 18
   Floyd moved to adopt the minutes from December 18, and Kim seconded. 12 members were in favor.
- V. Fish and Game Staff Present: Patty Skannes, Grant Hagerman, Troy Tydingco
- VI. Guests Present:

Steve Reifenstuhl, Matt Donahoe, Linda Danner, Carl Petersen, Joel Markis, Lawrence SpottedBird, Heather Riggs, Eric Jordon, Don Bird, Richard Shafran, Joel Hanson

#### VII. Old Business:

Designated seats/seating-

John asked if the AC would be interested in forming a subcommittee to discuss the atlarge seat, not active seats, seats with little interest, other seat etc. Bradley suggested we reallocate seats if seats aren't filled within 12 months. Reallocate inactive seats (guide/charter) for better representation for Sitka. Kim looked at which kinds of policies are in place. She found that if a member misses 3 meetings, they can be replaced unless their absences were excused. She also found that alternates are treated the same as regular members. As long as a regular seat doesn't show up, they can vote, and they're not alternates for specific person, just as voters. John will talk to Cody regarding his guide seat. Discussion continued.

Elections-

Tad nominated Joel Hanson as charter representative. Jerry seconded. Joel summarized his experience and background. He is not a licensed guide himself, but he does train guides every year.

Jeff asked if Heather Riggs was interested. Jeff nominated, Jessica seconded. Heather summarized her background and experience. She is now a biologist at Sitka Tribe of Alaska (STA). She hasn't guided, but monitored the guiding fishery for Fish and Game. Joel would like to abdicate his nomination as Heather seems more qualified. Tad moves to elect Heather by unanimous vote. Randy seconded. Bradley would like to discuss the fact that three STA employees would be sitting on the AC if Heather is

elected. Discussion ensued. If it's going to remain a charter seat, it should be someone that is actually chartering.

Jeff nominated Jon Martin, Jessica seconded. Jon is a charter fisherman in the summer, wildlife biologist at UAS, and also in the UAF PhD program.

Tad withdraws his motion for unanimous consent, Randy withdraws his second.

Kim called question. Jerry reminded the public they can vote. Eric's understanding was that vacant seats can only be voted on by committee members. Heather withdrew her nomination. John called the vote and it was a majority vote. Jon Martin was elected to the AC in the Charter seat.

#### VIII. New Business:

John asked committee members if they would like the proposals the AC will be discussing at the meetings in email prior to the meetings. Group was in agreement.

| Southeast and Yakutat Finfish, Feb. 23–March 3, 2015 |                    |                      |  |  |
|--|--------------------|----------------------|--|--|

|  | iviand             | atory- Ple           | ase Summarize Your Proposal Comments in this Form  |  |
| BOG or BOF   | Proposal<br>Number | Proposal Description |  |  |
| Supports or<br>Opposes?                              | Number<br>Support  | Number<br>Oppose     | Comments/Discussion (list Pros and Cons)/Amendments to Proposal  |  |
| BOF  | 174                | Establish            | a Taku River king salmon management plan.  |  |
| ⊠ Oppose   | 0                  | 12, 1<br>abstain     | Tad moved to adopt, Jerry seconded.<br>Patty (ADF&G)—Staff comments are not done yet. Very allocative, so<br>ADF&G can't take a position.<br>John—it doesn't look like much is happening based on numbers harvested.<br>Patty (ADF&G)—the Taku has wild stocks so coded-wire tagged (CWT) fish<br>are low. ADF&G can look at recoveries of CWT fish through fleet, but<br>statistics on that info isn't good, but genetics data indicate a few thousand of<br>fish per year, and it seems as though Taku returns have declined because of<br>the troll fishery, not natural fluctuations. Proposal is suggesting sweeping<br>management activities when escapement is predicted low. Currently, if<br>threshold was lower than lower bound, ADF&G would take action.<br>Tad—taking the tagged Taku fish over a long time scale and aggregating tags<br>for the last few years has some results. Of the CWT fish that were caught,<br>over half of fish came from net fishery not troll fishery. And if you look at<br>troll fishery the proposal is trying to close, it was about 1% of Taku fish.<br>Seemed like very drastic changes in the proposal.<br>Matt Donahoe (Public)—raising the bottom of the escapement range to mid-<br>range, and it seemed like the proposal arbitrarily cut the escapement half.<br>Eric Jordan (Public)—thinks this is a significant threat because of the BOF<br>composition and with conservation groups. Thinks there are problems that<br>need to be addressed in the real world—high interception of small kings,<br>high mortality in all fisheries—but doesn't think that this proposal is<br>representing the conservation concerns. Suspects most of the fish caught in<br>the Juneau sport /troll fishery are probably not Taku kings. Encourage voting<br>in opposition to this.<br>Jerry called question. |  |
| BOF  | 175                | Evaluate             | potential changes to enhanced salmon allocations.  |  |
| ⊠ Oppose   | 0                  | 12, 1<br>abstain     | Tad moved to adopt, Jerry seconded.<br>Matt Donahoe (Public)—Alaska Trollers' Association sees this proposal as a<br>fish grab from trollers, and is opposed.<br>Moe—Did NSRAA Board bring up this proposal at their meeting?<br>Steve Reifenstuhl (Public)—the NSRAA board opposed this proposal.<br>Tad—Gillnetters have harvested well above allocation for decades, and it<br>suggests to me that they want to change the allocation permanently. When<br>sport charter fleet got a halibut allocation, the BOF equivalent regulations<br>were made to keep charter fleet within allocation. The charter fleet sued,<br>and the judge on the case said that historic overfishing should not a basis for<br>continued harvest at that rate and provides incentives for wrong behavior.<br>Steve R. (Public)—this is not a gillnet proposal from the united gillnet  |  |

|         |     |                 | association (UGA).   |
|---------|-----|-----------------|--|
| 202     | 470 | <b>.</b>        | Kim called question.   |
| BOF     | 176 | Establish       | new enhanced salmon allocations by gear type.<br>Tad moved to adopt, Randy seconded.   |
| Support | 8   | 4, 1<br>abstain | Tad—the heading is not the correct language by Board Support. This<br>proposal would put the hatchery boards on notice that trollers expect<br>hatchery salmon allocations to be distributed as regulations require.<br>Johm—SSRAA does a pretty good job of the allocation issues.<br>Linda Danner (Public)—SE salmon allocation plan, determined which portion<br>of fish should be allocated to each gear group, through access to terminal<br>harvest areas (THAs), change allocation percentage, and species raised,.<br>Chum Trollers' Association (CTA) has tried to change access, and it han't<br>been easy and has been sent through multiple boards. SSRAA gets the<br>allocation close, but not NSRAA's Board. The 1994 Enhanced Salmon<br>Allocation plan addressed in the proposal has solution for not achieving<br>allocation goals, but does not account for intentional noncompliance. When<br>voting on boards, there's 5 seats for seine, gillnet, trollers, and there are<br>always 10 votes against; would like to have that loophole close. CTA would<br>like to have hatchery boards go to BOF with regards to allocations. Which<br>would result in less contentious BOF meetings because of allocations is a hot<br>topic issue. Proposal is designed to be utilized by gear group lowest in their<br>allocation, DIPAC and NSRAA aren't. All gear groups can utilize this proposal.<br>Carl Petersen (Public)—ATA is opposed to this, UGA, SSRAA board, and<br>NSRAA board are opposed. Proposal is in conflict with regulation. Proposal<br>is for all of SE including SSRAA. NSRAA has plans for troll allocation. Outside<br>of the CTA, everyone is opposed to this. 46% of NSRAA's budget is for<br>king/coho for troll fleet.<br>Linda D. (Public)—king/coho program has become important for net fleet in<br>last few years. Most of cost recovery is done by net fleet, and in 2014, none<br>of the fish went to trollers, and the nets disperse fish too much for trollers.<br>Moe—how many members on CTA?<br>Linda D.—366 tollers delivered chum in round this year, and there is 100+<br>members.<br>Moe—trolled for many years, and sees this proposal as against net fleet. |

|          |     | 1         |  |
|----------|-----|-----------|--|
|          |     |           | because the fishing is better. Just give this proposal a try!                    |
|          |     |           | Eric Jordan (Public)—issue is that between \$5-12 million in fish is harvested   |
|          |     |           | by nets that were allocated to trollers. It's a significant amount of money      |
|          |     |           | that is being harvested by net fleet instead of trollers [of fish that were      |
|          |     |           | allocated to trollers]. Tried to get consensus on NSRAA board, but not in net    |
|          |     |           | fishermen's interest to give the allocation to trollers. If BOF asks what the    |
|          |     |           | plan is to get NSRAA into 30% of allocation for trollers, what will NSRAA tell   |
|          |     |           | them?  |
|          |     |           | Steve R. (Public)—NSRAA would allow trolling in eastern channel, access for      |
|          |     |           | spring kings, hidden falls fish, 20 million chum in SE cove.                     |
|          |     |           | Eric J. (Public)—no plan for trollers to catch the fish next year?               |
|          |     |           | Steve R. (Public)—the plan is there's opportunity.                               |
|          |     |           | Eric J. (Public)—so no plans for next year or within the first couple years      |
|          |     |           | then.  |
|          |     |           | Tad—disclaimer: he is vice chair of CTA; Linda Danner is chair of CTA.           |
|          |     |           | Moe—larger schools outside harvest area (THA), trollers get to fish first.       |
|          |     |           | Concern over lack of effort when there's troll openings and quality concerns.    |
|          |     |           | As a seiner, he doesn't complain if he goes to fish a certain place or a certain |
|          |     |           | species. Trollers can't either. Thinks there's already enough opportunity for    |
|          |     |           | trollers, and they don't need any more fish.                                     |
|          |     |           | Carl P. (Public)—NSRAA board decided to have more net effort when DIPAC          |
|          |     |           | gave money to NSRAA. Can't run a fishery on 30,000 fish.                         |
|          |     |           |  |
|          |     |           | Tad—this proposal does not call for specific closures, but does call for         |
|          |     |           | hatchery boards to develop a plan that works for allocation.                     |
|          |     |           | John—this has been going on for 15+years. Trollers are fishing kings not         |
|          |     |           | chum. Doesn't see the goodwill coming from the net fishermen. Risky              |
|          |     |           | proposal, but thinks there's need to be more pressure in allocation. Will        |
|          |     |           | support. Hooks aren't' very effective. Would like to see some compromise.        |
|          |     |           | Steve R. (Public)—coho program at sawmill cove, and thinks there's goodwill      |
|          |     |           | already, and budget shows that. NSRAA is trying to promote chum program.         |
|          |     |           | Jeff called question.  |
| BOF      | 177 |           | nmon property commercial salmon fishery in a portion of Mist Cove Special        |
|          |     | Harvest A | rea to allow hatchery operations.  |
|          | 8   |           | Jerry moved to adopt, Kim seconded.  |
|          |     | 4         | Steve Reifensthul (Public)—closed areas by Emergency Order for many              |
|          |     |           | years, language ran through ADFG, so special harvest area would close            |
|          |     |           | hatched area on map [handed out at meeting]. Reason because facility in          |
|          |     |           | cove to rear and do cost recovery safety is jeopardized. It's been done by       |
|          |     |           | EO, and this proposal would put it in the regulations. Lots of conflict with     |
|          |     |           | people getting on docks and safety issues. Lots of interactions between          |
| ⊠Support |     |           | gear. Area is open to other users when not doing cost recovery.                  |
|          |     |           | Kim—subsistence fishermen closures?  |
|          |     |           | Steve R. (Public)—Closed to all fishing.   |
|          |     |           | Jon—would the stream mouth be open for guiding?                                  |
|          |     |           | Steve R. (Public)—yes, the facilities are around the corner.                     |
|          |     |           | Tad—does this proposal apply year round?   |
|          |     |           | Patty (ADF&G)—it's only in the summer.   |
|          |     |           | John—178 and 177 are the same proposal.  |
|          |     |           | Jerry called the question.   |
| L        | 1   | 1         |  |

| BOF       | 178 | Close common property commercial salmon fishery in a portion of Mist Cove Special Harvest Area to allow hatchery operations.  |
|-----------|-----|---|
| No Action |     | Same as above.  |
| BOF       | 179 | Close common property commercial salmon fishery in a portion of Kasnyku Bay<br>Special Harvest Area to allow hatchery operations.   |
| Support   | 8   | <ul> <li>Jerry moved to adopt, Dick seconded.</li> <li>Steve Reifenstuhl (Public)—same idea as with 177/178 proposals. Primarily protecting staff in operations area.</li> <li>Tad—did there used to be a hand troll fishery there?</li> <li>Jerry—there is some going on there.</li> <li>Don Bird (Public)—hand troller, and had fished there before. Opposed because NSRAA created the line, and enforced it without going through BOF process. Line is further out than necessary for commercial use. For sport fishermen there shouldn't be a line at all. Like at Medvejie. For the scope of work, it's an area larger than necessary.</li> <li>Steve R. (Public)—this is a closed area from ADF&amp;G process. He's not NSRAA, he's just the representative for the Board of Directors.</li> <li>John—Typically the closure is done through EOs?</li> <li>Steve R. (Public)—had closed off by barrier net, and closed through EO.</li> <li>Troy (ADF&amp;G)—It's always been open for sport until it needs to be closed, fishing prohibited within x number of feet of fish weir/ladder.</li> <li>Moe—what's the timing of the barrier net?</li> <li>Steve R. (Public)—it goes in June 12<sup>th</sup>, but we're trying to preclude fishing there prior to that date. Protection for area before/after barrier net is in place.</li> <li>Tad—what's the time frame of this proposal?</li> <li>Steve R. (Public)—it would be closed June through end of coho season. Patty (ADF&amp;G)—specifies during summer troll season.</li> <li>Steve R. (Public)—it would be closed June through end of coho season.</li> <li>Patter, Ruper Cosing the waters. Should read the portion of the waters xyz is closed.</li> <li>Steve R. (Public)—tho would be inside the barrier net that protects brood stock. Plenty of fish outside that net during the rest of the season. Safety issue as boats would tie up to net. This line is outside the barrier net.</li> <li>People tie up to net pens, which is a liability. John—is 180 the same?</li> <li>Steve R. (Public)—the s</li></ul> |
| BOF       | 180 | Close common property commercial salmon fishery in a portion of Kasnyku Bay<br>Special Harvest Area to allow hatchery operations.   |

| BOF     | 223 | -            | he king salmon harvest percentage for the initial opening in the summer   |
|---------|-----|--------------|---|
|         |     | salmon tr    | oll fishery from 70 percent to 60 percent.  |
| Support | 9   | 3<br>abstain | Tad moved to adopt, Jessica seconded.<br>John—question for ADF&G. High abundance years can you guess what a<br>10% increase in August harvest would be?<br>Grant (ADF&G)—it would be about 20,000 kings.<br>John—sticking to reasons given in proposal. Helps the homebodies, those<br>that are sticking to Sitka to fish. In Southern SE, some of best catches come<br>from August. Only a few extra days on a later opening.<br>Tad—looked at in depth if it had been in place every year. If you reduce the<br>effort from July to August, it looks like the average troller in SSEO would be<br>ahead \$900, in NSEO the average troller would be \$600 ahead. Most of Sitka<br>trollers he's talked to are in support of this. Tendency to catch 85% of fish in<br>July.<br>Matt Donahoe (Public)—Right now it's allocated 70/30 July/August, which<br>would essentially double the August catch. Perhaps maybe a 65/35 ratio. In<br>high abundance years, how would it work if ADF&G plans on a 21 day open<br>and it closes after 6 days (like this year) what happens then?<br>Moe—if you're taking fish from July to August, what would happen to<br>seiners who target in July?<br>Patty (ADF&G)—management of seine fishery in district 4 is run<br>independently from trollers.<br>Moe—would that mean there's a 10% increase in the seine catch?<br>Grant (ADF&G)—it's a possibility.<br>Tad—quota goes up for all fleets if August quota goes up.<br>Jerry called question. |
| BOF     | 224 |              | commissioner to open a season during which a trip limit is in effect for king<br>the commercial summer salmon troll fishery.  |
| Support | 12  | 0            | Randy moved to adopt, Tad seconded.<br>Matt Donahoe (Public)—not very many fish left of the quota (about 10,000<br>fish), which ADF&G can't open up the fishery with that many fish. With<br>regards to the treaty, we're at the end of the "totem pole" for allocation.<br>We don't want to leave Alaskan fish on the table. Proposal is to not open a<br>fishery; they could allocate fish per trip. Boats would register to fish in this<br>system.<br>Floyd—how is the registration process?<br>Matt D. (Public)—for Lingcod, you just sign up and tell ADF&G which areas<br>you'll be fishing. Worried about moving these unfished fish to other fleets as<br>a buffer. When quota is low, that's when fish are left on the table, and that's<br>when they're most valuable.<br>Eric Jordan (Public)—but this proposal would have high grading. Suggests<br>it's got to be a trip limit in POUNDS to avoid high grading. Average weight of<br>fish per boat, and a limit for the season. Not a trip limit, a rest of the season<br>limit.<br>Matt D. (Public)—can be adjusted in-season?<br>Matt D. (Public)—can be adjusted in-season?<br>Matt D. (Public)—proposal is flexible.<br>Patty (ADF&G)—ADF&G doesn't have comment, but we would want<br>registration, know how many treaty kings left, divide number of fish<br>between number of boats intending to fish.   |

|         |     |   | John—Wants to amend Trip Limit to TRIP LIMIT IN POUNDS. That would<br>remove high grading.<br>Matt D. (Public)—but the treaty is in fish, not pounds.<br>Tad—trying to get total mortality fish instead of actual landings, but<br>Southern US won't go for it because our fisheries are cleaned up.<br>Matt D. (Public)—Alaska would have gotten 53,000 more treaty fish based<br>on 2011 numbers when reviewing the fisheries.<br>Moe—pounds sound even more complicated. Not sure how you'd get away  |
|---------|-----|---|--|
|         |     |   | with high grading.   |
|         |     |   | Eric J. (Public)—based on this discussion, let's keep at number of fish.<br>Kim called question.   |
| BOF     | 229 |   | nmercial salmon fishing with troll gear in an area between North Chatham<br>I Homeshore.   |
| Support | 13  | 0 | Tad moved to adopt, Randy seconded.<br>Matt Donahoe (Public)—problem with area is that it's only open 4 days,<br>Wants to open shore to trolling. Proposal will stay out of shallow water<br>because territorial fishermen are fishing in there. Open up the area on a<br>map that was handed out. Gives trollers a little more area, stays in the same<br>district. An issue about going up into Lynn Canal, but proposal doesn't go up<br>there.<br>Floyd—clarification: whenever anything is open up there, this section's open<br>too?<br>Matt D. (Public)—would like it to be open at the same time as Homeshore is.<br>Patty (ADF&G)—under management plan, likely to have conservative<br>openings to gather data (not open for 7 days as the areas next to it are), and<br>species restrictions.<br>Matt D. (Public)—language can be changed just want to be able to move<br>through there with gear without having to pull it. Need ground to troll,<br>unlike nets.<br>John—is management plan working for district 12 and 14?<br>Patty (ADF&G)—it's been in place, but it sunsets at the end of 2014, and it's<br>up for editing this board cycle. Happy with the way it's going so far.<br>Eric J. (Public)—thinks it should not be proposed as a separate area, maybe<br>be an extension of northern Chatham area. The only difference is you'd be<br>able to keep certain species. Thinks it's a good idea to extend the northern<br>Chatham area.<br>Matt D. (Public)—the problem with Homeshore is that its only open four<br>days a week.<br>Jerry called the question. |

# IX. Next Meeting Date: January 14<sup>th</sup> at 6:30PM.

X. Adjournment: 9:50PM

Minutes Recorded By: Jessica Gill, Secretay Minutes Approved By: John Murray, Chairman Date: January 14, 2015

#### Sitka Advisory Committee February 2, 2015 Sitka Sound Science Center, 834 Lincoln Street

- I. Call to Order: 6:33 by John Murray, Chairman
- II. Roll Call: Jessica Gill, Secretary

Members Present: Jerry Barber, Kim Elliot, Tad Fujioka, Jessica Gill, Randy Gluth, Moe Johnson,
Karen Johnson, Jon Martin, Brian Massey, John Murray, Floyd Tomkins, Wayne Unger
Members Absent: Dick Curran, Jeff Feldpausch, Cody Loomis, Peter Roddy, Bradley Shaffer
Number Needed For Quorum on AC: 8
List of User Groups Present: Hand Troll, Subsistence, Trapping, Alternate 1, Hunting, Seine, At-Large 1, Charter, Resident Sport Fish, Power Troll, Conservation, Processor

- III. Approval of Agenda: No formal agenda was developed, but John Murray suggested the proposals to discuss.
- IV. Approval of Previous Meeting Minutes: From meeting date: January 14<sup>th</sup>, 2015
   Brian motioned to adopt, Kim seconded. John mentioned these minutes are great. Minutes passed unanimously.
- V. Fish and Game Staff Present: Dave Gordon
- VI. Guests Present: Steve Reifenstuhl, Joel Markis
- VII. Old Business: No old business was discussed.
- VIII. New Business:

Tad moved to have chair and secretary to write thank you letters to SSSC and the Sentinel for hosting and publishing our meetings. John mentioned he was working on this letter. Jessica asked for a quick turn around on minute approval to submit to BOF. It was determined that an email poll will suffice for approval of the minutes.

| Southeast and Yakutat Finfish, Feb. 23–March 3, 2015<br>Alaska Board of Fisheries |   |  |  |  |  |  |
|---|---|--|--|--|--|--|
|   | Mandatory- Please Summarize Your Proposal Comments in this Form |  |  |  |  |  |
| BOG or BOF  | Proposal<br>Number  | Proposal Description   |  |  |  |  |
| Supports or<br>Opposes?   | Number<br>Support   | Number<br>Oppose   | Comments/Discussion (list Pros and Cons)/Amendments to Proposal  |  |  |  |
| BOF   | 182   | Modify fis<br>Managem  | hing ratios and sunset date in the Deep Inlet Terminal Harvest Area Salmon<br>ent Plan.  |  |  |  |
| ⊠Support  | 9   | 0, 3<br>abstain  | Brian moved to adopt, Kim seconded.<br>Brian—what's the main change for this proposal from what's currently in<br>place?<br>Steve Reifenstuhl (Public)—regulation sunsets this year; this proposal<br>continues it for the next 3 years. Tied to allocation issues.<br>Dave (ADF&G)—the current 1:1 gillnet:seine rotation sunsets at the end of<br>2014 with BOF meeting and it needs to be addressed again. Proposal 182 no<br>specifics to season/regulation end date. Unclear about ratio of salmon<br>allocation (open for debate at BOF?). Joint RPT would meet prior to BOF<br>meeting with recommendation to BOF as to what they want to support.<br>Steve R. (Public)—the JPRT includes representatives from gillnet, seine and<br>troller from SSRAA and NSRAA areas.<br>Discussion about current regulations ensued.<br>Brian called the question.  |  |  |  |
| BOF   | 183   | -  | mmercial salmon fishery purse seine and drift gillnet fishing time ratios in   |  |  |  |
| Support   | 7   | 2, 3<br>abstain  | Inlet Terminal Harvest Area.<br>Tad moved to adopt, Kim seconded.<br>Tad—likes additional opportunity allocated to whichever gear group is<br>behind in their allocation, but there's no language about the trollers. The<br>trollers have been behind in allocation the longest.<br>Dave (ADF&G)—allocative proposal, and whichever the industry wants to do,<br>ADF&G will abide. The way he understands, after next season, it if seiners<br>their allocation, the time ratio the following year will be 1 gillnet:1 seine.<br>Doesn't change to 1:1 ratio at all [like proposal 182]. If the seiners are not<br>behind, the ratio will be 2 gillnet:1 seine. The proposal is poorly worded and<br>hard to understand.<br>Discussion about the sunset clause of current regulation ensued.<br>Steve R. (Public)—both net gear groups behind this proposal, but not<br>trollers.<br>Brian called the question. |  |  |  |
| BOF   | 189   | Remove reference to 5 AAC 33.366 Northern Southeast Seine Salmon Fishery   |  |  |  |  |
| Support   | 10  | Management Plans and clarify language regarding fishing openings.0, 2<br>abstainTad moved to adopt, Randy seconded.<br>Dave (ADF&G)—housekeeping proposal. Northern Southeast Seine<br>Management Plan addressing seining at Hidden Falls THA. Clarifying<br>language. Tried to strike difficult language in section 2, intention is to avoid<br>writing an emergency order within a week of the chum troll fishery. Not<br>sure if language is valid, as cost recovery has changed for this area.<br>Brian called the question. |  |  |  |  |

| BOF                    | 193 | Restrict a                           | Restrict and prohibit commercial purse seining in portions of Districts 12 and 14.  |  |  |
|------------------------|-----|--------------------------------------|---|--|--|
| Support                | 0   | 10, 2<br>abstain                     | Brian moved to adopt, Kim seconded.<br>Brian — another move to close areas to commercial guys.<br>Dave (ADF&G) — Connected to ETJ petition, and centered on Kanalku stock.<br>Federal Subsistence Board hired mediators to come up with solution to local<br>problem. Kanalku system has a falls on it, so they blasted the falls to make it<br>easier for the fish to get up to the lake to spawn. Not a very large system, 3-<br>4K fish. State did some sampling of the seine fishery, to get baseline data<br>throughout SE. Report just got published, lots of sockeye throughout Icy<br>Strait (600,000 sockeye pass through). Kanalku fish don't really show up on<br>the north side seine fishery. Subsistence fishery ends mid-July, and seine<br>doesn't open mid to late July.<br>Moe—already area closed around this stream, and the fleet doesn't even<br>catch them. One day a week opener would hurt the fishery.<br>Steve R. (Public)—45,000 extrapolated in sampling, 0.7% were Kanalku fish<br>in 2013. Results of mediator team came up as economic hardship and<br>change that Angoon needs (runway, hydropower dam).<br>Jon—would that 0.7%, roughly 200-400 fish, hurt the stock?<br>Steve R. (Public)—no I don't think so.<br>Brian called the question. |  |  |
| BUF                    | 194 | Close a po                           | Moe moved to adopt, Karen seconded.   |  |  |
| 🛛 Oppose               | 1   | 6, 5<br>abstain                      | Tad—proposal 194 is closing waters that are already closed?<br>Dave (ADF&G)—yes, but if there's a surplus of pink and chum, we can open<br>certain areas in regulations. Restriction vs closure. Proposal 194's attempt<br>is to close these waters permanently. Can get build up of fish in Lisianski<br>Inlet, and occasionally extend the openings after normal openings. Wild<br>stock seine fishery. Population estimates done by aerial surveys.  |  |  |
| BOE                    | 105 | Classer                              | Wayne called the question.  |  |  |
| BOF                    | 195 | Close a po                           | ortion of Lisianski Inlet to commercial salmon fishing with purse seine gear.<br>Discussion regarding coho escapement in the Lisianski area ensued. No coho   |  |  |
| No Action              |     |                                      | conservation concerns throughout SE.  |  |  |
| BOF                    | 196 | Establish                            | new salmon statistical areas in District 13.  |  |  |

|           |     |            | Brian moved to adopt 199 and 200, Kim seconded.   |
| 🛛 Oppose  | 0   | 12         | Discussion of Goldschmidt and Haas possessory boundary and what is                                  |
|           | Ũ   | 12         | encompassed of this boundary. This is related to ETJ petition. Discussion                           |
|           |     |            | about the area to be closed was discussed at length.  |
|           |     |            | Kim called the question.  |
| DOF       | 200 | Close wat  | ters within the Admiralty Monument proclamation boundary to commercial                              |
| BOF       | 200 | fishing fo | r salmon with purse seine gear.   |
| 🛛 Oppose  | 0   | 12         | See above, moved with 199.  |
|           |     | Close cer  | tain waters of Chichagof Island and Admiralty Island to commercial salmon                           |
| BOF       | 201 |            | ith purse seine gear.   |
|           |     |            | Tad moved to adopt, Brian seconded.   |
|           |     |            | Tad—for consistency, if we supported proposal 198, we should support this                           |
|           |     |            | one.  |
|           |     |            | Steve R. (Public)—it's similar, but not very defined as the ADF&G one is                            |
| 🛛 Oppose  | 4   | 7, 1       | (198).  |
|           |     | abstain    | John—is 198 more closed area?   |
|           |     |            | Dave (ADF&G)—not sure if they're markedly different.  |
|           |     |            | Tad—Basket Bay might be slightly larger in proposal 201.  |
|           |     |            | Tad called the question.  |
|           |     | Clarify m  | easurement standards for the commercial salmon purse seine vessel length                            |
| BOF       | 202 | -          | ne Southeastern Alaska Area.  |
| No Action |     |            | Seine fleet will be meet with BOF to discuss this with ADF&G.                                       |
|           |     | Establish  | and define a maximum speed at which a commercial salmon fishery purse                               |
| BOF       | 203 |            | y be towed.   |
|           |     |            | Brian—is there way to enforce this?   |
|           |     |            | Dave (ADF&G)—no. Difficult to enforce speed on seine.   |
|           |     |            | Tad—proposal 139 which is a department-sponsored proposal similarly                                 |
| No Action |     |            | imposes a speed limit on jig gears. If enforcement of a speed limit is                              |
|           |     |            | practical in the case of 139, is proposal 203 feasible? If infeasible, then                         |
|           |     |            | shouldn't proposal 139 be infeasible too?   |
|           |     | Prohibit t | he use of spotter planes during open commercial salmon fishing periods                              |
| BOF       | 204 |            | irse seine gear is allowed.   |
|           |     |            | Brian would like to move 204 and 205 together. Tad seconded.  |
|           |     |            | Brian—percentage of boats using spotter planes?   |
|           |     |            | Moe—maybe 4 planes used by boats in co-op fisheries.  |
|           |     |            | Tad—heard about from seiner: 1) When you do go by yourself seining, next                            |
|           |     |            | thing you know you're not alone anymore on the grounds because of the                               |
|           |     |            | planes. 2) Spotter planes are a big cost to fleet, and don't significantly                          |
|           |     |            | increase the number of fish they harvest. The seine fleet has plenty of                             |
|           |     |            | catching power to harvest all the harvestable surplus.  |
| 🔀 Oppose  | 4   | 8          | Floyd—in herring opening, no one will offset the cost if it'll increase the                         |
|           |     |            | catch. Likes to level the playing field.  |
|           |     |            |   |
|           |     |            | Moe—doesn't think it's important, and useless regulation. Maybe they'll be                          |
|           |     |            | used during the salmon seine openings, but not too much during the season.                          |
|           |     |            | Kim—drones not as obtrusive, and thinks most fishing boats might all have                           |
|           |     |            | drones in the near future anyway. Privacy an issue. A lot of plane traffic                          |
|           |     |            | over Deep Inlet, where she lives, and can be noisy.   |
|           |     | Duchiliti  | Jerry called the question.  |
| BOF       | 205 |            | he use of unmanned aircraft during open commercial salmon fishing periods<br>irse seine is allowed. |
|           |     | where bu   | ise seine is allowed.   |

| 🛛 Oppose            | 4   | 8               | See comments on 204.  |
|---------------------|-----|-----------------|---|
| BOF                 | 267 | Repeal ex       | ception for use of footgear with felt soles while sport fishing.  |
| 🛛 Oppose            | 1   | 11              | Jerry moved to adopt, Tad seconded.<br>Kim—problem is large number of out of state fishermen. Repealing this is<br>not a good idea, and you can get around slippery spots in non-felt soles.<br>Tad—BOF decision not based on good science, but it is a potential vector,<br>and ADF&G's position at the time was that banning felt soles was not<br>necessary, adequate, or a meaningful way to prevent the spread of disease<br>or invasive species.<br>Dave (ADF&G)—Sportfish supports the idea of felt soles.<br>Brian called the question.   |
| BOF                 | 239 |                 | Registration Area A from the 72-hour Dungeness crab pot storage limitation  |
| No Action<br>TABLED | 9   | requirem<br>3   | Tad moved to adopt, Kim seconded.<br>Dave (ADF&G)—unbaited open pots can be stored for 72-hours. Proposal is<br>requesting 7 day to retrieve pots.<br>Tad—in February and August, they get 7 days to retrieve pots, why not<br>during this closure?<br>Dave (ADF&G)—could be due to enforcement not being out there, or<br>wanting to stay out longer than necessary.<br>John—in support, for safety of fleet.<br>Brian—proposer wants to amend areas, and add area A to the removal<br>request. But thinks it should be discussed at BOF.<br>Kim—what about amending the removal to 7 days to remove pots instead of<br>eliminating the clauses [areas].   |
|                     |     | Modify p        | Jerry moved to table the proposal.<br>rohibitions on importation and release of live fish to specifically address   |
| BOF                 | 261 |                 | ns in Alaska.   |
| Oppose              | 0   | 5, 7<br>abstain | Jessica moved to adopt, Kim seconded.<br>Jessica—in invasive species regulations, amphibians are considered fish.<br>Jon—this is an emerging issue in invasive species and diseases. Thinks the<br>proposal is a good idea, but the way the proposer is going at it is not the<br>right way. Someone buying a frog from a pet store wouldn't know about<br>invasive species, being a vector or carrying diseases already. Very<br>challenging. Perhaps prohibiting transport of frogs is the way to go.<br>Proposal could be rewritten.<br>Floyd—is this a good first step?<br>Jon—from a regulatory standpoint, the proposal needs work.<br>Kim—can we be in support of the idea of the proposal, and not just the<br>actual proposal?<br>Floyd—it would take a resolution drafted from the AC.<br>Jon—the proposal is trying to get a little more teeth in regulations of the<br>movement of these animals.<br>Jerry called the question. |
| BOF                 | 262 |                 | ermitting requirements to specifically address the collection, transport, and   |
| Oppose              | 0   | 9, 3<br>abstain | n of amphibian in Alaska.<br>Jon moved to adopt, Brian seconded.<br>Jon—anybody can transport diseased amphibians, without clear and<br>appropriate gear. Needs to have certain regulations regarding what an<br>amphibian is [see comments on proposal 261]. Likes the concept of<br>proposal, but not the way it's written. Does anybody know what  |

|          |     |           | "reasonable precaution" is?<br>Tad—would like to think that some kid can handle a frog without getting a<br>ticket.<br>Jon—the current regulation is like that. And this proposal would make it not<br>required to have a permit to conduct research, which is ludicrous. All<br>vertebrates have permits needed to conduct research.<br>Jerry called the question. |
|----------|-----|-----------|---|
| BOF      | 265 | Ban the u | se of live earthworms as bait in freshwater sport fishing.  |
| 🛛 Oppose | 0   | 12        | Tad moved to adopt, Jon seconded.<br>Dave (ADF&G)—in overpopulated lakes you can use live bait.<br>Floyd—rationale is not in harmony with the regulation requested.<br>Tad called the question.   |

IX. Adjournment: 8:35 PM by John Murray

## Craig Advisory Council meeting February 3, 2015

#### **Quoram in attendance:**

Brian Castle Ellen Hannan Dave Creighton Steve Stumpf Fred Hamilton Stu Merchant Doug Rhoades Mike Douville Charles Haydu **Members not in Attendance:** Bill Farmer Steve Merritt Kirk Agnitsch

### **Public in Attendance:**

Jeff Reeves Craig Schwanke

Meeting called to order @ 7:07 PM

Agenda approved

Minutes approved from last meeting January 29, 2015

#### **Elections:**

Doug Rhoades-Alternate Steve Merritt-Vice-Chair

## New Business:

Discussion on Craig AC's Klawock River proposals. RAC (Regional Advisory Council) recommended closure on the federal portion of the mouth of Klawock River (just upriver of Fireweed Lodge). Federal restriction would be in place for July and August then no restrictions after August 31. We feel our **proposal 151** takes the RAC recommendation further by closing the fishery up river from the Klawock River Bridge. After a lengthy discussion **the Craig AC is dropping proposal 149 and amending Proposal 152 (See below)**.

|          | Proposal<br>Number | Proposal Description |  |  |
|----------|--------------------|----------------------|--|--|
| Supports | Number             | Number               | Comments/Discussions, Amendments to proposal |  |

| or      | Support | Oppose      |   |
|---------|---------|-------------|---|
| Opposes |         |             |   |
| BOF     | 152     | Horsepov    | ver restriction Klawock River subsistence fishery         |
|         | 9       | 0           | Amend proposal to leave HP restriction the way it         |
|         |         |             | is until August 31 then lift HP restriction. No           |
|         |         |             | restrictions on the days of the week that you can         |
|         |         |             | fish after August 31.                                     |
| BOF     | 127     | No more     | than 1,000 blades of Kelp per herring pen                 |
|         | 9       | 0           | The Craig AC recommends no more than 500                  |
|         |         |             | blades of Kelp per pen                                    |
| BOF     | 128     | Combine     | 2 closed herring pounds to make 1                         |
|         | 0       | 9           |   |
| BOF     | 129     | Allow her   | ring to be retained for up to seven days                  |
|         | 0       | 9           | This will lead to added mortality due to a longer         |
|         |         |             | duration in the pen. Releasing at night helps them        |
|         |         |             | escape predators.   |
| BOF     | 130     | Create sp   | iny dogfish fishery using pots                            |
|         | 9       | 0           |   |
| BOF     | 131     | Allow pot   | s in commercial sablefish fishery                         |
|         | 9       | 0           | 2   |
| BOF     | 132     | Adds pots   | s as legal gear in the long-line fishery                  |
|         | 9       | 0           |   |
| BOF     | 133     | Adds pots   | s as legal gear in long-line fishery                      |
|         | 9       | 0           |   |
| BOF     | 136     | 50 fish lir | nit for personal use sablefish                            |
|         | 9       | 0           |   |
| BOF     | 176     | Establish   | new enhanced salmon allocation by gear types              |
| 201     | 7       | 1           | <b>1 vote abstained</b> . We fell this proposal addresses |
|         |         | -           | accountability for what is being caught.                  |
| BOF     | 184     | Open Ken    | drick bay to troll fishery                                |
|         | 9       | 0           |   |
| BOF     | 207     |             | commercial drift gillnet salmon fishing opportunity       |
|         | 9       | 0           | Open an area for gillnetters that is not open when        |
|         | -       | Ũ           | seiners are fishing and allows protection from the        |
|         |         |             | weather.  |
| BOF     | 208     | Establish   | a drift gillnet mesh size restriction when king           |
| -       |         |             | shery is closed   |
|         | 0       | 9           | King salmon that are present are generally Anita          |
|         | -       |             | Bay hatchery fish. <b>The Craig AC prefers an area</b>    |
|         |         |             | restriction over a mesh size restriction.                 |
| BOF     | 209     | Increase    | mesh depth to 120 meshes                                  |
|         | 0       | 9           | •   |
| BOF     | 210     | Allow sin   | gle monofilament net in gillnet fishery                   |
|         | 0       | 9           | Our AC gillnetters opposed this stating,                  |

|     |     |  | "monofilament can be too effective".                   |  |
|-----|-----|--|--|--|
| BOF | 223 | Change harvest percentage for Trollers from 70 to 60 % for |  |  |
|     |     | king salm  | on on the first opening                                |  |
|     | 0   | 9  | Sometimes King Salmon are not available on the         |  |
|     |     |  | second opening. Trollers do not want to risk           |  |
|     |     |  | leaving fish "on the table".                           |  |
| BOF | 228 | Mandatory 10 day closure for Coho fishery August 1-10      |  |  |
|     | 0   | 9  |  |  |
| BOF | 257 | Repeal footgear with felt soles                            |  |  |
|     | 7   | 2  | Other materials on the same boots can transfer         |  |
|     |     |  | organisms as easily as felt. Felt soles are safer than |  |
|     |     |  | non-felt soles. There should be a decontamination      |  |
|     |     |  | method instead.  |  |

Stu Merchant attending BOF Meeting on behalf of the Craig AC.

Meeting Adjourned At 9:18pm
