Miscellaneous Business:

- Al makes a motion to put the 25,000 additional fish up the river beyond what the Department has set as their current escapement goal for subsistence in September. The motion was seconded by Gary.
Discussion: Al explains the reasoning for this motion is that the stream-life expectancy for red fish once they've begun their journey up river is around 60 days. And these additional fish would help with the current subsistence issue.
Question was called. Motion carried unanimously.

With no further business to discuss,

Adjournment at 8:40a.m.
