Permit Holder John Johanson

*Re: A Proposal for Regulations Affecting Commercial Fisheries in the Southern Southeast Area*

Dear Permit Holder,

I am one of the permit holders for sable fish pot gear in the Southern Southeast Area.

I am proposing that the Board of Fisheries change the regulations that affect the type of gear that can be used in the Southern Southeast Area. Enclosed herewith you will find a copy of the proposal that I intend to submit.

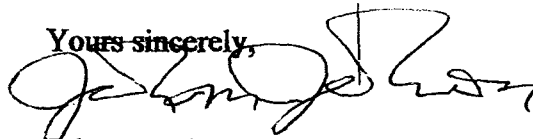

I believe that black cod quota for state waters should be harvested with pots at the option of all quota holders including those holding longline permits. Several longline permit holders have not been able to harvest their quota and this would allow them to realize the economic benefits of their permits. Permitting the harvesting of black cod with pots would:

1. Minimize the loss of black cod to marine mammal interaction
2. Cut down on by catch
3. Cut down on smaller fish
4. Cut down on bait costs
5. Have less waste due to slime eels (hagfish) and sand fleas

I am asking all of the permit holders for the Southern Southeast Area for sablefish to communicate their consent to the proposed regulation changes. If you agree, I would appreciate it if you would sign the attached consent and return it to me and I will attach it to the proposal which I am going to be sending to the Board of Fisheries with copies to the Commercial Fisheries Entry Commission.

If you have any questions, please contact me at (907) 209-5866 I would be glad to discuss my proposal with you.

Yours sincerely,

  
John M. Johanson
