PROPOSAL 142 – 5 AAC 01.220. Lawful gear and gear specifications. Change the dates gillnet gear may be used in the South Fork and Middle Fork of the Koyukuk River from November 1 through June 30 to August 20 through June 30, as follows:

5 AAC 01.220(f)(8) is amended to read:

Gillnets three and one-half inches, (current size restriction), may be used only from August 20–June 30.

What is the issue you would like the board to address and why? Change the open period for when subsistence gillnet may be used in the Middle and South Fork permit area, from the current November 1 to June 30 season, to August 20 to June 30. This proposal would still protect salmon when present but allow fall harvest of whitefish, grayling, suckers, and pike. I collected salmon samples under ADF&G Commissioner’s permit from 2010 to 2013, for the Genetic Conservation Lab. I found only summer chum and Chinook salmon present in the upper Koyukuk drainages from July 15 to August 15. I found no fall chum or coho in the Middle or South fork drainage.

PROPOSED BY: Jack Reakoff (EF-C15-029)
