Proposed New
Cape Igvak Salmon Management Plan (5AAC 18.360)

1. In the Cape Igvak Section during the period of June 1 through July 25, salmon fishing will close once all sockeye salmon harvested of all origins approaches 7.5% of the total sockeye catch in the Chignik Management Area.
2. However, fishing in the Cape Igvak Section may occur only if the department determines, from in-season fishery performance data, that by July 1 at least 500,000 sockeye salmon will have been harvested in the Chignik Management Area. After July 1 fishing may occur only if the department determines, from in-season fishery data, that at least 500,000 additional sockeye salmon will have been harvested through July 25 in the Chignik Management Area.
