**What is the issue you would like the board to address and why?** This proposal seeks to simplify regulations associated with the early-run king salmon fishery. Special Harvest Areas (SHA) and associated regulations were created to reduce harvest of early-run king salmon returning to the Anchor River, Stariski Creek, Deep Creek, and Ninilchik River. Regulations associated with SHAs are difficult to follow and enforce because the 1 mile distance from shore fluctuates with the changing tide cycle. Furthermore, king salmon returning to Cook Inlet streams to spawn also move in and out of the 1-mile corridor with the changing tide.

This plan will simplify the regulations by removing the SHAs while maintaining effective regulations defining the closed areas surrounding the river mouths of the Anchor River, Stariski Creek, Deep Creek, and Ninilchik River. The proposal will also prohibit guides and crew from sport fishing for king salmon while guiding, and prohibit anglers from fishing for king salmon after harvesting a king salmon 20 inches or greater in length. In addition, by extending this plan through August 31 all returning Cook Inlet king salmon stocks migrating through the saltwater area in July and August will be offered some additional protection.
