PROPOSAL 57

5 AAC 47.021. Special provisions for seasons, bag, possession, annual and size limits, and methods and means for the salt waters of the Southeast Alaska Area.

Close waters in the Klawock vicinity to sport fishing for Dungeness crab, as follows:

The taking of Dungeness Crab by sport fishermen will be prohibited: in the waters near and surrounding Klawock; East of a point located on Prince of Wales Island North of Pt Ildefonso: at 55”34.625 North latitude; 133.16.554 West longitude; to Fern Point; at 55”30.210 North latitude; 133.16.741 West longitude; and North of Tranquil Point; at 55”22.936 North latitude; 133.13.513 West longitude; These waters include Big Salt Lake, Picnic Bay, Shinaku Inlet, Klawock Inlet, San Alberto Bay, Bacareli Bay, Port Saint Nick and Trocadero Bay.

What is the issue you would like the board to address and why?

The taking of Dungeness Crab by sport fishermen: in the waters near and surrounding Klawock; East of a point located on Prince of Wales Island North of Pt Ildefonso: at 55”34.625 North latitude; 133.16.554 West longitude; to Fern Point; 55”30.210 North latitude; 133.16.741 West longitude; and North of Tranquil Point; at 55”22.936 North latitude; 133.13.513 West longitude; These waters include Big Salt Lake, Picnic Bay, Shinaku Inlet, Klawock Inlet, San Alberto Bay, Bacareli Bay, Port Saint Nick and Trocadero Bay.

- Reasoning: economic; Charter businesses have been utilizing these areas to gather crab for profit by supplementing their businesses and decreasing the biomass for subsistence users on Prince of Wales Island. Klawock and the surrounding communities have a large subsistence population that relies heavily on subsistence resources.
- Excessive pressure by charter businesses and sea otter population is depleting the resource
- A regulation closure of these specific areas to charter businesses would allow for the sustainability of the species for subsistence users on Prince of Wales Island and increase biomass of the species.
- The number of Charter businesses in Craig and Klawock is approximately 150 registered charter vessels multiplied by 4 people @ 5 crab per person per boat = 3000 crab per day that can be taken by Charter businesses
- Economics – charters can afford to buy gas and go beyond these immediate areas surrounding the community of Klawock
- The subsistence users in Klawock have only the bare necessities (18 foot Lund, 40 hp motor at best) to gather subsistence foods. Whereas the Charter businesses have top of the line gear (24 foot North River with twin 150 hp to 300 hp motors)
- In Klawock 73 % of households are at or below the federal and state poverty level and depend on local harvesting to sustain their households
- Klawock population is over half Native and is losing Traditional gathering areas to out of State business owners i.e.; charter businesses
- A majority of Prince of Wales Island communities are economically depressed with high rates of unemployment and other government assistance programs
- High cost of living on Prince of Wales Island
- This area has never been closed to sport fishing (charter businesses) help increase the biomass of Crab
• Depleted areas include all listed; Shinaku Inlet has been completely decimated from over harvesting to include human and marine mammals
• Oral histories have proven factual that these areas have been customary, traditional harvesting areas for the local Tlingit and Haida tribes since time immemorial, since then the population as a whole includes both Native and non-Native that rely on the subsistence lifestyle to sustain their households throughout the year
• There is not a Local Area Management Plan (LAMP) in place to better manage local resources for the subsistence user

PROPOSED BY: Tom & Brenda Leask, Byron Vaughn Skinna Jr. (EF-F17-104)

PROPOSAL 58
5 AAC 47.021. Special provisions for seasons, bag, possession, annual, and size limits, and methods and means for the salt waters of the Southeast Alaska Area.
Close waters in the Klawock vicinity to sport fishing for Dungeness crab, as follows:

The taking of Dungeness crabs by chartered sport fishing boats should be prohibited at least in the middle area of the West coast of Prince of Wales Island. The Klawock Cooperative Association, Tribe cannot speak for other parts of Southeast, Alaska but perhaps the Alaska Board of Fisheries should consider the impact of charter boat harvests of Dungeness crab elsewhere too.

What is the issue you would like the board to address and why? The taking of Dungeness crab by sport fishermen in the areas adjacent to Craig and Klawock is decimating a resource that has traditionally been used for subsistence purposes.

Why it needs to be addressed: Approximately 150 charter boats are licensed to sport fish the middle area of the West coast of Prince of Wales Island. The target fish are salmon and halibut, with bottom fish also taken. But charter operators add a bonus. They set crab pots that they pull up on the way back from a fish run, and the charter fishers are treated to the freshest possible crab dinners. Unlike the subsistence harvesters who fish crab periodically for their families (they don't eat crab every day), charter operators have a steady stream of new clients almost daily throughout their season, so they can leave their crab pots, freshly baited daily, to fish without a break throughout their entire season. A little math shows that they can take thousands of Dungeness crab per day. Title IX of ANILCA provides that rural Alaskans are to be given priority in the use of subsistence foods whenever the viability of the resource is threatened. Subsistence users of Dungeness crabs in the areas mentioned have seen a reduction in the resource. A finite subsistence resource is being diminished by a fishery that is, in effect, an add-on luxury for sports fishers, but a serious threat to subsistence users.

PROPOSED BY: Klawock Tribe (EF-F17-108)
PROPOSAL 59

5 AAC 47.021. Special provisions for seasons, bag, possession, annual, and size limits, and methods and means for the salt waters of the Southeast Alaska Area.
Close the Yakutat Area Dungeness crab sport fishery, as follows:

5 AAC 47.021(b) is amended by adding a new subparagraph to read:

(b) in the Yakutat vicinity;

(4) in all waters between the longitude of Cape Suckling (144° W. long.) and a line running southwest from the western most tip of Cape Fairweather at 58° 47.89’ N. lat. and 137° 56.68’ W. long., sport fishing for Dungeness crab is closed.

What is the issue you would like the board to address and why? Surveys conducted by the department indicate that the Dungeness crab stock in the Yakutat Area has not rebuilt following the closure of the commercial fishery in 2000. Surveys conducted in 2004, 2012, and 2013 indicate the population has not recovered. The Dungeness crab sport fishery in the Yakutat vicinity has been closed each year since 2005 by emergency order.

PROPOSED BY: Alaska Department of Fish and Game

PROPOSAL 60

5 AAC 47.xxx. New section.
Establish a guided sport ecotourism Dungeness crab fishery in Sitka Sound, as follows:

I would like to be able to take clients on eco tours in the Sitka Sound Special Use Area. On these tours I would like to pull pre set crab pots and or rings, for viewing purposes only.

I do not intend to retain anything so I would like to save my clients money and save them from purchasing a sport license.

What is the issue you would like the board to address and why? I propose a guided sport eco-tourism Dungeness crab fishery similar to the one in George Inlet near Ketchikan. Except I propose the ability to deregister and reregister for the commercial crab fishery as opposed to being registered for a full calendar year.

PROPOSED BY: Kenyatta Bradley
