

I am Vincent Goodlataw I am from
Tezline, Alaska

RC 022

I support proposal 13

Harvesting salmon with a dip from
a boat in the Glennallen subdistrict,
individuals are dip netting from
a boat targeting schools of salmon.

When they find a school of fish,
they take their limit within a short
limit ~~within~~ of time, not allowing
for escapement.

Subsistence fishermen are catching
salmon away from the shoreline
of the Copper ~~hat~~ River, salmon rest
in holes away from the shoreline
in high waters and are susceptible
to being easily caught in dip nets
from boats using electronics.

Once a holding hole is located, a boat
with electronics makes multiple
passes until the fish are ~~all gone~~.
cleaned out.

fishing from a boat is not a
~~customary~~ tradition way for fishing
Our tradition was from the shore
line
