

**RC**

**Proposal 16  
Submitted by CDFU**

**Existing Proposal:**

Require log books for all charters operating in personal use and subsistence fisheries, as follows:

A vessel for hire should keep a logbook recording the number of customers, the methods by which they fished, and the total number of each species caught.

**Amended language reads as follows:**

All personal use fishermen are required to record and report the methods by which they fished, and the total number of species caught, within five days (120 hours) from the time of harvest through the ADF&G reporting website link or other appropriate methods provided by the department.

If reporting is not possible for logistical or technical reasons, personal use fishermen may request a reporting extension of fourteen days.
