

The Fairbanks AC submitted proposals 29, 31, 33 & 34 because they were the issues in our petition to the board in the spring of 2017. That was before the fishery for 2017 and before we thought about our OEG. The FAC seeks an OEG. See RC 35, replacing proposal 32 and RC 19, supporting data.

We withdraw proposals 29, 31, 33 & 34. With a Chinook salmon OEG (25,700-33,000) as Proposald (RC 35) the department will have a board approved goal to manage for some minimum harvest and has the "tools" to accomplish the goal.
