**Regarding Proposal 45
Submitted by CDFU**

After speaking with numerous user groups and the State Troopers, CDFU wishes to amend Proposal 45 to reflect the objective that all running/buoy lines should count towards the total number of four deployed gillnets in the operation.

Existing proposal language:

No set gillnet permit holder shall have more than four set net sites deployed with lines and buoys during an announced opener.

Modify language to read:

No set gillnet permit holder shall have more than four set net sites deployed, including lines and buoys or "runner lines", during an announced opener.
