Regarding Proposal 45

Submitted by Prince William Sound Setnetter's Association

We are in opposition to this proposal, especially in light of enforcement concerns and potential restrictions on the setnet fleet.

If the Board feels compelled to define a number of running lines allowed per permit, our association agrees that 6 sets per set net permit at an absolute minimum would be workable for the set net fleet.

This would allow the set net fleet to have adequate sites to account for regulatory openings and closures of the Crafton Island and Main Bay subdistricts.
