Both active Dungeness permit holders**

Ref Record Copies

Date: 1/8/2018

Pages including cover: 2

Comments: Copy attached is for record copy. These comments are those of myself and my wife as individuals and should not be confused with the comments I have submitted for the Wrangell group I will be speaking for at the board meeting.

**Proposal #54 I oppose, I Support Wrangell group comments
Please note this proposal comments on Sea Otter Predation**

Proposal #55 I oppose, This will not reduce the amount of pots in the water.

**Proposal # 56 I Oppose,
Please note this proposal comments on Sea Otter Predation**

Proposal # 57 *I oppose, The board could easily modify Regs. To allow Charter guest to one pot per client on board with a limit of 2 crab a day, this would lessen pots in water, allow plenty to eat and still allow clients the experience.*

Please note this proposal comments on Sea Otter Predation

Proposal #58 *I oppose, Charter boats are not allowed to leave pots out through the entire season. The client must set & retrieve the pots with assistance from crew.*

Proposal #60 *I Oppose. Handling mortality needs to be a consideration. The board could require each client to purchase a one day Non Resident fishing license. The Last thing we need is another User Group.*

Proposal #235 *I support. As amended in Wrangell group comments*

Thank you,

Michael T. Lockabey
