

Don Westlund

Proposal 80

256 Active Permits

140 Current small or 100 large

Small pots 35,840

Large pots 25,600

$=61,440 / 2 = 30,720$ pots average

The reduction to a 100 small or 75 large would decrease the number of pots fished by if all were small pots is 10240 pots. By if all were large pots 6,400 pots = $16,640 / 2 = 8,320$ pots average. It would reduce 73 + small pots limits or 64 large pots limits. That would come to $137 / 2 = 68.5$ average pot limits.
