

On chinook salmon I would like to see Southeast inside waters closed to king salmon fishing other than sportfishing which should only be open mid August to end of October and that all other king fishing should be done in the terminal harvest areas

Winter king fishery for trollers should all be done on the outside waters from the surfline to the three-mile limit three days week and when the 45,000 Kings Are caught then shut it down until it is feasible to open the terminal harvest areas for the spring kings
Sincerely Calvin Bigelow
