

RC 051

Dear Board members,

Today you have the option to take on this Kodiak vs Cook Inlet fight with very little understanding of the fishery, the economics or the biology associated with it.

In 2 years when Kodiak comes up on schedule, you DO NOT have the option....you will have to discuss and deliberate on not one, but many many proposals coming from all aspects of the CI user group.

Please strongly consider taking no action on ACR #11 and take this next 2 years to read the factual information you have access to, discuss with ADFG and voluntarily talk with everyone you are comfortable with.

This will put you in the position to take on this very complicated discussion from a position of informed knowledge from a variety of sources instead of HOPING you have it right today.

Thank you.

A handwritten signature in black ink, appearing to read "Bruce Schactler". The signature is fluid and cursive, with a long horizontal line extending to the right.

Bruce Schactler
