PROPOSAL 111

5 AAC 07.331. Gillnet specifications and operations.
Increase maximum gillnet mesh size to 8 inches in both subsistence and commercial salmon fisheries, as follows:

Increase net sizes to 8 inches for salmon fishing either for subsistence or commercial fishing.

What is the issue you would like the board to address and why? Net sizes, commercial openings. Find a fish buyer for commercial fishing. Only income fishermen get because jobs are scarce in the villages.

PROPOSED BY: Kasigluk Traditional Council
