Trawl survey species composition* of commercially important species commonly targeted by longline gear

2015–2019	Northeast	Eastside	Southeast	Southwest	Westside	North Mainland	Total Kodiak
skates (all species)	11.2%	8.2%	2.7%	0.6%	22.3%	4.5%	49.5%
Pacific halibut	8.4%	6.7%	5.5%	0.8%	6.5%	1.9%	29.9%
Pacific cod	3.0%	2.2%	2.5%	0.9%	3.0%	0.6%	12.2%
spiny dogfish shark	0.1%	0.3%	0.0%	0.0%	2.2%	2.4%	5.0%
sablefish	0.2%	0.1%	0.3%	0.0%	2.5%	0.2%	3.4%

*Only includes survey stations in state waters that have tows deeper than 50 fathoms.

Number of sablefish caught per kilometer towed, by size, from the Kodiak Area large-mesh trawl surveys, 2015–2019.
