PROPOSAL 21
5 AAC 37.200. Seasons; and 5 AAC 37.300. Harvesting requirements for macrocystis kelp.
Allow commercial harvest of aquatic plants in Cook Inlet, as follows:

5 AAC 37.200 is amended to read:
(c) Aquatic plants may be taken only as follows:
   (1) Area H (Cook Inlet): from January 1 through December 31 unless closed by emergency
       order and only under the conditions of a permit issued by the commissioner, or the commissioner's
       authorized representative.

5 AAC 37.330 is authored and reads:
5 AAC 37.330. Commissioner's permits for aquatic plants in Registration Area H.
(a) Aquatic plants that have been naturally dislodged from the substrate and are located at or above
    the daily high tide line may be taken only under the conditions of a permit issued by the
    commissioner, or the commissioner's authorized representative.
(b) The permit required in this section
   (1) may specify season dates;
   (2) may specify areas of aquatic plant collection by district or by geographic location;
   (3) may specify the total quantity that can be collected by the permit holder;
   (4) may require completion of a written report by the permit holder submitted to the Homer
       ADF&G office within 30 days of harvest that includes dates of harvest, clear photographs of
       collected aquatic plants, and estimates of wet weight of collected plants;
   (5) may include other conditions provided by regulation or that the commissioner
       determines are necessary for conservation and management purposes.

What is the issue you would like the board to address and why? Historically there has been
interest in the small scale harvest of aquatic plants, (seaweed, kelp, etc.) for use in a variety of
commercial products in the lower Cook Inlet area. Since the mid-l970s beached kelp has been
collected in Anchor Point for use in a potting soil mix which is sold statewide. This proposal seeks
to add regulatory language that defines the process stakeholders must follow in order to
commercially harvest aquatic plants in Cook Inlet.

My family has been picking up washed up seaweed from the beach since the early 60's for garden
fertilizer, later, my father developed a formula to utilize fish waste, seaweed and peat for a
composting process. That finished compost is the main ingredient used to manufacture two potting
soils that is distributed throughout Alaska. This has become the center piece to a $500,000- gross
agriculture business that employs 10 people and supports many other home and agriculture
enterprises. Without the seaweed ingredient, none of this would be possible.

The issue is multifaceted. First, Fish and Game does not know production rates of seaweed and
what keeps it sustainable. They do not know what roll dead washed up seaweed plays in that
sustainability. Another issue is what is commercial or home use and what amounts are those. For
instance, I will collect 6 small pickups and it is called commercial, but my neighbor will collect
10 pickups for his berry patch and that is called home use. Another may just collect a bucket full
for his flower patch.
Who needs a permit and who doesn't? And for what purpose. Does anyone get grandfathered in or who decides by what criteria, amounts, geographic area or timing. Parameters would be based on what data. Will permits be personality driven since the proposal may specify many requirements. Permits and their variations in my estimation, place an undue burden on a small business and on home gardeners, some of which are becoming commercial.

Anecdotally, from a lifetime of collecting seaweed, I have to say the volume of seaweed washed up on the beach is increasing by a lot, probably due to climate change, so I see our collective beach seaweed gathering having no negative impact on the production of seaweed.

I would like to attend your meeting and to be able to discuss the issue with the board and be available for questions. At this time, I believe that out of all the folks who collect seaweed from the beach, I have been the only one who has been required to get a permit for this activity.

PROPOSED BY: Al Poindexter
