...

(d) Notwithstanding 5 AAC 75.035(3), no more than two pots **or crab rings or combination thereof** per person, regardless of type, with a maximum of two **pots or crab rings or combination thereof** per vessel, regardless of type, may be used to take shellfish at any time, except that in the waters between the longitude of Gore Point (150\_ 57.85' W. long.) and the longitude of Cape Fairfield (148\_ 50.25' W. long.), no more than two pots **or crab rings or combination thereof** per person with a maximum of six pots **or crab rings or combination thereof** per vessel may be used to take Tanner crab.

**What is the issue you would like the board to address and why?** The new Cook Inlet Tanner Crab Sport fishery has regulations wording that inadvertently left out the use of crab rings as legal gear. The regulations establishing this fishery were written defining the limit of pots per person, and pots per vessel with no reference to the allowance of crab rings which are also typical legal gear in all sport, personal use, and subsistence crab fisheries around the state. This proposal addresses this 'technical' omission which has currently prevented the use of crab rings in this fishery.

The smaller sport fishing boats and even kayakers are not equipped with pot pullers for handling tanner size crab pots and therefore have been excluded from participating in this winter fishery. The statewide sport crab fishery regulations allow pots and crab rings, or a combination of both when a fishery allows more than one piece of gear for harvest. Correcting the wording to include the use of a crab ring(s) along with crab pots will standardize the regulations to conform with the traditional gear and allow more participants to engage in this limited winter fishery. Even kayakers are capable of deploying and retrieving a crab ring from their vessel.
