OEO/ADA Compliance Statement

The Commission is administratively attached to the Alaska Department of Fish and Game.

The Alaska Department of Fish and Game (ADF&G) administers all programs and activities free from discrimination based on race, color, national origin, age, sex, religion, marital status, pregnancy, parenthood, or disability. The department administers all programs and activities in compliance with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975, and Title IX of the Education Amendments of 1972.

If you believe you have been discriminated against in any program, activity, or facility please write:

- ADF&G ADA Coordinator, P.O. Box 115526, Juneau, AK 99811-5526
- U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, MS 2042, Arlington, VA 22203
- Office of Equal Opportunity, U.S. Department of the Interior, 1849 C Street NW, MS 5230, Washington DC 20240.

The department's ADA Coordinator can be reached via phone at the following numbers:

- (VOICE) 907-465-6077
- (Statewide Telecommunication Device for the Deaf) 1-800-478-3648
- (Juneau TDD) 907-465-3646
- (FAX) 907-465-6078

Abstract

Limited entry permits held in the Prince William Sound commercial salmon fisheries are examined: the purse seine fishery (S01E permits) is first, followed by drift gillnet (S03E permits), and then set gillnet (S04E permits). This report includes summary statistics on the number of permit holdings, permanent and emergency transfers of permits, permit value, permit latency, new entrants in the fisheries, permit holder median age, estimated gross earnings, vessel characteristics for the purse and drift gillnet fisheries, and DNR shore fishery leases for the set gillnet fishery. Some summary statistics are also separated by resident type. A description of the computer files and methods used to generate the statistics are provided.

Prepared Daniel Strong, Caitlin Stern, and Brad Robbins

Introduction

This report provides an overview of limited entry permit holdings and estimated gross earnings in the Prince William Sound commercial salmon fisheries. Commercial fishing in Prince William Sound has been documented as far back as 1889.¹ Historically, several gear types have been employed to commercially catch salmon in Prince William Sound, but today the three commercial salmon fisheries prosecuted in Prince William Sound are: purse seine (S01E); drift gillnet (S03E); and set gillnet (S04E) fisheries.

In 1972, Alaskan voters amended the state constitution to allow limited entry in the state’s commercial fisheries. Following the amendment, in 1973 the Alaska State Legislature enacted the Limited Entry Act (AS 16.43), giving the Commercial Fisheries Entry Commission (CFEC) the authority to administer the program. Permit fisheries are defined by CFEC as a specific gear type for a fishery resource within a defined administrative area.

The Prince William Sound commercial salmon fisheries were part of an original group of 19 Alaska salmon fisheries that were limited after the Alaska legislature passed the limited entry act. Under the authority of AS 16.43.230, CFEC identified the Prince William Sound drift gillnet fishery among “distressed fisheries” in the State’s limited entry regulations². Salmon limited entry permits in all three Prince William Sound fisheries were first issued in 1975.

Information regarding season length, openings and closings, and other such data can be found in the Alaska Department of Fish and Game’s Area Management Reports. This report focuses on the economics of these commercial fisheries.

ADF&G fish tickets identify, among other things, the species harvested. Salmon species on fish tickets are well documented for each of these fisheries. Variations do exist in the financial composition for each of the five major Pacific salmon species commercially exploited in Prince William Sound from year to year and across each fishery. For each of the three gear groups, commercial harvest of species other than salmon were documented at rates less than 0.1% so they are not displayed in Table 1.

Table 1. Percent of Total Ex-vessel Value of Prince William Sound Salmon Fisheries by Species, 1975-2020

Species	PWS Purse Seine	PWS Drift Gillnet	PWS Set Gillnet	Total PWS Salmon
<i>Chinook</i>	0.0%	8.7%	0.1%	4.2%
<i>sockeye</i>	2.4%	60.7%	81.3%	32.1%
<i>coho</i>	1.3%	14.7%	1.7%	7.8%
<i>pink</i>	85.1%	3.3%	6.9%	44.0%
<i>chum</i>	11.1%	12.7%	10.0%	11.9%

Description of the Data Files Used to Generate This Report

Five data files were used to generate the statistics in this report: the CFEC gross earnings file, the CFEC permit file, the CFEC vessel file, the Alaska Department of Natural Resources (DNR) shore fishery lease file, and the CFEC Census file. In addition to these files, a shape file from the DNR was combined with geographic information systems to create a map depicting set gillnet sites that have active DNR shore fishery leases. The most recent updated data is included in this report. The following is a brief description of each file. Please contact CFEC for more detail about these files if you are interested.

CFEC Gross Earnings File

The CFEC gross earnings file is based on ADF&G fish tickets and is augmented with CFEC permit holder and other data. The ex-vessel value for salmon in the CFEC gross earnings file largely come from the Commercial Operators Annual Report and ADF&G fish tickets with some additional information provided by processors. ADF&G salmon districts were mapped out from statistical areas using information provided by ADF&G.

CFEC Permit File

The CFEC permit file contains data on persons who hold or have held CFEC permits. It originates from CFEC permit renewal and permit transfer forms. The permit file contains a data field indicating the declared residency of permit holders as well as their addresses.

In this report, resident status is categorized into three resident types:

- *Local* – permits held by persons residing locally to the ADF&G management area
- *Nonlocal* – permits held by persons who reside in Alaska outside of the ADF&G management area
- *Nonresidents* – permits held by persons who are not residents of Alaska

CFEC Vessel File

CFEC maintains a computer file of vessel registration data back to 1978. Commercial fishermen fill out a form and voluntarily provide data regarding the vessel they intend to use that fishing season.

DNR Shore Fishery Lease Data File

The DNR Land Administration System contains records used to maintain the DNR Shore Fishery Lease program. These records were merged with the CFEC permit file to create a dataset in 2021. The steps outlining the creation of the dataset is described in CFEC Report Number 19-3N, *CFEC Salmon Set Gillnet Permits and DNR Shore Fishery Leases in Prince William Sound, Cook Inlet, Kodiak, Alaska Peninsula, and Bristol Bay 1975-2018*.

CFEC Census File

CFEC maintains a computer file of places within Alaska where permit holders reside. Each community is annotated with information on its local or nonlocal status by permit fishery. Table 2 lists the communities that are currently designated as local to each of the management areas in this report, as per the 2010 CFEC Census File.

Table 2. Communities Local to the Prince William Sound Salmon Fisheries, as Indicated in the CFEC Census File

Cape Yakataga	Evans Island	Katalla	Port Nellie Juan
Chenega	Eyak	Knight Island	Ptarmigan
Chenega Bay	Falls Bay	Latouche	Tatitlek
Cordova	Golden	Nuchek	Valdez
Ellamar	Icy Bay	Port Ashton	Whittier

Data Display

Percentages are rounded to the nearest tenth of a percent where displayed. Dollars are rounded to whole dollars. As such, rounded aggregates may appear to not total due to rounding. If you would like more precise figures then please contact the CFEC research unit. Some counts will vary from previous research projects insofar as the data has been corrected and updated.

Prince William Sound Salmon Purse Seine Fishery

S01E Permit Holdings

Limited entry permits for the Prince William Sound salmon purse seine fishery (S01E permits) were issued starting in 1975. Table 3 indicates the initial distribution and historical net changes in permit holdings for the fishery. CFEC has issued 267 S01E permits. Of this total, Alaska Locals received 68.9% (184/267) of the permits, Nonlocal Alaskans received 10.1% (27/267) of the permits, and Nonresidents received 21.0% (56/267). Every permit issued was a transferable permit.

Table 3. Initial Issuance and Year-end 2020 Totals of Prince William Sound Salmon Purse Seine Permits, With Net Changes Due to Permit Transfers, Migrations, and Cancellations, by Resident Type

INITIAL ISSUE			TRANSFERS		MIGRATIONS		CANCELLED		2020 YEAR-END	
Residency	Total	Percent	Change	Percent Change from Initial	Change	Percent Change from Initial	Change	Percent Change from Initial	Total	Percentage
Local	184	68.9%	-51	-27.7%	-45	-24.5%	0	0.0%	88	33.0%
Nonlocal	27	10.1%	62	229.6%	13	48.1%	0	0.0%	102	38.2%
Nonresident	56	21.0%	-11	-19.6%	32	57.1%	0	0.0%	77	28.8%
Total	267	100.0%	0	0.0%	0	0.0%	0	0.0%	267	100.0%

The number of permits held by each resident type can change for three reasons: permits can be transferred to other resident types (transfer); permit holders can move from one location to another (migration); or permits can be cancelled (such as when a permit holder does not pay the renewal fee for two consecutive years). This table indicates the extent to which these factors have contributed to net changes in permit holdings in this fishery. Both transfers and migrations have had substantial impacts on the changes.

Transfers of S01E Permits

Under the Limited Entry Act's terms of free transferability, permits may be sold, traded, given away, or inherited. CFEC requires the completion of a survey with each transfer.³ The surveys provide information such as transfer acquisition methods, the relationship between individuals in the transaction, and the sale amount for instances when the permit is sold.

Table 4. Transfer Acquisition Methods for Prince William Sound Salmon Purse Seine Permits, 1980-2020

Acquisition Method	S01E Permits		PWS Combined Salmon Permits		Statewide Salmon Purse Seine Permits		All Fisheries Statewide Permits	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Gift	287	29.6%	709	25.5%	1,093	27.6%	13,099	32.5%
Sale	601	62.0%	1,874	67.3%	2,501	63.1%	23,650	58.6%
Trade	13	1.3%	32	1.1%	64	1.6%	528	1.3%
Other	69	7.1%	169	6.1%	304	7.7%	3,086	7.6%
Total	970		2,784		3,962		40,363	

Table 4 compares and contrasts transfer acquisition methods for the S01E permits, all three Prince William Sound salmon permit types combined, statewide salmon purse seine permits, and all limited entry permits between 1980 and 2020. More than half of all S01E permit transfers were sales (62%, or 601/970), just under one third were transferred as gifts (29.6% or 287/970), and a smaller percentage were trades (1.3% or 13/970) or other (7.1% or 69/970). The annual acquisition methods for S01E permits have not changed substantially throughout the time period.⁴

Table 5. Relationships of Transferor to Transfer Recipients for Prince William Sound Salmon Purse Seine Permits, 1980-2020

Relationship	S01E Permits		PWS Combined Salmon Permits		Statewide Salmon Purse Seine Permits		All Fisheries Statewide Permits	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
<i>Business Partner/Friend</i>	152	15.7%	466	16.7%	700	18.2%	7,528	18.4%
<i>Member of Immediate Family</i>	332	34.2%	809	29.1%	1,266	32.0%	13,614	33.8%
<i>Other Relative</i>	40	4.1%	105	3.8%	150	4.0%	1,812	4.6%
<i>Other</i>	446	46.0%	1,404	50.4%	1,846	45.8%	17,409	43.1%
Total	970		2,784		3,962		40,363	

Table 5 shows the relationships between the transferors and transfer recipients for S01E permits, and compares and contrasts S01E permit transfers with all three Prince William Sound salmon permit types combined, statewide salmon purse seine permits, and all limited entry permits from 1980 to 2020. Transfers within the family, both immediate family members and other relatives, total 34.2% (332/970) of all transfers. This compares to 29.1% (809/2,784) for all three Prince William Sound salmon permit types combined, 32% (1,266/3,962) for statewide salmon purse seine permits, and 33.8% (13,614/40,363) for all limited entry permits statewide.

³ CFEC implemented the transfer survey in 1980.

⁴ See *Changes in the Distribution of Alaska's Commercial Fisheries Entry Permits, 1975-2020*, CFEC Report No. 21-1N.

S01E Permit Value

Many permit transfers are non-monetary transactions (see Table 4). Table 6 considers solely the arms-length market transactions where permits are sold. CFEC estimated values are expressed in real (adjusted for inflation) terms. More detailed information on permit values can be found on the CFEC website at: [Prince William Sound Purse Seine Estimated Permit Values](#)

Table 6. CFEC Estimated Value of Prince William Sound Salmon Purse Seine Permits 1982-2020

Year	S01E Permit Sales	Real	
		Permit Value	Standard Deviation

2020	11	\$153,900	\$17,900

- Permit values represent averages of all arms-length sale transactions over the year. Beginning in 1991, additional data from recent months in the preceding year may be included until at least four observations can be averaged.
- The Standard Deviation was not calculated prior to 1987.
- Real permit values were calculated using the 2021 Consumer Price Index from the U.S. Bureau of Labor Statistics.

Emergency Transfers of S01E Permits

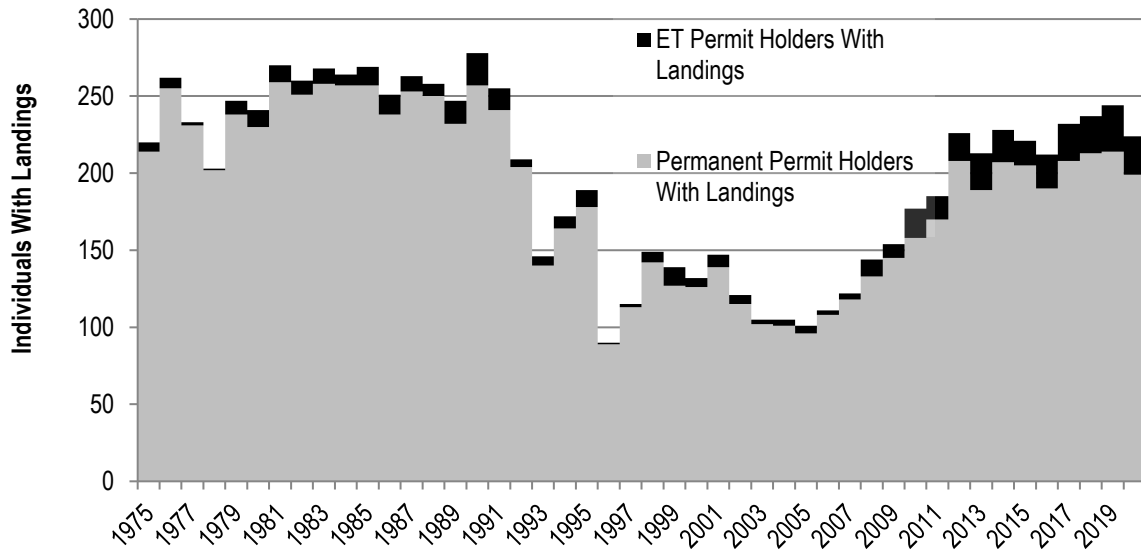

Commercial landings can be made with either permanently-held permits or with permits held temporarily through emergency transfers. Emergency transfers (ET) of permits are granted if illness, disability, death, required military or government service, or other unavoidable hardship of a temporary, unexpected, and unforeseen nature prevents the permanent permit holder from participating in the fishery. “Hardship” does not include the results of a permit holder’s own economic decisions, or the results of economic, biological or regulatory variables which are normally part of the risk of doing business as a fisherman. At the end of the year, ET permits automatically revert back to the permanent permit holder.

Table 7 and Figure 1 show the total number of individuals who recorded landings each year, and of that group, the number of individuals who made landings with ET permits. Some individuals who made landings with ET permits also made landings with permanent permits in the same year.

Table 7. Use of Emergency Transfer Permits in the Prince William Sound Salmon Purse Seine Fishery, 1975-2020

Year	Individuals With Landings	ET Permit Holders With Landings	Rate ET
1975	220	6	2.7%

Figure 1. Use of Emergency Transfer Permits in the Prince William Sound Salmon Purse Seine Fishery, 1975-2020

- The 1989 fishing season was cut short due to the Exxon Valdez oil spill that occurred that year.

Latent S01E Permits

CFEC regulations require individuals to renew their limited entry permits annually, regardless of whether they actually fish. Permits that are not used (don't record landings) in a given year are referred to herein as "latent" permits for that year.

Table 8 indicates the total number of viable S01E permits issued each year, the number of permits fished (with commercial landings), and the rate of permit latency. Viable permits include both interim entry and permanent permits. Note that for this table, in years when a single individual held an interim-entry permit and was also issued a permanent permit, only the permanent permit is counted. The rate of latency is depicted in Figure 2.

There are many reasons why an individual might not fish in any given year. This table and figure do not explain any of these reasons, but simply estimate the rate of permit latency.

Table 8. Prince William Sound Salmon Purse Seine Permit Latency, 1975-2020

Year	Permits		Latency Rate	Year	Permits		Latency Rate	Year	Permits		Latency Rate
	Issued	Fished			Issued	Fished			Issued	Fished

								2020	267	218	18.4%

- When an individual with an interim-entry permit is issued a permanent permit in the same year, only the permanent permit is counted in the above table.
- 'Permits Fished' is the number of CFEC permits that were used to record commercial landings in that year.

Figure 2. Prince William Sound Salmon Purse Seine Permit Latency, 1975-2020

- The 1989 fishing season was cut short due to the Exxon Valdez oil spill that occurred that year.

New Entrants into the Prince William Sound Salmon Purse Seine Fishery

New entrants are defined herein as individuals who, for the first time, record a landing on a permanent S01E permit. It is important to note that initial permit holders are not considered new entrants because they needed a proven fishing history prior to 1975 in order to become an initial permit holder of a limited entry permit. Individuals who only make landings on an emergency transfer or interim-entry permit for any given year are not considered in this table.

Table 9 and Figure 3 describe individuals rather than permits. An individual may hold up to two permits in this fishery, but can only fish one of them. An individual may hold one S01E permit one year, and then in subsequent years hold a different S01E permit. Likewise, individuals may enter and exit the fishery multiple times over the years. Individuals are only counted once as a new entrant and only in the year in which they made their first documented landing.

Table 9. New Entrants into the Prince William Sound Salmon Purse Seine Fishery, 1975-2020

Year	Individuals w/Landings	New	New Percent

2020	50.6	50.2	55.7	55.1	35.7

Table 10 shows the annual median age of five different cohorts of people: 1) Prince William Sound salmon purse seine (S01E) permit holders; 2) all three (S01E, S03E, and S04E) Prince William Sound salmon permit holders; 3) statewide salmon purse seine permit holders; 4) all CFEC limited entry permit holders; and 5) the general Alaskan population.

Note that these figures include ages of permit holders for both transferable and non-transferable permits; however, there were no non-transferable S01E permits issued. Some individuals hold permits in more than one fishery; in these cases, the age of the permit holder is counted once for each permit that he or she holds.

The median age of the general Alaskan population has increased 10.4 years between 1975 and 2020, which represents a 46.9% increase. The percent change in ages over the same period for all CFEC permit holders increased by 28.4.2% (12.2 years), 26.5% (11.7 years) for the statewide salmon purse seine permit holders, and 25.8% (10.3 years) for the combined Prince William Sound salmon permit holders.

For S01E permit holders, the median age increased 12.9% (5.8 years).

* AK Median age data is from the Alaska Department of Labor, Research and Analysis Section

Prince William Sound Salmon Purse Seine Vessel Characteristics

Table 11 reports on various vessel characteristics of the Prince William Sound salmon purse seine fleet since 1978. Reported are the age, length, net tonnage, and horsepower. This data is from the vessel license file which includes voluntarily supplied information on vessels. The first column of each category reports the count of vessels with described characteristics. Statistics reported include the 25th percentile, median, and 75th percentile.

Table 12 provides additional Prince William Sound salmon purse seine vessel characteristics. Included are statistics of hold capacity, engine power type, and hull material for each year since 1978.

Table 12. Additional Prince William Sound Salmon Purse Seine Vessel Characteristics

Participation and Earnings

Earnings are estimated from weighted average ex-vessel prices, and as noted earlier, largely stem from the ADF&G Commercial Operators Annual Report and fish ticket values. Earnings shown in Figure 4 are for both nominal and real dollars using the 2021 Consumer Price Index from the U.S. Bureau of Labor Statistics.

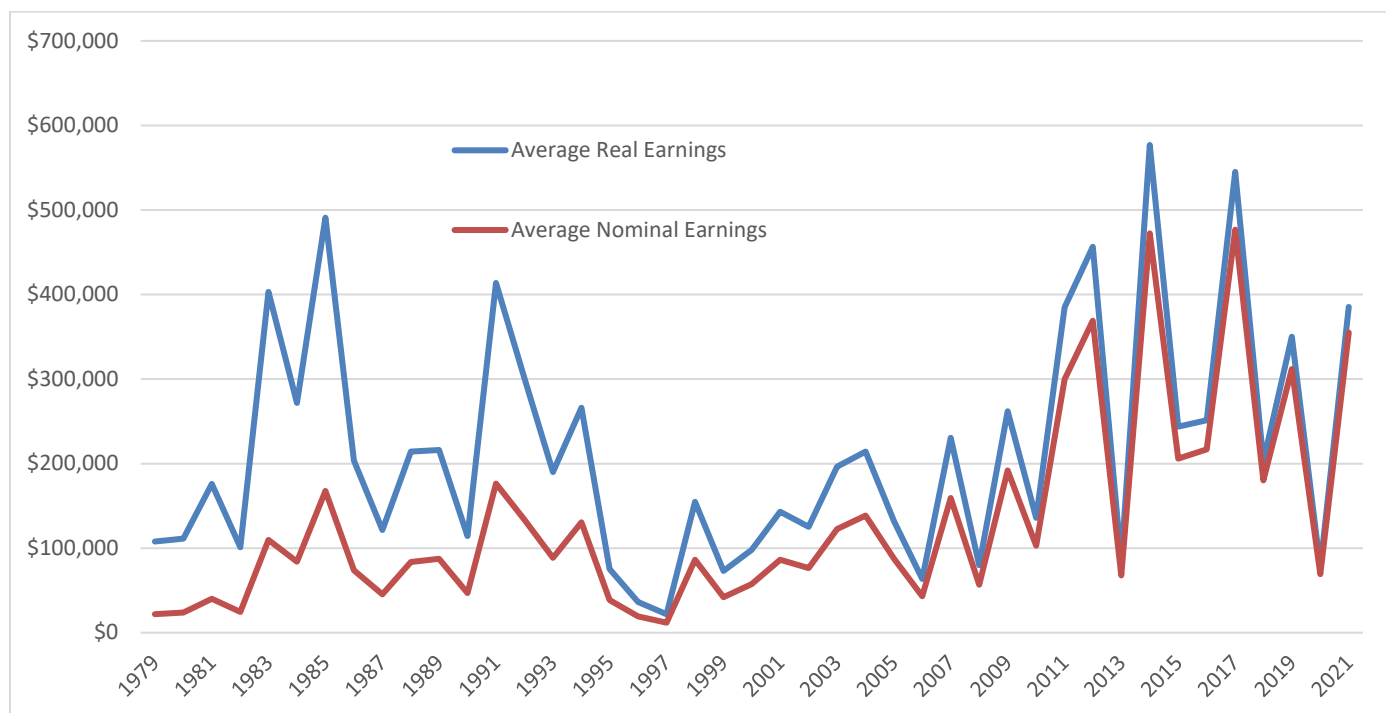

Permit counts include interim-entry permits and permanent permits. Interim-entry permits are issued to individuals during the period when their applications for permanent permits are in adjudication. The last year an interim-entry permit was held was in 2010. Some individuals made landings on both an interim-entry permit and subsequently on their newly issued permanent permit in the same year; for these instances, only the permanent permit is counted in this report.

Table 13 reports the number of permits issued, permits and vessels with landings, and estimated gross earnings in the Prince William Sound salmon purse seine fishery from 1975 to 2020. Note that the figures by permit in this table span the entire year, regardless of who held the permit or however many times the permit was transferred.

Table 14 reports the number of permit holders (people) and estimated real (inflation-adjusted) gross earnings by each resident type. Where fewer than four individuals made landings, earnings are masked for that group and at least one other due to reasons of confidentiality.

Table 15 breaks out participation and earnings by ADF&G salmon district with real ex-vessel values.

Figure 4. Estimated Nominal and Real Average Gross Earnings Per Prince William Sound Salmon Purse Seine Permit

- Real earnings are adjusted for inflation using the 2021 U.S. Bureau of Labor Statistics Consumer Price Index.

Table 13. Estimated Total Gross Earnings (Real and Nominal) for the Prince William Sound Salmon Purse Seine Fishery, With Average Earnings (Real) by Permit and Vessel, 1975-2020

- Adjusted for inflation to 2021 dollars using U.S. Bureau of Labor Statistics Consumer Price Index.
- Counts will differ from CFEC on-line Basic Information Tables where the on-line data does not account for the combination of interim-entry permits that were issued as permanent permits in the same year.
- The 1989 fishing season was cut short due to the Exxon Valdez oil spill that occurred that year.

Table 14. Estimated Real Gross Earnings for Permit Holders in the Prince William Sound Salmon Purse Seine Fishery by Resident Type, 1975-2020

Year	Local			Nonlocal			Nonresident			Total

- Adjusted for inflation to 2021 dollars using U.S. Bureau of Labor Statistics Consumer Price Index.
- Counts will differ from CFEC on-line Basic Information Tables where the on-line data does not account for the combination of interim-entry permits that were issued as permanent permits in the same year. Note that these counts are for individuals, not permits.
- The 1989 fishing season was cut short due to the Exxon Valdez oil spill that occurred that year.

Prince William Sound Salmon Purse Seine (S01E)

Table 15. Gross Real Earnings for the Prince William Sound Salmon Purse Seine Fishery by ADF&G Salmon District, 1975 to 2020

Year	Copper River		Eastern		Northern		Coghill		Northwestern		Southwestern		Motague		Southeastern		Unakwik		Total

- Adjusted for inflation to 2021 dollars using U.S. Bureau of Labor Statistics Consumer Price Index.
- Some Permits are used to record landings in more than one district.
- When fewer than four permits make landings, earnings in another column are masked (**) due to reasons of confidentiality.
- The 1989 fishing season was cut short due to the Exxon Valdez oil spill that occurred that year.

Prince William Sound Salmon Drift Gillnet Fishery

S03E Permit Holdings

Limited entry permits for the Prince William Sound salmon Drift Gillnet fishery (S03E permits) were issued starting in 1975. Table 16 indicates the initial distribution and historical net changes in permit holdings for the fishery. CFEC has issued 537 S03E permits. Of this total, Alaska Locals received 65.9% (354/537) of the permits, Nonlocal Alaskans received 8.8% (47/537) of the permits, and the remaining 25.3% (136/537) of the permits went to Nonresidents. All of the S03E permits were issued as transferable permits.

Table 16. Initial Issuance and Year-end 2020 Totals of Prince William Sound Salmon Drift Gillnet Permits, With Net Changes Due to Permit Transfers, Migrations, and Cancellations, by Resident Type

INITIAL ISSUE			TRANSFERS		MIGRATIONS		CANCELLED		2020 YEAR-END	
<i>Residency</i>	<i>Total</i>	<i>Percent</i>	<i>Change</i>	<i>Percent Change from Initial</i>	<i>Change</i>	<i>Percent Change from Initial</i>	<i>Change</i>	<i>Percent Change from Initial</i>	<i>Total</i>	<i>Percentage</i>
Local	354	65.9%	-55	-15.5%	-68	-19.2%	0	0.0%	231	43.0%
Nonlocal	47	8.8%	127	270.2%	5	10.6%	0	0.0%	179	33.3%
Nonresident	136	25.3%	-72	-52.9%	63	46.3%	0	0.0%	127	23.6%
Total	537	100.0%	0	0.0%	0	0.0%	0	0.0%	537	100.0%

The number of permits held by each resident type can change for three reasons: permits can be transferred to other resident types (transfer); permit holders can move from one location to another (migration); or permits can be cancelled, such as when a permit holder does not pay the renewal fee for two consecutive years. Cancellations often occur when a non-transferable permit holder decides to no longer renew his or her permit when they retire from fishing. This table indicates the extent to which these factors have contributed to net changes in permit holdings in this fishery. Transfers have had the largest impact on the changes.

Transfers of S03E Permits

Under the Limited Entry Act's terms of free transferability, permits may be sold, traded, given away, or inherited. CFEC requires the completion of a survey with each transfer.⁵ The surveys provide information such as transfer acquisition methods, the relationship between individuals in the transaction, and the sale amount for instances when the permit is sold.

Table 17. Transfer Acquisition Methods for Prince William Sound Salmon Drift Gillnet Permits, 1980-2020

Acquisition Method	S03E Permit		PWS Combined Salmon		Statewide Salmon Drift Gillnet		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
<i>Gift</i>	370	22.0%	709	25.5%	3,704	30.1%	13,099	32.5%
<i>Sale</i>	1,199	71.4%	1,874	67.3%	7,665	62.3%	23,650	58.6%
<i>Trade</i>	18	1.1%	32	1.1%	122	1.0%	528	1.3%
<i>Other</i>	93	5.5%	169	6.1%	810	6.6%	3,086	7.6%
Total	1,680		2,784		12,301		40,363	

Table 17 compares and contrasts the transfer acquisition methods for the S03E permits, all three Prince William Sound salmon permit types combined, all statewide salmon drift gillnet permits combined, and all limited entry permits between 1980 and 2020. Almost three in four S03E transfers were sales (71.4% or 1,199/1,680), about one fourth were gifts (22.0% or 370/1,680), and a smaller percentage were trades (1.1% or 18/1,680) or other (5.5% 93/1,680). The annual acquisition methods for S03E permits have not changed substantially throughout the time period.⁶

Table 18. Relationships of Transferor to Transfer Recipients for Prince William Sound Salmon Drift Gillnet Permits, 1980-2020

Relationship	S03E Permit		PWS Combined Salmon		Statewide Salmon Drift Gillnet		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
<i>Business Partner/Friend</i>	287	17.1%	466	16.7%	2,044	16.6%	7,528	18.7%
<i>Member of Immediate Family</i>	421	25.1%	809	29.1%	3,851	31.3%	13,614	33.7%
<i>Other Relative</i>	60	3.6%	105	3.8%	509	4.1%	1,812	4.5%
<i>Other</i>	912	54.3%	1,404	50.4%	5,897	47.9%	17,409	43.1%
Total	1,680		2,784		12,301		40,363	

Table 18 shows the relationships between the transferors and transfer recipients for S03E permits, and compares and contrasts S03E permit transfers with all three Prince William Sound salmon permit types combined, all statewide salmon drift gillnet permits combined, and all limited entry permits from 1980 to 2020. Transfers within the family, both between immediate family members and other relatives, total 28.6% (481/1,680) of all permit transfers for S03E permits compared to 32.8% (914/2,784) for all three Prince William Sound salmon permit types combined, 35.4% (4,360/12,301) for all salmon drift gillnet statewide, and 38.2% (15,426/40,363) for all limited entry permits statewide.

⁵ CFEC implemented the transfer survey in 1980.

⁶ See *Changes in the Distribution of Alaska's Commercial Fisheries Entry Permits, 1975-2020*, CFEC Report No. 21-1N.

S03E Permit Value

Many permit transfers are non-monetary transactions (see Table 17). Table 19 considers solely the arms-length market transactions where permits are sold. CFEC estimated values are expressed in real (adjusted for inflation) terms. More detailed information on permit values can be found on the CFEC website at: [Prince William Sound Drift Gillnet Estimated Permit Values](#)

Table 19. CFEC Estimated Value of Prince William Sound Salmon Drift Gillnet Permits 1982-2020

Year	S03E Permit Sales	Real	
		Permit Value	Standard Deviation
1982	51	\$127,840	-

2018	15	\$163,200	\$6,100
2019	11	\$147,200	\$4,400
2020	14	\$128,500	\$18,000

- Permit values represent averages of all arms-length sale transactions over the year. Beginning in 1991, additional data from recent months in the preceding year may be included until at least four observations can be averaged.
- The Standard Deviation was not calculated prior to 1991.
- Real permit values were calculated using the 2021 Consumer Price Index from the U.S. Bureau of Labor Statistics.

Emergency Transfers of S03E Permits

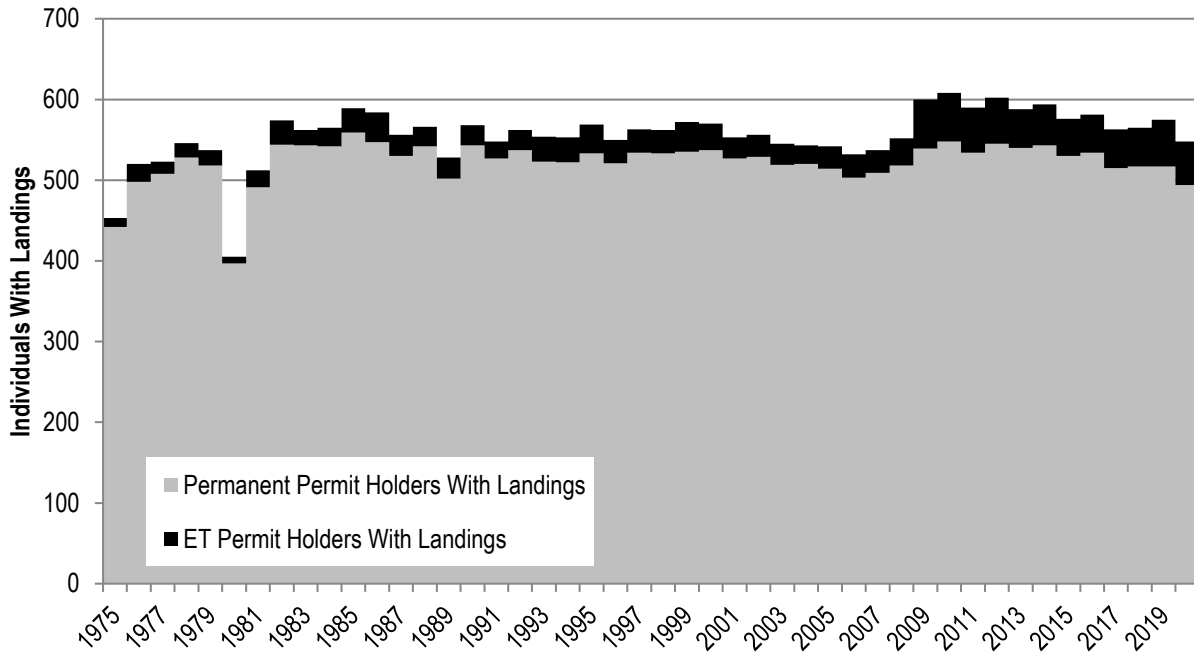

Commercial landings can be made with either permanently-held permits or with permits held temporarily through emergency transfers. Emergency transfers (ET) of permits are granted if illness, disability, death, required military or government service, or other unavoidable hardship of a temporary, unexpected, and unforeseen nature prevents the permanent permit holder from participating in the fishery. “Hardship” does not include the results of a permit holder’s own economic decisions, or the results of economic, biological or regulatory variables which are normally part of the risk of doing business as a fisherman. At the end of the year, ET permits automatically revert back to the permanent permit holder.

Table 20 and Figure 5 show the total number of individuals who recorded landings each year, and of that group, the number of individuals who made landings with ET permits. Some individuals who made landings with ET permits also made landings with permanent permits in the same year.

Table 20. Use of Emergency Transfer Permits in the Prince William Sound Drift Gillnet Fishery, 1975-2020

Year	Individuals With Landings	ET Permit Holders With Landings	Rate ET	Year	Individuals With Landings	ET Permit Holders With Landings	Rate ET	Year	Individuals With Landings	ET Permit Holders With Landings	Rate ET

Figure 5. Use of Emergency Transfer Permits in the Prince William Sound Salmon Drift Gillnet Fishery, 1975-20

- The 1989 fishing season was cut short due to the Exxon Valdez oil spill that occurred that year.

Latent S03E Permits

CFEC regulations require individuals to renew their limited entry permits annually, regardless of whether they actually fish. Permits that are not used (don't record landings) in a given year are referred to herein as "latent" permits for that year.

Table 21 indicates the total number of viable S03E permits issued each year, the number of permits fished (with commercial landings), and the rate of permit latency. Viable permits include both interim entry and permanent permits. Note that for this table, in years when a single individual held an interim-entry permit and was also issued a permanent permit, only the permanent permit is counted. The rate of latency is depicted in Figure 6.

There are many reasons why an individual might not fish in any given year. This table and figure do not explain any of these reasons, but simply estimate the rate of permit latency.

Table 21. Prince William Sound Salmon Drift Gillnet Permit Latency, 1975-2020

Year	Permits		Latency Rate	Year	Permits		Latency Rate	Year	Permits		Latency Rate
	Issued	Fished			Issued	Fished			Issued	Fished	
1975	535	435	18.7%	1990	541	521	3.7%	2005	538	502	6.7%
1976	534	475	11.0%	1991	541	517	4.4%	2006	538	492	8.6%

1978	544	514	5.5%	1993	541	514	5.0%	2008	537	507	5.6%
1979	549	506	7.8%	1994	541	506	6.5%	2009	537	511	4.8%
1980	545	393	27.9%	1995	542	518	4.4%	2010	537	519	3.4%
1981	546	479	12.3%	1996	539	509	5.6%	2011	537	513	4.5%
1982	543	524	3.5%	1997	540	520	3.7%	2012	537	522	2.8%
1983	543	528	2.8%	1998	541	522	3.5%	2013	536	525	2.1%
1984	543	522	3.9%	1999	541	521	3.7%	2014	536	524	2.2%
1985	544	533	2.0%	2000	541	526	2.8%	2015	537	520	3.2%
1986	544	525	3.5%	2001	541	522	3.5%	2016	537	517	3.7%
1987	542	519	4.2%	2002	540	519	3.9%	2017	537	504	6.1%
1988	541	525	3.0%	2003	540	510	5.6%	2018	536	508	5.2%
1989	542	485	10.5%	2004	540	513	5.0%	2019	536	504	6.0%
								2020	536	488	9.0%

- When an individual with an interim-entry permit is issued a permanent permit in the same year, only the permanent permit is counted in the above table.

Figure 6. Prince William Sound Salmon Drift Gillnet Permit Latency, 1975-2020

- The 1989 fishing season was cut short due to the Exxon Valdez oil spill that occurred that year.

New Entrants into the Prince William Sound Salmon Drift Gillnet Fishery

New entrants are defined herein as individuals who, for the first time, record a landing on a permanent S03E permit. It is important to note that initial permit holders are not considered new entrants because they needed a proven fishing history prior to 1975 in order to become an initial permit holder of a limited entry permit. Individuals who only make landings on an emergency transfer or interim-entry permit for any given year are not considered in this table.

Table 22 and Figure 7 describe individuals rather than permits. An individual may hold up to two permits in this fishery, but can only fish one of them. An individual may hold one S03E permit one year, and then in subsequent years hold a different S03E permit. Likewise, individuals may enter and exit the fishery multiple times over the years. Individuals are only counted once as a new entrant and only in the year in which they made their first documented landing.

Table 22. New Entrants into the Prince William Sound Salmon Drift Gillnet Fishery, 1975-2020

Year	Individuals w/Landings	New	New Percent	Year	Individuals w/Landings	New	New Percent	Year	Individuals w/Landings	New	New Percent	Year	Individuals w/Landings	New	New Percent

- AK Median age data is from the Alaska Department of Labor and Workforce Development, Research and Analysis Section.

Table 23 shows the annual median age of five different cohorts of people: 1) Prince William Sound salmon Drift Gillnet (S03E) permit holders; 2) all three (S01E, S03E, and S04E) Prince William Sound salmon permit holders; 3) all salmon drift gillnet permit holders statewide; 4) all CFEC limited entry permit holders; and 5) the general Alaskan population.

Note that these figures include ages of permit holders for both transferable and non-transferable permits; however, there were no non-transferable S03E permits issued. Some individuals hold permits in more than one fishery; in these cases, the age of the permit holder is counted once for each permit that he or she holds.

The median age of the general Alaskan population has increased 11.4 years between 1975 and 2020, which represents a 46.9% increase. The percent change in ages over the same period for all CFEC permit holders increased by 28.4% (12.2 years), 17.7% (7.8 years) for all salmon drift gillnet permit holders statewide, and 25.8% (10.3 years) for the combined Prince William Sound salmon permit holders.

For S03E permit holders, the median age increased 35.1% (13.0 years).

Prince William Sound Salmon Drift Gillnet Vessel Characteristics

Table 24 reports on various vessel characteristics of the Prince William Sound salmon purse seine fleet since 1978. Reported are the age, length, net tonnage, horsepower, and hold capacity. This data is from the vessel license file which includes voluntarily supplied information on vessels. The first column of each category reports the count of vessels with described characteristics. Statistics reported include the 25th percentile, median, and 75th percentile.

Participation and Earnings

Earnings are estimated from weighted average ex-vessel prices, and as noted earlier, largely stem from the ADF&G Commercial Operators Annual Report and fish ticket values. Earnings shown in Figure 8 are for both nominal and real dollars using the 2021 Consumer Price Index from the U.S. Bureau of Labor Statistics.

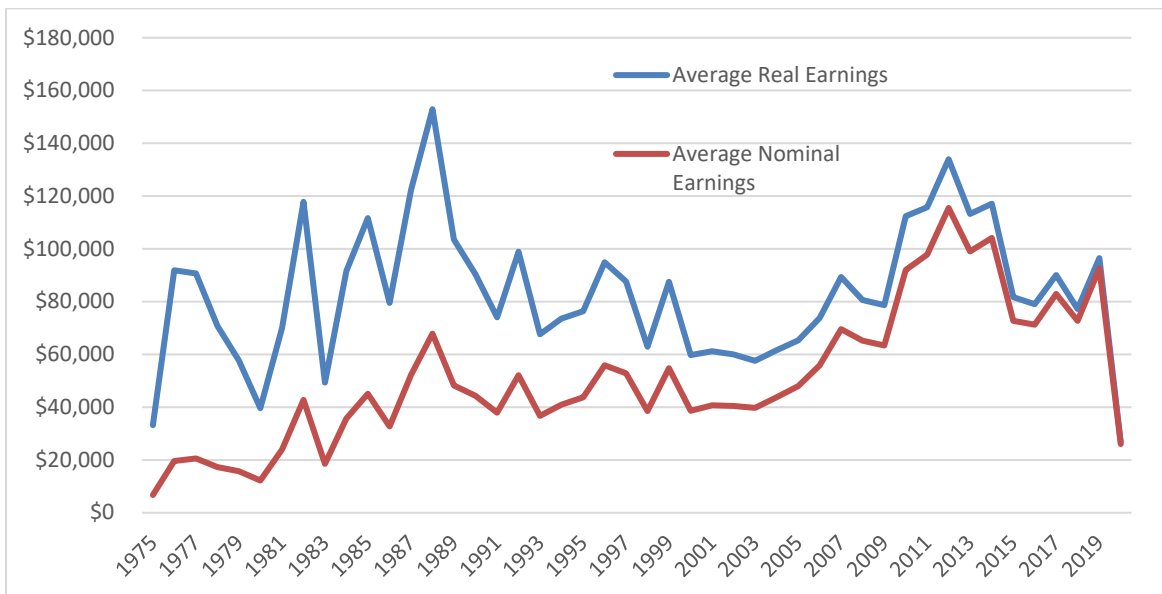

Permit counts include interim-entry permits and permanent permits. Interim-entry permits are issued to individuals during the period when their applications for permanent permits are in adjudication. The last year an interim-entry permit was held was in 2006. Some individuals made landings on both an interim-entry permit and subsequently on their newly issued permanent permit in the same year; for these instances, only the permanent permit is counted in this report.

Table 26 reports the number of permits, permit issued, and vessels with landings, and estimated gross earnings in the Prince William Sound salmon Drift Gillnet fishery from 1975 to 2020. Note that the figures by permit or vessel in this table span the entire year, regardless of who held the permit or however many times the permit was transferred.

Table 27 reports the number of permit holders (people) and estimated real (inflation adjusted) gross earnings by each resident type. Where fewer than four individuals made landings, earnings are masked for that group and at least one other due to reasons of confidentiality.

Table 28 breaks out participation and real earnings by ADF&G salmon district. Note that some permits are used to record landings in more than one district.

Figure 8. Estimated Nominal and Real Average Gross Earnings Per Prince William Sound Salmon Drift Gillnet Permit

- Real earnings are adjusted for inflation using the 2021 U.S. Bureau of Labor Statistics Consumer Price Index.

Table 26. Estimated Total Gross Earnings (Real and Nominal) for the Prince William Sound Salmon Drift Gillnet Fishery, With Average Gross (Real) Earnings by Permit and Vessel, 1975-2020

Year	Viable Permits	Total Gross Earnings		Permits With Landings	Average Real Earnings	Vessels With Landings	Average Real Vessel Earnings

- Adjusted for inflation to 2021 dollars using U.S. Bureau of Labor Statistics Consumer Price Index.
- Counts will differ from CFEC on-line Basic Information Tables where the on-line data does not account for the combination of interim-entry permits that were issued as permanent permits in the same year.
- The 1989 fishing season was cut short due to the Exxon Valdez oil spill that occurred that year.

- Adjusted for inflation to 2021 dollars using U.S. Bureau of Labor Statistics Consumer Price Index.
- Counts will differ from CFEC on-line Basic Information Tables where the on-line data does not account for the combination of interim-entry permits that were issued as permanent permits in the same year.
- Note that these counts are for individuals, not permits.
- The 1989 fishing season was cut short due to the Exxon Valdez oil spill that occurred that year.

Prince William Sound Salmon Drift Gillnet (S03E)

Table 28. Gross Real Earnings for the Prince William Sound Salmon Drift Gillnet Fishery by ADF&G Salmon District, 1975 to 2020

Year	Bering River		Copper River		Northern		Coghill		Northwestern		Eshmay		Montague		Unakwik		Total

- Adjusted for inflation to 2021 dollars using U.S. Bureau of Labor Statistics Consumer Price Index.
- When fewer than four permits make landings, earnings in another column are masked (**) due to reasons of confidentiality.
- Some permits are used to record landings in more than one district.
- The 1989 fishing season was cut short due to the Exxon Valdez oil spill that occurred that year.

Prince William Sound Salmon Set Gillnet Fishery

S04E Permit Holdings

Limited entry permits for the Prince William Sound salmon set gillnet fishery (S04E permits) were issued starting in 1975. Table 29 indicates the initial distribution and historical net changes in permit holdings for the fishery. CFEC has issued 30 S04E permits. Of this total, Alaska Locals received 70.0% (21/30) of the permits, Nonlocal Alaskans received 6.7% (2/30) and Nonresidents received 23.3% (7/30) of the permits. Only one of the 30 initially issued permits is non-transferable.

Table 29. Initial Issuance and Year-end 2020 Totals of Prince William Sound Salmon Set Gillnet Permits, With Net Changes Due to Permit Transfers, Migrations, and Cancellations, by Resident Type

INITIAL ISSUE			TRANSFERS		MIGRATIONS		CANCELLED		2020 YEAR-END	
Residency	Total	Percent	Change	Percent Change from Initial	Change	Percent Change from Initial	Change	Percent Change from Initial	Total	Percentage
Local	21	70.0%	-13	-61.9%	-4	-19.0%	0	0.0%	4	13.8%
Nonlocal	2	6.7%	14	700.0%	2	100.0%	-1	-50.0%	17	58.6%
Nonresident	7	23.3%	-1	-14.3%	2	28.6%	0	0.0%	8	27.6%
Total	30	100.0%	0	0.0%	0	0.0%	-1	-3.3%	29	100.0%

The number of permits held by each resident type can change for three reasons: permits can be transferred to other resident types (transfer); permit holders can move from one location to another (migration); or permits can be cancelled (such as when a permit holder does not pay the renewal fee for two consecutive years). This table indicates the extent to which these factors have contributed to net changes in permit holdings in this fishery. Transfers have had the largest impact on the changes. By the end of 2020, one permit had been cancelled due to nonpayment of permit renewal fees.

Transfers of S04E Permits

Under the Limited Entry Act's terms of free transferability, permits may be sold, traded, given away, or inherited. CFEC requires the completion of a survey with each transfer.⁷ The surveys provide information such as transfer acquisition methods, the relationship between individuals in the transaction, and the sale amount for instances when the permit is sold.

Table 30. Transfer Acquisition Methods for Prince William Sound Salmon Set Gillnet Permits, 1980-2020

Acquisition Method	S04E Permit		PWS Combined Salmon		Statewide Salmon Set Gillnet		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Gift	52	38.8%	709	25.5%	6,567	50.8%	13,099	32.5%
Sale	74	55.2%	1874	67.3%	4,991	38.6%	23,650	58.6%
Trade	1	0.8%	32	1.2%	97	0.8%	528	1.3%
Other	7	5.2%	169	6.1%	1,265	9.8%	3,086	7.7%
Total	134		2,784		12,920		40,363	

Table 30 compares and contrasts the transfer acquisition methods for S04E permits, all three Prince William Sound salmon permit types combined, statewide salmon set gillnet permits, and all limited entry permits between 1980 and 2020. The majority of S04E permit transfers were sales (55.2% or 74/134), then gifts (38.8% or 52/134), and a smaller percentage were trades (0.8% or 1/134) or other (4.1% or 7/134). The annual acquisition methods for S04E permits have not changed substantially throughout the time period.⁸

Table 31. Relationships of Transferor to Transfer Recipients for Prince William Sound Salmon Set Gillnet Permit, 1980-2020

Relationship	S04E Permit		PWS Combined Salmon		Statewide Salmon Set Gillnet		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Business Partner/Friend	27	20.2%	466	16.7%	2,557	19.8%	7,528	18.7%
Member of Immediate Family	56	41.8%	809	29.1%	6,235	48.3%	13,614	33.7%
Other Relative	5	3.7%	105	3.8%	896	6.9%	1,812	4.5%
Other	46	27.6%	1,404	44.9%	3,232	21.1%	17,409	38.9%
Total	134		2,784		12,920		40,363	

Table 31 shows the relationships between the transferors and transfer recipients for S04E permits, and compares and contrasts S04E permit transfers with all three Prince William Sound salmon permit types combined, statewide salmon set gillnet permits, and all limited entry permits from 1980 to 2020. Permit transfers between immediate family members and other relatives total 45.5% (61/134) of all transfers of S04E permits, compared to 32.7% (910/2,784) for all three Prince William Sound salmon permit types combined, 55.2% (7,131/12,920) for statewide salmon set gillnet permits, and 33.7% (13,614/40363) for all limited entry permits statewide.

⁷ CFEC implemented the transfer survey in 1980.

⁸ See *Changes in the Distribution of Alaska's Commercial Fisheries Entry Permits, 1975-2021*, CFEC Report No. 21-1N.

S04E Permit Value

Many permit transfers are non-monetary transactions (see Table 30). Table 32 considers solely the arms-length market transactions where permits are sold. CFEC estimated values are expressed in real (adjusted for inflation) terms. More detailed information on permit values can be found on the CFEC website at: [Prince William Sound Set Gillnet Estimated Permit Values](#)

2020	1	\$176,800	\$96,100

- Permit values represent averages of all arms-length sale transactions over the year. Beginning in 1991, additional data from recent months in the preceding year may be included until at least four observations can be averaged.
- The Standard Deviation was not calculated prior to 1991.
- Real permit values were calculated using the 2021 Consumer Price Index from the U.S. Bureau of Labor Statistics.

Emergency Transfers of S04E Permits

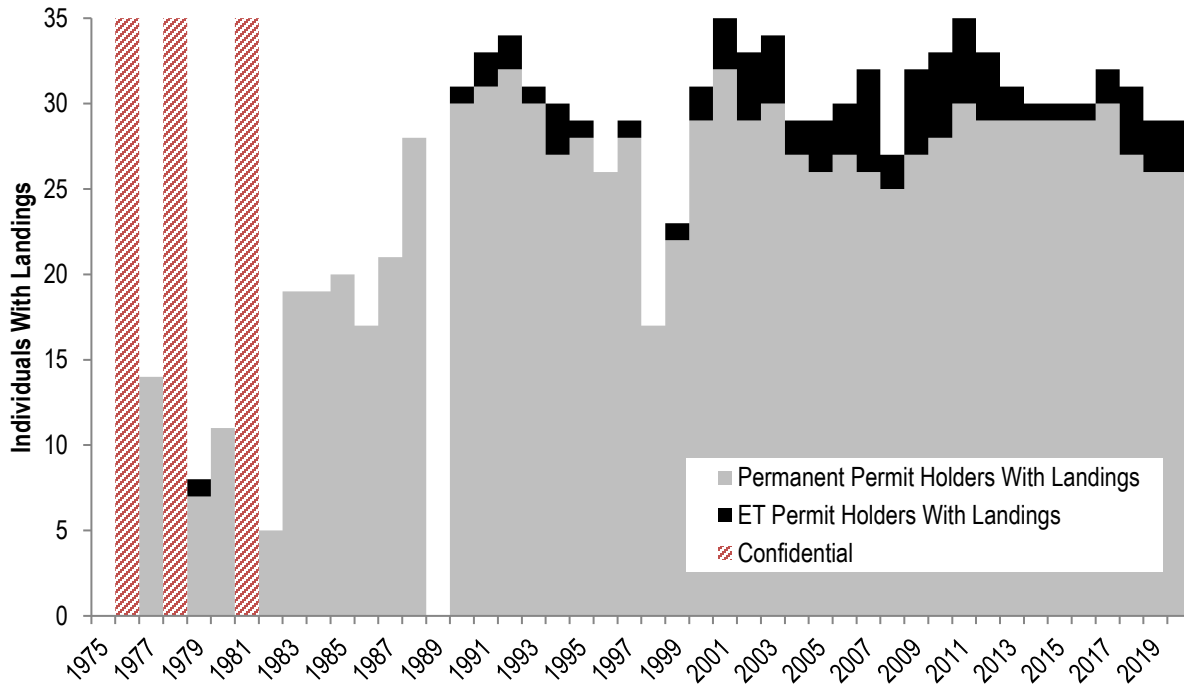

Commercial landings can be made with either permanently-held permits or with permits held temporarily through emergency transfers. Emergency transfers (ET) of permits are granted if illness, disability, death, required military or government service, or other unavoidable hardship of a temporary, unexpected, and unforeseen nature prevents the permanent permit holder from participating in the fishery. “Hardship” does not include the results of a permit holder’s own economic decisions, or the results of economic, biological or regulatory variables which are normally part of the risk of doing business as a fisherman. At the end of the year, ET permits automatically revert back to the permanent permit holder.

Table 33 and Figure 9 show the total number of individuals who recorded landings each year, and of that group, the number of individuals who made landings with ET permits. Some individuals who made landings with ET permits also made landings with permanent permits in the same year.

Table 33. Use of Emergency Transfer Permits in the Prince William Sound Salmon Set Gillnet Fishery, 1975-2020

- The 1989 fishing season was cut short due to the Exxon Valdez oil spill that occurred that year.

DNR Shore Fishery Leases in the Prince William Sound Salmon Set Gillnet Fishery

The Alaska Department of Natural Resources (DNR) administers a shore fishery lease program for the use of state owned and managed tidelands by S04E permit holders. A shore fishery lease grants permit holders the first right of priority to fish a tract of tidelands, but is not a requirement to commercially fish. In Prince William Sound, the DNR shore fishery lease program allows a permit holder to operate up to three nets with an aggregate of no more than 150 fathoms of length.⁹ Additional information regarding DNR shore fishery leases can be found in CFEC publication 17-2N.¹⁰

The total count of S04E permits, and S04E permits with a DNR shore fishery lease as of December 31 each year, is reported in Table 34.

Table 34. Prince William Sound Salmon Set Gillnet Permits With a DNR Shore Fishery Lease by Year

Year	S04E Permits			Year	S04E Permits

Latent S04E Permits

CFEC regulations require individuals to renew their limited entry permits annually, regardless of whether they actually fish. Permits that are not used (don't record landings) in a given year are referred to herein as "latent" permits for that year.

Table 35 indicates the total number of viable S04E permits issued each year, the number of permits fished (with commercial landings), and the rate of permit latency. Viable permits include both interim entry and permanent permits. Note that for this table, in years when a single individual held an interim-entry permit and was also issued a permanent permit, only the permanent permit is counted.

Several complications make it difficult to accurately count the number of latent permits; therefore, the figures should be viewed with caution.

First, some permits could be active in the fishery but might not be used to record landings. This can occur when permit holders fish in a group, especially among family or friends, and the group records their landings on only one, or some, of the group's permits. Although this practice is not legal,¹¹ it allegedly occurs in the set gillnet fisheries at a rate higher than in other fisheries. The effect would be to under-count the number of permits active in the fishery, and over-estimate the latency rate.

Secondly, individuals who hold a DNR Shore Fishery Lease are generally required by regulation to fish at least four openings in years when they hold a lease.¹² The 'Landings and/or DNR lease' column counts permits associated with either a DNR Shore Fishery Lease or a commercial landing.

There are many reasons why an individual might not fish in any given year. This table and figure do not explain any of these reasons, but simply estimate the rate of permit latency. The actual annual rate of latency is likely lies between the rates given in this table.

Table 35. Prince William Sound Salmon Set Gillnet Permit Latency, 1975-2020

2020	28	26	7.1%	28	0.00%

- When an individual with an interim-entry permit is issued a permanent permit in the same year, only the permanent permit is counted.
- 'Permits with Landings' is the number of CFEC permits that were used to record commercial landings in that year.
- 'Permit Landings and/or DNR Lease' is the number of CFEC permits that were used to record a landing, were associated with a DNR shore fishery lease, or both.

¹¹ See AS 16.05.680 (b) and AS 16.05.690 (b).

¹² See 11 AAC 64.180.

New Entrants into the Prince William Sound Salmon Set Gillnet Fishery

New entrants are defined herein as individuals who, for the first time, record a landing on a permanent S04E permit. It is important to note that initial permit holders are not considered new entrants because they needed a proven fishing history prior to 1975 in order to become an initial permit holder of a limited entry permit. Individuals who only make landings on an emergency transfer or interim-entry permit for any given year are not considered in this table.

Table 36 and Figure 10 describe individuals rather than permits. An individual may hold up to two permits in this fishery, but can only fish one of them. An individual may hold one S04E permit one year, and then in subsequent years hold a different S04E permit. Likewise, individuals may enter and exit the fishery multiple times over the years. Individuals are only counted once as a new entrant and only in the year in which they made their first documented landing.

Table 36. New Entrants into the Prince William Sound Salmon Set Gillnet Fishery, 1975-2020

2020	44.1	50.2	51.1	55.1	35.7

- AK Median age data is from the Alaska Department of Labor and Workforce Development, Research and Analysis Section.

Table 37 shows the annual median age of five different cohorts of people: 1) Prince William Sound salmon set gillnet (S04E) permit holders; 2) all three (S01E, S03E, and S04E) Prince William Sound salmon permit holders; 3) statewide salmon set gillnet permit holders; 4) all CFEC limited entry permit holders; and 5) the general Alaskan population.

Note that these figures include ages of permit holders for both transferable and non-transferable permits; however, there was only one non-transferable S04E permit issued. Some individuals hold permits in more than one fishery; in these cases, the age of the permit holder is counted once for each permit that he or she holds.

The median age of the general Alaskan population has increased 11.4 years between 1975 and 2020, which represents a 46.9% increase. The percent change in ages over the same period for all CFEC permit holders increased by 28.4% (12.2 years), 41.2% (14.9 years) for the statewide set gillnet permit holders, and 25.8% (10.3 years) for the combined Prince William Sound permit holders.

For S04E permit holders, the median age decreased 2.6% (-1.2 years).

Participation and Earnings

Earnings are estimated from weighted average ex-vessel prices, and as noted earlier, largely stem from the ADF&G Commercial Operators Annual Report and fish ticket values. Earnings shown in Figure 11 are for both nominal and real dollars using the 2021 Consumer Price Index from the U.S. Bureau of Labor Statistics.

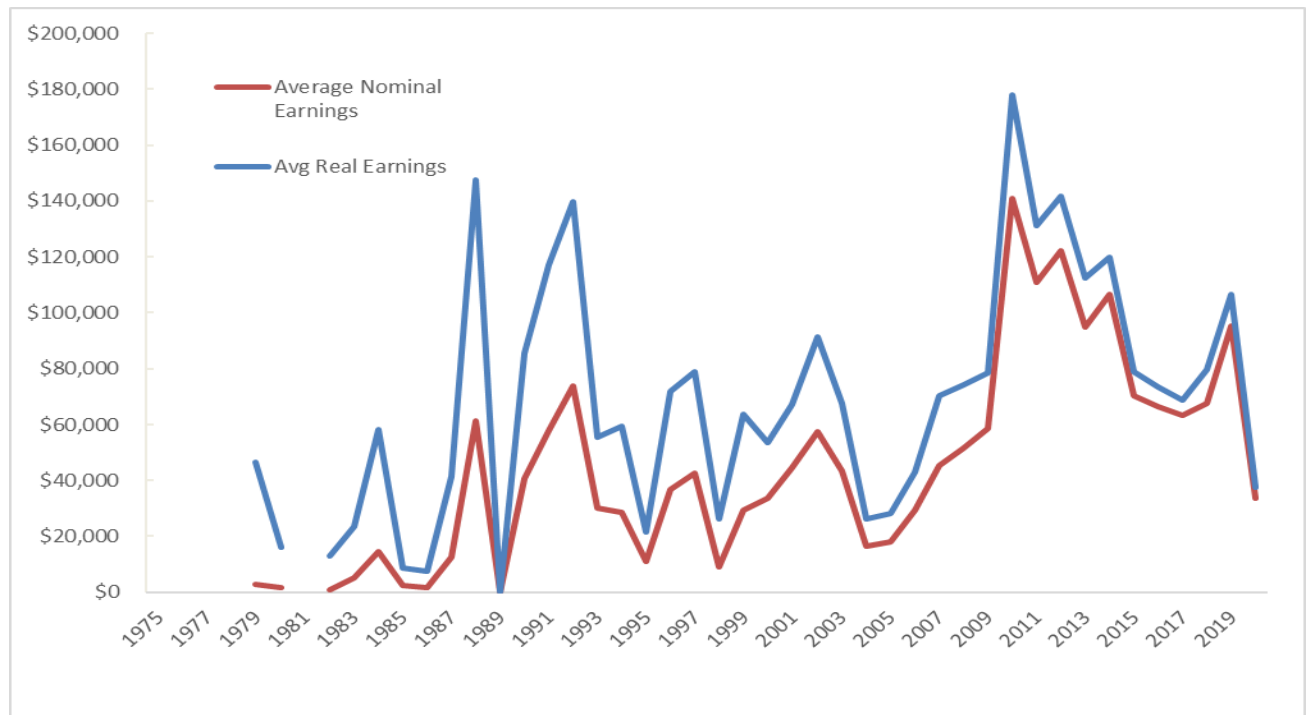

Permit counts include interim-entry permits and permanent permits. Interim-entry permits are issued to individuals during the period when their applications for permanent permits are in adjudication. The last year an interim-entry permit was held was in 1981. Some individuals made landings on both an interim-entry permit and subsequently on their newly issued permanent permit in the same year; for these instances, only the permanent permit is counted in this report.

Table 38 reports the number of permits, permits with landings, and estimated gross earnings in the Prince William Sound salmon set gillnet fishery from 1975 to 2021. Note that the figures by permit in this table span the entire year, regardless of who held the permit or however many times the permit was transferred.

Table 39 reports the number of permit holders (people) and estimated real (inflation adjusted) gross earnings by each resident type. Where fewer than four individuals made landings, earnings are masked for that group and at least one other due to reasons of confidentiality.

Table 40 breaks out participation and real earnings by ADF&G salmon district. Note that some permits are used to record landings in more than one district.

Figure 11. Estimated Nominal and Real Average Gross Earnings Per Prince William Sound Salmon Set Gillnet Permit

- Real earnings are adjusted for inflation using the 2021 U.S. Bureau of Labor Statistics Consumer Price Index.

Table 38. Estimated Total Gross Earnings (Real and Nominal) for the Prince William Sound Salmon Set Gillnet Fishery, With Average Gross Earnings (Real) by Permit, 1975-2020

- Adjusted for inflation to 2021 dollars using U.S. Bureau of Labor Statistics Consumer Price Index.
- Counts will differ from CFEC on-line Basic Information Tables where the on-line data does not account for the combination of interim-entry permits that were issued as permanent permits in the same year.
- When fewer than four permits make landings, earnings are masked (**) due to reasons of confidentiality.
- The 1989 fishing season was cut short due to the Exxon Valdez oil spill that occurred that year.

Adjusted for inflation to 2021 dollars using U.S. Bureau of Labor Statistics Consumer Price Index.

- Note that these counts are for individuals, not permits.
- When fewer than four permits make landings, earnings in another column are masked (**) due to reasons of confidentiality.
- The 1989 fishing season was cut short due to the Exxon Valdez oil spill that occurred that year.

Permit Holdings in Multiple Prince William Sound Salmon Fisheries

Because of their established fishing history in multiple fisheries prior to limitation, some initial permit holders were issued permits in more than one fishery. Table 41 provides counts and percentages of permit holders who were issued permits in one or more Prince William Sound salmon fisheries.

Table 40. Initial Permit Issuance in Multiple Prince William Sound Salmon Fisheries

Permit Type	One		Two		Three		Total
	n	%	n	%	n	%	
S01E	44	16.5%	216	80.9%	7	2.6%	267
S03E	301	56.1%	229	42.6%	7	1.3%	537
S04E	8	26.7%	15	50.0%	7	23.3%	30
Total	353	59.8%	230	39.0%	7	1.2%	590

Table 42 provides counts of permit holders who recorded landings in either one or more than one Prince William Sound salmon fishery. Please note that very few individuals made landings in all three fisheries, for which reason they are combined in the 2+ column.

Table 41. Participation in Multiple Prince William Sound Salmon Fisheries

Year	Purse Seine		Drift Gillnet		Set Gillnet		Year	Purse Seine		Drift Gillnet		Set Gillnet
