To the Board of Fisheries:

The purpose of this RC is to clarify information presented by the Alaska Board of Fisheries on November 29, 2021.

In reference to Tracy Hansen’s presentation RC 3 tab 11, we believe that the BOF were referring to slide 9 during their discussion when they should have focused their discussion on slide 8. Slide 8 shows percent harvest by gear type, whereas slide 9 shows harvest per permit. It is important to look at percentage of total harvest: this demonstrates that there is greater dipnet harvest by boat than from shore in the Glennallen Subdistrict.

Sincerely,

Odin Miller
Dan Gorze

Ahtna Intertribal Resource Commission
This slide would have been informative for the Board’s deliberations on Proposals 7, 9, 10, and 11 ....

Percent of subsistence harvest of sockeye and king salmon by gear type
Proposals 6-9, 14, 15, & 17

Sockeye salmon

King salmon

Gear type and method
- 2019
- 2020
- 2021
Excerpt from ADF&G staff report RC3, Tab 11, Slide 9.

... but deliberations instead were informed by this slide.

Glennallen Subdistrict subsistence sockeye and king salmon harvest
Proposals 6-9, 14, 15, & 17
