

This Aaron Miller permit holder of K69A-6536R. I am in support of RC10. I however, do not support permit stacking. If the State is going to allow permit stacking in historically non-tiered non-ifq or non equal split fishery. In other words, if the State supports permit stacking in historic one permit one vessel competitive fisheries (ie. Sitka sac Roe, SE Crab Permits Etc.) then they should also support a buyback of the vessels historically attached to those newly stacked permits.
