5 AAC 29.060 is amended to read:

5 AAC 29.060. Allocation of king salmon in the Southeastern Alaska-Yakutat Area.

(a) The department shall manage the commercial and sport king salmon fisheries in the Southeastern Alaska-Yakutat Area in accordance with the conservation and harvest goals of the Pacific Salmon Treaty, as implemented by the Pacific Salmon Commission.

(b) The department shall manage the sport and commercial net and troll fisheries in accordance with the annual harvest ceiling established by the Pacific Salmon Commission. During a directed king salmon fishery in District 8 and District 11, an allowable catch above the baseline harvest level will not be counted towards the annual harvest ceiling. The annual harvest allocation of the annual harvest ceiling for each fishery is as follows:

(1) purse seine fishery: 4.3 percent of the annual harvest ceiling;

(2) drift gillnet fishery: 2.9 percent of the annual harvest ceiling;

(3) set gillnet fishery: 1,000 king salmon;

(4) when the Southeast Alaska troll winter fishery CPUE is greater than or equal to 6.0;

(A) [(4)] troll fishery: 80 percent, after the net fishery allocations in (1) - (3) of this subsection are subtracted from the annual harvest ceiling;

(B) [(5)] sport fishery: 20 percent, after the net fishery allocations in (1) - (4) of this subsection are subtracted from the annual harvest ceiling[.];

(5) when the Southeast Alaska troll winter fishery CPUE is below 6.0;

(A) troll fishery: 80 percent, after the net fishery allocations in (1) - (3) of this subsection are subtracted from the annual harvest ceiling;

(B) sport fishery: 20 percent, after the net fishery allocations in (1) - (3) of this subsection are subtracted from the annual harvest ceiling.

(6) If the projected annual Southeast Alaska all-gear harvest is below the annual harvest ceiling, any remaining allocation from those gear groups listed in (1) – (3) and (4)(B) and (5)(B) of this subsection will be allocated to the troll fishery beginning at a season date determined by the department and established by emergency order.

(c) When computing the harvest allocations under this section, the department shall take into consideration that the Pacific Salmon Commission's annual harvest ceiling includes a pretreaty base level of 5,000 Alaska hatchery-produced king salmon and the risk factor for computing the Alaska hatchery contribution. Alaska hatchery-produced king salmon above the 5,000 fish base and the risk factor are excluded from the annual harvest ceiling. In determining each fisheries' allocation of the Pacific Salmon Commission's harvest ceiling, the department shall apportion the risk factor for computing the Alaska hatchery contribution and the 5,000 fish base into components for each fishery.

(d) For the purpose of calculating the king salmon harvest, the annual harvest period shall begin with the opening of the winter salmon troll season. For the purpose of calculating harvest performance for the king salmon fisheries under this section, the harvest in the sport and commercial net and troll fisheries will be applied to the cumulative harvest on an annual basis, as opposed to the harvest ceiling.

(e) If the Alaska all-gear annual harvest exceeds the annual harvest ceiling established by the Pacific Salmon Commission, in the year following any overage, the sector responsible for the overage shall bear a reduction to their allocation the following year except in sport all reduction shall be accrued by the non-resident sport sector.

5 AAC 47.055 is amended to read:

5 AAC 47.055. Southeast Alaska King Salmon Management Plan.

(a) The commissioner shall establish, by emergency order, the king salmon sport fish bag and possession limits and all other necessary management measures based on the Southeast Alaska winter troll fishery catch per unit effort (CPUE). The bag and possession limits and other management measures established by the commissioner will remain in effect until January 31 of the following year. If the new Southeast Alaska winter troll fishery CPUE is not available by February 1, the bag and possession limits and other management measures for the remainder of the year will be based on the prior year's Southeast Alaska winter troll fishery CPUE, unless superseded by emergency order **or modified by the provisions of 5 AAC 29.060(e).**

(b) The objectives of the management plan under this section are to

(1) manage the sport fishery to attain a [AN AVERAGE] harvest **not to exceed 20** [OF 20] percent of the annual harvest ceiling specified by the Pacific Salmon Commission,

after the subtraction of the commercial net allocation specified in 5 AAC 29.060 from the harvest ceiling;

(2) allow uninterrupted sport fishing in salt waters for king salmon, while not exceeding the sport fishery harvest ceiling;

(3) minimize regulatory restrictions on resident anglers; and

(4) if the Alaska winter troll fishery CPUE is less than 3.8 and equal to or greater than 2.0; a resident bag limit of two king salmon 28 inches or greater in length will be established in areas where conservation management measures for all anglers have prohibited king salmon retention or closed fishing for king salmon once they reopen;

(5) at all Alaska winter troll fishery CPUEs, if the department projects that the king salmon sport harvest allocation is going to be exceeded, the department shall, by emergency order, adjust the nonresident seasons and bag limits so that there are no closures for residents;

(7) any projected unused balance in sport allocation will transfer to the troll fishery at a date determined by the department [PROVIDE STABILITY TO THE SPORT FISHERY BY ELIMINATING INSEASON REGULATORY CHANGES, EXCEPT THOSE NECESSARY FOR CONSERVATION PURPOSES].

(c) When the Southeast Alaska winter troll fishery CPUE is equal to or greater than 20.5, which is equivalent to a king salmon abundance index greater than 2.2, the sport fishery harvest limit will be 69,000 treaty king salmon, and the commissioner may, by emergency order, implement the following management measures:

(1) a resident bag limit of three king salmon, 28 inches or greater in length;

(2) a nonresident bag limit of [TWO KING SALMON IN MAY AND] one king salmon [IN OTHER MONTHS]; a nonresident annual limit of **three** [FIVE] king salmon, 28 inches or greater in length;

(3) from October 1 through March 31, a sport fish angler may use two rods when fishing for king salmon; a person using two rods under this paragraph may only retain salmon.

(d) When the Southeast Alaska winter troll fishery CPUE is less than 20.5 and equal to or greater than 8.7, which is equivalent to a king salmon abundance index of less than or equal to 2.2 and greater than 1.8, the sport fishery harvest limit will be 61,900 treaty king salmon, and the commissioner may, by emergency order, implement the following management measures:

(1) a resident bag limit of three king salmon, 28 inches or greater in length;

(2) a nonresident bag limit of one king salmon; a nonresident annual limit of **three** [FOUR] king salmon, 28 inches or greater in length;

(3) from October 1 through March 31, a sport fish angler may use two rods when fishing for king salmon; a person using two rods under this paragraph may only retain salmon.

(e) When the Southeast Alaska winter troll fishery CPUE is less than 8.7 and equal to or greater than 6.0, which is equivalent to a king salmon abundance index less than or equal to 1.8 and greater than 1.5, the sport fishery harvest limit will be 49,300 treaty king salmon, and the commissioner may, by emergency order, implement the following management measures:

(1) a resident bag limit of two king salmon, 28 inches or greater in length;

(2) a nonresident bag limit of one king salmon; a nonresident annual limit of three king salmon, 28 inches or greater in length;

(3) from October 1 through March 31, a resident sport fish angler may use two rods when fishing for king salmon; a person using two rods under this paragraph may only retain salmon.

(f) When the Southeast Alaska winter troll fishery CPUE is less than 6.0 and equal to or greater than 3.8, which is equivalent to a king salmon abundance index of less than or equal to 1.5 and greater than 1.2, the sport fishery harvest limit will be 37,900[37,900] treaty king salmon, and the commissioner may, by emergency order, implement the following management measures [IN CONJUNCTION WITH WILD STOCK MANAGEMENT MEASURES]:

(1) a **resident** bag limit of **two** [ONE] king salmon, 28 inches or greater in length;
