Troll fleet capacity to fish 2 extra lines for chums

Sitka has the largest harbor system and largest troll fleet in AK. Walking through the harbors, with few exceptions, it appears that nearly every troller, regardless of its size, has the ability to run 2 extra lines. This is due to the fact that nearly our whole troll fleet has a set of 3 spool troll gurdies for a total of 6 spools. These 3 spool power troll gurdies were designed nearly 100 years ago for vessels of all sizes to utilize the use of 6 line fishing if allowed.

Examples

My vessel:

3 spool gurdies, one set on each side of the boat

A vessel across from mine with 3 spool gurdies:

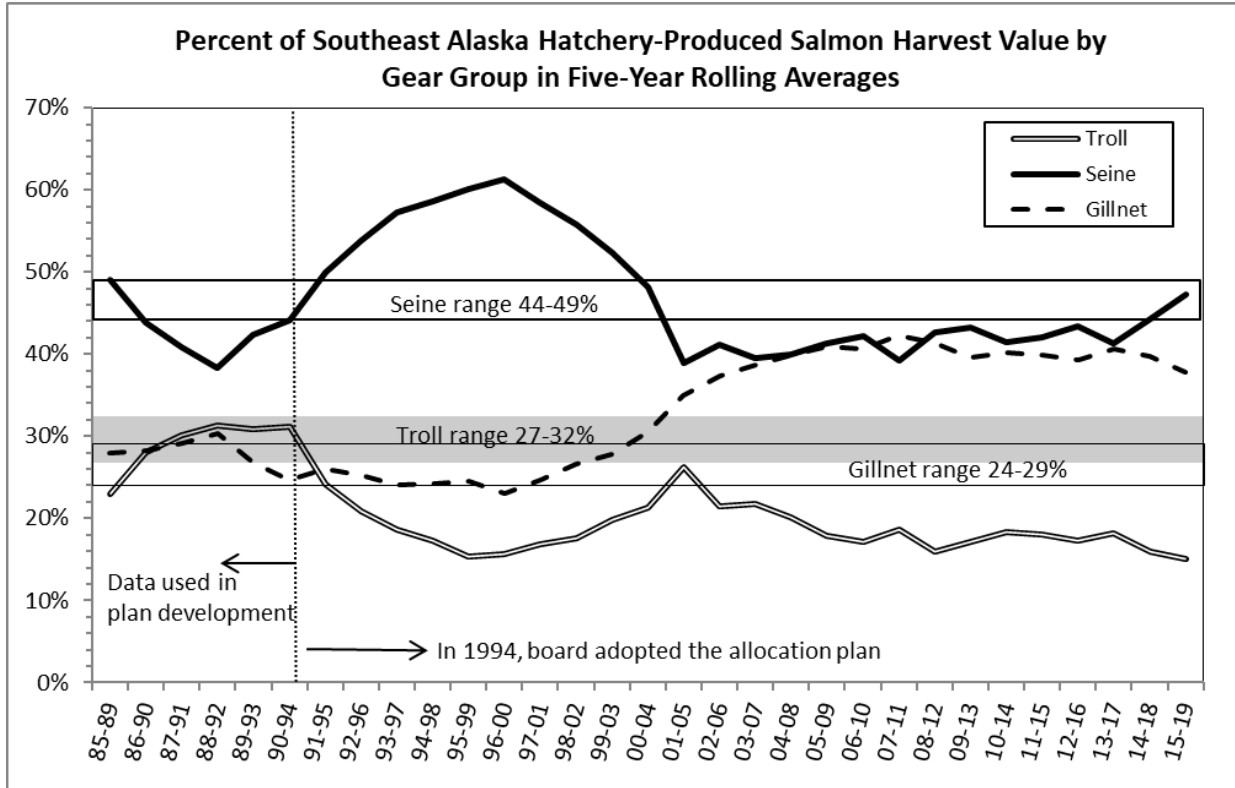

Another smaller vessel with 3 spool gurdies:

A 35ft troll vessel with 3 spool gurdies:
